# Electricity Needs You

## I Will Train You At Home

Stop right here. This is YOUR opportunity! Electricity is calling you, and the Electrical Business is in for a tremendous increase. But it needs more trained men—at big pay. By my **Home Study Course** in **Practical** Electricity I can train you for these positions.

## FREE!

### BIG ELECTRICAL OUTFIT

A fine outfit of Electrical Tools, Instruments, Materials, etc., absolutely FREE to every student. I will also send you FREE and fully prepaid—Proof Lessons to show you how easily you can learn Electricity and enter this splendid profession by my new, revised and original system of Training by Mail.

## Radio Course FREE!

Special newly-written wireless course, worth $45.00, given away **free. Full particulars when you mail coupon at right.**

### Earn Money While Learning

Early in my **Home Study Course** I show you how to begin making money in Electricity, and help you get started. No need to wait until the whole course is completed.

### EARN $70 TO $200 A WEEK

You've always had a liking for Electricity and a hankering to do electrical jobs. Now is the time to develop that talent; there's big money in it. Even if you don't know anything at all about electricity you can quickly grasp it by my up-to-date, practical method of teaching. You will find it intensely interesting and highly profitable. I've trained and started hundreds of men in the Electrical Business, men who have made big successes. YOU CAN ALSO

### Be a Big-Paid ELECTRICAL EXPERT

What are you doing to prepare yourself for a real success? At the rate you are going where will you be in ten years from now? Have you the specialized training that will put you on the road to success? Have you ambition enough to **prepare** for success, and get it?

You have the ambition and I will give you the training, so **get busy.** I am offering you **success** and all that goes with it. Will you take it? I'll make you an ELECTRICAL EXPERT. I will train you as you should be trained. I will give you the benefit of my advice and 20 years of engineering experience and help you in every way to the biggest, possible success.

**Valuable Book Free**

My book, "How to Become an Electrical Expert," has started many a man on the way to fortune. I will send a copy, free and prepaid, to every person answering this advertisement.

**ACT NOW!**

Good intentions never get you anywhere. It is action alone that counts. NOW IS THE TIME TO ACT.

# Millions Can Sell Goods — *but Don't Know It!*

**Through a vicious superstition thousands have been kept poor. They think Salesmanship is a gift, yet there is a remarkably easy method whereby men are being helped in one swift stride from monotonous routine to magnificent earnings in the selling field.**

***By* J. E. GREENSLADE**

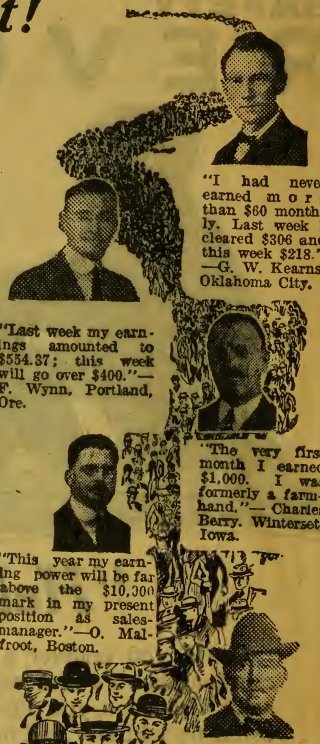
NO man knows better than I do the extent to which the superstition prevails that a salesman is "born" and not made. True enough, they are "born," but they are born babies and not salesmen.

This "born" idea is at once the most ridiculous and the worst of all superstitions. It is the most harmful of all because it **keeps thousands poor.** Because they **think** they are not endowed by nature to sell goods, they stay in a hopeless rut, despite the fact that they know that the selling field offers them unlimited opportunities for making big money. They know that the opportunities are ten to one in the selling field—that salesmen top the list of money makers—that the salesman is his own Boss—that his work is fascinating, interesting, and highly profitable — yet they pass up opportunity because of a vicious superstition.

Millions can sell goods but don't know it. You can—anyone of average intelligence can. And you can become a first class, money-making salesman in an amazingly easy way.

**J. E. GREENSLADE**

TO the average man the $10,000 a year job is only a dream. Yet to-day there are a surprising number of men earning five-figure salaries who were merely dreaming of them a short while ago. The secret of their success should prove a startling revelation to every ambitious man who has ever aspired to get into the $10,000 a year class. Let me show you how you too can step into the ranks of these big money-makers of business. At least, you can not afford not to investigate this great field and see what it offers you. It will only cost you a two-cent stamp, and the facts and proof you will receive will surprise you.



"I had never earned more than $60 monthly. Last week I cleared $306 and this week $218." —G. W. Kearns, Oklahoma City.

"Last week my earnings amounted to $554.37; this week will go over $400."—F. Wynn, Portland, Ore.

"The very first month I earned $1,000. I was formerly a farmhand."—Charles Berry, Winterset, Iowa.

"This year my earning power will be far above the $10,000 mark in my present position as sales-manager."—O. Malfroot, Boston.

"After ten years in the railway mail service, I decided to make a change. My earnings during the past thirty days were more than $1,000." — W. Hartle, Chicago, Ill.

## Proof That Salesmen Are Made—Not "Born"

You might laugh if I told you that in a few weeks or months you could be making good in a big way in the selling field. Thousands before you have laughed —perhaps bitterly—at the idea, but many of these thousands are now making big money as salesmen.

Five men who once thought salesmen were "born," who did not believe they were "cut out for selling," tell you on this page how they quickly shattered the superstition—and what the results were.

Thousands of men like these five—men who had never sold a dime's worth of goods in their lives—men who formerly thought salesmen were "born," are now enjoying magnificent earnings in the selling field. Formerly they were bookkeepers, mechanics, farmers, clerks—even doctors, lawyers, and ministers—but in a few months after writing to the National Salesmen's Training Association they were out in the field selling — and making more money than they had ever hoped to make in their former vocations.

Sounds remarkable, doesn't it? **Yet there is nothing remarkable about it.** Salesmanship is governed by rules and laws. There is a certain way of saying and doing things, a certain way of approaching a prospect to get his undivided attention, certain ways to overcome objections, batter down prejudice, overcome competition, and make the prospect act.

Just as you learned the alphabet, so you can learn Salesmanship. And through the NATIONAL DEMONSTRATION METHOD—an exclusive feature of the N. S. T. A. System of Salesmanship Training—you can gain actual experience while studying in your home or elsewhere.

That NATIONAL DEMONSTRATION METHOD gives you experience and knowledge that will enable you to overcome sales obstacles of all descriptions—easily. It is one of the reasons why N. S. T. A. members make good as salesmen right from the start.

### A Lifetime of Selling Experience in a Few Weeks—Then Success

No matter how bad that vicious old superstition may have you in its grasp, I can prove to you that it is superstition and nothing else. I can prove to you that you can gain years of selling experience in a few weeks—that you can go out and successfully sell goods—that you can make more money than you ever dreamed possible.

The N. S. T. A. System of Salesmanship Training and Employment Service will enable you to quickly step into the ranks of successful salesmen—will give you a big advantage over those who lack this training. It will enable you to jump from small pay to a real man's income.

## Remarkable Book, "Modern Salesmanship," SENT FREE

With my compliments I want to send you a most remarkable book, "Modern Salesmanship." It will not only shatter the vicious superstition about "born" salesmen, but will portray to you the wonderful opportunities in the selling field for you. It will show you how you can easily become a Master Salesman—a big money maker, how the N. S. T. A. System of Salesmanship Training through the NATIONAL DEMONSTRATION METHOD will give you years of selling experience in a few weeks; how our FREE Employment Service will help select and secure a good selling position when you are qualified and ready. And it will give you success stories of men—once victims of that superstition—who are now earning amazing salaries as salesmen. Mail the coupon today for the interesting FREE Book. **It may be the turning point in your life.**

# Be a Traffic Manager

Over a half million shippers need men who know how to route shipments, obtain shortest mileage and quickest deliveries; how to classify goods and obtain lowest rates. These are two vital factors in business competition. The man who can classify commodities and figure routings most economically can name practically his own salary. Concerns gladly pay competent traffic men

## $50 to $200 a Week

Many pay a great deal more, because the knowledge of a trained Traffic Expert saves them many times his salary. Train to enter this new profession. Positions are permanent; work is pleasant; salary is large.

### Train by Mail

in your **spare time—at home**—while holding your present position. The LaSalle Course is endorsed by railroads and big concerns everywhere. Covers thoroughly every phase of shipping and transportation. Write at once for our Free Traffic Book and full details. The coupon will bring them without obligation.

**Easy to Get a Government Position Like This**

"To-day received notice from the Superintendent of the 9th Railway Mail Division asking if I would accept position. You can bet I didn't hesitate long to say 'Yes.'

"You may be sure that I cannot too highly endorse your methods of coaching and I will gladly recommend your School without hesitation."

Frank H. Brownyard,
75 Pearl Street,
Rochester, N. Y.

EVERYWHERE throughout the country the U. S. Government Civil Service needs men to fill splendid positions. Liberal salaries are offered, with big chances for advancement.

Choose the kind of work you like best among the different branches of the service; enjoy all the special advantages of working for Uncle Sam—the steadiest, most dependable "boss" in the world. There are no hard times in the Government service—no layoffs, no salary cuts, no strikes, no discharges for personal, religious or political reasons. Get a job you can be sure of; give yourself and your family the protection of certain, continuous pay all the year round.

## Earn $120 to $190 a Month

From the very first day you enter the Civil Service you receive a good salary—$120 to $190 a month—and you are in line for advancement to positions paying $3,000 to $10,000 a year. And besides its good salaries, the Civil Service offers you advantages to be found in no other field of work. Hours are easy—eight or less a day. You get a vacation every year with full pay. There are positions in your home town, in Washington, at the Panama Canal, or travel if you desire.

If you are an American citizen, 18 years old or more, with an ordinary 4th grade education, you are eligible for a Government position. It is easy to pass the Civil Service Examination as soon as you are prepared to answer the kind of questions asked.

In just a little spare time at home you can prepare, under the personal coaching of Arthur R. Patterson, Principal of the Patterson Civil Service School and for years a Civil Service Examiner. Mr. Patterson, therefore, is in the best possible position to help you to the Government position you want. In fact, Mr. Patterson is so sure of your success under his coaching that he GUARANTEES to coach you until you actually get a position.

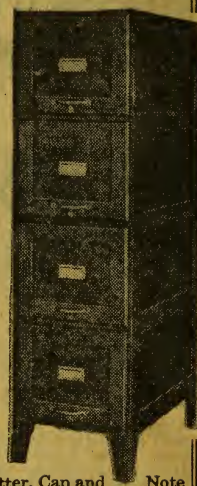
# Let us send you FREE Catalog of Weis Office Equipment

## Filing Supplies and Sectional Bookcases

## This Low Priced Letter File

Is the result of a desire to produce a paneled side, flat top, vertical filing cabinet that can be sold at a popular price and at the same time embody a method of construction that guarantees long life and satisfaction for the product. Made in two, three and four drawer heights in both Letter and Legal Cap widths. Drawers operate easily on hard fibre rollers; will not pull out accidentally but can be readily removed from frame by slight upward tilt. Each cabinet is complete—not sectional—and is made from best grade of well seasoned, kiln dried lumber. Golden or Natural Oak finish. Birch Mahogany 10% extra.

**$20** (See Note)

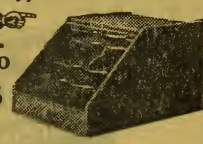


## Weis Sectional Card Index Cabinets

Logical equipment for a card file subject to expansion. The top section can be used as a regular two drawer file, capable of holding more than 2500 cards and necessary guides, then Bottom sections can be added as needs require. Made in 3x5,4x6,5x8,8x5 and 6x9 card sizes also 4x9 check size. Golden or Natural Quartered Oak or Birch Mahogany finishes. For a card file not liable to expansion and requiring less than 1400 cards and guides use the Weis Single Drawer Card Index Cabinets. Catalog tells all.

## Weis Stationery Cabinets

No. 140 **$6**

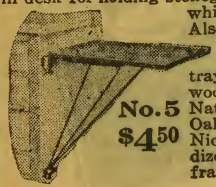


Are money earners because they are stationery savers. Have compartments for Letter, Cap and Note size papers, long and short envelopes and drawer for carbon papers, etc. Golden or Natural Oak or Birch Mahogany. No. 140 with drop lid $6.00. No. 150 with open vertical front $5.00.

## Weis Swinging Stand

Attached to desk provides additional working space. Much more practical than slide shelf in desk for holding stenographers' note book while taking dictation. Also handy for holding dictionary, typewriter, card index tray, etc. The 14"x18" wood tops in Golden, Natural or Weathered Oak or Birch Mahogany. Nickel plated or Oxidized copper metal frame 50 cents extra.

**No. 5 $4.50**



## Weis Legal Blank Cabinet

Contains six drawers as shown in illustration, each 1⅛" high, 8⅝" wide, 14¼" long. Cabinet outside is 10¼" high, 10" wide, 15½" deep. Made in Golden or Natural Plain Oak or Birch Mahogany. Also made with full length horizontal partitions and without drawers. No. 814 $8.00

## Weis Sectional Bookcases

Are the ideal book storage equipment for school, office or home. The sectional construction provides a method for taking care of your present as well as future requirements. You can start with one top, section and base and add other sections as needs demand. Made of very best grade of Plain and Quartered Oak, any standard finish, also in the red or brown Birch and Genuine Mahogany. A catalog devoted exclusively to Bookcases, will be sent on request.

**Filing Suggestions:** Heloful Booklet sent with Catalog. All that its name implies.

**Note:** Prices quoted in this ad apply in North, Central and Eastern States. Consistently low in South, Southwest and West.

**The Weis Manufacturing Co.** 150 Union St. **Monroe, Mich.** New York Office 52 Park Place

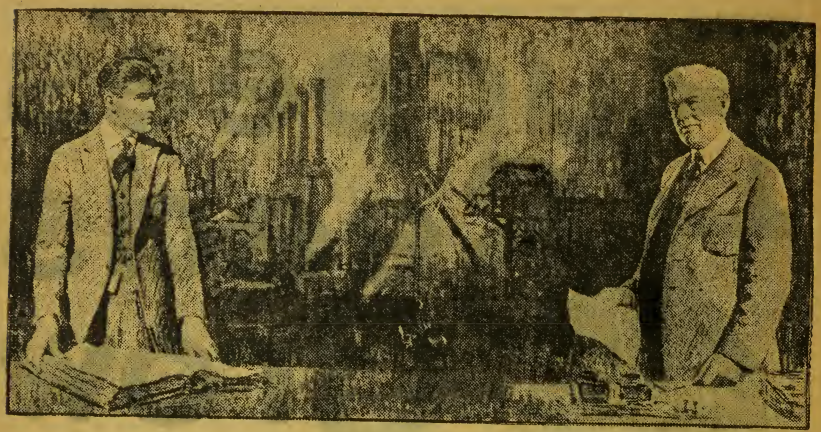
R.D. or STREET _____

POSTOFFICE _____ STATE _____



The youngest man enrolled yesterday is 22 and bookkeeper in a Trust Company

The oldest man enrolled yesterday is 60 and Treasurer of a successful corporation

# One is 22—the other 60

***Both Enrolled in the Alexander Hamilton Institute the Same Day***

IN salary, in age and income, there is a business man whose business situation is almost precisely like yours.

Yesterday that man enrolled for the Modern Business Course and Service of the Alexander Hamilton Institute; every day men like you are enrolling; and in that way are shortening their path to increased income and business success.

## A single day's enrolments

One day's mail brought in enrolments representing youth and middle age, and all degrees of position and salary. Glance at the two pictures at the top. One represents the youngest man enrolled that day in the Institute—alive, alert, twenty-two years old and determined to be *something* and *somewhere* at thirty.

The other is the oldest man enrolled that day—treasurer of a corporation, giving satisfaction to his directors but not satisfied with himself. He has determined to know the essentials of the *other* departments of business as well as his own.

That same day 611 men asked for fuller information about the Alexander Hamilton Institute by clipping a coupon like the one at the right. Can you afford to let these 611 men secure a business advantage

*Canadian address, C. P. R. Building, Toronto;*

*Copyright, 1923,*

over you? Isn't it worth while to make the little effort required to clip the coupon and get the facts?

### Just what will the Institute do for me?

This is what the Institute does! By texts and lectures prepared by business leaders, by practical business problems, and personal guidance it gives you the principles and practices of each department of modern business.

It takes the practical experience that you have in one department and adds to it the working knowledge of all the other departments to fit you, as an executive, to understand and direct the work of men in those departments.

Practical experience alone, taking you from one department to another, would give you that training *in years;* the Alexander Hamilton Institute offers it to you *in months.* And the record of the men it has enrolled is evidence that its training *does* train.

### You are paying whether you accept or not

The cost of the Modern Business Course and Service is a little investment in money and time. But think of the price which those men pay who do not secure business training.

Think of the years of routine progress or petty salary increases when the progress might be rapid and sure. Think of the opportunities that pass by because men have not the knowledge and self-confidence to reach out and grasp them.

Six hundred and eleven men wrote in one day for the facts. Will you invest a two-cent stamp in your future as these men did in theirs?

### Send for this book

All the facts about the Modern Business Course and Service and the answers to every question you are likely to ask are contained in a 118-page book, "Forging Ahead in Business." It is a valuable addition to any business library, yet you can read it in a single evening. A copy will reach you entirely without obligation on receipt of your name and address; merely fill in the coupon and mail.

# John Deere Special Factories Build Distinctive Implements

The House of Deere as it stands today is a great family of John Deere factories, each organized to a high point of practical efficiency to produce a certain group of farm implements for contribution to the John Deere Line.

**The JOHN DEERE Line of FARM IMPLEMENTS**

Steel Plows
Chilled Plows
Tractor Plows
Disc Harrows
Smoothing Harrows
Spring-Tooth Harrows
Grain Drills
Grain Seeders
Lime Sowers
Corn Planters
Cotton Planters
Beet Tools
Cultivators
Mowers
Sulky Rakes
Side Rakes
Hay Loaders
Stackers
Grain Binders
Corn Binders
Hay Presses
Manure Spreaders
Grain Elevators
Corn Shellers
Farm Wagons
Mountain Wagons
Trucks
Teaming Gears
"Waterloo Boy" Tractors
Gas and Kerosene Engines

It was to insure the permanency and merit of this Line that the John Deere family of factories was brought together under a permanent charter.

Around the great specialized factories which John Deere himself had founded and developed were gathered a number of other factories, each of which had pioneered in the production of some leading implement and stood pre-eminent in its particular line.

Each of these factories still operates under its policy of specialization. Each still produces the kind of tools that first made it famous. Each has connected with it men whose ingenuity, foresight and industry made it far-famed among dealers and farmers. Each preserves its old identity.

But each is dominated by the purpose that unites all—to maintain the premiership of the John Deere farm implement line.

All John Deere farm implements are made in John Deere factories owned by the John Deere Company. This arrangement insures and guarantees for every tool produced the superior quality that has marked John Deere farm tools for eighty-five years.

Write today for free booklets describing the John Deere implements in which you are interested.

# What One Editor Does With Fifteen Cents

**Washington, D. C. (Special).—One of the biggest achievements in the history of American journalism is that of the Pathfinder, now the most important weekly in the Nation's Capital. With less than 40,000 circulation a decade ago, it has now nearly 500,000. The editor ascribes most of this success to the fact that he lets people have the Pathfinder the first 13 weeks for 15 cents, an offer which has never been matched by a big weekly magazine.**

**The Pathfinder is chock full of just the kind of reading people want. It treats everything that happens in the world in a way that touches the spot. The Pathfinder is independent of all political, religious, capitalistic or "group" control. It is the Ford of American journalism.**

**Best serial and short stories you can find anywhere. Stunts, tricks and amusements for the children. Fashions and home helps. The Pathfinder Question Box service is a mine of information. Real fun; lots of it—Pathfinder jokes are famous.**

**The editor says it costs him a lot of money to send the 13 big weekly issues for 15 cents, but that it pays to invest in new friends. If you want the breeziest, cleanest, sanest, most entertaining weekly paper there is, send 15 cents to the Pathfinder, 600 Langdon Sta., Washington, D. C., and you will be delighted.**

# He Will Give You a Real Command of English

Your use of English proclaims you to the world. What you say tells what you are. Your language largely determines your place among successful men. The greater your vocabulary the greater your power of expression and influence upon your fellow men.

Commence now—let Grenville Kleiser teach you through his Mail Course in Practical English, how to

**Enlarge Your Stock of Words—**
**Use the Right Word in the Right Place—**
**Write Tactful, Forceful Letters, Advertisements, Stories, Sermons, etc.—**
**Earn Promotion and More Pay—**
**Become an Engaging Conversationalist—**
**Be a Man of Culture, Power and Influence in Your Community.**

It will take only some of your spare moments at home; no repellent grammar study; each lesson as clear as daylight; and inspiring to the highest degree. The average man of to-day can add largely to his efficiency, influence, and income if he will give a few minutes each day to Grenville Kleiser's fascinating Mail Course in Practical English. Many thousands have done so.

## BOOTH TARKINGTON

**Distinguished Novelist and Short-Story Writer, Author of "Monsieur Beaucaire," "Seventeen," "Penrod," etc.**

"Your course is almost painfully needed by many professional writers and speakers. A student who intelligently follows your course will know what he is talking about when he talks or when he writes. His audience will certainly know, because he will talk well, no matter what his subject."

## JOHN BURROUGHS

**Famous Naturalist and Writer, Said:**

"I see valuable and helpful hints in these lessons. Any young man or woman who has an undeveloped literary talent ought to profit greatly by this course."

## FREE—"How to Become a Master of English."

This booklet is absolutely free. It teems with information on English, and Mr. Kleiser's new, common-sense method of teaching it. You will find it of great interest and value. Send the coupon and get it free. No agent will call upon you.

# 10 Days' Free Trial

# Guaranteed For 5 Years!

## $3 DOWN *Will Put An Underwood*

**YES** only $3 brings you this genuine Shipman-Ward Rebuilt Underwood direct from our factory. Then, only small monthly payments make it yours, or, if convenient, pay cash. Either way you get the world's standard typewriter, and at a big saving to you.

### Why Pay Rental?

Think of it! You pay only a little more each month than rental—and the machine is yours! We offer you the same three models of the Underwood Typewriter that are being made and sold by the Underwood Company today. The only difference is that Shipman-Ward machines are rebuilt like new by experts. You can't tell Shipman-Ward Rebuilts from brand new machines, either in appearance, durability, or quality of work.

## SHIPMAN-WARD MFG. CO.

### TYPEWRITER EMPORIUM

**"The Rebuilders of the Underwood"**

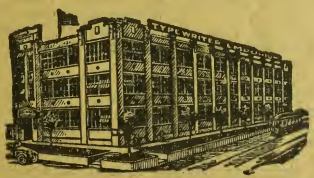
**Estab. 1892. 2991 Shipman Bldg., Ravenswood and Montrose Aves., Chicago**

Reproduced from an actual photo of a Shipman-Ward Rebuilt Underwood.

# *in Your Home!*

## Easy Payments

You pay only a little each month. The amounts are so conveniently small that the machine will be yours before you know it. All the time you are paying you will be profiting by the use of the machine. And the Underwood is rebuilt like new. Every typewriter is factory rebuilt by typewriter experts. An up-to-date machine with two-color ribbon, back spacer, stencil device, automatic ribbon reverse, tabulator, etc. In addition, we furnish FREE, waterproof cover and a special Touch Typewriter Instruction Book.



All shipments made direct to you from our big modern factory shown above—the largest typewriter rebuilding plant in the world.

## Mail the Coupon!

Remember, you don't even have to buy the machine until you have used it on 10 days' free trial, so that you can see for yourself how new it is and how well it writes. You must be satisfied or else the entire transaction will not cost you a single penny. So, mail the coupon to-day. Get all the facts—full details of this big offer. Act Now!

## FREE TRIAL COUPON

# "I Must Earn $200 Quickly" Said Mrs. Snow and SHE DID

Mrs. Frank Snow surveyed ruefully the list before her. She knew it by heart, had written it down a score of times, and each item seemed to grin and mock her as if to say, "Get me if you can."

Clothes for the children, $25; the insurance, $12.50; that long-past-due doctor's bill, a new davenport for the living room, that dress she needed so badly, shoes for Frank, and then there would have to be something to keep the family larder well-supplied when those visiting relations arrived. She added it up again—$198.50, and no less would do.

But how to get this money? She thought of working in an office for a while or clerking in a store, even sewing or housework would enable her to overcome this everlasting need of more money than Mr. Snow's slender earnings could supply.

Reluctantly she put aside each idea as impractical, for had she not the home and the children to look after? If only there was something she might do at home, piece-work sewing, for instance. But the nearest factory was miles away and, then again, they paid such small prices for the work.

Mrs. Snow was very nearly at her wit's end until one day she chanced to pick up a magazine, and there, before her eyes, seemed to be the very thing she was looking for, the Gearhart Plan of Home Knitting. She read of how she could knit famous Allwear Hosiery in the comfort and privacy of her own home, utilizing the spare time which every housekeeper finds each day. Or she could devote all her time, as she wished.

Mrs. Snow investigated and found the Gearhart Company to be a fine old concern with a reputation for doing exactly as they promise and thousands of satisfied women home knitters, and men, too, who had seized the *opportunity* Gearhart offered.

Like many another woman who has felt the urge of necessity, Mrs. Snow sent for a Gearhart Standard Knitter and the splendid 3-year work-contract sent with each machine. Soon she was turning her spare time into a tidy weekly income.

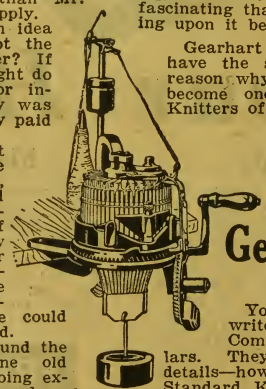
She was delighted with the ease and simplicity with which she was able to knit the loveliest hosiery, and still more delighted when the checks from the Gearhart Company began to arrive in ever increasing amounts. The liberal pay per dozen, just for knitting, urged her to greater efforts, as it seemed to her hardly more than a pleasant occupation, with none of the back-breaking, soul-rending strain of hard domestic labor.

## So *YOU* Can Succeed

Can you picture how delighted they were when the $200 was earned and the bills all paid? Can you picture the joy that you, too, would feel after you had accumulated the wherewithal to buy the hundred and one things every woman wants, to help tide the family over financial troubles or to lay away a nest egg for a rainy day?

Does this hypothetical case of Mrs. Snow mean anything to you? Are you in a position where it would be desirable to turn your spare time into dollars and cents? If so, here is the opportunity which perhaps you have been long awaiting, a home occupation so easy and fascinating that you will regret not coming upon it before.

Gearhart has the money, and YOU have the spare time. Is there any reason why you cannot get ready to become one of the Gearhart Home Knitters of Allwear Hosiery?



## Prompt Action Gets the Money

You are cordially invited to write at once to the Gearhart Company for free, full particulars. They will gladly explain the details—how you can get the Gearhart Standard Knitter, free yarn and full instructions how to knit Allwear Hosiery. You will learn of the liberal price they will pay you for your industry and all about the generous 3-year contract which you may also have.

Don't wait, write today. Delay may be dangerous to your opportunity. Can you, or any other woman who is really anxious to earn money at once in the privacy of her own home, afford to wait a single day? Write now for the Free Profit Guide Book, including samples of knitting and full particulars. Address the

**GEARHART KNITTING MACHINE COMPANY**

# Lowest Prices Ever Made on World's Best ROOFING Freight Paid

*"Reo" Metal Cluster Shingles*

*"Spanish" Metal Tile*

*Edwards Patent "Grip Lock"*

*Corrugated*

*Brick Siding*

We sell direct to you and save you all middlemen's profits. We ship everything—roofing, siding, ceiling, wallboards, etc.—freight prepaid. We cannot quote you our low factory prices here, but send for our Big Roofing Book and see for yourself that our prices are lowest ever quoted.

## "Reo" Metal Shingles

Have great durability. Many customers report 15 and 20 years service. Guaranteed fire and lightning proof. They save you money, give you better quality and lasting satisfaction.

## Edwards Exclusive Tightcote Process

makes Edwards Metal shingles, Metal Spanish Tile, Reo Cluster Shingles, Grip-Lock Roofing and other Roofings, Ceiling, Siding, etc., absolutely rust-proof. Not a pin point of space exposed to weather.

## Our Patent Interlocking Device

prevents warping, buckling or breaking. Protects nail holes—nails are driven through under layer; not exposed to weather. No special tools required. Easy to lay.

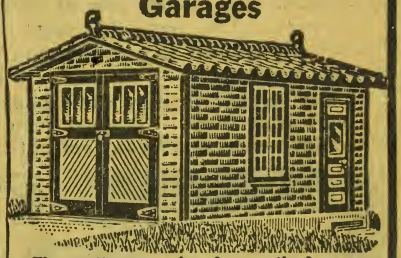
## The Galvanizing Test

Take any other galvanized steel—bend it back and forth, hammer it down. Great scales of galvanizing will flake off. Apply this test to Edwards Metal Roofing—you'll find no flaking. Edwards products are **superior**—yet sell for less than other materials.

**Samples FREE** Send coupon for World's Greatest Roofing Book and Free Samples. Book will convince you that we can save you a lot of money on any kind of roof you need, also on ceiling, siding, wallboard, etc. Fill out coupon and mail today. Ask for Book No. 95.

**THE EDWARDS MANUFACTURING COMPANY**
**45-95 PIKE STREET, CINCINNATI, OHIO**

## Special Bargains in Garages



The money you pay in a few months for garage rent buys an Edwards' Metal Garage. Gives you every convenience—no phoning or waiting for your car. Gives you every protection—against careless handling, mars, scratches—against fire, lightning, thieves, etc.

Write for Catalog showing all sizes, all styles—"Steelcote," "All Steel" or "Stucco-Steel," Plain Rock Faced, Brick or Stone, or Weatherboard Siding, Metal Spanish Tile or Metal Shingle Roof.

Edwards' Portable Garages pay for themselves in a few months. After that saves enough to pay upkeep of car. Find out. Write for Catalog.

**FREE Samples & Roofing Book**

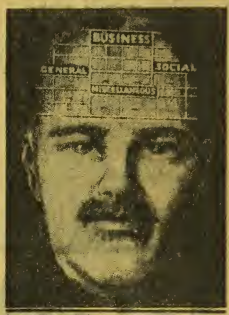
# Stop Forgetting!

The average mind resembles a scrap pile.

## Makes Your Mind a File— NOT A Pile



The Dickson Trained mind is as well ordered as a cross-indexed file.

IS your mind a scrap pile—filled with a lot of unindexed facts? When you want to remember a name, place or date, must you grope in vain to locate the information? Summoned to give facts and figures—does your mind become a blank? When called upon to speak—do you seek wildly to collect your thoughts—utter a few commonplace remarks — and sit down—humiliated? *Without Memory, all the knowledge in the world becomes worthless. "Stop Forgetting" makes your mind a file—not a pile.*

**Perfect Your Memory and Command What Salary You Will**

PROF. HENRY DICKSON, foremost authority on Memory Training and Principal Dickson Memory School.

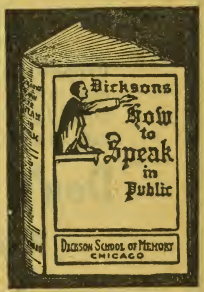
**I Can Make Your Mind as Systematic and Forget-Proof as a Card Index File**—master of its ramifications—instead of a victim of its disordered details. My course of Memory Training perfected by 20 years' experience, is recognized as the most thorough, practical, simple system of its kind. Thoroughly trains the memory. Develops concentration—overcomes self-consciousness, bashfulness—enables you to address an audience intelligently without notes.

### Dickson Memory Training Has Helped Thousands

Fill out and mail coupon or postal for statements from students who had poor memories and developed them to perfection—and men with good memories, who made them better. Give me 10 minutes daily, and I will make your mind a classified index from which you can instantly select facts, figures, names, faces.

**Special Offer on "How to Speak in Public"**

This de luxe, handsomely illustrated, $3 book free to everyone who enrolls. Will train you to think on your feet—express yourself clearly, convincingly, whether talking to one person or a thousand.



**Get My Book on "How to Remember"**

Send your name and address on coupon or postal. I will also send you a free copy of my unique copyrighted Memory Test.

PROF. HENRY DICKSON, Principal,
Dickson School of Memory,
Dept. 620, EVANSTON, ILL.

Send me your Free Book, "How to Remember," als particulars how to obtain a free copy of Dickson's "How to Speak in Public." also Copyrighted Memory and Concentration Test free.

TRAINING FOR HEAD AND HAND

GOVERNMENT statistics show nearly twelve million automobiles in the United States. Think what that means! Twelve million cars needing constant service; twelve million engines to adjust and repair; twelve million batteries requiring attention; twelve million starting, lighting and ignition systems to be kept in adjustment; fifty million tires to vulcanize and retread—and only fifty thousand garages to do the work. That's why thousands of trained men are needed. The demand exceeds the supply of competent men. Good pay awaits men who KNOW how to handle this work.

## Make $2,000 to $10,000 Yearly

Come to the Michigan State Auto School and get the necessary training. Fit yourself to fill one of these good jobs. Come to Detroit—the greatest Auto Centre of the world. Learn the Automobile Business right in the heart of the Auto Industry where 79% of the cars are made.

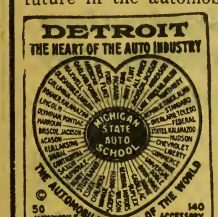
More than 18,000 M. S. A. S. graduates thruout world, making good in Auto business. Many of them in business for themselves. Edwards (Mich.) was offered $40.00 per week a few days after completing our Course; Nelson (N. Y.) took our Course when 17—now has five men working for him; Tirb (Mich.) gets $50.00 per week; Wolf (Iowa) making about $75.00 weekly in business of his own; Anderson (Minn.) made $300 per month in garage of his own. Hundreds more like these in our files showing what M. S. A. S. training does for our students.

**OUR COURSE COMPLETE—FACTORY ENDORSED.**

Every branch of auto business is taught—construction, operation, upkeep and repair of autos, trucks, tractors, farm lighting plants, and gas engines. We teach by actual practice on each machine. No guesswork. Students visit auto factories. Executives and service men helped outline our Courses and heartily endorse our School. M. S. A. S. training is complete, practical and profitable. IT PAYS TO LEARN THE M. S. A. S WAY.

**GOOD POSITIONS AWAIT OUR GRADUATES.**

Factories, garages and service stations continually call for M S. A. S. trained men. These positions pay good salaries and offer excellent opportunities for advancement, or to build a business of your own. More opportunities for trained men in Detroit and elsewhere than we can fill. Let the M. S. A. S. fit you for a wonderful future in the automobile business.



**MONEY BACK GUARANTEE.**

We guarantee that a graduate of our Automobile and Tractor Course will be qualified to fill a position as assembler, demonstrator, tester, repair man, auto electrician, chauffeur, tractor operator, or farm lighting expert, or we will refund his tuition fee. Make up your mind to succeed. Get into the Auto Business where opportunity awaits you. Learn the business right—and learn in Detroit, the Auto Centre, at the M. S. A. S.—the Factory Endorsed School. Be a go-getter. Train for success. Let us help you. Write to-day. Fill out and mail coupon now.

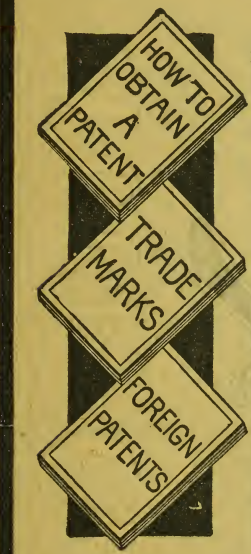
# PATENTS TRADE-MARKS AND COPYRIGHTS

## Special Offer—Free Opinion as to Patentable Nature

Before disclosing an invention the inventor should write for our blank form **"Evidence of Conception."** This should be signed and witnessed and if returned to us together with model or sketch and description of the invention, we will give our opinion as to its patentable nature.

## *Our Three Books Mailed FREE to Inventors*



### OUR ILLUSTRATED GUIDE BOOK HOW TO OBTAIN A PATENT

Contains full instructions regarding Patents, Trade-Marks, Foreign Patents. Our Methods, Terms, and 100 Mechanical Movements illustrated and described. Articles on Patent Practice and Procedure, and Law Points for inventors.

### OUR TRADE-MARK BOOK

Shows the value and necessity of trade-mark protection and gives information regarding unfair competition.

### OUR FOREIGN BOOK

**We have direct agencies in foreign countries.** Write for our illustrated Guide Book on Foreign Patents.

### SPECIALIZATION—OUR STAFF

The field of invention is so vast that it is impossible for any one to become an expert in all the different classes of invention. Only those skilled in the class to which the invention relates are capable of rendering efficient service. For this reason Victor J. Evans & Co., employ a number of patent lawyers and mechanical experts who have been selected for their special knowledge and ability in certain lines of invention. Each case is placed in charge of experts in the classes to which the invention relates.

### THE VALUE OF YOUR PATENT

will depend much upon the skill and care with which your case is prepared and prosecuted in the United States Patent Office. We spare neither time nor pains to secure the broadest possible patents that the inventions will warrant. That every case intrusted to us receives our best efforts, and that our work is done consistently, skilfully and thoroughly is evidenced by the many unsolicited letters of commendation that we receive constantly from our clients. We will furnish upon request lists of clients from any State in the Union for whom we have secured patents.

### Our New York, Philadelphia, Pittsburgh, Chicago and San Francisco Offices

Owing to the growth of our business we have established for the benefit of our clients Branch Offices in New York City, Philadelphia, Pa., Pittsburgh, Pa., Chicago, Ill., and San Francisco, Cal. These branch offices being located in these large commercial cities, together with our Main Office located near U. S. Patent Office in Washington, enable us to more promptly handle the business of our clients, particularly as the branch offices are in constant touch with the Main Office and fully equipped to handle patent business in all its branches.

# TAKE YOUR CHOICE!

## Your Office Needs An ACME to Save Time and Labor

One pressure of the lever of Acme No. 2 and Midget punches, inserts the staples and binds your papers—certainly a tremendous saving of time and energy over all old-fashioned methods.

The Midget is a great deal better, safer and cheaper than any other method of binding and fastening papers, light fabrics, cloth, straw, braid or lace.

The Sure Shot is for all-around uses. In your file room it will keep clips and pins out of your files—and prove a convenience a hundred times a day for other purposes.

### OTHER ACMES FOR EVERY POSSIBLE PURPOSE

These are only three models of the standard Acme line. They are all automatic, self-feeding and clog-proof. Scientifically built to serve some particular purpose best. If these models do not fit your requirements, write us to-day. We do, or we can, make any kind of stapling machine to serve your purpose exactly, whatever it is. Ask any dealer about the Acme family

IT takes but a moment to mark the career of your choice, sign your name, clip out and mail this coupon. Yet that simple act has started more than two million men and women toward success.

In city, town and country all over the world, men are living contented lives in happy, prosperous homes—because they clipped this coupon.

In every line of business and industry, in shops, stores, offices, factories, in mines and on railroads, men are holding important positions and receiving splendid salaries—because they clipped this coupon.

Clerks have become sales, advertising and business managers, mechanics have become foremen, superintendents and engineers, carpenters have become architects and contractors, men and boys have risen from nothing to places of responsibility —because they clipped this coupon.

You have seen it in almost every magazine you have looked at for years. And while you have been passing it by, more than ten thousand men and women each month have been making it the first stepping stone to real success in life.

Will you still turn away from Opportunity? Can you still go on, putting in your days at the same grind, getting the same pay envelope with the same insufficient sum, when such a little thing can be the means of changing your whole life?

You *can* have the position you want in the work you like best, a salary that will give you and your family the home, the comforts, the little luxuries you would like them to have. No matter what your age, your occupation, your education, or your means —you can do it!

All we ask is the chance to prove it. That's fair, isn't it? Then mark and mail this coupon. There's no obligation and not a penny of cost. It's a little thing that takes but a moment, but it's the most important thing you can do today. Do it now!

# The Book That Has Shown Thousands The Way To Amazing Salary Increases.

TAKE this situation: A man who had worked all his life in a routine job at low pay suddenly surprises his friends by moving into a better neighborhood, taking a big house, buying a car and blossoming out as a well-to-do and influential citizen in his new community. What is the secret that he used? He knew that the biggest money in business is in Selling, and though he felt that he couldn't sell a thing, he suddenly learned the secrets that make Master Salesmen and then began to make big money.

For example: Charles Beery of Winterset, Iowa, stepped from $18 a week as a clerk to a position making him $1,000 the very first month. J. P. Overstreet of Dennison, Texas, read this amazing book, left a job on the Capitol Police Force at a salary of less than $1,000 a year and in six weeks earned $1,800. F. Wynn, Portland, Ore., an ex-service man, earned $554.37 in one week. Geo. W. Kearns of Oklahoma City found in this book a way to jump his earnings from $60.00 a month to $524.00 in two weeks, and C. W. Campbell learned from it how he could quit a clerking job on the railroad to earn $1,632 in thirty days.

## Your One Chance to Make the Biggest Money of Your Life

Not one of these men had ever sold a thing before—not a dime's worth. Yet every one of them through reading this book discovered an amazingly easy way to jump suddenly from low pay to extraordinary earnings in the selling field.

There are certain ways to approach different types of prospects to get their undivided attention — certain ways to stimulate keen interest—certain ways to overcome objections, batter down prejudices, outwit competition and make the prospects act.

## Simple As A B C

"Modern Salesmanship" tells exactly how the National Salesmen's Training Association will teach you these principles in your spare time at home.

As soon as you are qualified and ready the Association's Employment Service helps you to select and secure a selling position as city or travelling salesman.

## Free Book—Mail Coupon!

All of the amazing proof and many important features about Salesmanship are contained in our new salary raising book, "Modern Salesmanship." It is yours—FREE. Send the coupon for it to-day. It will show you how you can quickly become a Master Salesman—a big money maker. It will tell you about the National Salesmen's Training Association system of Salesmanship training—about the National Demonstration method that gives you actual experience while studying—and all about the amazing opportunities that await you in the selling field.

This may be the one big chance of your life to leave forever behind you the low pay of a routine job for a sudden, brilliant success at a big salary.

Is it worth 2c to find out? Then mail this coupon NOW.

**NATIONAL SALESMEN'S TRAINING ASSOCIATION**

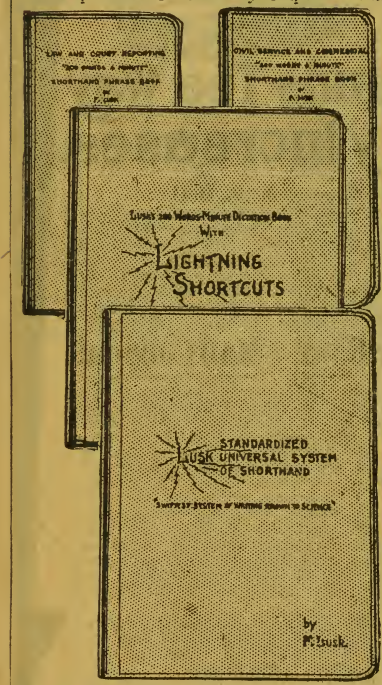
# Pitmanic Shorthand

practically the only system, and the standard used for VERBATIM REPORTING throughout the English Speaking World for nearly 80 years; used by reporters in Houses of Parliament, London; House of Representatives and U. S. Senate (Chief of the Senate Reporters receiving $25,000 yearly; highest salary paid any stenographer in the world); used by every Court Reporter in New York City and by all Court Experts in every State in the Union; the high rate of speed necessary for such positions formerly required many years of practice; with the modern Lusk Method every stenographer now, in a few months, can take even faster than the swiftest speaker can articulate.



## NEW 1923 400 Word-a-Minute LUSK SHORTHAND

**Pitmanic now Marvelously and Scientifically Improved by the Lusk Standardized Universal. Called "Standardized Universal" because the Standard Pitman alphabet is used, and the expedients and shortcuts are used by 99% of the reporters of the world.**

**Greatest Improvement made in 40 years in phrasing and arrangement of text-books.**

**Twice as rapid as the Swiftest Pitmanic; four times as rapid as the Swiftest Non-Pitmanic ever devised.**

**A Lusk writer can record almost any sentence in the English language twice while a writer of the Swiftest Pitmanic is recording it once. Or FOUR TIMES while the Swiftest Non-Pitman writer is recording it ONCE.**

Lusk Stenographers can pass any Civil Service examination held, and, owing to their terrific speed, command twice or thrice the salary of ordinary stenographers.

Ordinary Shorthand Systems enable only two or three out of 10,000 stenographers to take over 100 Words-Minute (simple letters). With the Lusk Method, every stenographer can take over 200 Words-Minute on technical matter.

## Beginners' Courses

By the arrangement of these wonderful text books, beginners knowing absolutely nothing about shorthand are required to commence the dictation of letters at 100-words-minute in the briefest reporting style, after five lessons. By the marvelous Simplification of Pitmanic Shorthand, only one-third of the time is now required to obtain double the speed.

**Post-graduate Courses for Stenographers.** Pitman, Graham, Munson and all Pitmanic Writers are trained by the Lusk text-books to take 200 to 300 words-minute; 400 actually possible.

Books for Self-instruction on sale. Mail and personal courses for both beginners and advanced writers of any Standard System.

Stenographers unaware of the great improvement made in Shorthand the past year send for Demonstration and Specimens gratis.

# Lusk Institute Corporation

**Department E 229 W. 42 St., Selwyn Theatre Bldg., N.Y.**

# Could YOU Talk to These Men? Or Any One of Them?

Could you read one of their letters? They speak only their mother tongues—French, Italian, and Spanish. Yet in social circles and in business, when travelling and at home, here and abroad, there are countless opportunities for you to gain the strong friendship of these nationalities for your pleasure, profit, and personal advancement. What you most need is a knowledge of at least one of these foreign languages. And through our remarkable system of instruction—

# You can learn a new language as easily as a new tune

Only a trained musician can learn a tune without hearing it—by merely studying the printed notes. But almost any one can learn a tune by listening to it several times. It is the same with languages. The Rosenthal Language Phone Method enables any one to learn a foreign tongue as easily as a new tune. You merely put a Language Phone record on your phonograph and listen; then repeat the sentences aloud. In a surprisingly short time you are yourself actually speaking a foreign language and understanding what is said to you.

# LANGUAGE PHONE METHOD

**(Title Reg. U. S. Patent Office)**

## With Rosenthal's Practical Linguistry

The feature that makes this wonderful method so speedy, interesting, and correct is the set of Language Phone discs. These are records of the speech of a cultured native professor, speaking his mother-tongue. He talks of everyday matters, giving you hundreds of phrases, questions, and answers that you will have immediate and constant use for. You learn conversationally. No rules or decisions to be memorized, but perfect accent, pronunciation, and grammar assured.

# SPANISH—FRENCH—ITALIAN

You need give only a few minutes of spare time a day to study—in the privacy and comfort of your own home. Select your own time—when you are in the mood. No arbitrary lesson-hour or waiting teacher to consider.

Whether you are an employer or employee, man or woman, boy or girl, clerk, executive, salesman, manufacturer, wholesaler, retailer, lawyer, doctor, minister, teacher, author, artist, actor, musician—familiarity with another language will add to your success—as it has done in thousands of cases. Hundreds and hundreds of owners of Rosenthal Language Phone outfits, in all these professions, have written us enthusiastic letters about their interest and pleasure in this fascinating study; and of the great benefit it has been to them—enlarging their business or winning promotion and bigger salaries.

## FREE A 64-Page Book That Tells You

How to Increase Your Income; How to Acquire Quickly Conversational Fluency in a Foreign Tongue; How to Increase Your Influence—in the office, the club, the drawing-room.

# "I'm After That Raise in Pay!"

"A few years from now I want to be making at least five thousand a year—that's why I'm spending two or three evenings a week here at home. I'm tired of being a business nobody, Jack, and I've made up my mind to stick to this game until I put it over big."

Real stuff in that young man—and the wonderful thing about it is that it's a mighty *interesting* game he's playing.

You see, by the LaSalle Problem Method you don't just *read* how to do a thing, you *do* it. You are shown the *principles* that govern a situation; then under the direction of some of the ablest business men in their respective fields you work out *everyday business problems*—just the problems you will meet on the bigger job.

*That* kind of training, you'll agree, is *practical*. It explains why during only three months' time 1,089 LaSalle members reported salary increases totaling $889,713 *an average increase per man of 56 per cent.*

What will *you* be doing with *your* spare time in the coming months? First thing to do, we should say, would be to *get the facts about LaSalle training.*

The coupon below will bring them to you without obligation, together with details of our convenient payment plan; also your copy of "Ten Years' Promotion in One," a book that has proved the inspiration of thousands of ambitious men. "Get this book," said a prominent Chicago executive, "even if you have to pay five dollars for it." We will send it *free.*

A stroke or two of the pencil, a letter dropped in the mail box and you have made your start on the road to bigger things. Make that start TODAY.

*INQUIRY COUPON*

# He Starts at $5,200 a Year

One hundred dollars a week! And only a few years ago his weekly wage was less than $30. Didn't dream he could do it when he first took up the study of Higher Accounting under the LaSalle Problem Method; but he just couldn't *help* getting ahead—so he wrote—because he found it the most interesting thing he ever tackled.

Knew nothing about bookkeeping, but LaSalle quickly gave him the necessary foundation. Then, step by step, he was trained in the practical work of Cost Accounting, Auditing, Business Law, Organization, Management, Finance, Income Tax Procedure—*not* theoretically, mind you, but by the solving of actual problems lifted bodily from business life. As a result, he sits as Auditor at a big mahogany desk and commands a salary of $5,200 a year.

## *Unusual Opportunities in Accounting*

Typical, this man's experience, of that of thousands of ambitious men who have found their path to success in the LaSalle Problem Method. Never in the history of business has the need for trained accountants been so great or the rewards so attractive. The files of LaSalle Extension University contain literally thousands of letters reporting rapid advancement—incomes doubled, tripled and quadrupled as the result of home-study training. During three months' time, 1,089 LaSalle members wrote to the University telling of the "raises" they had got as a result of their training. *The average increase per man was 56 per cent.*

These men were not unusual; they had no "pull" or "luck"; they got their start by signing just such a little coupon as appears directly below this text. Mark the coupon, sign and mail today—*and get the facts.* We will promptly send you complete information regarding the training you are interested in; also a copy of that inspiring book, "Ten Years' Promotion in One." "Get this book," said a prominent Chicago executive, "even if you have to pay five dollars for it." We will send it *free.*

Remember, the cost of LaSalle training is small and can be covered in easy monthly payments, if you so desire. The *decision* that you make this moment is *important.* Mail the Coupon *now.*

# How Much Do You Really *Know* About Selling?

Whether or not you have ever sold goods, you have long since discovered that the big money in business is in the *selling* end.

You have seen hundreds of men of no unusual ability jump their earnings to better than a hundred dollars a week. You know that it is no unusual thing for a man who really *knows* the finer strategy of selling to land a contract running into the hundreds of thousands of dollars a year. You know that a deal of this sort means in a single commission more money than the average man on the inside makes in a year.

Perhaps you have thought that the man who lands such a contract is a superman.

That is not true—neither was he born with a "gift for selling."

He holds the right of way to big success and tremendous earnings for one reason and one reason only—he has mastered the principles of *salesmanship*.

And you, just as well as he, can *learn* those principles and go out and increase your income in a way that will actually amaze you.

## *Your Opportunity to Master Salesmanship*

For twelve years LaSalle Extension University has been gathering and analyzing the selling methods used by the ablest salesmen in America. Some of the most aggressive sales organizations in the country have generously turned over to LaSalle their complete procedure in the field—have thrown back the curtains and revealed in detail the scientific selling methods responsible for their success.

All this material LaSalle has organized into a practical hard-hitting course in SALESMANSHIP. Untried theory has been eliminated. From start to finish it sets forth the straight-from-the-shoulder methods used by America's star salesmen—illustrates these methods by countless examples taken from actual experience.

## *Mail the Coupon*

If you are in any phase of business whatsoever, you need a thoro training in salesmanship—the best you can obtain. Your very living depends to great extent upon your ability to *sell*.

We have prepared an interesting booklet entitled "Modern Salesmanship," telling just how you can get this training in your spare time—by the famous LaSalle Problem Method. It contains also a wealth of information that should have a tremendous bearing upon your future. We recommend that you send for this booklet TODAY. The coupon will bring it to you without obligation.

# *It Pays to Read*

# LAW

**THE READING OF LAW** has brought swift, sure success to thousands of men who without the benefit of this specialized knowledge would probably never have progressed beyond ordinary achievement. A practical working knowledge of LAW is a short cut to personal power in every walk of life.

**LAW** is a factor of prime importance in every business. To-day's conditions, involving a mass of statutes, decisions, rulings—changes from old precedents—new interpretations of commercial law—all make the legal expert of vital importance, a positive necessity in every large business house. Never before were prospects so bright for men who can answer the puzzling legal questions which come up daily in business. Important positions carrying executive responsibilities with large salaries are always seeking legal experts.

**LAW** training often leads to a big executive position, because it enables a man to dictate policies that are legally sound—to make quick, correct decisions on intricate points, puzzling to the untrained man. Every large corporation has a well equipped legal department, and smaller concerns have their retained legal advisers. The presidents of many corporations (for example: Pullman Co., American Sugar Refining Co., National Biscuit Co., etc.) are law-trained men.

**LAW** is a stepping stone to personal prestige and social standing. The successful practising lawyer, or law-equipped business man, has open to him a prosperous career in a dignified, influential profession. No other profession opens up greater opportunities for rapid and profitable advancement. And never before has it been so easy to acquire a thoro law training of university grade as now.

## University Course by Mail

LaSalle Extension University's faculty of legal experts will train you thoroly in every phase of law. You will get instruction in the same subjects taught at leading resident universities. You will have text books, lectures, quizzes, illustrative cases, examinations, etc., prepared by leading law professors. You will be directed at every step, with every point clearly explained. Graduate with a degree of LL. B. All this training can be had at home—in spare time only. No need to leave your present position. Membership also includes general consulting privileges with all departments of the university—a service not offered by any other institution.

## Convenient Tuition Terms

The LaSalle course and this direct personal instruction and business consulting service is offered at a cost within reach of even the man of small income. Decide now to be a law-trained man. Get above the ranks where the pay is small and competition intense—increase your income by increasing your mental capacity.

**WRITE**—Just mail the coupon and we will send full information about the LaSalle Home Study Course in Law and about our Free Consulting Service. We will also send you a copy of our famous book, "Ten Years' Promotion in One"—which tells how men with the aid of LaSalle training have gained in one year promotion which men without this training have not realized in ten. Send for your copy now.

# New Easy Way to Become An Artist

THIS wonderful new method makes it possible for *anyone* to learn Illustrating, Cartooning, or Commercial Art. Hundreds of our students are now making splendid incomes. And most of them never touched a drawing pencil before they studied with us.

The simplicity of this method will astound you. You will be amazed at your own rapid progress. You learn by mail—yet you receive personal instruction from one of America's foremost Commercial Artists. Get into this fascinating game, NOW. You can easily qualify. A few minutes' study each day is all that is needed.

## Crying Demand for Trained Artists

Newspapers, advertising agencies, magazines, business concerns—all are looking for men and women to handle their art work. There are hundreds of vacancies right this minute! A trained commercial artist can command almost any salary he wants. Cartoonists and designers are at a premium. Dozens of our students started work at a high salary. Many earn more than the cost of the course while they are learning! YOU—with a little spare time study in your own home—can easily and quickly get one of these big-paying artists' jobs.

## No Talent Needed

This amazing method has exploded the old idea that talent is an absolute necessity in art. Just as you have learned to write, this new method teaches you to draw. We start you with straight lines, then curves. Then you learn how to put them together. Now you begin making pictures. Shading, action, perspective, and all the rest follow in their right order until you are making pictures that bring you from $50 to $500 or more! Some artists get as high as $1,000 for a single drawing!

## Write for Interesting Free Book

Mail coupon now for this interesting free book "How to Become an Artist." Explains about this amazing method in detail. Tells of our students—and their wonderful progress—and how we can qualify you for a high-salaried artist's position. Also tells of our free artist's outfit and special low offer to a limited number of new students. Mail coupon NOW!

# *We Teach* COMMERCIAL ART

## Consider this vital point *before* enrolling in any school

*—the Meyer Both College has 1114 students who previously have been enrolled in other art schools. Find one Meyer Both student who has ever changed from the Meyer Both College to any other art school.*

*The Meyer-Both College is the only art school operated directly in contact with and as a part of a great advertising art organization—its students are in continuous FIRST HAND touch with the pulse of the art field.*

Make sure the school you select is actually engaged in today's commercial art field—for commercial art and commercial art methods progress constantly. Make sure your contact will not be of the "proxy" or "canned" variety. Make sure of the experience and abilities of your actual instructors—and exactly how *practical* your instructions and criticisms will be. Make sure that you will be in direct touch with the faculty and personnel the school claims. Good instruction is necessary—but experienced criticism and good teaching are vital. In short make sure you will not only get what you pay for—but that you will get a foundation and co-operation that will fit you with earning power when you graduate.

The Meyer-Both College—as a department of the Meyer-Both Company (the largest Commercial Art organization in the world—who annually sell over ten thousand drawings to Advertisers in the U. S. and Canada) offers a training based upon their 20 years of success—and today's active leadership. We can refer you to merchants or newspapers in your own or nearby towns, who are *now using* our art work. Commercial Art is a highly paid, intensely, interesting vocation—equally open to men and women. The *right school* is vitally important if you would succeed. The Meyer-Both College has a definite sincerity of purpose. Our book "Your Opportunity," will be sent you for half the cost of the postage—4c in stamps. *You should read it carefully before you enroll in any school.*

**MEYER BOTH COLLEGE OF COMMERCIAL ART**

**Address Dept. 42 - - Chicago, Ill.**

# Don't tell me you never had a chance!

"Four years ago you and I worked at the same bench. We were *both* discontented. Remember the noon we saw the I. C. S. advertisement? That woke me up. I realized that to get ahead I needed special training, and I decided to let the I. C. S. help me. When I marked the coupon I asked you to sign with me. You said, 'Aw, forget it!'

"I made the most of my opportunity and have been climbing ever since. You had the same chance I had, but you turned it down. No, Jim, you can't expect more money until you've trained yourself to handle bigger work."

There are lots of "Jims" in the world—in stores, factories, offices, everywhere. Are *you* one of them? Wake up! Every time you see an I. C. S. coupon your chance is staring you in the face. Don't turn it down.

Right now, thousands of men are preparing themselves for bigger jobs and better pay through I. C. S. courses.

You can join them and get in line for promotion. Mark and mail the coupon, and find out how.

# Do You Make These Mistakes *in* ENGLISH?

**Does your English reveal your lack of education or does it prove that you are a person of culture and refinement? Are you handicapped in your speech and writing or does your command of English rise to meet every occasion and every situation? English is the one weapon you must use every day. Here is how you can improve it almost at once.**

MANY people say, "Did you hear from him to-day?" They should say, "Have you heard from him to-day?" Some people spell calendar "calender" or "calander." Still others say "between you and I," instead of "between you and me." It is astonishing how many people use "who" for "whom," and mispronounce the simplest words. Few people know whether to spell certain words with one or two "c's" or "m's" or "r's," or with "ie" or "ei," and when to use commas in order to make their meaning absolutely clear. And most people use only common words—colorless, flat, ordinary. Their speech and their letters are lifeless, monotonous, humdrum. Every time they talk or write they show themselves lacking in the essential points of English.

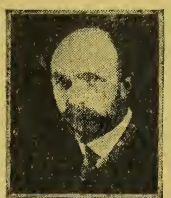
Every time you talk, every time you write, you show what you are. When you use the wrong word, when you mispronounce a word, when you punctuate incorrectly, when you use flat, ordinary words, you handicap yourself enormously. An unusual command of English enables you to present your ideas clearly, forcefully, convincingly. If your English is incorrect it hurts you more than you will ever know, for people are too polite to tell you about your mistakes.

## Wonderful New Invention

For the past five years Mr. Cody has been working almost day and night on the study of the problem, "How to make correct habits in speaking and writing stick in your mind." After countless experiments he finally invented a simple method by which you can acquire a better command of the English language in only 15 minutes a day. Now you can stop making the mistakes in English which have been hurting you. Mr. Cody's students have secured more improvement in five weeks than had previously been obtained by other pupils in two years!

## Learn by Habit—Not by Rules

Under old methods, rules are memorized, but correct habits are not formed. Finally the rules themselves are forgotten. The new Sherwin Cody method provides for the formation of correct habits by constantly calling attention only to the mistakes you make.



Sherwin Cody

One of the wonderful things about Mr. Cody's course is the speed with which these habit-forming practice drills can be carried out. You can write the answers to fifty questions in 15 minutes and correct your work in 5 minutes more. The drudgery and work of copying have been ended by Mr. Cody. You concentrate always on your mistakes until it becomes "second nature" to speak and write correctly.

## Write for Free Book

A booklet explaining Mr. Cody's remarkable course is ready. If you are ever embarrassed by mistakes in grammar, spelling, pronunciation, or punctuation, if you cannot instantly command the exact words with which to express your ideas, this book will prove a revelation to you.

Write for this new free book, "How to Speak and Write Masterly English." Merely mail the coupon or a letter, or even a postal card. You can never reach your greatest possibilities until you use correct English. Write to-day for the free booklet that tells about Mr. Cody's simple invention.

**Sherwin Cody School of English**

# *Why Some People Are Never At Ease Among Strangers*

PEOPLE of culture can be recognized at once. They are calm, well-poised. They have a certain dignity about them, a certain calm assurance which makes people respect them. It is because they know exactly what to do and say on every occasion that they are able to mingle with the most highly cultivated people and yet be entirely at ease.

But there are some people who are never at ease among strangers. Because they do not know the right thing to do at the right time, they are awkward, self-conscious. They are afraid to accept invitations because they do not know what to wear, how to acknowledge introductions, how to make people like them. They are timid in the presence of celebrated people because they do not know when to rise and when to remain seated, when to speak and when to remain silent, when to offer one's chair and when not to. They are always uncomfortable and embarrassed when they are in the company of cultured men and women.

It is only by knowing definitely, without the slightest doubt, what to do, say, write and wear on all occasions, under all conditions, that one is able to be dignified, charming and well-poised at all times.

## How Etiquette Gives Charm and Poise

Etiquette means good manners. It means knowing what to do at the right time, what to say at the right time. It consists of certain important little laws of good conduct that have been adopted by the best circles in Europe and America, and which serve as a barrier to keep the uncultured and ill-bred out of the circles where they would be uncomfortable and embarrassed.

People with good manners, therefore, are people whose poise and dignity impress you immediately with a certain awe, a certain respect. Etiquette makes them graceful, confident. It enables them to mingle with the most cultured people and be perfectly at ease. It takes away their self-consciousness, their timidity. By knowing what is expected of them, what is the correct thing to do and say, they become calm, dignified and well-poised—and they are welcomed and admired in the highest circles of business and society.

### Do You Know

**how** to introduce men and women correctly?
**how** to word invitations, announcements, acknowledgments?
**how** to register at a hotel?
**how** to take leave of the hostess after an entertainment?
**how** to plan home and church weddings?
**how** to use table silver in the proper way?
**how** to do all times, under all conditions, the cultured, correct thing?

## Here's the Way People Judge Us

Let us pretend that we are in the drawing room and the hostess is serving tea. Numerous little questions of conduct confront us. If we know what to do we are happy, at ease. But if we do not know the correct and cultured thing to do, we are ill at ease. We know we are betraying ourselves. We know that those who are with us can tell immediately, simply by watching us and talking to us, if we are not cultured.

For instance, one must know how to eat cake correctly. Should it be taken up in the fingers or eaten with a fork? Should the napkin be entirely unfolded or should the center crease be allowed to remain? May lump sugar be taken up with the fingers?

There are other problems, too—many of them. Should the man rise when he accepts a cup of tea from the hostess? Should he thank her? Who should be served first? Is it good form to accept a second cup? What is the secret of creating conversation and making people find you pleasant and agreeable?

It is so easy to commit embarrassing blunders, so easy to do what is wrong. But etiquette tells us just what is expected of us and guards us from all humiliation and discomfort.

## Etiquette in Public

Here are some questions which will help you find out just how much **you** know about the etiquette that must be observed among strangers. See how many of them you can answer:

When a man and woman enter the theatre together, who walks first down the aisle? When the usher points out the seats, does the man enter first or the woman?

There is nothing that so quickly reveals one's true station and breeding than awkward, poor manners at the table. Should the knife be held in the left hand or the right? Should olives be eaten with the finger or with a fork?

*Many embarrassing blunders can be made in a public restaurant. Should the young lady in the picture pick up the fork or leave it for the waiter to attend to? Or should one of the men pick it up?*

How is lettuce eaten? What is the correct and cultured way to eat corn on the cob? Are the finger-tips of both hands placed into the finger-bowl at once, or just one at a time?

When a man walks in the street with two women, does he walk between them or next to the curb? Who enters the street car first, the man or the woman? When does a man tip his hat? On what occasions is it considered bad form for him to pay a woman's fare? May a man on any occasion hold a woman's arm when they are walking together?

Some people learn all about etiquette and correct conduct by associating with cultured people and learning what to do and say at the expense of many embarrassing blunders. But most people are now learning quickly and easily through the famous Book of Etiquette— a splendid, carefully compiled authentic guide towards correct manners on all occasions.

## The Book of Etiquette

The Book of Etiquette makes it possible for you to do, say, write and wear what is absolutely correct and in accord with the best form on every occasion—whether you are to be bridesmaid at a wedding or usher at a friend's private theatre party. It covers every-day etiquette in all its phases. There are chapters on the etiquette of engagements, weddings, dances, parties and all social entertainments. There are interesting chapters on correspondence, invitations, calls and calling cards. New chapters on the etiquette in foreign countries have been added, and there are many helpful hints to the man or woman who travels.

With the Book of Etiquette to refer to, there can be no mistakes. no embarrassment. One knows exactly what is correct and what is incorrect. And by knowing so definitely that one is perfect in the art of etiquette, a confident poise is developed which enables one to appear in the most elaborate drawing-room, among the most brilliant and highly cultured people without feeling the least bit ill at ease.

### Send No Money

To enable every one, everywhere to examine the famous Book of Etiquette without obligation, we make this special offer to send the complete two-volume set free for 5 days to any one requesting it. Entirely free—no money in advance. All that is necessary is your name and address on the coupon below, and the Book of Etiquette will be sent to you at once at our expense. You have the privilege of examining it, reading it, and deciding for yourself whether or not you want to keep it.

Send for the Book of Etiquette to-day. Read some of the interesting chapters. Surprise your friends and acquaintances with your knowledge of what to do, say, write and wear on all occasions. And when you have been fully convinced that etiquette widens your circle of friends, makes you admired and respected, increases your knowledge of society and its requirements, gives you poise, self-confidence and charm—keep the set and send us $3.50 in full payment. But if you are not utterly delighted after the five-day free trial, simply return the books and you won't be out a cent.

The Book of Etiquette is published in handsome cloth binding, decorated in gold. Send for your set to-day. Just the coupon, remember—no money. But get your coupon off NOW. Nelson Doubleday, Inc., Dept. 8323, Garden City, N. Y.

**NELSON DOUBLEDAY, Inc.**
**Dept. 8323, Garden City, New York**

# I Want 235 Salesmen Who Want to Earn at Least $5000 a Year

**Mr. B. M. Oliver, President of the Oliver Oil-Gas Burner & Machine Company**

KNOWING that this publication is read by the progressive type of men, I take this means to "tell the world" that I want to get in touch with some live-wire fellows—I am not looking for supermen—just fellows who have confidence in themselves—and particularly the ones who want to make real money; say about $5,000 a year or more.

Right on my desk here I've got a letter from F. W. Bentley of Philadelphia, telling how he made $215 in one day—and one from A. M. Russell of Hartford, Conn., who made $660 in one month. I have scores of other similar letters in my files—from R. Berger of Ontario, who makes $250 a week; from J. Carnegey of South Dakota, telling how he is making $1,000 a month; from W. Drew of Michigan who makes $85 a day. There is no reason under the sun why you should not make a minimum of $100 a week right from the start.

I want you to be the representative of the famous OLIVER OIL-GAS BURNER—an invention that instantly turns any cook-stove, heating-stove or furnace into an oil-gas stove, giving an even oil-gas fire—an intense clean flame—in any stove or furnace at the turn of a valve, **with three times the heat of coal** and wood and none of the bother or dirt.

## Every Home Wants This New Invention

The Oliver Oil-Gas Burner does away with coal and wood. Banishes all worry about strikes, scarcity and high prices. Turns any range, furnace or stove into an oil-gas stove. 16 different models. Burns 5 per cent. kerosene (coal oil) and 95 per cent air. Think of the appeal you can make in every community. Cheaper than coal, wood or gas. Absolutely safe, and always dependable.

Does away with drudgery—no fires to make, no ashes, dirt, smoke, chopping, carying coal and wood. Easy to install.

Doesn't change stove. Protects health from exposure and uneven heat. Easy to demonstrate—slips in any stove in one minute. Show any woman what it will do and the sale is made.

### AND THE OLIVER IS AN ALL-SEASON SELLER

In Winter the Oliver gives three times the heat of coal or wood and does away with the worry about their exorbitant prices, poor quality, dirt and muss. In changeable Spring and Fall the Oliver also sells big because it offers immediate heat at turn of valve—without the need of keeping a fire going just to meet the needs of chilly days. In Summer the Oliver does away with the labor and drudgery of a sweltering kitchen.

No wonder the Oliver brings salesmen big profits in every season.

# This Proposition Brings Some Men $1,000 a Month

These men know a good thing when they see it and they know that the time is ripe for this new Oliver Improved Oil-Gas Burner. They know that this age of high-priced coal and wood makes it necessary for some substitute. They see ships and locomotives being run by oil, and big buildings being heated by it. And they know that an invention that makes effective use of this cheap fuel for every home is the thing they want to tie up to. You too can use this secret of big money. You do not need to be a high-powered salesman. The Oliver's amazing features sell it for you. When people see it they know at once that it is the thing they want. You will realize that this is a proposition that will pay you as big money as it does others. We have a definite number of open territories which we are ready to dispose of. Every territory allotted is filled with big-money opportunities. And this big money comes easily. Because not only does this invention practically sell itself on sight but when you have sold one this one will sell several others as soon as your customer's friends and neighbors see it. And thru our special plan you get credit and commissions for every sale in your territory.

### Coupon Brings Full Offer

Mail this coupon now for my offer. We are not making any extravagant claims about this. We do not have to. We believe that your common sense will indicate a good proposition to you when you know about it. We want to give you the facts. Won't you write us? And by doing so promptly you will be allotted an exclusive territory with private selling rights. **You can use either spare or full time. Many are making fine money in their spare moments.**

The coupon will bring you the facts and will save you writing a letter. But mail the coupon now.

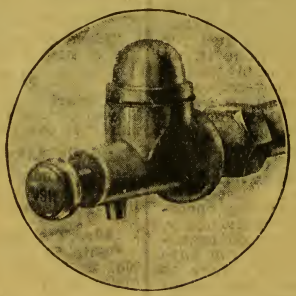
# WEST
# SOAPARATUS
## GRAVITY BATTERY TYPE

is the ultimate development in liquid soap dispensing systems for heavy service demands, where a large number of people must be supplied without interruption.

Pure, cocoanut oil liquid soap conveyed by gravity from a supply tank mounted on the wall, through a feed pipe extending the entire length of the row of washstands, to taps equipped with Soaparatus Valves, centred over each basin.

An exclusive feature of the Soaparatus Valve is the reservoir chamber, located in the dome, which controls the amount of soap delivered into the hand when the plunger is pushed. The reservoir is automatically refilled by the action of the plunger in resuming position.

*The Valve with the Dome*



*The Valve with the Dome*

The Soaparatus keeps pace with the latest developments in plumbing appliances and washroom appointments. Where absolutely sanitary conditions are required with a desire to create an atmosphere of tone, the Soaparatus becomes an essential feature, worthy of the high consideration it deserves.

That the Soaparatus assumes a place of deservedly high rank as an important modernizing factor in the up-to-date washroom is evidenced by the rapidity with which it has been adopted by most of the leading Hotels, Theatres, Banks, Office Buildings and Factories.

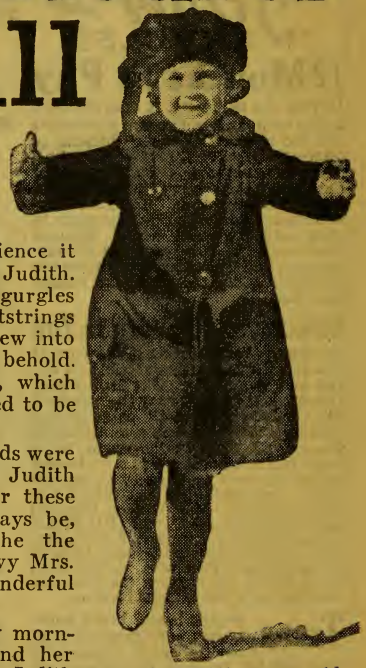
# The Child Who Won The Hearts of All

***A true life-story showing how a woman successfully dealt with the responsibilities of motherhood and brought up a child whom every one admired***



A BEAUTIFUL and wonderful experience it was to see the growing-up of little Judith. The pink, chubby tot with her gurgles and soft coos of delight tugged at the heartstrings of every one who saw her. As babyhood grew into girlhood, the blossoming forth was a joy to behold. All the lovable traits and good qualities, which parents hope their children will have, seemed to be combined in little Judith.

The joy of it all was that the mother's friends were as completely captivated by the charms of Judith as was the mother herself. For whenever these friends met their first remark would always be, "Have you seen Judith lately?—Isn't she the most adorable child!"—and "Oh, how I envy Mrs. Garrison!—A wonderful mother and a wonderful child!"

One bright, sunshiny day, while taking my morning walk in the park, I found Judith and her mother playing hide-and-seek. Judith's mother and I were old friends. We sat down on the grass together for a visit—and Judith played around.

Of course, we talked about the child, for I loved her almost as much as her mother did. As I watched this remarkable child playing I thought of the tremendous responsibility of the mother. I asked her how she had met it. And this is what she told me:

"When Judith was born, my first feeling was one of utter helplessness. I knew nothing about caring for a child. I was afraid—afraid that I might do the wrong thing. I wondered if other mothers had felt that same haunting fear for their child's welfare. And even though Judith thrived under my care, I never could quite shake off the feeling that I might do the wrong thing.

"Never shall I forget the day when my helplessness overwhelmed me completely. Judith was about 2½ years old—just old enough to begin to play, to notice things and to ask questions.

"I had corrected her for striking me in the face with a ball. Then I went to get the ball and had my back to her for a moment. As I turned around with the ball, I saw something that nearly broke my heart! There was Judith, in an attitude of defiance, making a face at me!

"For a moment I couldn't move nor speak. Was it possible that Judith didn't love me and had lost confidence in me?

"For days I struggled with the problem, haunted by the fear that my child didn't love me. Then I realized that something had to be done and done quickly. So I went to my friends and asked frankly for advice. If I had followed all that advice I shudder to think of what might have happened to Judith!

**Would You Like to Know How—**

- to obtain cheerful obedience always?
- to correct mistakes of early training?
- to keep child from crying?
- to suppress temper in children without punishment?
- to succeed with child of any age without display of authority?
- to discourage the "Why" habit in regard to commands?
- to prevent quarreling and fighting?
- to cure impertinence? Disrespect? Sauciness?
- to teach unselfishness? Carefulness? Fairness?
- to teach child self-control?
- to cure a child of the habit of whining?
- to keep a boy at home in the evening?
- to cure a child of saying, "I don't want to"?
- to teach a child to go willingly to bed?
- to treat a child who laughs at commands?
- to overcome obstinacy?
- to cultivate mental concentration?
- to teach honesty and truthfulness?

These are only a few of many questions explained in a way that makes application of the principles involved easy.

"By good fortune I learned of The Parents' Association, formed for the purpose of giving the very information I was seeking. I was astounded! They told me all the things I'd been puzzling over, and lots of surprising things I'd never even thought of.

"These revelations gave me a most wonderful feeling of confidence. I learned how to control Judith—to break naughty little habits just taking root, and to nourish the sweet ways which every one loved. And then—but there's no need to go into details, for you can see what it has done. I give The Parents' Association full credit."

The heart of every mother thrills with pride when she hears some whole-souled, notable man proudly stand up and say, as Lincoln said, "All that I am and that I hope to be I owe to my mother." Never was a greater truth uttered than this, for the course of one's whole life is shaped in childhood.

There is no greater responsibility in the world than that of being a parent. A child is what its parents make it. Heredity, environment and education all count, it's true. But all these points are as nothing compared with the right training in a child's tender and flexible years.

To love and cherish one's children is the joy of parenthood. But something more than love is due a child. And this is the right training—training that will not only give health and brightness, but will equip the child to become a power in the world.

The Parents' Association is an organization devoted to scientific child training which has over 30,000 members in twenty-one countries. It was founded by Ray C. Beery, A. B. M. A. (Harvard and Columbia), after years of scientific research and practical experience in child training. President Beery is regarded by those who know his work as one of the greatest authorities in child culture. No man has better knowledge of human nature or a more sympathetic understanding of children.

And now—through The Parents' Association—for the first time there is a scientific method in child training, founded on the principle that confidence is the basis of control. This new system shows you how in your own home to correct the **cause** of disobedience, wilfulness, untruthfulness and other dangerous habits which, if not properly remedied, lead to dire consequences. The trouble in most cases now is that children are punished or scolded for what they do. The new method **removes the cause**—*not* by punishment or scolding but by confidence and co-operation along lines which are amazingly easy for any parent to instantly apply. This new system, which has been put into the form of an illustrated Course, prepared especially for the busy parent, is producing remarkable and immediate results for the thousands of parents in all parts of the world. It is also **endorsed by leading educators.** It covers all ages from cradle to eighteen years. Through this course avenues of knowledge which will astound you are opened up. Things which have worried you will become as clear as day. You will be amazed at the tremendous possibilities of child training. And best of all you can get this vital information immediately. You will marvel at the remarkable and instant results.

For in these lessons you will find definite suggestions for securing results with children of all ages, from babyhood to maturity, as a glimpse at the contents will tell you. Here are a few of the subjects dealt with: Understanding your children; Fundamentals in child training; How to procure obedience; Common mistakes—how to avoid them; The right and wrong way of punishment; How to be a successful parent, etc., etc.

If your child disobeys, you can turn to these lessons and you will learn just how to secure willing and immediate obedience, for President Beery cites exactly the steps to take by telling just how other mothers have, through his methods, solved the very same problem.

And in the same way by actual illustrations he shows how to overcome, almost instantly, selfishness, boastfulness, shyness, cowardice, deceitfulness—all practically without punishing.

**FREE BOOK**

**"New Methods in Child Training"** is the title of a startling booklet which describes this new system and outlines the work of The Parents' Association. The coupon below will bring you this booklet—without cost or obligation.

Simply to send your request may mean so much to you in pointing the way to a new and wonderful success in training your children that you will be prompted to take advantage of this opportunity at once. Surely you owe it to your children's welfare and happiness to investigate, especially since there is no expense or obligation whatever involved. It is only a matter of sending the coupon or a post card. May we suggest that you do this now while the matter is before you?

# DRESSMAKING

## LEARN AT HOME NEW, EASY METHOD

BY a new, wonderfully simple and practical method, you can now learn right at home in spare time to make all your own and your children's clothes. You can save half or more of what you are now spending or you can have twice, yes, three times, as many garments for what your clothes now cost you.

Or you can prepare yourself to take up dressmaking as a profession. The demand for dressmakers is greater than the supply. Hundreds are making $25 to $40 a week.

This opportunity is made possible through the home-study course in Dressmaking now being offered by the Woman's Institute.

You learn by simple, fascinating methods how to design perfect fitting patterns from your own or any other woman's measurements; how to use tissue paper patterns; how to plan and make garments of every kind—blouses, skirts, dresses, suits, coats, lingerie, children's and infants' clothes; how to buy and use materials; how to renovate and remodel; how to copy dresses and suits you see on the street, in the shops or pictured in fashion magazines; how to do all kinds of embroidery and fancy work; how to dress in style and taste; how to go into business as a dressmaker.

You study at home in spare time and apply each lesson immediately in making your own clothes. You have the personal help by mail of expert teachers with years of experience as successful practical dressmakers.

### Learn Millinery, Too!

The Woman's Institute also offers a complete course in Millinery that will qualify you to make all your own hats, or open a shop of your own.

The Woman's Institute is ready to help you, no matter where you live or what your circumstances or your needs. And it costs you absolutely nothing to find out what it can do for you. Just send a letter, post card, or the convenient coupon below to the Woman's Institute, Dept. 7023, Scranton, Penna., and you will receive, without obligation, the full story of this great school that is bringing to women and girls all over the world the happiness of having dainty, becoming clothes and hats, savings almost too good to be true, and the joy of being independent in a successful business.

# LEARN GREGG SHORTHAND

## FOR SPEED, ACCURACY AND SUCCESS

Charles L. Swem

### Fresh Proof of the Efficiency of GREGG SHORTHAND

in the remarkable achievements of Gregg writers in the 1922 National Shorthand Reporters' Association Speed Contests at New London, Connecticut, where

Twenty-four out of a total of forty-nine qualifying transcripts were made by writers of Gregg Shorthand.

Albert Schneider

Mr. Swem, for eight years official reporter and personal stenographer to President Wilson, broke all previous world's records by making a net speed of 279 words a minute on high-speed court matter, dictated at 281 words a minute. This he achieved despite the fact that he is entirely without court-reporting experience and although he has been out of the contests for ten years. He won second place in the Championship contest with an accuracy rating of 98.65%, and in the 220 straight literary matter test exceeded the previous record by writing 218 words a minute.

Louis A. Leslie

Mr. Leslie was 1922 Winner in the World's Amateur Championship contest, his accuracy record standing at 99.1%. Mr. Leslie had never before participated in a speed contest.

Martin J. Dupraw

Mr. Dupraw, a sixteen-year-old graduate of the New York High School of Commerce, astonished the judges by winning, handily, speed certificates at 150, 175 and 200 words a minute.

Mr. Schneider, who won the 1921 World's Championship contest, defeating three former world's champions and performing the greatest feat ever achieved in a championship contest—transcribing five of the highest speed dictations, from 175 to 280 words a minute, in the time allotted for the three championship dictations—was a close runner-up to Mr. Swem in the 1922 contest. His accuracy record on speeds of 200, 240 and 280 words a minute was 98.36%. Mr. Schneider was world's champion before he was twenty years of age.

**To Begin to STUDY Gregg Shorthand Is to Begin to WRITE It.**

Gregg Shorthand is scientifically correct. Therefore it is easy of mastery and lends itself quickly to proficiency of performance. It does away with the memorizing of bewildering hieroglyphics and the tedious study of intricate rules. It is based on long-hand writing and is therefore a saver of time. It "comes naturally." YOU can become a master speed writer with surprising ease.

Taught in the high schools of 89% of the cities and towns in the United States where shorthand is taught

For the surest guarantee of speed, accuracy and a successful stenographic career,

**Insist on Learning Gregg Shorthand**

**THE GREGG PUBLISHING COMPANY**

**New York Chicago Boston San Francisco London**

Taught also in over 100 private, parochial and public schools in the Metropolitan District.

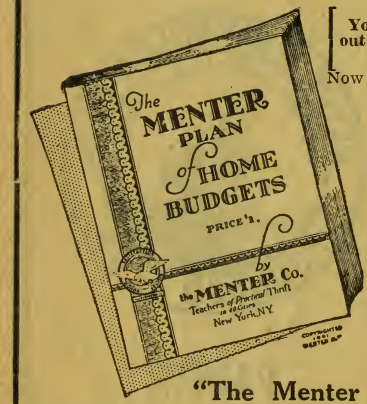
# What IS a BUDGET Anyhow?



[ You may get $500 out of keeping this budget book ]
Now read our Ad. Story

*This one is a "Silent Partner" It Helps you to save and HAVE!*

This IS a PLAN
*Not* merely a BOOK!
it's an aid to SAVING—
a Silent PARTNER—
it's the friend in need who
HAS that $5 or $10 when
you don't know WHERE
to turn for it

***It is a way to S-A-V-E***

HOW would you like to have a Silent Partner from whom you could borrow the "much-needed-Five-or-Ten-Dollars" that is so hard to get, sometimes, when you need it MOST? Of course you'd like to have one! And here it is! Here is the Housewife's Silent Partner—the "friend-in-need,"

## "The Menter Plan of HOME BUDGETS"

—Not merely a book, but a complete PLAN;
—Not just ADVICE, but *HOW* to make ends meet;
—Not a course in bookkeeping, but a CAREFULLY STUDIED OUT, consistent plan, which is the basis of HOW to save money, and HOW to save something to show for your INcome at the end of the year (just as a business shows a dividend on ITS INcome, when the business is properly managed).

This HOME BUDGET *BOOK has been prepared to show you How to find out where the leaks in your use of your household money occur—so that you can decide HOW to stop them.

This book is a HOW BOOK—not a book of advice and wise sayings, but a complete plan which pays you in your business of homemaking, the same dividends that efficiency, applied to business, has paid to many corporations.

*You can HAVE this Silent Partner working with you*—helping you to avoid WORRY, helping you to HAVE something to "fall back on,"

ORDER your copy of THIS Housewife's Silent Partner, to-day!

It is mighty helpful, too, for single men and women, who do not seem to be able to save anything.

It is a genuine FIRST AID to enjoying your INcome.

It is PRACTICAL THRIFT demonstrated!

The sooner you get *yours*—the *sooner* you'll have a Savings Account.

# MENTER

**ROOM 1426, 467 7TH AVE., NEW YORK CITY**
**Teachers of Practical Thrift in Forty Cities in the U. S. A.**

*NOTE—A BUDGET is simply a PLAN which regulates the spending and saving of your INcome, so that you can control your OUTgo and live on less than your EARNINGS. It helps you to accumulate money and open a savings account.

Copyright L-jr., for Menter Co., 1922. No. 204-L-jr-22

# *A NEW Way to Save:—*
# --- this Home CASH REGISTER for 50c

here's what every housewife *wants*—a way to have money for everyday necessities, and to budget household expense without a lot of bookkeeping.

## Susie Savit's Put and Take **CASH REGISTER** for the Home

It's very simple. When you get your weekly allowance you put 10c out of each $1 in No. 1 SAVINGS.

You put whatever one-quarter of your month's rent amounts to in No. 2. In No. 3 you put the money for the Baker— Butcher — Iceman, etc.

And in No. 4 you put 16c of each dollar to be applied to your dressing account.

In No. 5 you put 5 cents of each dollar each week to be used when you need a Doctor or Dentist or when you need anything from the Druggist. And so on.

This is the way to keep accounts without being an accountant.

**Order yours to-day, price $.50 postpaid — two for a dollar. Send money order, silver or stamps.**

*If it's not worth the price to you after you've used it for thirty days —mail it back and I'll return your $.50.*

If you send a dollar for two, Susie Savit will send you a chart that has helped over 20,000 housewives open savings accounts. The chart alone costs $.50, so that you get $1.50 for $1.00 if you send your order now.

*This is only a rough idea of it, full size is 4 inches wide by 9 inches long. Substantially made, guaranteed to give at least one year's service.*

*Address* **SUSIE SAVIT**

**Suite—1421**

**469 Seventh Avenue, New York City**

# "He's Patented Four Inventions"

"FUNNY thing, too. . . . When he first came here he was just an ordinary worker. For a time, when things were slack, I even thought that we might have to let him go.

"Then, gradually, I noticed an improvement in his work. He seemed to really understand what he was doing.

"One day he came into my office and said he had worked out a new arm for the automatic feeder. I was a little skeptical at first, but when he started explaining to me, I could see that he had really discovered something. And when I started questioning him, I was amazed. He certainly did know what he was talking about.

"So we sat down and talked for over an hour. Finally, I asked him where he had learned so much about his work. He smiled and took a little book from his pocket.

" 'There's no secret about it,' he said. 'The answer's right here. Four months ago I saw one of those advertisements of the International Correspondence Schools. I had been seeing them for years, but this time something inside of me said, *Send in that coupon.* It was the best move I ever made—I knew it the minute I started my first lesson. Before, I had been working in a sort of mental fog—just an automatic part of the machine in front of me. But the I. C. S. taught me to really understand what I was doing.'

"Well, that was just a start. Three times since he has come to me with improvements on our machines—improvements that are being adopted in other plants and on which he receives a royalty. He is certainly a splendid example of the practical value of I. C. S. training."

Note the word *practical.* No one word describes the courses of the International Correspondence Schools better than that.

For the lessons and textbooks take up problems that you meet every day in your work. And every lesson is so fully illustrated and is written in such plain, simple language that you just can't help understand.

Just fill out and mail the coupon printed below and, without cost or obligation, get the full story of what the I. C. S. can do for you. Today—not Tomorrow—is the day to take that first step toward Success.

# Are You Planting the Seeds of Success?

How much of your income are you regularly setting aside in readiness for the proverbial "rainy day"?

Are you among those who are putting off the preparation for their future because of present inconvenience?

## Save Systematically

One of the most profitable ways to save is to invest in high grade securities with attractive income returns.

The opportunities to buy this type of security have, because of the small purchasing power of the majority, been confined to a few commonly known as capitalists.

## The Monthly Instalment Plan

makes it possible for a person of restricted buying power to participate in the profitable purchases that can be made. This plan is also used by investors of ample means enabling them to secure greater holdings than they otherwise could.

## A Descriptive Booklet

of our "Monthly Instalment Plan" will be sent to you with our compliments if you are interested in saving money by means of careful investing.

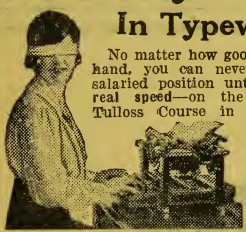
# BE A BIG MAN'S RIGHT HAND

## Business Executives Everywhere Calling for Private Secretaries—*Men and Women*

Nothing scarcer in the business world to-day than the competent private secretary. Hundreds of opportunities open, but few who can meet the speed and accuracy requirements of the high-pressure executive. More than anything else, the busy business man demands of a private secretary speed and accuracy in shorthand and typewriting! The executive of to-day works fast, but surely. He wants the man or woman who is exceptionally fast and certain in shorthand and typewriting. And he is more than willing to pay the price.

# Train by Mail in the "New Way"

## In Typewriting or Shorthand or Both



No matter how good you are in shorthand, you can never expect the high-salaried position until you get speed—real speed—on the typewriter. Take Tulloss Course in Speed Typewriting and be able to write 80 to 100 words a minute—with accuracy! 10 easy lessons by mail—and marvelous speed is yours!

If you are not a stenographer, here's your chance to get into this lucrative profession. Take the Tulloss "New Way" course in **Stenography** (both Shorthand and Typewriting). Train at home, after work or after school. Only about half the usual cost, yet you become a far better stenographer—one who can start right in at a big salary instead of at the usual beginner's salary.

## Typewrite 80 to 100 Words a Minute—10 Easy Lessons

You can typewrite 80 to 100 words a minute the Tulloss "New Way." And with this speed goes Accuracy and Ease of Operation. Clean, correct work. No fatigue as in typewriting the "old way." 10 easy lessons—by mail.

# Free Book!

Write today for this free book—"How to be a Big Man's Right Hand." Tells how business men choose their private secretaries and what they pay them, etc. Also explains in full the "New Way" in typewriting and shorthand. Mark the coupon for free book, indicating also the particular Tulloss course in which you are interested. Mail coupon.

# BROMO-SELTZER

FOR HEADACHES

# How Applied Psychology

## (*"Organized Common Sense"*)

## Will Increase Your Earnings

Another man started even with you in life, no richer, no more talented, no more ambitious. But in the years that have passed he has somehow managed to move far ahead. What is the secret of it? Why should he, apparently, have the power to get so easily the things he wants while you must work so hard for all that comes to you?

Another woman, madam, no more able than yourself, has the good gifts of life fairly thrust into her hands. You have compared yourself to her and questioned what there is in her character and talents that you somehow lack.

### *Learn the Reason From Science*

Scientists have found the secret. They can show you how you, too, can obtain the better things of life. How you can arouse the hidden powers of your mind and make them bring you more influence, a larger income, greater happiness.

Human intelligence acts and reacts according to certain laws known as the laws of Psychology—"organized common sense." Either by instinct or by study some individuals master these laws. To them the minds of their associates become like fine instruments on which they can play at will. They have but to set the train of circumstances moving and await results, in other words—**they apply Psychology.**

### *No Longer the Dream of Theorists*

To-day we see Psychology studied by the business man and its principles applied to the management of factory and office. We see men in every profession, as well as those in many lines of industry and business, applying Psychology to their personal occupations, and from the benefits derived from it greatly increasing their incomes, enlarging the scope of their activities, rising to higher positions of responsibility, influence and power.

### *Psychology the Direct Method for Success*

Recognizing the need for a popular understanding of its priceless truths, an organization was founded by Mr. Warren Hilton some years ago to coordinate the principles of Psychology and apply them to every-day life—thus the Society of Applied Psychology came into being. Among the members of the Advisory Board, who also contribute to the Society's literature, are such well-known men as Henry A. Buchtel, D.D., LL.D., Chancellor, University of Denver, former Governor of Colorado; Hudson Maxim, D.Sc., Inventor and Mechanical Engineer; George Van Ness Dearborn, M.D., Ph.D., Psychologist and Author; Harry S. Tipper, Chairman, National Educational Committee, Associated Advertising Clubs of the World, and others.

Because of the very great value of the Society's Basic Course of Reading to the average man and woman, **The Literary Digest** is cooperating to bring it within the means of every earnest seeker for self-betterment.

## FREE—"How to Develop Your Power of Achievement"

A compelling booklet packed with information on such topics as: Psychology reduced to easy, simple language; How to Apply Psychology in Salesmanship; in Public Speaking; in Retail Selling—Psychology Applied by the Professional Man—Your Undiscovered Resources—Source of Will Power—How to Avoid Worry—How Ideas are Created—The Ability to Read Men,—etc. Sign and mail coupon and you will receive full particulars of the Society of Applied Psychology, and what membership in it will mean to you.

Can **YOU** help supply the demand for fresh, interesting, true-to-life screen stories? Don't think that you must be a genius to win success. Neither is it necessary to waste valuable time and money studying tedious, tiresome correspondence courses or "lessons." The real foundation of the photodrama is the plot or "idea" upon which it is built. Put **Your** idea on paper and send it to us immediately. Our Scenario Editor will offer to arrange it for you in proper form should he believe that your subject has merit. Producers eagerly read, and gladly purchase at substantial figures, work that appeals to them as being meritorious.

## How Much Is Your Imagination Worth?

Who knows but some incident in your own life or that of a friend—some moving, gripping story of love, hate, passion or revenge, may prove to be the lever with which you will lift yourself to heights of unthought-of success and prosperity. Nearly everyone has at some time thrilled to a great human emotion—some tremendous soul-trying ordeal or experience. It is these really human stories of the masses that the producers want and will pay for liberally. Send us at once **YOUR** idea of what a good screen story should be. You can write it in any form you wish and our Scenario Editor will carefully examine it and advise you promptly of his opinion as to its merits and how we can help you. **THIS COSTS YOU NOTHING!** Certainly you owe it to yourself to **TRY.**

## Free Interesting Booklet

Probably there are countless questions regarding the lucrative and fascinating profession of photoplay-writing that you would like answered. Most of the points which would naturally arise in your mind are answered fully in our interesting booklet. **"THE PHOTOPLAY in the Making."** It contains a gold mine of information and over fifty thousand aspiring writers have already received a copy. Send for **YOUR** copy at once. It is entirely free and there are no "strings" to the offer. If you have a story ready, send it to us, together with your request for the booklet.

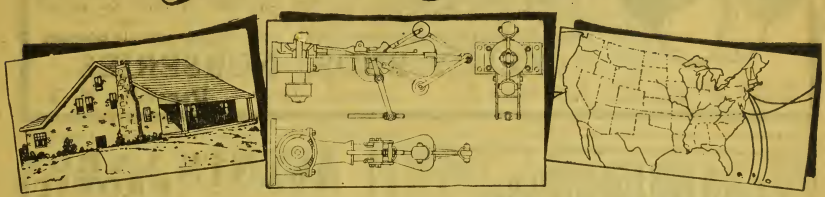
# Earn $35 to $100 a week
## Making Drawings like these



## Drawing Outfit Furnished *FREE*

You need no artistic talent or "pull." In a few months with our help you can be alongside the best of them, earning enough money to live on and to lay some aside.—Here's how.

**Learn Mechanical Drawing**

That means Real Money for you. Shorter Hours, Quick Promotion. The opportunities for success in Mechanical Drawing today are big as compared with other fields. Mechanical Drawing or Drafting is specialized knowledge. It is power to success.

**Attractive Salaries**

$35 to $55 a week is only a beginning. $100 a week and up are within the possibilities of your grasp as a practical Mechanical Draftsman.

**Quick Promotion**

Your efforts are rewarded. You can climb up and up in salary and position—from Draftsman to Chief Draftsman—to Chief Engineer—to Production Manager—and so on up. Offers a chance to make big money on the side in your spare time, in addition to your regular salary. Then, when the opportunity comes, you can go into business for yourself, as many others have done.

**Permanent Employment.**

You won't have to stand around looking for a job. Properly trained draftsmen are always in demand. Railroads, Manufacturing Plants, Electrical Works, Enginering and Construction Houses and United States Government Departments always need trained draftsmen. Even when men in other lines of work are without positions, the draftsman is usually on the job at good pay.

**Get the Right Training**

"Columbia" training is simple and sure, yet complete and practical. By Roy C. Claflin's improved "Columbia" method of practical, Mechanical Drawing you can become a master Mechanical Draftsman in a few months of pleasant, easy home study, under Mr. Claflin's personal supervision. No troublesome, fancy theories—no difficult mathematics to master—just the plain, common sense brass tacks of Drafting. And after that, if you want it, you receive training in a specialized branch of drafting through your choice of one of our post-graduate courses.

**"Columbia" Draftsmen Are in Demand**

The largest concerns in the country, including the United States Government, employ Columbia trained draftsmen. Openings for draftsmen in Government Departments carry starting salaries ranging from $5.20 to $15.04 per day—and it is generally recognized that salaries outside of Government service are still higher.

**FREE BOOK**

Send in this coupon today. Immediately upon receipt of it we will send you our illustrated book. "Your Future in Drafting." It tells you all about our new method of teaching Mechanical Drawing and gives full details of our offer.

**Drafting Outfit**

**WE GIVE YOU** this professional drawing outfit of sixteen pieces, and eleven-piece set of highest grade drafting instuments in plush lined case when you enroll. The entire outfit is yours to keep.

# Salesmanship and Business Efficiency

*(Revised Edition)*

By J. S. KNOX

This book gives you the bed-rock fundamentals of personal power, leadership, selling strategy and management. Nearly 200,000 copies have been sold in the United States and nineteen other countries. More copies have been sold to great business concerns for their employees than any business or salesmanship book ever written.

**WHAT THEY SAY:**

"Salesmanship and Business Efficiency" was worth one thousand dollars in cold cash to me the first year after I got it."

O. SALISBURY, Sales Manager, Pennsylvania Consumers Oil Co. Council Bluffs, Iowa.

"Hundreds of Hoover salesmen throughout this country, Canada and Great Britain have studied your old edition, which was the best we were able to find. The revised edition is even better."

M. L. PIERCE, Promotion Manager, Hoover Suction Sweeper Co., Canton, Ohio.

**HOW THEY BUY:**

| | |
|---|---|
| R. C. Barnum Co. | 7,500 |
| F. B. Dickerson Co. | 4,000 |
| Baldwin Publishing Co. | 4,000 |
| Better Farming Association. | 3,500 |
| Fuller Brush Company. | 3,360 |
| Imperial Company. | 3,000 |
| The Midland Press. | 1,411 |
| S. F. Baker Company. | 938 |
| Review & Herald Pub. Co. | 872 |
| Hoover Suction Sweeper Co. | 828 |
| S. A. Mulligan Company. | 612 |
| J. C. Penney Company. | 350 |
| John A. Hertle Co. | 300 |

The above books were bought by these concerns to be used in training their own salesmen.

This revised edition has thirty-four marvellous charts worth ten times the price of the book.

407 pages, beautifully bound, prepaid **$2.50.**

# STUDY BIBLE NOW!

## Better Than College Course

*Former President Roosevelt*

William Lyon Phelps, A.M., Ph.D., professor of English language and literature, Yale University, says:

*"I thoroughly believe in a university education for both men and women; but I believe a knowledge of the Bible without a college course is more valuable than a college course without the Bible.*

*"Every one who has a thorough knowledge of the Bible may truly be called educated; and no other learning or culture, no matter how extensive or elegant, can form a proper substitute."*

And former President Roosevelt said:

**"To every man who faces life with real desire to do his part in everything, I appeal for a study of the Bible. No book of any kind ever written has so affected the whole life of a people."**

The Correspondence method of Bible study is the best method for securing a thorough knowledge of the Bible—**better than any oral teaching can possibly be.** More than 7,000 persons of 40 different occupations are now enrolled in one or more of the

## MOODY BIBLE INSTITUTE'S CORRESPONDENCE COURSES

studying the inspired Revelation under the direction of eminent, Spirit-filled, Bible scholars. To really know the Bible is an education out of which springs the fullest and best development of one's powers in any vocation. This marvellous book has moulded earth's loftiest characters. It meets man's deepest needs. It charts the only path to real and lasting success. **Dig in it as for gold and you will secure treasure of value and extent beyond any calculation.** Letters of warmest appreciation are constantly received from students and graduates. For example:

**"It has never been my privilege to be fascinated with Bible study as I am with this course."**

**"I have come to know the Bible in an entirely new light. The Old Testament is now intensely interesting."**

**"The benefits I have received from the Synthetic Course are beyond estimate and above price."**

**"I finished the Scofield Bible Course about three years ago. It has been of greater value to me than any other training I have ever had, though I spent four years in college."**

**A Clergyman says: "I often mention in my sermons that a Correspondence Course from the Moody Bible Institute has been of far greater value to me than all of my Bible and theological work in college."**

No matter what your occupation you can study the Bible by correspondence. These courses open a new world to you—broaden your vision, develop your understanding, answer your questions, help solve your perplexities, give comfort and encouragement.

**Enroll Now!** You will be a personal pupil—time, place and amount of study under your own control. The prices are very low—these courses are not sold for profit. There is no better time to start than NOW. Send the coupon at once for Free Prospectus describing our eight Courses in detail.

### WE OFFER EIGHT COURSES BY MAIL

# YOU HAVE A BEAUTIFUL FACE

## *BUT YOUR NOSE?*

BEFORE

AFTER

IN THIS DAY and AGE attention to your appearance is an absolute necessity if you expect to make the most out of life. Not only should you wish to appear as attractive as possible, for your own self-satisfaction, which is alone well worth your efforts, but you will find the world in general judging you greatly, if not wholly, by your **"looks,"** therefore, it pays to "look your best" at all times. **Permit no one to see you looking otherwise;** it will injure your welfare! Upon the impression you constantly make rests the failure or success of your life. Which is to be your ultimate destiny? My latest **Nose-Shaper, "TRADOS MODEL 25"**, U. S. Patent, with six adjustable pressure regulators and made of light polished metal, corrects now ill-shaped noses without operation, quickly, safely and permanently. Diseased cases excepted. Does not interfere with one's work, being worn at night.

*Write today for free booklet, which tells you how to correct ill-shaped noses without cost if not satisfactory.*

**M. TRILETY, Face Specialist, 1775 Ackerman Bldg., Binghamton, N. Y.**

*Also For Sale at Riker-Hegeman, Liggett's, and other First Class Drug Stores.*

**Eureka** *Send for Catalog—FREE*

## Potato Planter

Profitable for the large or small grower. Plants potatoes at lowest possible cost. *One* man operates it. Opens the furrow—drops the seed any distance or depth required—puts on fertilizer (if wanted)—covers up—marks the next row. Accurate, automatic and dependable. Sold with or without Fertilizer Attachment. Here's why you should select the Eureka Potato Planter: Furrow Opening Plow is directly under the axle—that means uniform depth at all times. The seed drops in sight of driver. Steel and malleable construction makes long life and few repairs. Made in three sizes—for one or two rows.

**Eureka** *Write for Free Catalog*

## Mulcher and Seeder

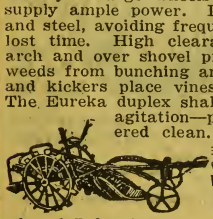
A mulcher, smoothing harrow, cultivator, weeder and seeder—all in one. Forms dust mulch—a blanket of loose soil—preventing soil hardening and moisture escaping. Increases yield of corn, potatoes, oats, wheat, etc. Kills weeds. Has *flat teeth,* especially adapted to form mulch. Lever and pressure spring control depth of teeth. Sold with or without seeding boxes for grass seed, alfalfa, oats, etc. Teeth cover the seed. Adapted for a large variety of work. Three sizes, 8, 10 and 12 feet. Shipment from branch near you.

**Eureka** **POTATO DIGGER**

**Gets all the potatoes**

***Result of 19 Years' Digger experience***

A companion implement of the famous Eureka Potato Planter—made in same factory. Large wheels and main gears supply ample power. Largely malleable and steel, avoiding frequent breakage and lost time. High clearance under truck arch and over shovel prevents vines and weeds from bunching and dragging—rods and kickers place vines in row at side. The Eureka duplex shaker provides most agitation—potatoes are delivered clean. Rear extension elevator furnished when desired.



*Write for catalog*

**Eureka Mower Co.**

6 and 7 ft. sizes. Box 710, **Utica, N.Y.**

## *Never neglect cuts!*

**Keep Handy in Medicine Cabinet at Home, in Office Desk Drawer, in Club Locker and carry in grip when away from home.**

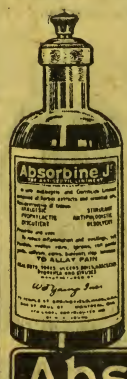
Infection lurks where least expected. A cut, scratch or laceration may prove serious unless treated promptly. In all such little emergencies, the application of a few drops of Absorbine, Jr. is cleansing and healing and brings peace of mind.

For bumps, burns and bruises Absorbine, Jr. draws the pain, reduces the swelling and is instantly soothing and cooling.

After long continued or hard exercise or exertion, rub the muscles with Absorbine, Jr. It will prevent that next-day stiffness, lameness and soreness. For tired, aching feet it affords wonderful relief.

Use a few drops of Absorbine, Jr. in a little water as a mouth wash. It destroys crevice-hidden germs, alleviates conditions of sore throat and leaves the mouth refreshingly clean.

Remember that Absorbine, Jr. is an antiseptic, liniment and germicide, economically and conveniently combined in one container for emergency uses. Although powerfully concentrated, it contains no harmful ingredients and is safe with children about. Unlike ordinary liniments, it is of a clean, pleasant odor and does not leave the usual liniment stain.



**At most druggists', $1.25, or postpaid. Liberal trial bottle, 10c, postpaid.**

**W. F. YOUNG, Inc.**

# A Big Raise in Salary!

## *Is Very Easy to Get, If You Go About It in the Right Way*

You have often heard of others who have doubled and trebled their salaries in a year's time. You wondered how they did it. Was it a pull? Don't you think it. When a man is hired he gets paid for exactly what he does, there is no sentiment in business. It's preparing for the future and knowing what to do at the right time that doubles and trebles salaries.

**Remember When You Were a Kid**

and tried to ride a bike for the very first time? You thought that you would never learn, and then, all of a sudden, you knew how, and said in surprise: "Why it's a cinch if you know how." It's that way with most things, and getting a job with big money is no exception to the rule, if you know how.

**We Will Show You How**

Without the loss to you of a single working hour we can show you a sure way to success and big pay. A large number of men in each of the positions listed are enjoying their salaries because of our help—we want to help you.

Make check on the coupon against the job you want and we will help you get it. Write or print your name on the coupon and send it in today.

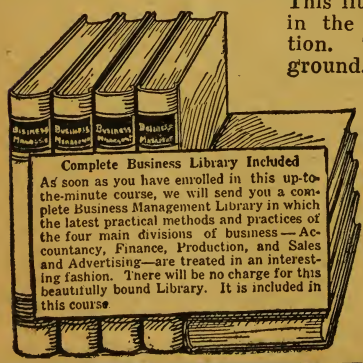
Name.....

Address.....

"I want to talk to you about promotion, John. How do you expect to gain it? What are your plans? You are the best man in this organization for your particular job. But you are just as much of a machine as that adding machine over there. You do one thing well and that is all. I've watched you. Several times I tried you out on different jobs but you always fell down on anything not connected directly with your work. If you ever expect to be general manager of this concern you've got to know a lot besides everyday accounting. What do you know about the other branches of our business—production, finance, sales and advertising? Not a blessed thing."

This little dialogue took place several years ago, in the president's office of a well known corporation. The president's words fell on fertile ground. For the next few days John was a thoughtful man. He reorganized his plans for the future. John Barton added to his knowledge of accounting a knowledge of sales, production and finance—he acquired that comprehensive grasp of things that every executive must have. Today he directs policies where once he posted ledgers. John Barton is only one of the many business men who built their foundation on American School training. For more than a quarter of a century we have helped men to plan and win. We will help you. The coupon will give us a chance to prove it.



**Complete Business Library Included**

As soon as you have enrolled in this up-to-the-minute course, we will send you a complete Business Management Library in which the latest practical methods and practices of the four main divisions of business — Accountancy, Finance, Production, and Sales and Advertising—are treated in an interesting fashion. There will be no charge for this beautifully bound Library. It is included in this course

**AMERICAN SCHOOL**

**Drexel Ave. and 58th St. Dept. B1195, CHICAGO**

# John Barton Took This Course

This book is a straight from the shoulder treatise on modern business and its practical methods. There is not a line of sentimental inspirational dope in it. But it will be just as useful to the accomplished executive as it will be helpful to the ambitious novice. The book is free. It will come to you by return mail if you will send the coupon.

# HIGH SCHOOL COURSE IN TWO YEARS

**YOU ARE BADLY HANDICAPPED** if you lack High School training. You cannot attain social or business prominence. You are barred from a successful business career, from the leading professions, from well-paid civil service jobs, from teaching and college entrance. In fact, employers in practically all worthwhile positions demand High School training. That's the way you are handicapped if you lack this vital training. But you can remove this obstacle to your success. The American School Course *meets every requirement.*

## FIT YOURSELF FOR A BIG FUTURE

This Course will broaden your mind, and make you keen, alert and capable. It is complete, simplified, and gives you the same training as a resident school will. Lessons are written specially for home study and competent instructors guide and coach you from start to finish. It absolutely gives you the knowledge that now stands as a barrier between you and desirable positions.

**USE IDLE HOURS ONLY** Most people *idle* away *fifty* hours a week. Probably you do, too. Use only one-fifth of that time for studying and you can easily remove your present handicap *within two years.* The question of your success hinges on whether or not you will devote a part of your spare time to this home study course of High School training.

**TRAINING DECIDES PAY** There is only *one known way to increase your earning power*—only one way to get the position you want and the pay you want. *You must train.* The difference between $15 and $50 a week is measured only by training — knowing HOW. Let us assist you to acquire the knowledge you need. Our training does not interfere with your present work. Check and mail the coupon for full particulars and Free Bulletin.

SATISFACTION GUARANTEED — YOUR MONEY BACK IF YOU ARE NOT SATISFIED AFTER COMPLETING TEN EXAMINATIONS

# SPECIALIZE AND WIN

## EXPERTS Demand Big Pay—And Get It

Experts name their own salaries—and they get what they ask for. Why? Because they have specialized—they are **experts** in their particular line. Others guess, suppose, and imagine. Experts KNOW.

Specialize and Win! It's only the poorly paid jobs that are crowded. The big $8,000 and $10,000 positions are always seeking men and women who have specialized.

## Earn $20 a Day

You are paid what you are worth—no more, no less. Make yourself worth more and you'll get more. Equip yourself with **special knowledge** and you'll get a specialist's salary—$20 to $25 a day and more.

Men and women—why not get out of the crowded jobs? There's nothing in it, now or in the future—and you know it! **Specialize**—that's the answer. Think it over and you'll agree.

It isn't hard to gain a specialist's knowledge. You can easily learn at home in your spare time, to be a

# His New Invention

## Finds and Corrects Your

# Mistakes in English

**Does your English reveal your lack of education or does it prove that you are a person of culture and refinement? English is the one weapon you must use every day. Here is how you can improve it almost at once.**

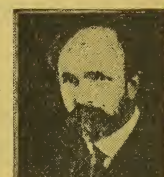
AS a result of thousands of tests, Sherwin Cody found that the average person is only 61% efficient in the vital points of English. In a five-minute conversation, or in an average one-page letter, from five to fifty errors will appear. It is surprising how many experienced stenographers fail in spelling such common words as "business," "abbreviate," etc. It is astonishing how many business men say "between you and I" instead of "between you and me," and use "who" for "whom," and mispronounce the simplest words. Few people know whether to use one or two "c's" or "m's" or "r's," whether to spell words with "ie" or "ei," and when to use commas in order to make their meaning absolutely clear.

### A Remarkable Discovery

Mr. Cody has specialized in English for the past twenty years. But instead of going along in the old way he has applied scientific principles to teaching the correct use of our language. He made tens of thousands of tests of his various devices before inventing his present method. In all his tests he found that the trouble with old methods is that points learned do not stick in the mind. In school you were asked to remember rules, and if you forgot the rules you never could tell what was right and what was wrong. For five years Mr. Cody worked almost day and night to find a way to replace bad habits in writing and speech with good ones. And as a result of his experience he evolved his wonderful new

### Self-Correcting Method

This invention is simple, fascinating, time-saving and incomparably efficient. You do the lesson given on any page, then you see exactly how Mr. Cody himself would correct it. You mark your errors and check them in the first blank column. Next week you try that page again, on the second unmarked sheet, correct your errors, and check them in the second column. You see at a glance what you have learned and what you have failed to remember until you have reached the 100% point in spelling, punctuation, grammar, and expression.



Sherwin Cody

### Only 15 Minutes a Day

A remarkable advantage of Mr. Cody's course is the speed with which these habit-forming practice drills can be carried out. You can write the answers to fifty questions in 15 minutes and correct your work in five minutes more. You waste no time in going over the things you already know. Your efforts are automatically concentrated on the mistakes you are in the habit of making, and through constantly being shown the right way you soon acquire the correct habit in place of the incorrect habit. There are no rules to memorize. There is no tedious copying. There is no heartbreaking drudgery.

### New Book Free

If you feel your lack of language power, if you are ever embarrassed by mistakes, if you cannot command the exact words to express your ideas, our new booklet, "How to Speak and Write Masterly English" will prove a revelation to you. Merely mail the coupon or a postal card, and it will be sent by return mail. Learn how Sherwin Cody's new invention makes command of language easy to gain in 15 minutes a day. Mail this coupon now.

# DIAGRAPH

## Try This Stencil Machine FREE

Put the Diagraph Stencil Cutting Machine in your shipping department—with it your shipping clerk can cut neat, legible address stencils that can be transferred to boxes, bags, barrels, crates, and in fact, practically every kind of package.

Address stencils cut with the Diagraph will avoid many lost and delayed shipments, which are so often due to blurred, indistinct addresses, markings scratched or rubbed off and shipping tags being torn from parcels. Diagraphs have been in use everywhere for over 20 years—they contain many new and vital improvements which are not to be found in any other machine.

The Diagraph will pay for itself in a short time. Ask us to send you one for 10 days' free trial; freight prepaid. If you like it, buy it; otherwise return it at our expense. Popular open and housed models, **$110.00** complete with all supplies.

# Electricity

## at your fingers' ends

Know the *facts* in Electricity. They *count*—and mean more money and better position for you. You need the *exact* information,—in a practical form so that you can use it every day, to help you install electrical equipment, or make repairs, or operate machines, or do whatever else your present job—or the job ahead of you—calls for.

# HAWKINS ELECTRICAL GUIDES

## help you succeed through electricity

These books will answer every one of your electrical problems. They are written so that you can understand them. Arranged in the form of questions *you* would ask—and the answers to them—in plain, practical, everyday language, clear, concise and to the point. Thousands of men are using Hawkins Electrical Guides as a practical aid to greater success in the electrical field.

"Worth ten times their price." "I wouldn't send them back for a handful of diamonds." "I congratulate you on their excellence." "Helped me to two raises in four months." "Better than a school of instruction." "Studied them when I was laid up and got further ahead than if I'd been on the job."

These are the words of gratitude that come to us by mail from Electrical workers. There is no short cut to genius. But there are sign posts all along the road to success. **Hawkins Electrical Guides** find these sign posts for you. It is so easy to pay for the Guides that you will scarcely miss the monthly payments.

**HAWKINS GUIDES**
**3,500 PAGES**
**4,700 ILLUSTRATIONS**
**$1 A VOLUME**
**$1 A MONTH**

## *Shipped to You FREE*

Send no money. Examine the books first. Decide for yourself that they are the most complete and clearest written electrical books ever published. Every book is complete in itself, but the entire set is the best bargain. Accept this unusual offer now—mail the coupon today. If you decide to keep the books you can make settlement at only $1 per month, until paid for.

*Have You An Idea For A Movie Star?*

# WRITE FOR THE MOVIES

*Big Money In It—*

Can **YOU** help supply the demand for fresh, interesting, true-to-life screen stories? Don't think that you must be a genius to win success. Neither is it necessary to waste valuable time and money studying tedious, tiresome correspondence courses or "lessons." The real foundation of the photodrama is the plot or "idea" upon which it is built. Put **Your** idea on paper and send it to us immediately. Our Scenario Editor will offer to arrange it for you in proper form should he believe that your subject has merit. Producers eagerly read, and gladly purchase at substantial figures, work that appeals to them as being meritorious.

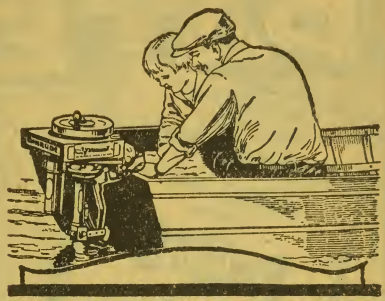
## How Much Is Your Imagination Worth?

Who knows but some incident in your own life or that of a friend—some moving, gripping story of love, hate, passion or revenge, may prove to be the lever with which you will lift yourself to heights of unthought-of success and prosperity. Nearly everyone has at some time thrilled to a great human emotion—some tremendous soul-trying ordeal or experience. It is these really human stories of the masses that the producers want and will pay for liberally. Send us at once **YOUR** idea of what a good screen story should be. You can write it in any form you wish and our Scenario Editor will carefully examine it and advise you promptly of his opinion as to its merits and how we can help you. **THIS COSTS YOU NOTHING!** Certainly you owe it to yourself to **TRY.**

## Free Interesting Booklet

Probably there are countless questions regarding the lucrative and fascinating profession of photoplay-writing that you would like answered. Most of the points which would naturally arise in your mind are answered fully in our interesting booklet. **"THE PHOTOPLAY in the Making."** It contains a gold mine of information and over fifty thousand aspiring writers have already received a copy. Send for **YOUR** copy at once. It is entirely free and there are no "strings" to the offer. If you have a story ready, send it to us, together with your request for the booklet.

**Bristol Photoplay Studios**
**Suite 609, BRISTOL BLDG., New York.**



# EVINRUDE

# Which will succeed?

WHICH will succeed? the one who spends all his precious reading time with the daily paper? or the other, who is gaining little by little, in a few delightful minutes each day, that knowledge of a few truly great books which will distinguish him always as a really well-read man? What are the few great books — biographies, histories, novels, dramas, poems, books of science and travel, philosophy and religion—that picture the progress of civilization?

Dr. Charles W. Eliot, from his lifetime of reading, study, and teaching, forty years of it as President of Harvard University, has answered that question in a free booklet that you can have for the asking. In it are described the contents, plan, and purpose of

**DR. ELIOT'S FIVE-FOOT SHELF OF BOOKS**

Every well-informed person should know about this famous library. The free book tells about it—how Dr. Eliot has put into it "the essentials of a liberal education"; how he has so arranged it that even "fifteen minutes a day" are enough; how, by using the reading courses he has provided, you can get the knowledge of literature and life that every University strives to give. Every reader of this page is invited to have a copy of this handsome and entertaining free book.

**Send for this free booklet that gives Dr. Eliot's own plan of reading.**

*Merely clip the coupon and mail it to-day*

**P. F. COLLIER & SON CO.**
**416 West 13th St., New York**

By mail, free, send me the little guide-book to the most famous books in the world, describing Dr. Eliot's Five-Foot Shelf of Books, and containing the plan of reading recommended by Dr. Eliot of Harvard.

# Get your Auto Training at this Y.M.C.A.

## The Auto Industry Needs Trained Men

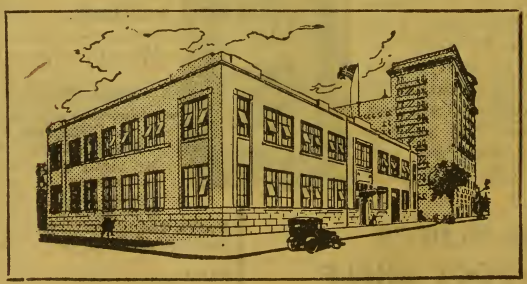
With more than ten million cars and trucks now in use in the United States and millions more being produced every year, there is a steady and growing demand for TRAINED AUTO MECHANICS. The man who knows how to build, repair or operate cars and trucks is wanted by factories, garages and service stations at high wages. Many splendid opportunities also are offered for the trained man to start into the repair business for himself.

## Learn the Auto Business in Detroit

In Detroit the great majority of the cars and trucks used in this country are being produced. Here in this city is the best place for a young man to get his auto training. Every facility is offered here for learning autos and becoming thoroughly familiar with the auto industry.

## Go to This Y. M. C. A. School

The AUTOMOTIVE SCHOOL of the Detroit Institute of Technology is a Y. M. C. A. School. It is a chartered institution, established in 1891. Detroit "Tech" also offers college degree courses in Engineering, Chemistry, Pharmacy, Accountancy and other courses. The certificate of this institution, which you will receive on the completion of your auto course, will mean a great deal to you.



**This splendid structure, right in the heart of Detroit, houses our Automotive School**

# Auto School

## Thorough Auto Training "At Cost"

Being a Y. M. C. A. School, this auto school does not operate for profit. It has no stockholders who expect a dividend from their investment. It offers the best possible kind of training it can give at the lowest possible price.

## Courses Offered

This school offers standard, high-grade courses in Auto Repairing, Tire Repairing and Vulcanizing, Battery Repairing, Welding and Brazing, Driving, Auto Electric Systems, Machine Shop Practice and Toolmaking. Other courses in such subjects as Business Training, Salesmanship, Advertising may be secured, if the student desires.

## Our Men Make Good

The training received at the AUTOMOTIVE SCHOOL of Detroit Institute of Technology is so thorough and practical that if a man applies himself to his work he cannot fail to make good. Graduates of this school have built up an excellent record for success in the auto business. You, too, can get ahead in this business, if you will GET PROPER TRAINING. Let us tell you how you can do it. Write to-day for our free explanatory folder.

# Nearly Every Week the Postman Brings Me a Check

## Extra money that I earn in spare time—in the privacy of my home

I SHALL never forget the thrill that came with that first check. I could not have been much prouder or happier if it had been for a million dollars.

Month after month, it had been the same old story — always running short of money — always so many things that I had to do without. And then came that first check — and emancipation from the old worries and discouragements. I knew there would be many more such checks.

*Mrs. Helene Himberg*
*261 Wyckoff Street*
*Brooklyn, N. Y.*

It's wonderful what a difference a little extra money can make. I now have better clothes. I can often spare the money for a little trip for myself or the family. I have many comforts that I did not enjoy before. And every month I put a little in the bank.

Every penny I earn myself—just in spare time. And without stepping out of the house.

### Surprisingly Easy

These checks are my pay for knitting wool hose—not by hand but on a wonderful little knitter. Whenever I have an idle moment I sit down at this machine — my "magic purse filler"—and almost before I realize it I have three or four or more pairs of hose finished—adding just that much to my week's earnings.

I can make any style and size of hose, also sweaters, babies' Teddy Bear outfits and many other articles.

Often I knit while watching the breakfast or dinner cook. And often my husband will sit down and knit an hour or so. It's so easy and fascinating that it hardly seems like work at all.

My checks come from the Home Profit Hosiery Company, Rochester, New York. It was from them that I got my Home Knitter. You know how popular wool hose have become—

men's, women's and children's. Most people would much rather have genuine home-knit goods than the factory kind. The Home Profit Hosiery Company sells to stores—and the demand is so big they want all the home-knit hose they can get. As fast as you finish a dozen or more pairs you simply send them to the Home Profit Hosiery Company and they send you a check for your work—it's all guaranteed.

It's an ideal way to earn extra money. You do the work entirely at your own convenience—as much or as little each week as you choose. There is a year-round demand for the work. And you get fine pay.

Mrs. Helene Himberg,
261 Wyckoff St.,
Brooklyn, N. Y.

## It's Helping Hundreds of Others

All over America the Home Profit Knitter is helping people turn their spare time into money—helping them get out of debt—helping them pay for homes—helping them dress better—helping them buy new furniture and pianos and phonographs—helping them provide trips and vacations and other pleasures—helping them to lay up money to send their boys and girls to college—helping them build bank accounts—helping them get more comfort, more enjoyment and more self-respect out of life.

Home knitting on the Home Profit Knitter is easy, rapid, profitable and pleasant. You can knit any style and any size of wool hosiery, also sweaters and babies' Teddy Bear outfits and many other articles. You can send all your work to the Home Profit Hosiery Company and get good pay for it—all on a guaranteed basis—or you can buy your yarn and sell the finished work direct to friends and neighbors and local stores, just as you choose. Either way you can easily earn an extra $5 to $15 or more every week the year round—the amount depending on how much time you give to the work.

If your regular income is not enough—if there are things you want or need—why not at least write to the Home Profit Hosiery Company and get full information? Through their simple and easy plan you can bring an end to your worries about money—just in your spare time and without having to step out of the house. Use this coupon. Do it right away—it may make a difference of hundreds of dollars a year to you.

# *Crooked Spines*
## Straightened!

NO matter how old you are; no matter what caused your affliction; no matter how many years you have suffered or how hopeless you believe your case to be, there is hope for you in the Philo Burt Method.

Eminent specialists who have studied and treated spinal diseases and deformities for years are first astonished, then convinced and quickly become enthusiastic upon finding one success follow another when the Philo Burt Method is used. Ask us for the names of happy patrons right in your vicinity.

**A young woman who was bed-ridden at 26 with spinal tuberculosis after suffering for 20 years, is married, happy and perfectly strong and vigorous at 29.**

**A boy of 8 was unable to walk or hold his head erect. After a few months every symptom disappeared and he walks daily three miles to school.**

**A man of 45, in cruel agony for six years, spent over $3,000 in a vain search for relief. Now works every day without the aid of any artificial support.**

## FREE—30 Days' Trial

The Philo Burt Method is new and different, not like anything you have tried. It has benefited or cured over 30,000 sufferers from spinal trouble caused by tuberculosis, Pott's disease, infantile paralysis, spinal meningitis, pleurisy, rheumatism, injuries, wrong sitting and standing postures, etc. Treat yourself at home. A 30-days' trial costs you nothing; no obligations of any kind if it fails.

The Philo Burt Appliance will positively cure any case that is curable and straighten any crooked spine that can be straightened. It gives firmer and more natural support to the spine than any torturing, unsanitary, old style brace made of steel, iron, leather, plaster of paris, etc. It is as yielding, soft and comfortable as a corset. Goes on and off like a coat and cannot be detected under the clothing. It relieves and strengthens and has accomplished many amazing cures. Let us send you sworn proof. Send no money. Simply describe your case fully. Get our liberal offer and helpful book on spinal troubles absolutely free.

# The famous Marshall Stillman BOXING Course $2.97

## with Jiu Jitsu & Wrestling—85 lessons —over 200 illustrations

Here it is—the famous Marshall Stillman Course in Boxing, Jiu-Jitsu and Wrestling, now at the extraordinary price of $2.97 instead of $5.00!—85 lessons, 381 pages, 246 illustrations!

Sooner or later you'll have to whip your man. It may come to-morrow. A thug insults you, your sweetheart or wife. What do you do? Swallow the insult? No, you fight! But unless you know more about boxing and self-defense than your opponent, you're the man who's going to get the beating!

**You're not playing fair with those who love and depend upon you if you fail to prepare yourself!**

And think of the sport you're missing. There's barrels of fun in friendly boxing bouts and wrestling matches. You may even box rings around "that chap who thinks he knows it all," or pin his shoulders to the mat.

Marshall Stillman teaches you the game right in your own home from the simplest rudiments of hitting and guarding to the most scientific blows and guards such as the Benny Leonard Triple, the Jack Dempsey Triple, the Fitzsimmons Shift, etc. So quickly do pupils learn that many outbox bigger opponents after only two weeks' training. Joseph Amend of Brooklyn, N. Y., says: "I have fought three men each weighing 10 to 25 pounds heavier than myself. I made the three quit in three rounds and did not receive any punishment myself." J. H. Dolan, of the U. S. S. Shawmut, says: "Now I am what my shipmates call a good one, and they can't see how I got all the new blows and guards so quickly."

In wrestling you learn 15 jiu-jitsu holds—how to disarm an opponent, how to break a strangle-hold, etc.—and 14 of the best mat holds—the Gotch Toe Hold, the Stecher Scissor Hold, the Head-Lock, etc.

A complete set of muscle-building and health-development exercises is included to improve you physically, with complete instructions on training—how to put on or take off weight, how to improve your speed and endurance, etc.

With the course you get a Free History of 69 Famous Boxers, with their pictures.

**SEND NO MONEY!**

Simply fill in and mail the coupon. When you have the course in your hands, merely deposit 97 cents with the postman. Then examine the course for 10 days—try it out thoroughly. At the end of 10 days either send us the small balance of $2 in final payment, or return the course, and we'll send your deposit back. Mail the coupon to Marshall Stillman Association, Dept. 2022-L, 42d St. & Madison Ave., New York.

**Marshall Stillman Association, Dept. 2022-L, 42d St. & Madison Ave., New York.**

You may send me on approval the Marshall Stillman Course. When the course is placed in my hands, I will give the postman a deposit of 97 cents, with the understanding that if, after 10 days I wish to return the course I may do so and my deposit will be refunded. If I keep the course I am simply to send you two dollars in final payment.

# NEW KIND OF HEAT!

## Does Away With Dirty Coal and Wood

No more fires to build, bank or watch—no more dirty coal to carry and lift—no more clouds of ashes to breathe or back-breaking scuttles to empty—no more heating problems—no more cold rooms in Winter—no more suffering from lack of quick fires in uncertain Fall and Spring—no more sweating over a hot kitchen stove in summer—no more worries about coal shortages, poor quality or high prices since this Wonderful New Invention.

## Three Times the Heat of Coal at Turn of Valve

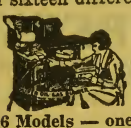
Here is the amazing new kind of heat that has ended forever the days of woman's back-breaking servitude to a hot, mussy stove or furnace! The wonderful invention of Mr. B. M. Oliver of St. Louis in one minute turns any coal or wood burner into a modern, up-to-date gas stove. Regulates to any degree of heat you want. In Winter you can have a hot, roaring fire in less than three minutes. In summer you can bake, cook or iron, turn off the heat instantly when through, and have a cool kitchen all day long.

## Cheaper Than Coal and Wood

Mr. Oliver calls his invention the Oliver Improved Oil-Gas Burner, because it uses 95% air and only 5% coal oil (ordinary kerosene) —the cheapest fuel there is, turning them into an actual gas that burns with an intensely hot, clean flame. Saves its cost in cleaning bills alone.

## Fits All Stoves—Any Kind or Size

Mr. Oliver's wonderful invention is made in sixteen different models, to fit any kind of cook stove, heating stove or furnace. Doesn't change your stove. Simply sets in firebox. Easily slipped in in one minute. Absolutely safe. It lasts a lifetime. Saves your stove.

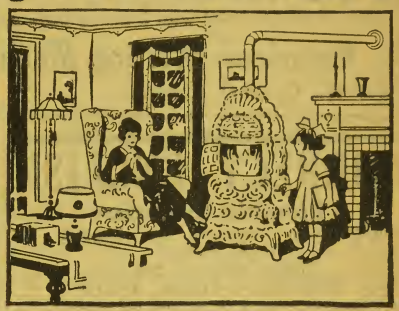


**16 Models — one for every heater, range or furnace**

## Hotter Than Coal

You can absolutely depend upon your Oliver to heat your rooms in the coldest Winter weather. **It gives three times the heat of coal.** Install this amazing new kind of heat and you can snap your fingers at coal shortages, poor quality or high prices.

**AGENTS**—Oliver agents earn as high as $500 a month—$25 a day spare time is easy. Exclusive territory Big, all-season seller. Write for Special Offer.



No worry when you can get three times the heat of coal by just turning a valve! No coal, wood, ashes, odor, smoke. Saves money, time and health. Physicians recommend the Oliver as a safeguard against colds, influenza, &c.

Fine all-year round. Does away with overheated and underheated rooms in moderate weather. Ends the roasting kitchens of July and August. No need to have a fire all day long just to do a little cooking.

### Use It 30 Days—FREE

Now, once and for all time, do away with household dirt and drudgery. End ashes, dirt, smoke, odor, chopping, shoveling, carrying dirty, heavy coal and wood. Send immediately for the FREE ATTRACTIVE BOOKLET, "New Kind of Heat," telling all about this amazing new invention Shows exactly how it burns, how it is different from all other burners and tells how you can use it in your stove thirty days free. The famous Oliver Ironclad Money-Back Guarantee protects you.

### SEND FOR BIG OFFER

If you write at once you will receive Mr. Oliver's very low introductory price offer and 30-day free trial.

# A New Skin in 40 Minutes

## With this Astounding BEAUTY CLAY

In far off Wales there are no bad complexions. The Welsh women, famed for the clarity and babe-like texture of their complexion, make a weekly habit of "claying" their skin, quite as regularly as one cares for the hair. A native clay of marvelous beauty power almost instantly restores full color and life to any skin it touches. A chemist who spent weeks in the Welsh hills has at last succeeded in confining the peculiar properties of this naturally endowed clay and his laboratory sends it direct to users—in its pristine strength. Here, at last, is a scientific, certain means of banishing blemishes, clarifying and coloring the skin, making it satiny-smooth—in 40 minutes.

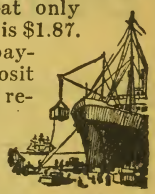
**Greatest Complexion News Ever Brought to America**

**Read the Special Offer!**

You are now invited to try it. The application is readily made by anybody, and the changes brought about in less than an hour will cause open-mouthed astonishment. As the clay dries the most delightful tingling is experienced in every pore. All the impurities are being literally pulled out! A half hour more and the clay mask is moistened and wiped off, revealing all the glory of a *perfect* complexion! In over six hundred test cases it has never failed. All ages respond to its magical effects, and regardless of how pimpled, clogged or dull the skin may be.

## At Present No Charge For $5 Jars

except the actual outlay for tariffs and raw materials! You are entitled to benefit by a discovery of this importance. So, for a limited time we will distribute regular, full-size $5.00 jars of Forty Minute Clay without profit—at only the actual cost, which is $1.87. This is not really a payment; rather, a deposit that we will promptly return if you are not unreservedly satisfied that this miracle clay is all we claim.



**SEND NO MONEY—See coupon below:**

**DERMATOLOGICAL LABORATORIES,**
**Dept. 242, Century Building, Chicago**

I accept your "no profit" offer Send full $5.00 jar of Forty Minute Beauty Clay **(Terra-Derma-Lax)** at net laboratory cost price of $1.87, which I will pay on delivery, plus postage. My money back if only one application is not completely satisfactory.

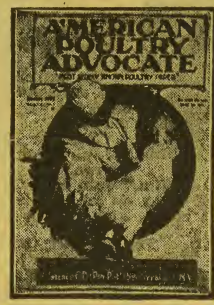
# "PLEASURE AND PROFIT FROM POULTRY"

## Tells of Successful Methods of Raising Poultry on Large and Small Plots of Land

DO you know how to start a profitable poultry plant? Do you know the best breeds to start with? Do you know how to get the most economical start? Do you know the size of the flock best suited to your needs and capital? Do you know how to master and apply the unit of operation?

Profit by the experiences of others—learn how the successful poultrymen of today raise and breed poultry for pleasure and profit.

"Pleasure and Profit from Poultry," written by Dr. N. W. Sanborn and revised in 1922 by Prof. L. N. Gilmore, of Syracuse University, contains 48 pages of practical poultry information. Read the following table of contents and then you will be able to judge of its value to YOU.



**Chapter I.** The advantage of buying day old chicks; the most economical way to start.

**Chapter II.** Making money with incubators. The kind of incubator to install; how to make money in hatching; most popular breeds to hatch; money in one-pounders.

**Chapter III.** Brooding. How many to a brooder; foods, best brooder to use.

**Chapter IV.** Feeding chicks. Two best methods; care in the brooder; regulating heat; two formulas for best chick food.

**Chapter V.** Pullets for laying. Best month to hatch; three best formulas for dry mash.

**Chapter VI.** Green foods. Alfalfa, mangels, clover, sprouted oats.

**Chapter VII.** Money in eggs. How to market to best advantage; how to make money in summer eggs; winter eggs; breaking up broody hens.

**Chapter VIII.** Saving time. Reducing manual labor; feeding short cuts.

**Chapter IX.** Culling the flock. Selling old stock; mature pullets; fancy stock; how to keep out disease.

**Chapter X.** Summer in the poultry yard. Breaking up matings; how disease is introduced; care of drinking water; feeding; room for growing chicks; home grown grain.

**Chapter XI.** Successful poultry farms. A white leghorn farm; autumn eggs; culling, your market for eggs and poultry.

**Chapter XII.** Fall months on the poultry plant. Buying pullets; alfalfa as feed; high protein feeds; housing.

**Chapter XIII.** Early production spells success. Does blood tell? Egg profits.

**Chapter XIV.** Artificial illumination. How to install and handle.

**Chapter XV.** December eggs. How to get maximum production; foods to feed; housing.

**Chapter XVI.** Selection of breeding stock. High standard; trap nesting; breeding for eggs; selecting breeders; breeding pens.

**Chapter XVII.** Fighting vermin. Red mites and lice; spraying houses; method of U. S. Department of Agriculture.

—and besides, a wealth of vital information valuable to everyone interested in poultry—coming from men who have been through it all and know what they are writing about from actual first-hand experience. Not a word of theory in it—just actual FACTS that YOU can profit by immensely.

You need "Pleasure and Profit from Poultry." We have a copy waiting for you and will give it to you for the asking with a new or renewal subscription to the American Poultry Advocate at only One Dollar. Fill out the following coupon, pin a dollar bill thereto (at our risk) and mail to us and we will send you a copy of the book without expense by return post, together with the American Poultry Advocate for one full year. DO IT NOW, as our supply of books is limited. The price of the book without the subscription to the American Poultry Advocate is 50 cents prepaid.

# Put Yourself in This Man's Place!

**"WHAT MADE JIM TAYLOR LATE FOR SUPPER?"**

Mrs Taylor was worried, for Jim was seldom late for supper Finally she heard footsteps outside and Jim opened the door.

"I couldn't help it, Polly—just couldn't help it," said Jim, as he put the bank book on the table, "we are going to have our new poultry house this winter. I have just paid off the mortgage on the place and bought the lumber for the new building, and see," as he took up the bank book, "we still have $2,100 in the bank."

"Just think, Jim," said Mrs. Taylor, "the chickens and **The National Poultry Institute** did it all."

"You are right. Polly It was a lucky day for us when we enrolled for their poultry course."

"It doesn't seem possible, does it, Jim," said Mrs. Taylor, "that two years ago you were working for someone else, and today we own our own home and poultry plant; we are able to put up a new poultry house, and have a good bank account besides. It beats working for the other fellow."

**NOW IS THE TIME FOR YOU.** THE BIG SEASON IS HERE. Put yourself in Jim Taylor's place. A new edition of the book, "How to Raise Poultry for Profit" has just been issued; send for your copy today; it's free. This remarkable book contains many valuable suggestions on poultry raising, and may prove the stepping stone to your future success. **Act quick. Send today.** A postal will do.

# Conkey's Big Poultry Book

Conkey's Poultry Book has been considered the poultry authority for a generation. New edition, just off the press, enlarged and more complete than ever.

It contains valuable information on Getting a Start, Housing, Back-Lot Rearing, Farm Poultry, Culling of Hens, Molting, Starting Chicks, Growing Birds, Feeding for Eggs, Ridding Chickens and Houses of Vermin, Poultry Diseases and their Successful Treatment, and much other valuable information. Whether you are a beginner or a professional, you need Conkey's Poultry Book. Ask for Free Copy.

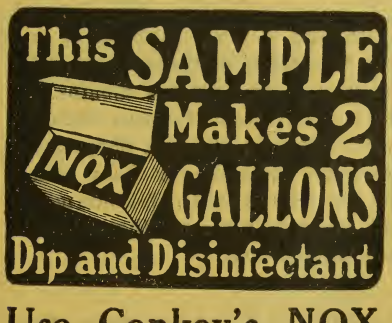
# Conkey's Buttermilk Starting Feed

THE ORIGINAL

It will prevent your big losses of little chicks, due to weakness and disease, and give your chickens that quick start in growth that is necessary to insure early broilers and layers. It also helps to prevent White Diarrhoea, as the lactic acid in the buttermilk helps to sweep away and neutralize the germs that cause it.

Conkey's is low in fibre and just right in protein, scientifically correct. Does not injure or overtax the sensitive digestive apparatus.

Conkey's is the only Buttermilk Starting Feed made by the Conkey Original Process, in which the buttermilk is thoroughly incorporated with the other ingredients. We use semi-solid buttermilk only.



## Use Conkey's NOX

once and you will prefer it to any other form of Disinfectant, Exterminator or Germicide. It is undoubtedly the most efficient coal tar preparation known to science at the present time.

## *This Sample Makes 2 Gallons Coal Tar Disinfectant*

We want you to try this new Solidified Coal Tar Disinfectant—Conkey's Nox. Destroys lice, mites, etc. It should be used constantly in disinfecting houses, roosts, nests, etc. Send 10 cents, coin or stamps, for sample package containing two cubes; for making two gallons. Circular free.

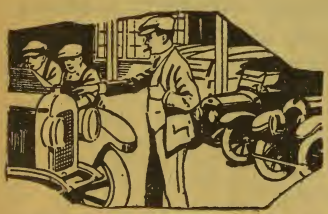
# It takes only 8 weeks to get a big job

Emanuel Rushfeldt, Alberta, says: "Earning $10 a day and only 20 years old."

**Read what these men are doing in the Auto and Tractor Business. Here is your big chance to get "on Easy Street." Come to these great shops on the biggest FREE offer ever made.**

## Big Firms Need Trained Men



Louis Beimer at 24 was made foreman over men many years older. That's not luck—it's Rahe training.

The Auto and Tractor Business is on the boom. Thousands of trained men will be needed during the next few months. I get calls every day from Garages, Battery Stations, Auto Repair, Welding Shops and other successful concerns for Rahe men. When the big fellows need high-grade men, they know where to come for them. They want Rahe trained men.

**My Training Unusual** Scientific tool training—that's the secret. You do things here according to the latest engineering standards. Thousands of dollars have been spent in modern tools and equipment. That's why my men are at home in the biggest shops in the country. If you want to succeed the way Beimer and Justus and the rest have—qualify by the same method.

# I'll Make You an Offer

**In order to fill the openings that now exist, I am making an offer no one has ever made before. It is so liberal that I reserve the right to withdraw it at any time without notice. Write at once and I will tell you about it in a confidential letter.**

**O. H. Justus owns a big agency and repair shop at Parkersburg, W. Va. He says "that my schools give motor secrets that will put any man 'on Easy Street.' "**

## SEND FOR FREE BOOK

My big illustrated training book tells how others are succeeding. It tells many things you ought to know about Autos and Tractors. Write for it and my short time offer NOW. It soon expires.

**W. W. Peace gets $250 a month and expenses operating a tractor in the oil fields.**

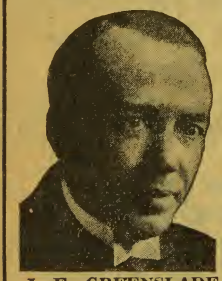
# It's a Crime to Slave for Low Pay—

## *When It's So Easy To Earn Big Money*

***If You Are Making Small Pay, Then You Ought to Investigate This Simple Plan That Has Shown Thousands the Way to Magnificent Earnings.***

IT is little short of an actual crime for a man to struggle along trying to make ends meet when he can easily step into a position with better pay and unlimited opportunities for making money.



J. E. GREENSLADE

**A Foolish Notion About Salesmen**

The average man imagines that, in order to make good in selling, he must be a "born" salesman. Nothing could be further from the truth. There is no such thing as a "born" salesman. Thousands of clerks, machinists, bookkeepers, factory hands, firemen and farmhands, to-day, are making big money in the selling field through the simple plan you are invited to investigate.

The sentence for a crime of this kind is "a lifetime of drudgery." Trying to make ends meet is a much harder task than making from three to ten times as much money as you are now making. For you can just as easily take advantage of the experience of countless others who, in one swift stroke, have jumped from small pay in blind-alley jobs to incomes of anywhere from $5,000 to $10,000 a year.

## The Secret Revealed

Take this situation: A man who had worked all his life in a routine job at low pay suddenly surprises his friends by moving into a better neighborhood, taking a big house, buying a car and blossoming out as a well-to-do and influential citizen in his new community. How did he do it? What is the secret that he used? Simple enough. He knew that the biggest money in business is in Selling, and though he felt that he couldn't sell a thing, he suddenly learned the secrets that make Master Salesmen and then began to make big money.

A whole book could be filled with stories equally amazing of men who have taken this new, quick road to big pay. A few extracts from actual letters are given in the panel on this page. Nor is there anything exceptional about these men. They were once in the same circumstances that you may be in now. They were discouraged, tired of working for small pay, and disgusted with their prospects. And then, as though by a

touch of magic, they were earning salaries that they had never dared hope for.

## Easy Work—Big Pay

For they entered this new field—a field that they had never dreamed of as theirs—one that is not only the most interesting, but the best paying branch of all business—Selling. Sounds remarkable, doesn't it? Yet there is nothing remarkable about it. There are certain ways to approach different types of prospects to get their undivided attention — certain ways to stimulate keen interest — certain ways to overcome objections, batter down prejudices, outwit competition and make the prospects act.

**These Men Investigated and—**

As an office worker in Detroit, Mr. B. H. Voss slaved away for $125 a month. But he saw his one big opportunity — grasped it —and increased his pay to $500 a month.

As a farmhand, George W. Kearns, of Oklahoma City, grasped the same opportunity. He writes: "Last week I cleared $306, and this week $218." And Mr. Kearns earned $60 a month previously.

Mr. J. L. DeBonis, Chicago, now enjoying magnificent earnings. Before investigating, he was earning $16 a week as a clerk.

When Charles Berry, of Winterset, Ia., decided that it was a crime to slave for low pay, he was earning $18 a week. And then the very first month he earned $1,000.

## Secrets That Make Master Salesmen

No matter what your earnings may be, you can quickly learn the secrets of Selling that have put thousands into the big-pay class. For the past fifteen years the National Salesmen's Training Association has successfully trained thousands for the selling field and through its Free Employment Service helped thousands to secure good selling positions. And through the National Demonstration Method you gain actual experience in overcoming sales problems of all descriptions while studying in your spare time at home. Then, through the National Salesmen's Training Association System of Electives, you get specific instructions in how to sell the line or lines you want to handle. In other words, the proved selling plans of master salesmen in all lines are laid before you.

# Send for This FREE Book

## *"Modern Salesmanship"*

Without cost or obligation, we will gladly mail you a copy of a very interesting book, "Modern Salesmanship." In addition to many interesting facts about salesmanship, it will also give you full information as to how you can become a highly paid salesman. No matter what you may think now, this book will prove to you that it's a crime to slave for low pay when magnificent earnings are within easy reach. There is no obligation, so just fill in the coupon and mail it to-day.

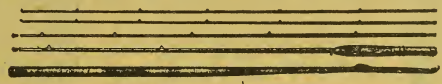
# Abbey & Imbrie

Established 1820

"Fishing Tackle that's Fit for Fishing"

This is Our 103rd Year

## OUR BEST FLY ROD



**Centennial Fly Rods**—These are our highest quality six-strip bamboo fly rods. Light and resilient, for long and accurate casts. Reserve power without stiffness. Selected split Tonkin cane. Hand-made nickel silver ferrules and reel seat. Agate guide on butt and tips, other guides snake pattern. Three pieces and extra tip; case for tips. Canvas partition bag. Lengths and weights: 8½ feet, 4¾ ounces; 9 feet, 5¼ ounces; 9½ feet, 5¾ ounces; 10 feet, 6¼ ounces. Two grades, "A" and "B," difference being in quality of cane and care used in fitting, gluing and finishing. Grade "A" retails at $35; Grade "B" at $25. Stiffened leather case for either rod, $9.60.

### *KEEPS 'EM ALIVE*

## Banta Minnow Pail

Note the air pump at the side. The Banta is aerated simply by pressing this button occasionally. No changing of water—no trouble—no loss of minnows through stale water. The Banta is self-cooling. Pail is covered with cloth. A wick inside pail is connected with cloth cover and keeps it damp. Evaporation of water from the cloth cools water in pail—it's the principle of the desert water jar. Capacity 10 quarts. Retails at $3.00.

### *FOR DAY OR NIGHT*

## "Glowbody" Minnow

(Patented)

Every fisherman should have a "Glowbody," one of our famous Centennial features, in his tackle box. It is one of the best bass catchers we have ever put out. Attracts bass day or night. Crystal body contains tube of permanently luminous material. Bass see it in all waters from afar as it spirals toward the angler. Double hook easily detached and single hook substituted if desired. Crystal body protected by wires. Retails at $1.00.

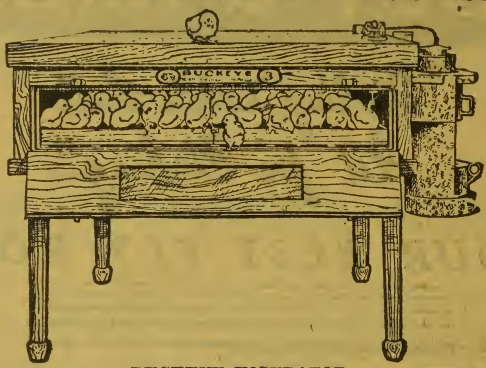
# BUCKEYE INCUBATORS

## HATCH MORE and STRONGER CHICKS

**Simple to Operate**

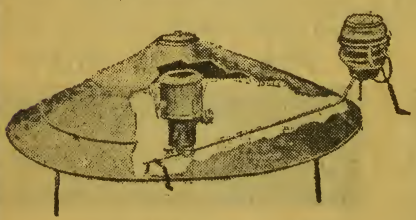


**Perfect in Results**

**BUCKEYE INCUBATOR**

The **BUCKEYE** will hatch more chicks and stronger chicks than any other make of incubator. It requires no artificial moisture; will operate satisfactorily in any climate, and requires no attention to the regulator from the time a hatch is started until it is finished.

**BUCKEYE "STANDARD" INCUBATORS** are equipped with every desirable device that could possibly add to the efficiency of an incubator. Only the best of materials are used and each machine is inspected by the National Board of Insurance Underwriters before it leaves the factory.



### Blue Flame Colony Brooder

Pronounced a "Winner" from its inception. Plenty of heat equally distributed to all parts of the brooder. Will accommodate a large number of chicks as well as small. The real thing in simplicity and efficiency. Has a gravity feed, thereby eliminating the troublesome needle valve. Made in three sizes.

### International Sanitary Hover

There are advantages in the **SANITARY HOVER** that cannot be found in other makes. Possesses qualifications in heating and ventilation which make it perfection in brooding devices. It has the highest percentage for broods raised to maturity.

# Learn WHY YOU STAMMER

***—and how you can be quickly and permanently cured***

**This 288-page Book Tells**—Here is a book worth its weight in gold to you if you stammer, stutter or have any speech trouble. It is a book fairly overflowing with the **real, definite, tangible, hard-to-get** facts about stammering. It is packed with **priceless pointers** that have **never before appeared in print**—tells dozens of things you have long wanted to know—tears away the veil of doubt, mystery and guesswork and **reveals the plain truth** about speech and its defects.

## Would You Like To Know

- —Why you are better at some times than at others?
- —Why you have trouble talking over the phone?
- —Why there is a difference when you talk to strangers?
- —Why you can sometimes sing without trouble?
- —Why you are more nervous at sometimes than at others?
- —Why some cases cannot be cured?
- —Why you talk differently when very angry?
- —Why you are sometimes free from your trouble?
- —How stammering is cured?
- —How to determine whether you can be cured?
- —How the author cured himself after stammering for 20 years?
- —How stammering causes nervousness?
- —How stammering affects the mind?
- —How stammering affects the health?
- —How stammering can be cured?
- —How we learn to speak?

This 288-page cloth-bound book, "Stammering--Its Cause and Cure" tells you all these things and--hundreds more. Send the coupon.

## Some of the Chapter Headings

The Secret of Curing Stammering
A Successful Method of Cure
Cases That Cannot Be Cured
How to Determine Whether You Can Be Cured
The Real Cause of Stammering and Stuttering
The Peculiarities of Stammering
The Intermittent Tendency
Can Stammering Be Outgrown?
Effect of Stammering on the Mind
Child Stammering -- Advice to Parents
Speech Disorders of Youth--and Their Dangers
Where Does Stammering Lead?
Some Cases I Have Met
The Cure of Stammering by Mail

## Based on 30 Years Experience

This book is the condensed and crystallized experience of America's greatest speech specialist, Benjamin Nathaniel Bogue, who gives to the stammerer in this book the result of more than thirty years' constant study, research and investigation, during which time he has met more than 20,000 stammerers, diagnosed 76,000 cases of speech trouble and corresponded with more than 190,000 others who stammer.

## A Remarkable Volume

No matter how long you have stammered or stuttered, no matter how old you are, what caused your trouble, how many courses you have taken, how many schools you have attended, how many books you have read or how much studying you have done, you need this book "Stammering—Its Cause and Cure"—with its wealth of new facts, late discoveries and startling revelations on stammering and kindred speech disorders. This book is clearly written, easy to understand and goes straight to the point, telling the HOW and the WHY and the WHEREFORE.

**"STAMMERING—Its Cause and Cure**

Contains 288 pages of facts, printed in clear, clean, readable type on Antique Book Paper. Bound in Maroon Book Cloth, cover and back stamped in Gold.

## Use This Coupon

**Get This $3 Book For Only 10 cents**

If you stammer or stutter or have any impediment in your speech, you are losing if you don't get this book. Find out how the author cured himself after being pronounced incurable by famous specialists; what causes your own trouble and whether you can be cured; get all these valuable pointers, these vital facts. Merely send the coupon with 10 cents coin or stamps to cover postage and packing and this $3 book will come to you all charges prepaid -- nothing to pay later--the book is yours to keep--to use--to profit by.

# Why the Kingsley Plan for the CORRECTION of STAMMERING is *different*

***Just a Few Testimonials***

"Only scientific and uniformly successful plan for cure of stammering. My personal experience testifies to its wonderful results."—E. T. Bailey. 5238 Jefferson St., Phila.

"Have attended different schools, but Kingsley Plan has features for successful correction of stammering that make it unique."—M. M. Strickler. Phila. Chamber of Commerce.

"Only course that embodies correct principles, compiled by founder who stammered for years. Kingsley Club, an association of former stammerers and graduates, is living testimonial."—Robt. M. Clutch, Sr. 722 Penfield Bldg., Phila.

Corrects fundamental faults by inducing proper mental attitude, harmonizing physical with mental effort and supplying inspiration and assurance necessary to make permanent habit of normal, natural speech. Is revelation to hear our students talk before large audience at monthly Kingsley Club events. Hopelessness, self-consciousness, fear, nervousness give way to hope, confidence and assurance under our system. Marvelous results with shell-shocked war veterans. No other course so deep, so fundamental, so thorough, yet so simple in principle.

Earle E. Liederman as he is today

# How Strong Are You?

## Can You Do These Things?

**Lift 200 or more overhead with one arm;**
**Bend and break a horseshoe;**
**Tear two decks of playing cards;**
**Bend spikes;**
**Chin yourself with one hand?**

Can you do any of them? I can and many of my pupils can. It is remarkable the things a man really can do if he will make up his mind to be strong. **Any man.** It is natural for the human body to be strong. It is unnatural to be weak. One leading writer on physical culture says: "It is criminal to be weak." I have taken men who were ridiculed because of their frail make-up and developed them into the strongest men of their locality.

## I WANT YOU FOR 90 DAYS

It once took four weeks to cross the ocean—now it takes less than one. In olden days it took years to develop a strong, healthy body. I can completely transform you in 90 days. Yes, make a complete change in your entire physical make-up. In 30 days I guarantee to increase your biceps one full inch. I also guarantee to increase your chest two full inches. But I don't quit there. I don't stop till you're a finished athlete—a real strong man. I will broaden your shoulders, deepen your chest, strengthen your neck. I will give you the arms and legs of a Hercules. I will put an armor plate of muscle over your entire body. But with it comes the strong, powerful lungs which enrich the blood, putting new life into your entire being. You will have the spring to your step and the flash to your eyes. You will be bubbling over with strength, pep and vitality.

### A DOCTOR WHO TAKES HIS OWN MEDICINE

I was once a frail weakling in search of health and strength. I spent years in study and research, analyzing my own defects to find what I needed. After many tests and experiments I discovered the secret of progressive exercising. I have increased my own arm over 6½ inches, my neck 3 inches and other parts of my body in proportion. I decided to become a public benefactor and impart this knowledge to others. Physicians and the highest authorities on physical culture have tested my system and pronounced it to be the surest means of acquiring perfect manhood. Do you crave a strong, well-proportioned body and the abundance of health which go with it? Are you true to yourself? If so, spend a pleasant half hour in learning how to attain it. The knowledge is yours for the asking.

### Send for My Book "MUSCULAR DEVELOPMENT"—It is FREE

It contains dozens and dozens of full page photographs of myself and my numerous pupils. This book is bound to **interest** you and **thrill** you. It will be an **impetus**—an **inspiration** to every **red-blooded man.** I could easily collect a big price for a book of this kind just as others are now doing, but I want every man and boy who is interested to just send the attached coupon and the book is his—**absolutely free.** All I ask is the price of wrapping and postage—10 cents. Remember, this does not obligate you in any way. I want you to have it. **So it's yours** to keep. Now don't delay one minute. This may be the turning point in your life. Tear off the coupon and mail at once while it is on your mind.

Cultivate your mind. Develop your literary gifts. Master the art of self-expression. Make your spare time profitable. Turn your ideas into dollars.

Courses in Short-Story Writing, Versification, Journalism, Play Writing, Photoplay Writing, etc., taught personally by Dr. J. Berg Esenwein, for many years editor of Lippincott's Magazine, and a staff of literary experts. Constructive criticism. Frank, honest, helpful advice. *Real Teaching.*

**One pupil has received over $5,000 for stories and articles written mostly in spare time—"play work," he calls it. Another pupil received over $1,000 before completing her first course. Another, a busy wife and mother, is averaging over $75 a week from photoplay writing alone.**

There is no other institution or agency doing so much for writers, young or old. The universities recognize this, for over one hundred members of the English faculties of higher institutions are studying in our Literary Department. The editors recognize it, for they are constantly recommending our courses.

We publish **The Writer's Library**, descriptive booklet free. We also publish **The Writer's Monthly**, an indispensable magazine for literary workers, sample copy 25c. Besides our teaching service, we offer a manuscript criticism service.

**150-page illustrated catalogue free.**

# "You've Gone Way Past Me, Jim"

"TODAY good old Wright came to my office. All day the boys had been dropping in to congratulate me on my promotion. But with Wright it was different.

"When I had to give up school to go to work I came to the plant seeking any kind of a job. They put me on the payroll and turned me over to Wright, an assistant foreman then as now.

"Well, I did my best at my routine work, but I soon realized that if ever I was going to get ahead I must not only do my work well, but prepare for something better. So I wrote to Scranton and found I could get exactly the course I needed to learn our business. I took it up and began studying an hour or two each evening.

"Why, in just a little while my work took on a whole new meaning. Wright began giving me the most particular jobs — and asking *my* advice. Next thing I knew I was made assistant foreman of a new department. I kept right on studying because I could see results. Then there was a change and I was promoted to foreman—at good money, too.

"And now the first big goal is reached—I am superintendent, with an income that means independence, comforts and enjoyments at home—all those things that make life worth living.

"Wright is still at the same job, an example of the tragedy of lack of training. What a truth he spoke when he said today, 'You've gone 'way past me, Jim—and you deserve to.' Heads win—every time!"

Yes, it's simply a question of training. Your hands can't earn the money you need, but your head can—and will—if you only give it the chance.

The International Correspondence Schools have helped more than two million men and women to know the joy of getting ahead in business and in life, and they can help *you!*

All we ask is the chance to prove it—without obligation on your part or a penny of cost. Just mark and mail this coupon.

# See How Easy It Is To Learn Music This New Way

YOU know how easy it is to put letters together and form words, once you have learned the alphabet. Playing a musical instrument is not very much different. Once you learn the notes, playing melodies on the mandolin, piano or violin is simply a matter of putting the notes together correctly.

The first note shown above is F. Whether you are singing from notes, playing the piano or banjo or any other musical instrument, that note in the first space is always F. The four notes indicated are F, A, C, E, easy to remember, because they spell the word "face." Certain strings on the mandolin, certain keys on the piano represent these same notes—and once you learn them, playing melodies on the instrument is largely a matter of following the notes.

Any one can now learn to play a musical instrument at home, without a teacher. A new, simplified method of teaching reduces all music to its simplest possible form. You can now master singing, piano playing or any musical instrument you wish, right at home, quickly, easily, without endless study and practice.

You don't have to know anything whatever about music to learn to play a musical instrument this new way. You don't have to pin yourself down to regular hours, to regular classes. You practise whenever you can, learn as quickly as you please. All the intricate "mysteries" of music have been reduced to a method of amazing simplicity—each step is made as clear as ABC. Thousands have already learned to play their favorite musical instruments this splendid, new, quick way.

**You Can Play Your Favorite Instrument Three Months From To-Day.**

If you are dissatisfied with your present work, let music act as a stepping-stone into a new career. If you long for a hobby, a means of self-expression, let music be the new interest in your life. If you wish to be a social favorite, if you wish to gain popularity—choose your favorite instrument and, through the wonderful home-study method of the U. S. School of Music, play it three months from to-day.

**LEARN TO PLAY ANY INSTRUMENT**

| | |
|---|---|
| **Mandolin** | **Saxophone** |
| **Drums and Traps** | **Piano** |
| **Harmony and Composition** | **Organ** |
| | **Violin** |
| **Sight Singing** | **Banjo** |
| **Ukulele** | **Clarinet** |
| **Piccolo** | **Flute** |
| **Trombone** | **Harp** |
| **Hawaiian Steel Guitar** | **Cornet** |
| | **'Cello** |
| | **Guitar** |

**Voice and Speech Culture**

**Automatic Finger Control**

You can do it. Youngsters of 10 to 12 years have done it, and men as old as 60 have found new interest and enjoyment in learning how to play a musical instrument. You don't have to listen while others entertain any longer. YOU can be the center of attraction, the talented person who holds the audience fascinated.

**Free Book Explains New Method.**

Every one who is interested in music should send at once for our valuable book, "Music Lessons in Your Own Home." It not only explains the wonderful new simplified method of learning music but tells about a special short-time offer now being made to music lovers.

Mail this coupon at once for your copy. Remember, it obligates you in no way whatever—it's free. But act now before the supply is exhausted. **U. S. School of Music, 1133 Brunswick Building, N. Y. C.**

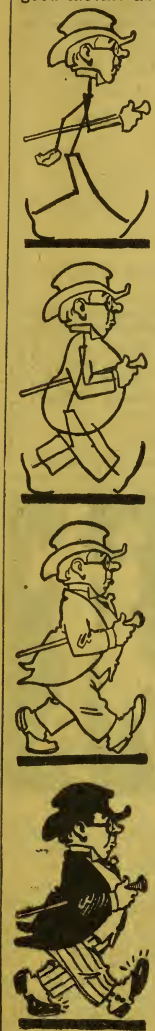
# LEARN CARTOONING

## —and Increase Your Income

IF you like to draw—if you find pleasure in trying to make sketches and cartoons, have your ability developed and earn a good income as a cartoonist.



**Hundreds of nationally known cartoonists such as Branner of the Chicago Tribune, Blosser who draws "Freckles and His Friends," Gene Byrnes creator of "Reg'lar Fellers," Locher of the New York World and others equally well known, took the Landon Course at home in their spare time and fitted themselves for excellent positions, paying from $50 to $200 and more per week.**

What others have done you can do with the same training The Landon method of teaching makes **original drawing** easy to learn. By means of an extensive series of "Landon Picture Charts" every necessary detail of original drawing is explained step by step, so that you can **easily learn** to do successful creative work.

### Facts That Determine the Superiority of the LANDON SCHOOL

1. **From the very beginning the Landon Course teaches original drawing — no copying. The Picture Chart Method is used exclusively.**
2. **Individual attention and criticism of students' work. Personal coaching wherever necessary.**
3. **Instruction on how to originate new cartoon ideas is an exclusive feature of the Landon Course.**
4. **Cost is within reach of all. Easy payments can be arranged.**

Write for full information, sample Picture Chart and book of cartoons by successful Landon students. **Please state your age.**

# An Easy, Delightful Way to Earn Money at Home

TAKE up Millinery. It is just the kind of work that every woman and girl likes to do—it is dignified — and it pays splendidly. Through the Woman's Institute you can now learn easily and quickly in spare time at home all the secrets of successful millinery—how to design, make and trim hats of every kind—how to make ribbon flowers and bows—how to renovate and make over hats, how to go in business for yourself.

### Become a Milliner
### Have a cozy little shop of your own

Even though you are now employed or have household duties that take up most of your time, you can learn in a few weeks, in your spare time evenings, to make pretty, becoming hats for yourself at one-fourth their cost in the shops. Then you can start making hats at home for your friends, and if you want to, you can secure a position, or better still, have a cozy little shop of your own and make $20, $30, yes, even $40 a week and more.

It costs you nothing to find out all about the Woman's Institute and what it can do for you. Just send a letter, post card, or the convenient coupon to the Woman's Institute, Dept. 7023-A, Scranton, Penna., and you will receive, without obligation, the full story of this great school that is bringing to women and girls all over the world the happiness of having pretty, becoming clothes and hats, savings almost too good to be true, and the joy of being independent in a successful business.

# FREE Five Dancing Lessons

## To Prove You Can Learn to Dance at Home in One Evening

1. **The Secret of Leading.**
2. **How to Gain Confidence.**
3. **How to Follow Successfully.**
4. **The Correct Dancing Position.**
5. **A Fascinating New Fox Trot Step.**

For a limited time, Arthur Murray, America's greatest teacher of social dancing, makes this special offer to prove anyone can learn by his remarkable new, easy method, at home, in a few hours, to be a really good dancer. Even if you don't know one step from another, by Arthur Murray's method you can quickly and easily master any dance without partner and without music. **More than 60,000 have learned this new way. Your own success is guaranteed.**

Arthur Murray's method is so amazingly simple it is revolutionizing the teaching of dancing. It is easier and much less expensive than a personal teacher.

All the very newest dances and the standardized popular dances such as the Fox Trot, Waltz, One Step, etc., can be mastered at home in one short evening. You can teach your children while you are learning. In fact, many whole families have become really good dancers from one set of instructions.

There is no need of being a wallflower. Everyone admires and wants to meet and dance with an accomplished dancer. Learn in private and surprise your friends. Be more popular by becoming a good dancer **soon.** This offer of five free lessons absolutely free may be withdrawn at any moment. Send for your lessons (mailed in plain wrapper) today. No obligation—the lessons are yours to keep. To pay the cost of handling, mailing, etc., send 25c.

# Five Facts About
# LAW
## *Every Business Man Should Know*

1. Eighty-five (85) per cent. of all civil suits today involve BUSINESS disputes.
2. Every transaction in business involves a legal principle.
3. "Ignorance of the Law Excuses No One," is the rule enforced by the courts.
4. Laws are made as GUIDES to proper conduct; operating a business without legal knowledge is like sailing the high seas without a compass.
5. Business needs law-trained executives—opportunities are unlimited for law-trained men.

You can now acquire a complete legal education—at home, in spare moments, without interruption to your regular work.

Ex-President Taft, and 80 other eminent authorities have co-operated to produce the Modern American Law Course of the Blackstone Institute, a home study course in law which already has started 45,000 ambitious men on the road to greater success.

Thousands of Blackstone students have been admitted to the Bar and are today successful lawyers and judges. Thousands of others have fitted themselves for bigger things in business.

The course is endorsed and recommended by leading law and commerce schools as the foremost non-resident law course in the country. It is arranged in a way that makes law among the most fascinating of all home courses. Easy to grasp—interesting—practical—and complete.

No matter what your business or your position, a knowledge of the Law will pave the way for bigger responsibilities and increased income. Clarence Saunders, head of the Piggly Wiggly Stores, himself a Blackstone student, says, "Law training makes any man more efficient, more valuable."

You, too, can assure greater success by learning LAW. Just how you can do it is told interestingly in our course.

In addition to giving you full facts about the Modern American Law Course, this book contains many helpful legal pointers that will be of value to you in your everyday work. It answers such important questions as, "Must an agreement, to be binding, always be in writing?" "Does a receipt in full always protect the holder against further demands?" etc. The legal illustrations it contains, in story form, may be the means of saving you thousands of dollars. The book is yours, free for the asking. Mail the coupon today—Now—there's no obligation.

# A New Way to Health and Strength

**Every Day Brings More Reports of Remarkable Self-Cures Effected Through the Pages of this Book.**

**ANYBODY Can Apply COUÉ'S Method of AUTO-SUGGESTION in the Building of Body and Mind.**

## *"Day by Day, in Every Way, I Am Getting Better and Better"*

ALL the world is speaking about Emile Coué, the modest French chemist, who cures diseases without medicines, surgery, diet, exercise or any other standardized healing system. Rheumatism, asthma and even paralysis and spinal deformity have been reported cured through his methods. Minor ailments of all sorts yield readily to his methods.

It is so easy to follow his personal instructions that anyone can apply them immediately after one reading. They consist of a few simple rules which have been thoroughly tested by thousands who have found them to be completely effective in regaining or fortifying health, rebuilding human bodies, awakening undreamed-of powers, and creating new life.

LUTHER BURBANK, the great thinker and famous botanist, was so profoundly impressed that he wrote as follows:—*"Emile Coué merits our joyous admiration, universal love and immortal thanks for his wonderful emancipation proclamation contained in his book."*

### A Few Unsolicited Testimonials Taken from the Scores That Reach Us

*"I have cured myself of stomach trouble of long standing by application of Emile Coué's method as explained in his book."*
Mr. L. A. H., Riversburg, Pa.

**"I suffered for years from neurasthenia which involved the entire digestive tract. At last I have found what I consider the permanent cure for neurasthenia and that is by following the wonderful method taught by Emile Coué."**
**Mr. W. K. C., Barnesville, Ohio.**

*"Words cannot explain my happiness and joy. The doctors have been wanting to operate on me for nine years for a growth in the neck of my bladder—after receiving Emile Coué's book and applying his methods, all the inflammation is gone and the growth is also going away. I was having serious trouble with my eyes, which has also almost gone."* Mrs. A. B. C., Quincy, Ill.

**"For years I had a spinal curvature and I had given up hope of a cure, two or three bones being misplaced, making a hollow in the back. I hardly know how to explain it. I am very thankful to Dr. Coué to find that my spine is straightening and the hollow has filled out."**
**Mrs. F. G. D., Poplar Hill, Md.**

*"Emile Coué's method is the most effective of any I have tried. In its simplicity it works wonders. I cannot begin to express the torture of body and mind which I suffered. Now, I am happy to say I am well and at peace."*
Mrs. J. D. T., Charleston, W. Va.

**"I have had an almost complete healing from a chest pain that for nine years has given me the most terrible suffering, almost a death agony, whenever I would go upstairs or walk hurriedly. I began to use the mental suggestion as soon as Coué's book came to me."**
**Mrs. C. H. W., Mansfield, Ohio.**

# *The Man Who Says—*
# "Nobody Ought to be Sick"
## *and Helps You Prove It*

EMILE COUÉ

**The Wonderful Achievements of EMILE COUÉ in Europe Are Now Being Nearly Duplicated in America by Many People After Merely Reading This Book.**

Thousands of lives have been made richer in every respect by this book. Many who have been sick for long periods have been cured. Those who are in average health have found the secret of remaining so and building themselves up to a greater physical well-being. Some who were sound physically, but mentally and spiritually disturbed, have found peace in the pages of this book. Countless numbers of people are freeing themselves from the terrors of lurking ill-health, despondency mental inertia and failure. You can benefit by Coué's teachings no matter what the circumstances in which you find yourself.

### What Is Autosuggestion?

Emile Coué has made the discovery that it is not the will which controls our lives, but our imagination. He has demonstrated again and again in his clinic that through the subconscious or imagination, we can direct forces in ourselves which will contribute powerfully to our regeneration. His greatness lies in the fact that he has taken this idea away from the complexities of science and presented it in such a simple fashion that it can be understood immediately and applied with ease.

### COUÉ Takes No Fees

**Your guarantee** of the sincerity of Emile Coué is that he accepts no fee for his treatment. He impresses upon everyone that all he can do is to show them how to use this element of Autosuggestion directly and effectively for one's own good.

And that is what he does in his book. He has written in the simplest language his own personally-uttered instructions as to just how you can apply his methods to yourself, and, if you wish, your family and your friends. No will power, personality or high education are necessary. Coué expressly states that there should be *no effort* put forth. And herein is the secret of the great success of his method; which he calls Conscious Autosuggestion. Coué discovered exactly the RIGHT THING TO DO to set to work these great forces in the subconscious which mould the body and control the source of health and everything that goes to make a full and worth-while life.

And he tells YOU how you can do this yourself at any or all times without help from anybody else, in his remarkable book.

## SELF MASTERY Through Conscious AUTOSUGGESTION

**It contains a complete exposition of his theories and methods and amazing cures and gives in detail, step by step, word for word, just what you should do to get immediate and complete benefits from his system.**

When people of the rank and importance of **Lord Curzon,** Foreign Minister of Great Britain, and **Countess Beatty,** who can afford the best of medical attention, sought out Coué last summer and were cured completely by him of serious illnesses, there must be truth and power in Autosuggestion as contained in Coué's methods, especially when these people out of gratefulness, made public announcement of the fact and gave Coué full credit for their cures.

**Dr. Frank Crane,** whose judgment on matters is read daily by 2,000,000 people, said of Coué "He helps people get well by Autosuggestion."

**Henry Ford,** the great captain of industry and apostle of common sense, said in a recent interview: "I have read Coué's Philosophy. He has the right idea."

Only $1.00 makes this book and all its possibilities for your health, happiness and success your permanent possession. His book gives you the full benefit of his methods just as if you were receiving his personal treatment in his own clinic Send for this book NOW and....Mail the coupon below.

# IF YOU CAN YOU CAN SELL

**WILLIAM MAXWELL**
**"America's Best Known Sales Manager"**
**WHAT OTHERS SAY OF HIM:**

Mr. Maxwell has been over every step of the road that led from canvassing at twenty-one to a goal of affluence, responsibility, and power. That is why he is such a good guide

**New York Evening World.**

Mr Maxwell's instructions wear an aspect of novelty and originality. It is a great game with rich prizes for those who play it best.

**Philadelphia North American.**

William Maxwell gives straight talks. There are no useless discussions, only the real meat of selling in a nutshell—the experience tested salesmen stuff on approach and greeting, signing up a customer, overcoming indifference, and getting the order.

Practically any average man can develop and train himself into a good salesman.

**Birmingham (Ala.) Age-Herald.**

What would you do if you had your life to live over? Mr Maxwell sets himself to the serious answer of the question, not by the way of idle speculation, but in order that what he has learned by hard experience may be easily available for the youth of today.

**New York Evening Post.**

It is packed with what is usually termed common sense. **Los Angeles Times.**

## *A Tom-Cat Taught a Salesman a Valuable Lesson*

A GOOD many years ago a salesman was having too many cancellations of orders which he had worked hard to get. One day, while observing a tom-cat begging for its dinner—in contrast with its attitude after its stomach was filled—this salesman learned what was wrong with his own "get away" or "fade out," and corrected the trouble.

This same salesman borrowed some ideas from the stage—some from the methods of successful trial lawyers—and adapted them to salesmanship. He even delved into criminology because it is virtually a public clinic of human motives and emotions.

This salesman is William Maxwell, "America's Best Known Sales Manager." His rich experience, combined with that of sixteen other well known executives, is now available to you in a highly practical course of instruction. It will interest not only salesmen and sales executives but also every other man who appreciates the importance of knowing how to sell himself and his ideas.

# WILLIAM MAXWELL

# SELL YOURSELF ANYTHING

## *"I closed the Scotchman this A.M."*

IT was a $15,000 equipment deal with a hard-headed Scot, and the negotiations had seemingly reached an impasse. The student, an experienced salesman in the Middle West, called on us for special instructions. A few days later he wrote us as follows: "You will be more than pleased to know that I followed your advice and closed the Scotchman this A. M.; so I will have to give you all the credit."

**A New York student** has just written us: "I utilized the instruction in Lesson 20 in approaching the presidents of the largest New York banks and have had no trouble in making appointments with them. Yesterday I called on five New York bank presidents (by appointments thus made) and was successful with two of them."

**A famous Princeton football and baseball star,** who is now a successful salesman, writes us: "I gained more in the first four lessons than I did all last year in taking the course in salesmanship at one of the large universities. If a man can't sell after studying your course, it is either because he is dumb or has merely read and not studied what you say."

These are extracts from three of the many enthusiastic letters that come to us daily. Our course in salesmanship is unique in that, as one of our students has aptly said, we "not only tell what to do and say, but exactly **when** and **how** to do and say it.

**FREE**

The Maxwell method of teaching salesmanship is founded on the great truth that a man must be able to **sell himself** before he can expect to sell his merchandise or his ideas.

William Maxwell, "America's Best Known Sales Manager" has devised a Self-Analysis Chart which, when conscientiously filled out by you, enables us to advise you what qualities to cultivate to improve your ability to sell yourself. His opinion costs you nothing and puts you under no obligation. Yet, the chart and our free booklet, "How to Sell Yourself," may be of great help to you. Send for them to-day.

## Special Notice to Employers

Without charge to anyone, we are glad to place responsible employers in touch with salesmen and sales executives who have demonstrated their intelligence, industry, and powers of application. This service is not available to employers whose financial responsibility is doubtful, nor to those engaged in questionable enterprises.

**William Maxwell Institute**

402 Second National Bank Bldg., Orange, New Jersey.

Please send me, without c h a r g e or obligation, your Self-Analysis Chart and the booklet, "How to Sell Yourself."

THIRTY-EIGHTH YEAR

OF PUBLICATION

COPYRIGHTED, 1923, BY THE PRESS PUBLISHING CO.
(THE NEW YORK WORLD)

PULITZER BUILDING, 53-63 PARK ROW, NEW YORK

# PREFACE.

The World Almanac and Book of Facts is presented to the American public for the thirty-eighth year of its publication improved in form, handier to consult, easier to read, better printed and on better paper.

Readers who in constantly increasing numbers have testified to its value as a book of daily and constant reference will find the tables of statistics revised up to the latest possible date by heads of departments in the National Government, in the States, in the cities (and particularly in New York City); and by men of authority in banking, trade and industry; and in social, educational and religious activities throughout the country. To each and all of these men and women the editor takes pleasure in here acknowledging his indebtedness and expressing his keen appreciation.

New statistical tables present the latest Census figures on population, vital statistics and industries, which are supplemented by those of the Departments of Agriculture, Commerce, Labor and the Interior, all setting forth in form the material growth of the Republic.

In addition The World Almanac presents this year descriptions of the several States of the Union and its dependencies, and descriptions of all the foreign countries with their colonies and dependencies, carefully prepared in most condensed form from the best available authorities here and abroad. Much of this material has been furnished or revised by the embassies, legations and consulates of the countries concerned and by The World Almanac's correspondents abroad, and to them our thanks are due.

In this connection the editor wishes to present his especial thanks to Sir John Scott Keltie, long editor of the Statesman's Year Book; to Col. C. W. Whitaker, editor of Whitaker's Almanack; to Mr. Sayre, editor of Hazell's Annual, and to Francis W. Hirst, formerly editor of The Economist of London, for their most valuable advice and assistance. Thanks are also due to the officials in Washington of the Pan-American Union for information regarding the Latin-American states.

The record of the year 1922 is given with greater fulness than heretofore. The reader will find the carefully compiled chronology or diary of the year, the death roll, the benefactions, the record of scientific progress, the tariff law and other new and important laws, the full election returns, and the complete sporting events and records to which he is accustomed. He will also find new features in authoritative reviews of the financial world and bond market with the range of prices for stocks on the Exchange up to Dec. 1, 1922; also special reviews of labor and strikes, American relief work in Europe, the great progress made in aviation, the creation of the Irish Free State, the rise of the Fascisti; the platform of the British Labor party, and in another field, reviews of the year in the book world, art, music and the drama, and in wireless telegraphy and telephony.

Big problems of the year past and the year beginning are presented in special articles which will be welcomed for quick reference as the day's news will demand. The Reparation Commission furnished the figures showing exactly what Germany has paid in cash and kind and what the armies of occupation have cost.

The exact figures of the interallied debts owed to the United States with unpaid interest are furnished by the Secretary of the Treasury. The treaties of the Washington Arms Conference are given in full with resultant effects on the great navies of the powers. The progress of the League of Nations is shown by the Secretariat. The statement of Soviet Russia's finances is that given out officially at The Hague. The essential points of the Soldiers' Bonus Bill veto are recorded, and so also are those of President Harding's message on the Ship Subsidy Bill, together with a statement of the affairs of the United States Shipping Board, and some facts on the enforcement of the Prohibition law.

Readers will find The World Almanac more complete than before and better than ever. It has profited greatly in the past from their suggestions and will welcome any that may be made for its future betterment.

# INDEX.

The contents of the ALMANAC are arranged topically, so far as feasible, as will be seen on consulting the table of contents. See *italic running head* at top of each page for guide to topic.

In looking for an organization not in the Index, consult the general list of Associations and Societies; for institutions of learning, see the list of Colleges and Universities.

Dates of great fires, celebrations and other historical events will be found in Memorable Dates, Marine Disasters, the Dictionary of Biography, and other tables of dates grouped toward the end of the book.

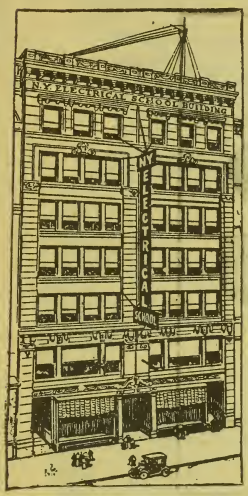
# Master Electricity By Actual Practice



The only way you can become an expert is by doing the very work under competent instructors: in other words, *learn by doing*. That is the method of the New York Electrical School.

Five minutes of actual practice properly directed is worth more to a man than years and years of book study. Indeed, Actual Practice is the only training of value, and graduates of New York Electrical School have proved themselves to be the only men that are fully qualified to satisfy EVERY demand of the Electrical Profession.

## The Only Institution of the Kind in America

At this "Learn by Doing" School a man acquires the art of Electrical Drafting, the best business methods, and experience in Electrical Contracting together with the skill to install, operate and maintain all systems for producing, transmitting and using electricity. A school for Old and Young. Individual instruction.

## *Over 8,000 Graduates Are Successful Men in the Electrical World*

No previous knowledge of electricity, mechanics or mathematics is necessary to take this electrical course. You can begin the course now and by steady application prepare yourself in a short time. You will be taught by practical electrical experts with actual apparatus, under actual conditions.

The N. Y. E. S. gives a special Automobile Ignition Course as an advanced training for Auto Mechanics, Garage Men and Car Owners. The course covers completely all systems of Ignition, Starters, Lighting and other electrical equipment on automobiles, motor boats, airplanes, etc.

*Let us explain the courses to you in person. If you can't call, send now for 64-page book—it's FREE to you.*

# STEINWAY

## *The Instrument of the Immortals*

## *A Companion of the Years*

SOMEBODY has said that we should choose a piano as carefully as we choose a husband or wife. First, because it is to be a companion of our inward and intimate life; second, because we want it to be with us for a lifetime. An unwisely chosen piano we apologize for as the years go by and at the earliest opportunity we rid ourselves of it; a wisely chosen piano endears itself with time and we contemplate it with increasing pride.

The Steinway tradition is to make the finest possible piano and to sell it at the lowest possible price and upon the easiest possible terms. The moderate cost and the convenient terms upon which you can own a Steinway will probably surprise you greatly.

*Any new Steinway piano may be purchased with a cash deposit of 10% and the balance extended over a period of two years. Used pianos taken in exchange.*

***Prices: $875 and up***

In Greater New York Steinway pianos are sold only at Steinway Hall.

STEINWAY & SONS, Steinway Hall, 109 E. 14th Street

*Subway express stations at the door*

**Also Pianos for Rent**

AT ALL DRUG STORES

# BROWN'S BRONCHIAL TROCHES

were first introduced to the public in the year 1850 and are known over the entire world as a preparation of superior merit for the relief of coughs and throat troubles.

They give prompt and effective relief in the coughing spells and throat irritation incident to Bronchitis, Asthma and Lung troubles.

Of great value to singers, speakers, preachers and teachers, as a means to clear the voice, remove hoarseness and irritations caused by use of the voice.

As they contain no opiates or anything injurious, BROWN'S BRONCHIAL TROCHES may be used in all cases where cough or throat lozenges are employed, without the least danger.

Sold only in boxes. Not sold by weight.

# The Remington Portable

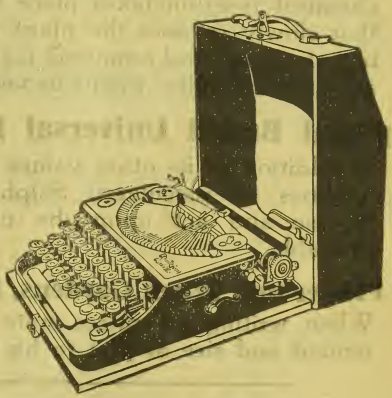
is the most complete of all portable typewriters.

It has the standard keyboard, with 42 keys, in four rows, and no shifting for figures—just like the big machines.

It has the automatic ribbon reverse and every other feature to which you are accustomed on the larger typewriters.

It is so small and compact that it fits in a case only 4 inches high—and so light that even a child can carry it easily.

"It carries its table on its back." This permanent baseboard makes its use always easy and convenient, even on your lap.



Sold by Remington branch offices and dealers everywhere.

Send for our illustrated "For You—For Everybody."

**Address Department 102**

## Remington Typewriter Company

(INCORPORATED)

**374 Broadway** **New York**

Paragon Ribbons for Remington Portable Typewriters, 50c. each—$5 a dozen.

***Universal*** ***Fertilizer***

***Analysis***

Ammonia.....5%
Phosphoric Acid.....5%
Potash.....5%

**Elephant Brand Universal Fertilizer**

In addition to the 5% Soluble Phosphoric Acid contains large quantities of Phosphates designed to be available in the plant and vegetables when most needed. Unlike many other fertilizers it is slowly soluble and will not entirely dissolve in water. A chemical reaction takes place with nature's assistance that slowly releases the plant food. A liberal quantity of potash and ammonia is present to insure a good start for the bulbs, plants or vegetables.

**Elephant Brand Universal Fertilizer**

In addition to its other values contains the germicidal qualities of inoculated Sulphur that destroy plant disease and act upon the phosphate, rendering it available.

**For Flower and Truck Gardens, Lawns and Farms**

When writing for prices state purpose for which intended and size of plot to be treated.

*Sanford Bennett at 50* *Sanford Bennett at 72*

# Old at Fifty Young at Seventy

Sanford Bennett became famous as one who was "an old man at 50—a young man at 70," because at 70 years of age he was a younger looking, younger feeling and younger acting man than he was at 50.

By the time he had reached the half-century mark in years, Sanford Bennett, a well-known business man, discovered that he was an old man—nervous, irritable, a victim of chronic dyspepsia, rheumatism and other ailments that afflict people who neglect the fundamental rules of health.

It was then that he started to create a system of exercise of his own—one that required no paraphernalia of any kind—and which could be practised each morning before arising. Exercising in bed! A new idea, but one that proved to be his salvation, as it has to many thousands of others who have followed Mr. Bennett's methods.

No medicines—no drugs—just a few simple exercises developed to their highest efficiency through constant application and a study of Nature's methods of regeneration and rejuvenation. Mr. Bennett actually discovered the secret of longevity—the secret of defying old age—and he reveals this in his book, "Old Age—Its Cause and Prevention"—a book that for ten years and more has stood every test in actual performance by men and women who have been restored to health and usefulness by following its teachings.

## *Two Books You Must Own*

# OUTWITTING OUR NERVES

*By* JACKSON, M. D., and SALISBURY

THIS is the most cheerful, the most readable, the most generally helpful health book published in years. Its success has already been phenomenal. It is almost impossible to conceive of anyone reading it without gaining benefits worth many times its cost. Doctors have prescribed it by the hundreds of copies. It has actually revolutionized the life-time habits of many a reader. *Price $2.50.*

# OUR REPUBLIC

*By* S. E. FORMAN, PH. D.

HAVE you a reliable, up-to-date, entertainingly written history of the United States? Every American's library, however small, should include that. Dr. Forman's new volume begins at the very start of our history and comes up through the World War and the Armament Conference, and it gives the whole story of America—not only politics and war but also our industrial and social life as well. A large handsome volume of nearly 1,000 pages. Illustrated and indexed. *Price $5.00.*

"Outwitting Our Nerves" and "Our Republic" can be bought at all bookstores or from the publishers, The Century Co., 353 Fourth Avenue, New York City.

FREE: "The Centurion," a 16-page illustrated monthly magazine containing extracts from books and news and comments about authors and their work, will be sent regularly and without charge to anyone requesting it. Address The Century Co., 353 Fourth Avenue, New York City.

26—Q

# The World.

**JOSEPH PULITZER.**

**April 10, 1847 ✝ October 29, 1911.**

THE WORLD, as established by JOSEPH PULITZER, May 10, 1883:—

"An institution that should always fight for progress and reform, never tolerate injustice or corruption, always fight demagogues of all parties, never belong to any party, always oppose privileged classes and public plunderers, never lack sympathy with the poor, always remain devoted to the public welfare, never be satisfied with merely printing news, always be drastically independent, never be afraid to attack wrong, whether by predatory plutocracy or predatory poverty."

As must be the case for years to come, The World's editorial policy in 1922 included anxious thought for the improvement of international relations in a world harassed by the after-effects of the great war. In its domestic policy it fought, with some success in the event, against a normalcy which in an abnormal condition could be but a pretense.

What The World thought necessary to the restoration of real peace it stated in July, in the following platform:

**The Reduction of the Reparations.**
**The Reduction of the Debts.**
**The Reduction of the Armaments.**

In the pursuit of a better understanding between nations it never ceased to stress the responsibility of the United States for its share in the turmoil of Europe, in having abandoned its associate nations to their fate as soon as the war was over and having turned its back upon the League of Nations.

In American politics 1922 was a year of retribution for the hypocrisy of the 1920 campaign. Then the Republican Party rolled up a plurality of 7,000,000 votes by promising the impossible to men on both sides of almost every pending issue. The natural reaction two years later was the repudiation of that hypocrisy at the polls. In the campaign The World took a leading part, spreading abroad the details of the Fordney-McCumber tariff, in which the wool schedules were fixed by wool-selling Senators the glove schedules by a glove Senator from New York, the textile schedules by super-lobbyists from New England.

A victory that was much more than personal to its victim was achieved by The World in forcing Truman H. Newberry out of his bought seat in the United States Senate. Practically alone among newspapers it kept up the fight upon him when the Supreme Court had absolved him from the penalty affixed by a Republican Federal Judge in Michigan, solely upon technical grounds, and when Charles E. Hughes, Secretary of State, came to his defense during the campaign. When, for the first time in seventy years, Michigan elected a Democratic Senator and when in other States the issue of Newberryism was proved potent to lose Republican votes, the handwriting on the wall was plain. Newberry resigned.

In a year characterized by gigantic strike movements at home, The World pleaded for a better understanding between labor and capital in services essential to the country. It urged the ascertainment of the facts affecting the production and distribution costs of coal, unfortunately covered from view by a Federal Court decision in the District of Columbia. The Fact-Finding Commission on Coal Supply was named in accordance with its urgency. In a kindred and parallel field it sustained the cause of free speech, even in Kansas, in West Virginia and in the coal mining regions of Pennsylvania. It led the Nation-wide fight upon the Ku Klux Klan as a dangerous attempt to set up, in the cause of an outdated illiberalism, a super-government within the Government of the United States.

The World, in State policy, strongly supported the nomination and election of Alfred E. Smith as Governor; urged further consideration for his policy of reorganization of the State's spending agencies, and continued to indicate the dangers as well as the manifest injustice of the rotten borough districting of legislative constituencies, which gives the legislative power in Albany to the representatives of a minority of the people. Both in Albany and in the City Hall it urged the pressing need of economy at a time when it has been estimated that half the national income is called for in taxation, direct and indirect, local, State and national.

Upon the editorial page of The World the "Looker on in Washington" has brilliantly and with acid wit punctured shams in public life and sustained the cause of international sanity and accord. The daily cartoons of Rollin Kirby have continued to hold the high regard of students of affairs. To Mr. Kirby's cartoon, "On the Road to Moscow," the Pulitzer prize of $500 was awarded last spring. As has been said of Punch in England, the course of history for the year could be traced by a reminiscent reading of the Kirby cartoons.

## WON PRIZE FOR PUBLIC SERVICE.

On June 7, 1922, the trustees of Columbia University awarded to The World the "Pulitzer Prize in Journalism for Public Service in Its Articles Exposing the Ku Klux Klan."

This recognition was but the consummation of a series of acclamations, public and private, official and semi-official, that came to The World during the year for its contributions to the common welfare. It is The World's pride that in the minds of so many people in so many quarters, both here and abroad, its name is synonomous with the description "First in Public Service," accorded it by the votes of three colleges of journalism.

The World's opposition to the Ku Klux Klan, begun in the fall of 1921 and renewed again in the closing weeks of 1922, was merely the most conspicuous of its contributions in this field.

Early in the spring it made a survey of conditions on the rapid transit lines of New York City. So absolutely did it demonstrate the inadequacy of the service on which more than 7,000,000 passengers a day must depend that orders were issued by the Transit Commission directing immediate improvement.

As the result of a similar survey the depreciation of the quality of illuminating gas under the projected change from the long-established candle-power standard to that of the British thermal unit was demonstrated.

An exhaustive inquiry into conditions in the

"pushcart" markets of the city brought to public knowledge the complete disregard of the law that supervisors should be chosen under the Civil Service, that the fees paid by the peddlers should be paid into the city treasury instead of going for "expenses" and that certain goods only should be offered for sale. As an almost immediate consequence of The World's articles the authorities announced their intention to comply with the law.

## AIDING THOSE OUT OF WORK.

When unemployment was at its height during the late winter, The World by agitation brought about the opening of nearly a score of churches and parish houses as lodging places for these unwillingly idle men. This agitation followed the conclusion of The World's "Give-a-job" campaign. As a result of this campaign the heads of 129 families found permanent employment at a time when thousands sought work in vain.

For years The World has conducted a "department" of missing people. During 1922 an unprecedented number of appeals for assistance was addressed to it. More than 500 requests came from the United States, Germany, Austria, Italy, Czechoslovakia and Russia. So well known has this service of The World become that it is turned to by police departments, by charity societies and by banks and similar institutions throughout the country.

Closely related to these public service endeavors were inquiries by The World into conditions in the mining districts of Central Pennsylvania, where issues were sharply drawn during the coal strike and scores of families were evicted. First in a series of articles by McAlister Coleman and then by Elizabeth Houghton, a staff correspondent, these conditions were depicted, with the result that large contributions of money and supplies were made.

An graphic a portrayal of social conditions was made in a series by Lester A. Walton who studied the circumstances of Southern Negroes since the war. For this series and for the assignment of Mr. Walton, himself a Negro, to the picturesque convention of the followers of Marcus Garvey, The World received the commendation of many leaders of the race.

The World cherishes an interest in the affairs of the average man, of which this attention to the concerns of the Negro is but a single instance. Alone among the newspapers of New York it "covered" especially the Farm Conference in Washington last spring, Theodore M. Knappen writing a series that vividly set forth the growing solidarity among agriculturists that has found expression already in the first economic bloc in Congress.

## LAID BARE TARIFF BILL INIQUITIES.

In the field of politics as it affects the day-by-day interests of the average man, The World won marked distinction during 1922. Articles by Elliott Thurston, of the staff, which were published in a dozen other cities, laid bare the extraordinary nature of the Fordney-McCumber tariff bill. So complete was the revelation of the business and industrial rather than the popular interest served by this bill that it became a definite and powerful factor in the revulsion at the polls in November.

As a partner to this series came an unveiling by Charles S. Haud, also of the staff, of the part played by the beet sugar interests of the United States in dictating the cane sugar schedules in the new tariff bill. It was shown that these schedules were drawn after the beet sugar men had attempted to set an arbitrary limit on the Cuban crop, and republication of the articles in Cuba created no less a sensation than they did here.

During the early summer there came also a poll of sentiment in New York City on the question of a soldiers' bonus. A marked sentiment in opposition to a bonus for all service men but an unqualified demand for generous provision for the disabled was revealed, and popular opinion was definitely affected.

In the same way The World was first to crystallize sentiment throughout the State in support of Alfred E. Smith as the Democratic candidate for Governor instead of William R. Hearst. At the other end of the record of this contest came a story by Mr. Hand of the victory wrested by Gov. Smith at the Syracuse convention. Not only did this story give the only complete account, stage by stage, of the fight that culminated in this victory but it was so brilliant a narration that it has already become a classic of reporting—a classic even of The World, known as it is for the consistent excellence of its writing and editing.

## COMPLIMENTED FROM LONDON.

This is not an empty boast. It is a tribute paid abroad as well as at home, as may be illustrated by this excerpt from the New Statesman of London, last summer:

"In New York the first place for vigor and intelligence belongs unmistakably to The World, which in recent years has made remarkable strides. Its staff includes a group of clever writers at present unequalled in America. Its tone is courageously liberal."

The World's interest in politics was far from being confined to New York State. Mr. Hand and Charles Michelson, head of its Washington bureau, were sent during the primary campaigns into the States where the progressive elements were at grips with the reactionaries. Again, just before the general election in November, Mr. Michelson visited these States, with the result that readers of The World knew, almost to the division of the Congressional delegations, what the outcome would be.

No other American newspaper, and few in the European capitals, gave so illuminating and so expert a review of international affairs as did the World last year.

## H. G. WELLS, REPORTER.

This began with the closing days of the Arms Conference at Washington, where H. G. Wells, best known of authors writing in English, served as a reporter for The World. Complementing him were Joseph W. Grigg, of the London bureau of The World, Adachi Kinosuke, a well known Japanese journalist, Henry W. Nevinson, of the Manchester Guardian (whose news service, by the way, is the exclusive property of The World in the United States), Charles Merz, an acknowledged authority on affairs in the Far East, and Mr. Michelson.

Soon after the Arms Conference Mr. Merz wrote a series on the crisis in India, the first comprehensive and understanding statement that had appeared in the United States. Later in the year he followed this with a series of letters from Europe that was most enlightening.

Not since the war has there been so brilliant, so sympathetic, so penetrating a study of life in Europe as that which is still being set forth by Mrs. Clare Sheridan, whose genius as a sculptor is rivalled by her facility as a diarist, now bids fair to be transcended by the reputation she is establishing as a correspondent.

Mrs. Sheridan's contributions to The World began with her interview with Rudyard Kipling in September, when he bitterly declared that the United States had garnered the gold of the world but had lost its soul. Two continents flamed with the controversy that followed this declaration, and while Mr. Kipling disclaimed the permission of the interview he did not deny the fact.

## MRS. CLARE SHERIDAN IN EUROPE.

Into the heart of the fighting in Ireland, Mrs. Sheridan went from this interview, and on across Europe until she reached Turkey, where she was when the Turkish Nationalists seized Constantinople and whence she crossed to Smyrna while the city still burned. She talked with Kings and Viceroys and Ministers; she talked with soldiers and merchants and beggars; she saw and told of the lives of women and children.

Country by country, The World covers Europe as it does these more general aspects of life after the war on the Continent.

In Russia, The World has Samuel Spewack, a member of its staff. Supplementing his despatches last year was Emma Goldman's own story of her experience—and her disillusionment—with Bolshevism. There were intimate pictures of life and conditions by Herbert Pulitzer and Michael Farbman, and vivid descriptions of the sweep of the famine by Arthur Ransome.

In Germany, The World has as head of its Berlin bureau, Arno Dosch-Fleurot, an eminent authority on affairs in the territory of the old Central Empires. A striking addition to his despatches came in the form of the interview by Ferdinand Tuohy with Gen. Ludendorff that created a sensation no less profound in Germany than in the United States.

Each Sunday there comes to The World an article of comment on affairs in general from Maximilian Harden, best known of the liberal editors of Germany.

## ARTICLES BY CAILLAUX.

In France, the Paris bureau is headed by Mr. Tuohy. To the day-by-day despatches of himself and his staff is added at fortnightly intervals a "leader" by Joseph Caillaux, former Premier of France, whose engagement by The World for this purpose provoked a storm of discussion throughout the republic. Each week there is, too, an article by Andre Tardieu, editor of L'Echo Nationale and former High Commissioner to the United States.

In Rome Beatrice Baskerville is chief of The World's bureau. Miss Baskerville, through long residence in Italy, is exceptionally well informed

regarding political and social and ecclesiastical conditions.

In London the central European bureau of The World is directed by James M. Tuohy, dean of the correspondents for American newspapers and equipped with a profound knowledge of British affairs. With him is Joseph W. Grigg, whose standing was evidenced by the fact that he was the first correspondent of any nationality to be accredited to British general headquarters in France during the war. To their view and record of the progress of events is added a weekly letter by A. G. Gardiner, formerly editor of the Daily News, and, as has been said, the service of the Manchester Guardian, the foremost liberal newspaper in Great Britain.

In Ireland, P. J. Kelly serves as staff correspondent of The World. During the fateful days when the issue between the Free State and the republic was being fought out in the Dail Eireann, J. M. Tuohy wrote a truly historic series of despatches. These were displayed against a background formed by a remarkable sequence of intimate portraits of the leaders of the Irish cause by Samuel McCoy, of The World's staff, who wrote from personal acquaintance with them.

## CLEMENCEAU'S CONTRIBUTIONS.

Throughout the year The World has enjoyed the services of a company of "occasional correspondents" that has never been paralleled by an American newspaper. A fortnight ago it concluded a series of articles by Georges Clemenceau, with which the Tiger of France amplified and perfected the arguments he put forth at his public meetings in support of his appeal for American support of France. This was a historic newspaper achievement, for since the war Clemenceau had refused to write even for his own paper, L'Echo Nationale.

During the economic conference at Genoa the "occasional correspondents" of The World included John Maynard Keynes, the great British economist, and Frank A. Vanderlip, former President of the National City Bank. Mr. Vanderlip followed his Genoa articles with a series based on personal study of conditions in the principal countries of the Continent.

In "Somewhere in Europe," Francis Hackett wrote—and is still writing—each week a delightful monograph under the title "The Rolling Stone," which has been read with an eagerness easily to be understood by those familiar with his graceful style and friendly viewpoint.

At the close of the year The World began a series by Emile Coué, the great French exponent of auto-suggestion, which will continue for some time into 1923.

This engagement was in keeping with a consistent policy of maintaining a current record of the progress of science. The World was first among American newspapers to elucidate popularly the now famous Steinach operation.

## TEST OF PHOTOGRAPHY BY WIRELESS.

It also lent its auspices to a test of the wireless transmission of photographs by the Korn process, receiving by way of Bar Harbor and publishing a portrait of the Pope sent from Rome.

Now The World has secured American rights to the Belin process of transmission of pictures by wire and wireless. Demonstration of this process was made here more than a year ago by The World, and now, in its perfected form, it will soon institute what may well prove to be the greatest advance in the dissemination of news since the invention of the telegraph.

Not unrelated to these records was the publication by The World of "Our American Adventure" by Sir Arthur Conan Doyle, in which he set forth the results of his missionary tour in behalf of spiritism. Recalling that Sir Arthur regards spiritism as a religion, attention may be called in this connection to the fact that each Monday morning The World prints the report of a sermon preached the day before, the only New York newspaper to attempt a systematic account of the doctrines preached in the pulpits of the metropolis.

## SOME FEATURE WRITERS.

In the departments devoted to the arts, The World has never reached so high a plane as that attained in 1922. Franklin P. Adams (F. P. A.) brought his Conning Tower to The World with the beginning of the year, beyond question the best known and best liked of the "colyums" that mark American newspapers. A daily neighbor of the Conning Tower is "It Seems To Me," in which Heywood Broun writes of plays and books and intellectual affairs in general, with quizzical excursions into a wide variety of other fields.

Mr. Broun is, as well, dramatic critic of The World, with Lawrence Stallings as an assistant, and with Quinn L. Martin adding daily to his reputation as a critic of the increasingly important motion picture. Deems Taylor is the music critic, with a steadily growing following among those who know the worth of real knowledge, sound judgment and unfailing grace of expression.

E. W. Osborn is still in charge of the book pages of The World, where Mr. Broun, John L. Heaton, Vivian Radcliffe and others as well known are represented regularly. Henry Tyrrell continues as the art critic of The World with new distinction.

Frueh spread the whimsical humor of his caricatures through the year, and to Gene Carr, who draws the "Metropolitan Movies," came not only the publication in book form of a collection of these inimitable glimpses of child life in the streets but a series of public exhibitions of them—and a sermon about them by the Rev. Percy Stickney Grant in the Church of the Ascension. Joseph van Raalte won new encomiums during the year for his sometimes humorous, sometimes appealing, but always perfected vignettes of life.

It is one of the recompenses of newspaper work that real excellence needs little other commendation to attention than its own worth. This has been strikingly demonstrated by the success that has marked the daily publication on the editorial page of The World of "News Outside the Door." This "news" is of birds and flowers and stones and trees, all the things and creatures of the realm of nature. "J. O. S.", who reports this "news," calls them essays; scores of readers have written in to acclaim them poems.

## FONTAINE'S FINANCIAL COMMENT.

The financial pages of The World established themselves as the best ordered and best printed in the city. A new feature during the year was a daily column of comment and gossip by S. S. Fontaine, financial editor, wherein he sounds a note entirely new in Wall Street chronicles. Burton L. Read continues as bond editor, and C. F. Hughes as business news editor, his page having been made still more notable by serial contributions on the science of retailing by Prof. Norris A. Brisco of New York University.

And not least among the developments of the year was the adoption of leaded brevier as the type in which the first page of The World should be set. This page stands to-day the cleanest, most attractive, most legible in the United States—a fit vehicle for its contents.

## UNUSUAL SPORTING FEATURES.

Sports in The World for 1922 have been based on authority and accuracy, and marked by variety. Daily happenings have been carefully chronicled by members of the regular staff, who are writers recognized as authorities in their several lines. Furthermore, big stories have been treated in a big way by calling on writers of prominence to contribute special articles on golf, baseball, boxing, football and lawn tennis.

Among the unusual features provided during the year were a series of analytical articles on The World's Series baseball games by Christy Mathewson, who came out of enforced retirement at Saranac Lake for the first time as a guest of The World.

Another striking feature was furnished by G. F. T. Ryall of The World staff, who made the journey from the Jamaica track to Louisville, Ky., in the car with Morvich, the horse of the hour at that time and the one which, following this journey, won the Kentucky Derby. It was the first time that full details on the travelling of a famous horse were recorded.

L. de B. Handley, also of The World staff, was responsible for bringing about the international swim for women at three and a half miles, which was won by Miss Gertrude Ederle, and in which Miss Hilda James, an English girl, finished third.

Among the men of prominence who contributed to the sporting page during the year were Walter Hagen, open golf champion of Great Britain, Gerald L. Patterson, Captain of the Australian Davis Cup lawn tennis team; Francis Ouimet, one of the leaders in amateur golf; W. W. Roper, coach of the Princeton football eleven; T. A. D. Jones, coach at Yale; John Heisman, coach at Pennsylvania; Christy Mathewson in baseball, and Mlle. Suzanne Lenglen, the French lawn tennis wonder.

George Daley's Sport Talk each Monday morning has aimed to make constructive suggestions in an effort to keep sports up to the highest standard and free from abuses. Monitor in baseball, Igoe in boxing, Patterson McNutt in golf and other sports, William Hennigan in baseball and track athletics, and George Daley in racing and football, have kept the readers of The World well informed from day to day, while Heywood Broun has added a punch in touching on the high spots here and there.

## RELIGIOUS NEWS A FEATURE.

As a constructive feature in present day journalism The Morning World maintains a department devoted to the activities of local churches, and each Monday morning prints a stenographic report of a Sunday sermon with a picture of the preacher. The department is also a clearing house for religious news from all parts of the world.

The regular department of religious news on Saturday mornings to quote a former Moderator of the General Assembly of the Presbyterian Church, has "become a force and a distinct advance on all the religious features of other papers (New York). It has lifted the religious feature to a dignified and challenging position and ministers are rejoicing in it."

## OUTSTANDING FEATURES IN THE SUNDAY WORLD MAGAZINE.

The Sunday World Magazine during the year achieved an unprecedented record in the quality and quantity of features presented. Perhaps the most outstanding achievements were the publication, in special supplements illustrated in color, of "The Story of Mankind," by Hendrik Van Loon, and "The Story of the Irish Nation," by Francis Hackett. Two other notable features were stories written especially for The Sunday World Magazine by the three most popular stars of the movies, "Hollywood to Paris" by Mary Pickford and Douglas Fairbanks, and "The Mirror of My Life" by Pola Negri.

The most striking narrative of the year was "The Tragic Story of the Castaways of the Dumaru," being a diary kept by two of the survivors.

Branching into the realm of fiction, the magazine offered four of J. S. Fletcher's most thrilling mystery stories, a novel by P. G. Wodehouse, and a series of detective stories by E. Phillips Oppenheim.

The expert criminologist, E. H. Smith, contributed regularly fascinating stories of the underworld, including a valuable series on bucket shops, while Karl K. Kitchen, the intrepid traveller, brought back from the west, "The Mirrors of Hollywood," and from Europe "Capital Nights' Entertainments."

Among the regular features to be found in the magazine were reproductions of songs from current musical successes, by such famous composers as Victor Herbert, Irving Berlin and Jerome Kern; two pages of odd and interesting information on new discoveries and inventions; a page of Ingenuities including the popular cross-word puzzle; a monthly article on the astrological significance of birthdays. The World staff writers in Europe frequently contributed thrilling and colorful stories from abroad, and Arthur Benington wrote many valuable articles on the new discoveries in the world of science and psychical research.

The cover designs maintained an unusual standard of artistry, presenting the work of such well known men as Coles Phillips, Halmi, Remisoff, Soudekine, Joseph Cummings Chase, Howard Chandler Christy, Fabiano, Haskell Coffin, and others.

For wide range of subject the magazine offerings for the year have been unequalled. Articles on art, music, sports, fashions, adventure, romance, the theatre, have appeared on its pages, and among the staff writers not already mentioned are Sarah MacDougall, Prosper Buranelli, Ernest Brennecke, Charles Welton and Milton Raison.

The Sunday World Magazine aims to be truthful, interesting and informative. It is well written, well illustrated and lives up to its slogan, "The Best Weekly Magazine in New York."

## SUNDAY WORLD SCHOOL PRIZES.

The Sunday World has actively promoted athletics in the city schools under the auspices of the Board of Education and the Public Schools Athletic League for seventeen years, and the development they have reached each year is the most important that has been accomplished in New York schools. Millions of boys have received training through the field days which began in 1906. The class banner, a cherished trophy each year, is hung in a conspicuous place in the schools, and upward of a hundred thousand young men and boys in the city are wearing medals of silver and bronze provided annually for winners of each school that had a field day, and gold, silver and bronze for the city-wide "Final Meet." The Sunday World final meet, this year, was the largest athletic event in the history of the city, having more than three thousand boys with fine records made in the schools engaged in the various events, distinguished officials and a great assemblage of spectators.

Athletic activities, supported by The Sunday World, under the supervision of city teachers, are carried on at vacation playgrounds that give every child opportunities for pleasure and mental and physical benefit by baseball tournaments, basketball track and field events, swimming, etc. The Parks and Playgrounds Association maintains games and athletic sports for which The Sunday World provides prizes.

The Sunday World encourages school garden clubs, for which prizes are given to promote interest in practical gardening and cultivate a love of nature and outdoor work. Crops this year in seventy outdoor gardens, reported weekly by teachers, showed a season total crop valuation, according to market prices, of $21,139.56.

A walking club is open to boys and girls above the fifth grade, which provides means of getting wholesome exercise for those who cannot engage in strenuous sport.

Swimming contests, ice and roller skating, tennis and marble shooting have attracted a large share of pupils that have profited by the support of the Sunday World.

## BUREAU OF ACCURACY AND FAIR PLAY.

The World's Bureau of Accuracy and Fair Play completed the ninth year of its existence in July. Its primary purpose, as declared at the outset, is to promote accuracy and fair play in the columns of The World, to correct carelessness, and to stamp out fakes and fakers. All complaints involving these questions, including libel actions, are turned over to this bureau and carefully inquired into and, if they are found to be well grounded, corrections are made. A record is kept of each case investigated, with a card index of those responsible for articles complained of. Faking and chronic carelessness are punished by dismissal. In practice the idea has worked out well. Members of The World staff, and its correspondents everywhere have, with very few exceptions worked in harmony with the bureau. The World's example has been followed by many other newspapers throughout the country.

The bureau has made a practice of opposing attacks and complaints that have no merit. In the early stages of its operation it learned that there are lawyers in New York who make a specialty of stirring up libel litigation and who seemingly are not adverse to representing criminals and otherwise disreputable characters who sometimes bring suits on false and perjured complaints. A card index covering a period of more than twenty years reveals the names of lawyers who have made a practice of stirring up libel litigation, and whenever attempts are made to recover damages in these cases The World has spared neither trouble nor expense in fighting to the last ditch. As a result some lawyers have been disbarred or suspended from practice, several notoriously crooked litigants have been sent to prison and there has been a very material decrease in libel suits.

The bureau has also waged war against false and misleading advertising and occasional swindlers who have attempted to use The World's advertising columns to ensnare victims. It has successfully cooperated with public prosecutors and the police in bringing many of these swindlers to justice.

## EVENING WORLD EDITORIAL PAGE.

True to its principle of working primarily for the best interests of the 7,000,000 people in metropolitan New York, The Evening World editorial page in 1922 devoted much space to discussion of the transit problem, advocating co-operation between State and city authorities and denouncing obstructive political tactics.

In the interest of public safety The Evening World worked for the taxi-bonding law and demanded its enforcement. It has also emphasized the need for a motor code and more efficient licensing and registration of drivers.

As the result of an Evening World editorial suggestion, the Garment Workers' Union applied for and were granted an injunction against the contract-breaking employers in the industry, the first case on record in which union labor had made such use of the equity provisions of the law.

This newspaper was also instrumental in securing extension of the rent laws it previously sponsored.

For the health and pleasure of New Yorkers now and in years to come, The Evening World has insisted on the need for foresight in provision of playgrounds, parks and public golf courses. It has kept before the public the need for a seat for every child in the public schools. It exposed the unbusinesslike conduct of the public markets and secured correction of some of the worst abuses.

John Cassel's cartoons, famous for their finely drawn, straight-aimed thrusts into the meaning of current events, have been a daily feature widely reproduced.

## EVENING WORLD'S ACHIEVEMENTS.

The Evening World, constant and insistent in its support of every project for the public good, has

during the year made some notable fights; among the most outstanding are:

1. For the passage of a law bonding all taxicabs, and the enforcement thereof. More than 10,000 judgments against taxicab companies were returned unsatisfied during 1921. Under the new law, secured by Evening World efforts, each taxicab must carry insurance at the rate of $2,500 against accidents.

2. Through an exhaustive investigation and analysis conducted by Sophie Irene Loeb, it was demonstrated that the increase in the price of gas to the consumer, from 80 cents per thousand to the rate of $1.25 and $1.50, was not justified by any increase in gas oil or wage costs. The Evening World demanded an adjustment of these rates and the discontinuance of the antiquated methods of gas-making. Results have been obtained in a change of methods and a reduction of 10 cents per thousand. The Evening World figures demonstrate that gas, at a reasonable profit, can be furnished the consumer at a rate between 90 cents and $1.00. The fight for a fair price will be continued.

3. The Evening World exposed the astounding nepotism in Congress. Thousands of relatives of Congressmen were carried on the Government pay-rolls, many of whom did not render service. During this exposure the news was broadcasted throughout the country, and was responsible for the defeat of many of the offending candidates for re-election.

4. The Evening World urged and secured extension of the rent laws, which were originally passed following a long fight made by this paper in the interests of the tenant.

5. The Evening World has disclosed reasons for the need of a general and thorough investigation of coal conditions, along the lines of the plan finally adopted by Congress. The published investigations as to the visible coal supply for New York City, in smaller sizes, and substitutes, coupled with the reluctance of coal dealers to avail themselves of these, has resulted in new rulings by the Fuel Administrator, which materially eased the situation.

6. Insistently, The Evening World has demanded increased and better transit facilities, and the editorial policy has been supported in the news pages by articles bearing on every phase of the transit situation.

7. The plans and articles published in The Evening World urging a great war memorial and recreation park and public swimming pool in Central Park have borne fruit, the recommendation by the Committee of Estimate that $600,000 be appropriated by the city for this purpose.

8. The Evening World has rendered signal service by calling attention to the gasoline and oil surpluses. Following these expositions the price of these essentials has been reduced.

In the late fall an eight-page illustrated Brooklyn Section was added to the regular edition of The Evening World, dealing exclusively with the local activities of that borough.

## EVENING WORLD'S FEATURE PAGES.

The Evening World's Daily Magazine Page, carefully developed to combine every chief interest of woman and the home, included in its large staff of special contributors some of America's most widely recognized authorities on the subjects covered. The trend in fashions was accurately and interestingly forecast and followed by Margery Wells and Mildred Lodewick in illustrated articles which, on Saturdays, were expanded to a full page. Mrs. Christine Frederick's articles covered every common problem in home economics and household engineering. Doris Doscher, in several series of articles, pointed the way to health and beauty by natural means, supplementing her writings with talks broadcasted by radio. Inspirational articles by Sophie Irene Loeb sympathetically and helpfully touched every phase of human emotion in every walk of life. Caroline Crawford's love serials penned fascinating and accurate word pictures of modern youth in its greatest adventure. Betty Vincent's keen understanding of lovers' problems gave her special articles and "Courtship and Marriage" correspondence column a wide popularity. Neal O'Hara's sparkling humor, Roy McCardell's inimitable Jarr Family and Marguerite Mooers Marshall's Fables for the Fair and Maxims of a Modern Maid gave lightening touches of genuine entertainment. Other writers as ably conducted a wide range of special departments, including home decoration, recipes, sewing suggestions, and informative matter of several interesting kinds.

Marguerite Mooers Marshall, Fay Stevenson, Ruth Snyder, and other special writers regularly contributed feature articles and interviews for the news pages of The Evening World. Notable among these features was the "Daily Movie" strip of pictures of prominent people, usually combined with interesting interviews.

During the year The Evening World published nearly a score of the best novels of the day as serials, the names of the best known writers of both America and England being represented in the list. A complete novelette, an unusual short story, by a well known author was a feature of each Saturday edition.

The Evening World's Comic Page every day provided a variety of real laughs that somewhere caught every fancy. An ever-growing following of fun-loving fans has daily looked for "Joe's Car", "The Big Little Family," "Little Mary Mixup" and "Katinka." Maurice Ketten's "Can You Beat It," "Such is Life" and "The Day of Rest," cartoons that accurately mirror the funniest side of human life, every day "struck twelve" on humor's clock.

The "What Did You See To-Day?" page, which made "Every Reader a Reporter," met with instantaneous public response. Roughly, half a million readers from the city and neighboring States have been contributors to this page, requiring a large staff of discriminating readers to handle the immense mail, so that the automobile and cash prizes might be properly awarded. Thousands of readers have "tipped off" The Evening World to first big news events.

Other special features of The Evening World included: Charles Darnton's criticisms of the New Plays, Don Allen's motion picture Screenings, Bide Dudley's the Stage and Good Evening, Frank H. Warren's In the Realm of Music, R. R. Batson's Daily Wall Street Report, and W. G. Bowdoin's art criticism and news, E. W. Osborn's literary comment and Capt. Robert Schofield Wood's radiophone service column.

## EVENING WORLD'S SPORTING PAGES.

The Evening World promptly recognized the pronounced trend toward athletics by printing every day two full pages of interesting sport cartoons and articles by Robert Edgren, Bozeman Bulger, Vincent Treanor, William Abbott, Richard Freyer, Robert Boyd and Joseph Gordon. Special attention was paid to amateur sports. During the year The Evening World donated many handsome trophies to encourage young athletes toward greater efficiency in all lines of sport.

Every important sport event during 1922 was ably reported by staff experts, while clever cartoons by Robert Edgren, Bud Counihan and Thornton Fisher furnished a pictorial review of all big doings in the field of sport.

## THE KIDDIE KLUB.

The Evening World Kiddie Klub, which is under the direction of Eleanor Schorer, gave a benefit performance at the Astor Theatre on Feb. 26, 1922, for the Kiddie Klub Country Fund. With the money raised at this performance and through public subscription, the fund was able, by working in co-operation with Health Commissioner Copeland and the New York City Department of Health, to give vacations of from six weeks to three months each to over 300 city children suffering with whooping cough and to send them home well. These 300 children were guests of the city at Riverside Island, under the immediate care of Dr. Thomas F. Joyce and a staff of eight doctors and forty-two nurses, between June 25 and October 15. Diversional teachers, playground equipment, toys, books, extra clothes, etc., were supplied by the Kiddie Klub Country Fund. Through Mr. I. Elkin Nathans of the New York Milk Conference over 9,600 quarts of Grade A milk were donated by five milk concerns: Borden's, Beakes' Model Dairy, Clover Farms and Levy Co. Happiness Candies supplied the thousands of Cutie Pops eaten by the youngsters throughout the summer.

Two outings, one at Luna, Coney Island, July 12, and the other at Starlight Park, Bronx, on July 26, supplied midsummer fun for well Klub members. Eighteen thousand Brooklyn children attended the Luna outing and over 10,000 Bronx youngsters went to Starlight Park. All the attractions were free to members on Kiddie Klub Days at Luna and Starlight.

The Seventh Annual Kiddie Klub Christmas Show was given at the Casino Theatre (courtesy Messrs. Lee and J. J. Shubert) on Dec. 28 and 29. There were over 50 kiddie acts, selected from the Klub membership. Two seats were sent free of charge to each member who applied. The Evening World Kiddie Klub boasts a membership of over 142,000 children under 16 years of age.

The Boy Scout Weekly Department covered the activities of that organization. The Girl Scout and Camp Fire Girls were handled in many illustrated stories.

# Postal Information.

**Domestic Letter Rate**—2 cents an ounce or fraction thereof. Includes letters or other first class matter addressed for local delivery or for transmission from one place to another within the United States, or to or from or between the possessions of the United States, Hawaii, Porto Rico, Virgin Islands of the United States, Canal Zone, the Philippines, Guam, Tutuila, (U. S. Samoa), United States naval vessels, United States Naval Hospital and United States Navy Fuel Depot at Yokohama, Japan, and United States forces in Germany. The U. S. Postmaster General announced Sept. 25, 1922, that on Dec. 31 he would abandon the United States postal agency at Shanghai, China, and that the 2-cent letter rates would not include Shanghai after Nov. 30, 1922.

The limit of weight for first-class matter is the same as for fourth-class parcel post. 70 pounds, local, or in the first, second or third zone; 50 pounds in the other zones.

First-class matter includes written matter, matter sealed against inspection, postal cards, and private mailing cards.

**Aeroplane** letter rate is 2 cents an ounce or fraction thereof.

**Domestic Postal Card Rate**—1 cent as to each country and place in the above paragraph; reply card, 2 cents. The rate for private mailing cards is 1 cent each.

**Second-Class Matter**—Periodical publications, no limit of weight. The rate to the public is 1 cent for each 4 ounces or fraction thereof, for complete copies. Incomplete copies are subjected to third-class or fourth-class rates, according to their physical character.

**Third-class Matter**—Printed paper matter other than books, and other than such periodical publications as are entitled to second-class rates. The limit of weight is 4 pounds. The rate is 1 cent for each 2 ounces or fraction thereof. Packages over 4 pounds in weight go as fourth-class parcel-post matter.

**Fourth-class Matter** (domestic parcel post)—Includes all mailable matter not in the preceding classes. It may be insured and may be sent C. O. D.

**Rates of postage on fourth-class or parcel-post matter—to be fully prepaid—unsealed**—are as follows: (a) Parcels weighing 4 ounces or less, except books, seeds, plants, etc., 1 cent for each ounce or fraction thereof, any distance; (*b*) Parcels weighing 8 ounces or less, containing books, seeds, cuttings, bulbs, roots, scions, and plants, 1 cent for each 2 ounces or fraction thereof, regardless of distance; (*c*) Parcels weighing more than 8 ounces, containing books, seeds, plants, etc., parcels of miscellaneous printed matter weighing more than 4 pounds, and all other parcels of fourth-class matter weighing more than 4 ounces, are chargeable, according to distance or zone, at the pound rates shown below, a fraction of a pound being considered a full pound:

**Local rates**—1 lb., 5 cts.; 2-3 lbs., 6 cts.; 4-5 lbs., 7 cts.; 6-7 lbs., 8 cts.; 8-9 lbs., 9 cts.; 10-11 lbs., 10 cts.; 12-13 lbs., 11 cts.; 14-15 lbs., 12 cts.; 16-17 lbs., 13 cts.; 18-19 lbs., 14 cts.; 20-21 lbs., 15 cts.; 22-23 lbs., 16 cts.; 24-25 lbs., 17 cts.; 26-27 lbs., 18 cts. 28-29 lbs., 19 cts.; 30-31 lbs., 20 cts.; 32-33 lbs., 21 cts.; 34-35 lbs., 22 cts.; 36-37 lbs., 23 cts.; 38-39 lbs. 24 cts.; 40-41 lbs., 25 cts.; 42-43 lbs., 26 cts.; 44-45 lbs.; 27 cts.; 46-47 lbs., 28 cts.; 48-49 lbs., 29 cts.; 50-51 lbs., 30 cts.—and so on up to 70 lbs., 1 cent additional for each 2 lbs. or fraction.

**1st zone** (up to 50 miles)—1 lb., 5 cts., and 1 cent extra for each added pound, up to 74 cts. for 70 lbs.

**2nd zone** (50 to 150 miles)—1 lb., 5 cts., and 1 cent extra for each added pound, up to 74 cts., for 70 lbs.

**3rd zone** (150 to 300 miles)—1 lb., 6 cts., and 2 cents extra for each added pound, up to $1.44 for 70 lbs.

**4th zone** (300 to 600 miles)—1 lb., 7 cts., and 4 cents extra for each added pound, up to $2.03 for 50 lbs.

**5th zone** (600 to 1,000 miles)—1 lb., 8 cts., and 6 cents extra for each added pound, up to $3.02 for 50 lbs.

**6th zone** (1,000 to 1,400 miles)—1 lb., 9 cts., and 8 cents for each added pound, up to $4.01 for 50 lbs.

**7th zone** (1,400 to 1,800 miles)—1 lb., 11 cts., and 10 cents for each added pound, up to $5.01 for 50 lbs.

**8th zone** (over 1,800 miles)—1 lb., 12 cents., and 12 cents for each added pound, up to $6 for 50 lbs.

**Registered Mail**—The fee is 10 cents over the regular postage. Articles admissible—Any mailable articles, except unsealed fourth-class matter (parcel-post) for domestic destinations, may be registered. Domestic parcels containing fourth-class matter may also be registered if sealed and the usual fee and postage at the first-class rate are paid. The amount recoverable from the Government in case of loss is limited to $50.

**Money Orders**—The maximum is $100, but there is no limit to the number that can be issued in one day to the same remitter. The fees for domestic orders are: $2.50 or less, 3 cents; $2.51 to $5.00, 5 cents; $5.01 to $10.00, 8 cents; $10.01 to $20.00, 10 cents; $20.01 to $30.00, 12 cents; $30.01 to $40.00, 15 cents; $40.01 to $50.00, 18 cents; $50.01 to $60.00, 20 cents; $60.01 to $75.00, 25 cents; $75.01 to $100.00, 30 cents. International money orders cost 10 cents for $10.00 or less, and 10 cents extra on each additional $10.00 up to $1 for $100.00. Domestic money orders are payable within 30 days at any United States Post Office (continental); after that, only at the office designated. In the United States insular possessions, colonies of Great Britain, etc., the orders are payable only at the office drawn upon.

**Unmailable Matter**—Includes not only all legitimate matter not conforming to the rules as to legibility of address, size of package or certificates of inspection, but also game, etc., killed out of season; poisons, explosive or inflammable articles, or bad smelling; all spirituous and malt liquors; all liquor advertisements to or from prohibition localities; indecent matter, written or otherwise; dunning postals and lottery, endless chain and fraud matter. In addition, sealed mail to a *foreign country*, except it be obviously letters, cannot be sent, nor can publications in violation of the copyright laws of the country of destination.

**Postal Savings**—The limit of an individual deposit has been increased from $1,000 to $2,500. No sum of less than $1 will be accepted for a deposit. Interest is allowed at the rate of 2 per cent.

**Foreign Letter Rates**—2 cents an ounce or fraction thereof, to the following countries:

Argentina, Bahamas, Barbados, Bermuda, Bolivia, Brazil, British Guiana, British Honduras Canada, Colombia, Costa Rica, Cuba, Dominican Republic.

Dutch West Indies (Aruba, Bonaire, Curacao, Saba, St. Eustatius, and the Dutch part of St. Martins); Ecuador, Great Britain, Ireland, Haiti, Honduras, Republic of.

Jamaica (including Turks, Caicos, and Cayman Islands).

Leeward Islands (Antigua with Barbuda and Redonda, St. Kitts, or St. Christopher, Nevis with Anguilla, Dominica, Montserrat, and British Virgin Islands), Martinique, Mexico, Newfoundland, New Zealand, Nicaragua, Panama, Peru, Salvador, Spain (including the Spanish colonies), Trinidad (including Tobago).

Uruguay, Western Samoa.

Windward Islands (Grenada, St. Vincent, the Grenadines, and St. Lucia).

Members of the American Army of Occupation in Germany.

Members of the United States Navy in foreign waters, when addressed care of the Postmaster at New York or San Francisco, as the case may be.

United States Naval Hospital, Yokohama, Japan.

*The rate to all other* foreign countries and places in foreign countries for letters is 5 cents for the first ounce or fraction thereof, and 3 cents for each additional ounce or fraction thereof.

**Foreign Postal Card Rate**—1 cent each to Argentina, Bolivia, Canada, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Honduras, Mexico, Nicaragua, Panama, Peru, Salvador, Uruguay, and Spain and her colonies. The rate is 2 cents each to other foreign countries.

**Rates on other matter** for foreign countries—Postal cards, double (with paid reply), 4 cents;

Newspapers and other printed matter, each 2 ounces or fraction, 1 cent.

Printed matter in relief for use of the blind, each 18 ounces or fraction thereof, 1 cent.

Commercial papers, first 10 ounces or less, 5 cents; each additional 2 ounces or fraction, 1 cent; (limit of weight, 4 pounds 6 ounces).

Samples of merchandise, first 4 ounces or less, 2 cents; each additional 2 ounces or fraction, 1 cent; (limit of weight, 18 ounces).

# Astronomical Calculations for 1923.

THE Astronomical Calculations, beginning on the next page are given in local Mean Time, except as otherwise indicated, and were made expressly for THE WORLD ALMANAC by Arthur Newton of the United States Naval Observatory, Washington, D. C.

## THE SEASONS.

IN the temperate zones, these are four in number: Spring, Summer, Autumn and Winter; beginning respectively at the vernal equinox, the summer solstice, the autumnal equinox and the winter solstice; for which, in the north temperate zone, the approximate dates are March 21, June 21, September 23, and December 21. In the south temperate zone, the vernal equinox or the beginning of spring is September 23, the summer solstice or the beginning of summer is December 21, and so on.

The earth's axis continually points in the same direction and if the axis were perpendicular to the plane of the earth's orbit around the sun, there would be no change of seasons. Day and night would everywhere be of equal length and equable conditions of temperature would prevail throughout the year. But the axis is tilted 23° 27′ away from a perpendicular to the orbit, and only in March and September is the axis at right angles to the direction of the sun. In those months occur the equinoxes, when day and night are equal the world over. In June, the North Pole is tilted 23° 27′ toward the sun and the days in the northern hemisphere are longer than the nights; at the same time, the days in the southern hemisphere are shorter than the nights. In December the North Pole is tilted 23° 27′ away from the sun and the nights in the northern hemisphere are longer than the days; at the same time the nights in the southern hemisphere are shorter than the days.

The heating influence of the sun increases with the length of the day and with the sun's altitude at noon. The greatest daily accession of heat is, therefore, at the time of the summer solstice; and the least is at the time of the winter solstice. In June, in the north temperate zone, the heat received by day far exceeds the loss through radiation by night and it is not until July or August that the two become equal and the maximum temperature of the year is experienced. In December, the heat received by day fails to make good the loss by night and it is not until January or February that gain and loss become equal and the thermometer ceases to show a downward tendency.

The seasons, in 1923 (Eastern Standard Time—old) begin as follows: Vernal equinox (Spring), March 21 (10.29 A. M.); summer solstice (Summer), June 22 (6.03 A. M.); autumnal equinox (Autumn), Sept. 23 (9.04 P. M.); winter solstice (Winter), Dec. 22 (3.54 P. M.).

NOTE.—To ascertain any day of the week, first look in the table for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days below. *For Example:*—To know on what day of the week July 4, 1918, fell, look in the table of years for 1918, and in a parallel line under July is figure 1, which directs to column 1 in which it will be seen that July 4 fell on Thursday.

* 1752 same as 1772 from January 1 to September 2. From September 14 to December 31 same as 1780 (September 3–13 were omitted). (Whitaker's Almanack).

## Morning Stars in 1923.

MERCURY—January 28 to April 8; May 28 to July 22; September 28 to November 15.
VENUS—January 1 to September 10.
MARS—August 8 to end of year.
JUPITER—January 1 to May 5; November 22 to end of year.
SATURN—January 1 to April 7; October 17 to end of year.

## Evening Stars in 1923.

MERCURY—January 1 to 28; April 8 to May 28; July 22 to September 28; November 15 to end of year.
VENUS—September 10 to end of year.
MARS—January 1 to August 8.
JUPITER—May 5 to November 22.
SATURN—April 7 to October 17.

### THE ANCIENT AND MODERN YEAR.

THE Athenians began the year in June, the Macedonians in September, the Romans first in March and afterward in January, the Persians on August 11, the ancient Mexicans on February 23, the Mohammedans in July. The Chinese year, which begins late in January or early in February, is similar to the Mohammedan in having 12 months of 29 and 30 days alternately; but in every nineteen years there are seven years which have 13 months. This is not quite correct, and the Chinese have therefore formed a cycle of 60 years, in which period 22 intercalary months occur.

### THE FRENCH REVOLUTIONARY ERA.

IN September, 1793, the convention decreed that the common era should be abolished in all civil affairs, and that the new French era should begin on September 22, 1792, the day of the true Autumnal Equinox, and that each succeeding year should begin at the midnight of the day on which the true Autumnal Equinox falls. The year was divided into twelve months of thirty days each. In ordinary years there were five extra days, from the 17th to the 21st of our September, and at the end of every fourth year was a sixth complementary day. This reckoning was first used on November 22, 1793, and was continued until December 31, 1805, when it was discontinued, and the Gregorian Calendar was resumed.

### CHURCH FASTS.

THE Roman Catholic days of obligation are: Jan. 1 (Circumcision of Christ); Ascension Day (forty days after Easter Sunday); Aug. 15 (Assumption of the Blessed Virgin Mary); Nov. 1 (All Saints' Day); Dec. 8 (Immaculate Conception); Dec. 25 (Christmas), and all the Sundays of the year.

THE Roman Catholic Days of fasting are the forty days of Lent, the Ember Days, the Fridays of the four weeks in Advent, and certain vigils or evenings prior to the greater feasts, while all Fridays of the year are days of abstinence from flesh meat. In the American Episcopal Church the days of fasting or abstinence to be observed, according to the Book of Common Prayer, are the forty days of Lent, the Ember Days, the three Rogation Days, and all the Fridays of the year except Christmas Day. In the Greek Church the four principal fasts are those in Lent, the week succeeding Whitsuntide, the fortnight before the Assumption, and forty days before Christmas.

### EMBER AND ROGATION DAYS.

EMBER and Rogation Days are certain periods of the year devoted to prayer and fasting. Ember Days (twelve annually), about the beginning of the four seasons, are the Wednesday, Friday, and Saturday after the first Sunday in Lent, in Spring; after the feast of Pentecost (Whit Sunday), Summer; after the festival of the Holy Cross, Autumn, and after the festival of St. Lucia, Winter. Ember Weeks are the weeks in which the Ember Days appear.

Rogation Days occur on the Feast of St. Mark, April 25, and on the three days immediately preceding Ascension Day.

## PROT. EPIS. RITUALISTIC CALENDAR, WITH ALTAR COLORS.

*White*—From the First Service (First Vespers) of Christmas Day to the Octave of Epiphany, inclusive (except on the Feasts of Martyrs); on Maundy Thursday (for the celebration); from the First Service of Easter Day to the Vigil of Pentecost (except on Feasts of Martyrs and Rogation Days); on Trinity Sunday, Conversion of St. Paul, Purification, Annunciation, St. John Baptist, St. Michael, St. Luke, All Saints, Saints who are not Martyrs, and Patron Saints (Transfiguration and Dedication of Church).

*Red*—From First Vespers of Pentecost to the First Vespers of Trinity Sunday (which includes Ember Days); Holy Innocents (if on a Sunday), and Feasts of all Martyrs.

*Violet*—From Septuagesima to Maundy Thursday (Easter Eve); Advent Sunday to Christmas Eve; Vigils, Ember Days (except in Whitsun Week), and Rogation Days; Holy Innocents (unless on Sunday).

*Black*—Good Friday and at funerals. *Green*—All other days.

Easter Sunday (Easter Day) is the first Sunday after the Paschal Full Moon; that is the first Sunday after the full moon on or next after March 21, and therefore cannot be earlier than March 22, or later than April 25. If the full moon falls on a Sunday, then Easter Day is the next Sunday.

Lent begins on Ash Wednesday, which comes 40 days previous to Easter Sunday, not counting Sundays.

## DIVISIONS OF TIME.

THE interval between two consecutive meridian transits of a fixed star having no proper motion, or the interval during which the earth makes one absolute revolution on its axis, is invariable. Very slightly differing from this is a Sidereal Day, which is the interval between two consecutive transits of the Vernal Equinox over any meridian. Vernal Equinox is employed in two senses: it may mean either the date when Spring commences, or else, as here, the point in the heavens occupied by the sun's centre when Spring commences. The interval between two consecutive transits of the Sun over any meridian is called an *Apparent* Solar Day, and its length varies from day to day by reason of the variable motion of the earth in its orbit and the inclination of this orbit to the Equator on which time is measured.

A *Mean* Solar Day is the average or mean of all the apparent solar days in a year; it is equal to 1 day 3 minutes and 56.555 seconds, when measured in units of the Sidereal Day. *Mean Solar Time* is that shown by a well-regulated clock or watch, while *Apparent Solar Time* is that shown by a well-constructed sun-dial; the difference between the two at any time is the *Equation of Time*, and may amount to 16 minutes and 22 seconds. The Astronomical Day begins at noon and the Civil Day at the preceding midnight.

The interval during which the earth makes one absolute revolution round the Sun is called a *Sidereal Year*, and consists of 365 days 6 hours 9 minutes and 9.6 seconds, which is invariable.

The Tropical Year is the interval between two consecutive returns of the sun to the Vernal Equinox. If this were a fixed point, the Sidereal and Tropical Years would be identical; but in consequence of the action of the Sun and Moon upon the equatorial protuberance of the Earth's mass and, in a much less degree, the disturbing influence of the planets upon the Earth's orbit, the Equinox has a slow, retrograde mean motion of 50".26 annually, so that the Sun returns to the Equinox sooner every year than he otherwise would by 20 minutes 23.6 seconds; the Tropical Year, therefore, consists of 365 days 5 hours 48 minutes and 46 seconds. The Tropical Year is not of uniform length; it is now slowly decreasing at the rate of .530 second per century, but this variation will not always continue.

Julius Cæsar, in B. C. 45, reformed the Roman calendar so that thereafter every fourth year should contain 366 days, and all the other years 365 days. The intercalary day was introduced by counting the *sixth* day before the Kalends of March *twice*, hence the name bissextile, from bis, twice, and sex, six. He also changed the beginning of the year from the first of March to the first of January, and also changed the name of the fifth month (Quintilis) to July, after himself. The average length of the Julian year is therefore 365¼ days, which, however, is too long by 11 minutes and 14 seconds, and this would accumulate in 400 years to about three days. The Julian Calendar continued in use until A. D. 1582, when the Gregorian Calendar was introduced by Pope Gregory XIII., with the view of keeping the Equinox to the same day of the year. Of the centurial years only those which are exactly divisible by 400 thenceforward

contained 365 days. The length of the mean Gregorian Year may therefore be set down at 365 days 5 hours 49 minutes 12 seconds, and the error will amount to one day in 3,000 years. The Gregorian Calendar was introduced into England and her colonies in 1752, at which time the Equinox had retrograded 11 days since the Council of Nice in A. D. 325, when the rule for Easter Day was established and the Equinox occurred on March 21; hence September 3, 1752, was called September 14, and at the same time the commencement of the legal year was changed from March 25 to January 1, so that the year 1751 lost the months of January and February and the first 24 days of March. The difference between the Julian and Gregorian Calendars is now 13 days.

The Gregorian Calendar was adopted by Japan in 1873, by the Chinese Republic in 1912, by the Turkish Parliament in 1917, by the Bolshevist Government of Russia in 1918, and by Roumania in 1919. Bulgaria, Serbia, Greece and the Greek Church still use the Julian Calendar.

## STANDARD TIME.

THE United States adopted standard time in 1883, on the initiative of the American Railway Association, and at noon of November 18, 1883, the telegraphic time signals sent out daily from the Naval Observatory at Washington were changed to the new system, according to which the meridians of 75°, 90°, 105° and 120° west from Greenwich became the time meridians of Eastern, Central, Mountain, and Pacific standard time respectively.

By Act of Congress, approved March 19, 1918, standard time is made the legal time throughout the United States; in addition to the four time meridians already mentioned, the meridian 150° west from Greenwich is established the time meridian of standard Alaska time; authority to readjust the boundary line between the time zones is lodged with the Interstate Commerce Commission. The Commission has made the readjustment so as to bring the new limits of the zones about half way between the standard meridians.

United States standard Eastern time is used from the Atlantic Ocean to a line through Toledo, Monroeville, Mansfield and Newark, O.; thence through Huntington, W. Va.; Norton, Va.; Johnson City, Tenn.; Asheville, N. C.; Atlanta and Macon, Ga., and Apalachicola, Fla. U. S. standard Central time is used from this first line to a line through Mandan, N. D.; Pierre, S. D.; McCook, Neb.; Dodge City, Kan., and along west line of Okla. and Tex.; standard Mountain time is used from the second line to a line that forms the western boundary of Mont., and thence passes through Pocatello, Idaho; Ogden and Salt Lake City, Utah; Parker and Yuma, Ariz. U. S. standard Pacific time is used from the third line to the Pacific Ocean.

Almost all countries throughout the world use standard time based on the meridians 15° apart from Greenwich, while some use standard time based on the longitude of their national observatories.

United States standard Eastern time is time of the meridian 75° west from Greenwich. If Summer time be desired one hour must be added to the time given in the two tables above. Summer time, or daylight saving time, is still in use throughout Europe; also in some American cities and Commonwealths.

## LONGITUDE DIFFERENCE.

THE DIFFERENCE IN LONGITUDE BETWEEN NEW YORK CITY AND THE FOLLOWING FOREIGN CITIES; MEASURED FROM NEW YORK EAST OR WEST AS INDICATED:

| | H. | M. | | H. | M. | | H. | M. |
|---|---|---|---|---|---|---|---|---|
| Aden | 7 | 56 E. | Dublin | 4 | 31 E. | Melbourne | 14 | 36 E. |
| Alexandria | 6 | 55 E. | Hamburg | 5 | 36 E. | Mexico City | 1 | 40 W. |
| Amsterdam | 5 | 16 E. | Havana | | 33 W. | Natal | 7 | 0 E. |
| Athens | 6 | 31 E. | Havre | 4 | 56 E. | Paris | 5 | 5 E. |
| Berlin | 5 | 49 E. | Hongkong | 12 | 33 E. | Petrograd | 6 | 57 E. |
| Berne | 5 | 26 E. | Honolulu | 5 | 36 W. | Rio de Janeiro | 2 | 3 E. |
| Bogota | | 1 W. | Lima | | 13 W. | Rome | 5 | 46 E. |
| Bombay | 9 | 47 E. | Lisbon | 4 | 20 E. | Santiago (Chile) | 0 | 13 E. |
| Bremen | 5 | 31 E. | Liverpool | 4 | 44 E. | Sitka, Alaska | 4 | 5 W. |

### METHOD OF USING THE TABLE ABOVE, WITH NEW YORK CITY AS AN EXAMPLE.

Directions:—From New York City, subtract 4m from the Calendar for that city and the result is in Eastern standard time; for other cities, use the Calendar named at head of column and add or subtract the given number of minutes; this gives the required standard time, which is Eastern, Central, Mountain or Pacific, according as the letter E, C, M or P is found in the table. A small letter indicates that in case of sunrise and sunset, a correction for latitude is advisable; which correction is to be found in the table below, in the column headed by the small letter and on line with the date.

### CORRECTION TO SUNRISE.

| DATE. | b. | c. | d. | e. | f. | g. | h. |
|---|---|---|---|---|---|---|---|
| | M. | M. | M. | M. | M. | M. | M. |
| Jan. 1 | add 4 | add 8 | add 17 | sub 4 | sub 7 | sub 9 | sub 17 |
| 15 | add 4 | add 7 | add 14 | sub 3 | sub 6 | sub 8 | sub 15 |

The above table of days' lengths at New York City serves as the basis for similar computations elsewhere.

## HOLIDAYS OF THE WORLD.

(For full list of fixed, historical, commemorative, and religious holidays, see 1919 ALMANAC.)

Christmas and New Year's are observed the world over.

In Episcopal countries, such as England, the only church days which are regular legal holidays, aside from Christmas, are Good Friday Easter Monday, and Whit-Monday. This holds good for the British colonies, in some of which several Roman Catholic Church holidays are established. Whit-Sunday, or White Sunday, comes seven weeks after Easter. It commemorates the descent of the Holy Ghost upon the Apostles; the old feast of Pentecost.

In Roman Catholic countries, such as Spain, the church days other than Christmas which are almost universally legal holidays are Epiphany, Ascension, Assumption, All Saints', and Immaculate Conception. Throughout the Latin-American countries it is usual to observe, in addition, Good Friday and Corpus Christi. Good Friday is in many of these countries a 3-day holiday season, beginning on Holy Thursday and closing on Holy Saturday.

In Lutheran countries, such as Sweden and Prussia, Epiphany, Annunciation, Good Friday, Easter Monday, Ascension Day, Whit-Monday, Ash Wednesday, and Corpus Christi are holidays.

### OLD ENGLISH HOLIDAYS.

JANUARY 6. TWELFTH DAY, or Twelfth-tide, sometimes called Old Christmas Day, the same as Epiphany. The previous evening is Twelfth Night, with which many social rites have long been connected.

FEBRUARY 2. CANDLEMAS: Festival of the Purification of the Virgin. Consecration of the lighted candles to be used in the church during the year. Also known as "Groundhog Day."

FEBRUARY 14. OLD CANDLEMAS: St. Valentine'sDay.

MARCH 25. LADY DAY: Annunciation of the Virgin. April 6 is old Lady Day.

JUNE 24. MIDSUMMER DAY: Feast of the Nativity of John the Baptist. July 7 is old Midsummer Day.

JULY 15. ST. SWITHIN'S DAY. There was an old superstition that if rain fell on this day it would continue forty days.

AUGUST 1. LAMMAS DAY. Originally in England the festival of the wheat harvest. In the church the festival of St. Peter's miraculous deliverance from prison. Old Lammas Day is August 13.

SEPTEMBER 29. MICHAELMAS: Feast of St. Michael, the Archangel. Old Michaelmas is October 11.

NOVEMBER 1. ALL-HALLOWMAS: All-hallows, or All Saints' Day. The previous evening is All-hallow-e'en, observed by home gatherings and old-time festive rites.

NOVEMBER 2. ALL SOULS' DAY: Day of prayer for the souls of the dead.

NOVEMBER 11. MARTINMAS: Feast of St. Martin. Old Martinmas is November 23.

DECEMBER 28. CHILDERMAS: Holy Innocents' Day.

Lady Day, Midsummer Day, Michaelmas and Christmas are quarter (rent) days in England, and Whitsunday, Martinmas, Candlemas and Lammas Day in Scotland.

Shrove Tuesday, the day before Ash Wednesday, and Maundy Thursday, the day before Good Friday, are observed by the church. Mothering Sunday is Mid-Lent Sunday, in which the old rural custom obtains of visiting one's parents and making them presents.

## LEGAL OR PUBLIC HOLIDAYS IN THE UNITED STATES IN 1923.

**The chief legal or public holidays are:**

**Jan. 1**—New Year's Day (all the States, Territories and colonial possessions).

**Feb. 12**—Lincoln's Birthday (Alaska, Cal., Colo., Conn., Del., Ill., Ind., Ia., Kan., Ken., Mich., Minn., Mo., Mont., Neb., Nev., N J., N. Y., N. Dak., Ohio, Ore., Pa., Porto Rico, S. Dak., Utah, Wash., W. Va., Wyo.).

**Feb.22**—Washington's Birthday (all the States, Territories and possessions).

**Mar. 30**—Good Friday (Conn., Del., Fla., La., Md., Minn., N. J., Pa., Philippines, Porto Rico, Tenn.). In Conn. Good Friday is usually proclaimed by the Governor as a day of fasting and prayer.

**May 30**—Decoration or Memorial Day (all States and possessions, except Ala., Fla., Ga., La., Miss., N. Car., S. Car., Tenn. and Tex.).

**July 4**—Independence Day (all the States, Territories and possessions).

**Sept. 3**—Labor Day (every State and Territory except Wyoming and the Philippines).

**Oct. 12**—Columbus Day (every State and Territory except Alaska, Ark., Dist. of Col., Fla., Ga., Hawaii, Ia., Me., Minn., Miss., N. C., Okla., Philippines, So. C., S. Dak., Tenn., Utah, Va., Wis. and Wyo. In Kansas it is not a holiday as to courts or notes).

**Nov. 6**—General Election Day (1st Tuesday after 1st Monday in Nov.). Every State and Territory except Alaska, Dist. of Col., Hawaii, Ill., Mass., Miss., Ohio, Philippines and Vt. In Illinois it is a legal holiday in Chicago, Springfield, East St. Louis, Galesburg, Danville, Cairo and Rockford. In Ohio it is a half holiday. In Maine it is a legal holiday only as to the courts, which also close on the State Election Day (biennially, 2d Monday in Sept.).

**Nov. 29**—Thanksgiving Day (last Thursday in Nov. Every State, Territory and possession except Utah, where it is observed, though not on the statute books).

**Dec. 25**—Christmas Day (every State, Territory and possession).

### LAW AS TO NEGOTIABLE INSTRUMENTS.

*Under the Negotiable Instruments Law every negotiable instrument is payable at the time fixed therein without grace. When the day of maturity falls upon Sunday or a holiday, the instrument is payable on the next succeeding business day. In the United States legal holidays are fixed by State and Territorial legislation. No national holidays have been established by congressional action.*

### OTHER LEGAL OR PUBLIC HOLIDAYS NOT IN THE ABOVE TABLE.

**Jan. 8**—Battle of New Orleans (at New Orleans only).

**Jan. 19**—R. E. Lee's Birthday (observed in Ala., Ark., Fla., Ga., Miss., N. C., S. C., Tenn. and Va.).

**Feb. 12**—Georgia Day (in that State only. Date of Oglethorpe's landing in 1733).

**Feb. 13**—Shrove Tuesday (observed as Mardi Gras in Ala., Fla. and La.).

**Feb. 14**—Admission Day (in Arizona).

**Mar. 2**—Sam Houston Memorial Day (in Texas).

**Mar. 4**—Inauguration Day (once every 4 years in the Dist. of Col. only).

**Mar 22**—Emancipation Day (in Porto Rico).

**Mar. 25**—Maryland Day (in that State only).

**Mar. 30**—Seward Day (in Alaska).

**April 12**—Date of passage of Halifax Resolutions (in North Carolina).

**Mar. 29**—Holy Thursday (in the Philippines).

**April 13**—Birthday of Thomas Jefferson (in Ala.).

**April 19**—Observed as Patriots' Day (in Me. and Mass.).

**April (3rd Tuesday)**—State elections (in La.).

**April 21**—Anniversary Battle of San Jacinto (in Tex.).

**April 26**—Confederate Memorial Day (in Ala., Fla., Ga. and Miss.).

**April (Last Thursday)**—Fast Day (in N. H.).

**May 1**—Labor Day (in Philippines).

**May (1st Tuesday)**—Pres. Primary Day (in Cal.).

**May (2nd Sunday)**—Mothers' Day.

**May 10**—Confed. Memorial Day (observed in S. C.).

**May 20**—Anniversary signing of Mecklenburg Declaration of Independence (observed in N. C.).

**May (3rd Friday)**—Primary Day (in Ore.).

**June 3**—Birthday of Jefferson Davis (in Ala., Ark., Fla., Ga., La., Miss., S. C., and Tex.).

**June 3**—Decoration Day (in Tenn.).

**June 11**—Kamehameha Day (in Hawaii).

**June 14**—Flag Day.

**July 12**—Muno Rivera Day (in Porto Rico).

**July 25**—Occupation Day (in Porto Rico).

**Aug. 1**—Colorado Day (in that State only).

**Aug. 13**—Occupation Day (in Philippines).

**Aug. 16**—Anniv. Battle of Bennington (in Vt.).

**Aug. (Last Tues.)**—Prim. Elec. Day (Cal. and Mich.).

**Sept. (1st Tuesday)**—Prim. Elec. Day (in Nev.).

**Sept. (2nd Monday)**—State Election Day (in Me.).

**Sept. 6**—Lafayette Day (also the anniversary of the First Battle of the Marne) is not a legal holiday, but is celebrated in New York and ten other States.

**Sept. 9**—Admission Day (in Cal.).

**Sept.12**—Defenders' Day (in Md.).

**Oct. 1**—Missouri Day (in that State only).

**Oct. 18**—Alaska Day (in Alaska only).

**Oct. 31**—Admission Day (in Nev.).

**Nov. 1**—All Saints' Day (in La.).

**Dec. 30**—Rizal Day (in Philippines).

**Child Labor Day** (not a legal holiday) is observed in many of the States on the last Sunday in January.

## DATES ON WHICH ARBOR DAY IS OBSERVED.

THE Golden Anniversary of Arbor Day was celebrated throughout the United States on April 22, 1922, as a part of Forest Protection Week, by a proclamation from President Harding. The pioneer Arbor Day State is Nebraska, where the observance began in April, 1872.

The time of the observance of Arbor Day varies greatly in different States and countries, being determined somewhat by climatic conditions, sometimes a day which is already a holiday is selected, as in Alabama and Texas, where Washington's Birthday has been chosen; and in Jamaica, on the late Queen Victoria's Birthday. In many States of the Union it is combined with Bird Day. In general the date is early in the year in the South, and is set further along toward Summer in the more northern States, beginning in February and ending in May. In the following list the date in parentheses is the year when the Arbor Day Law was first observed. If there is a second date not in parentheses it is the year when an Arbor Day Law was enacted:

Alabama (1887)— February 22.
Arizona (1890)—In 5 no. counties, Fri. after 1st day April. Elsewhere Fri. after 1st day February.
Arkansas (1906)—First Sat. in March.
California (1886)—March 7.
Colorado (1885)—3d Fri. in April. The Gov. issues proclamation.
Connecticut (1887)—1886. Early May, by procl. of Gov.
Delaware (1901)—April, by procl. of Gov.
District of Columbia (1919)—April 16, by proclamation of the District Commissioners.
Florida (1886)—First Fri. in February.
Georgia (1887)—1890. First Fri. in December.
Hawaii (1906)—First Fri. in November.
Idaho (1886)—Various dates in April named by County Supts.
Illinois (1886)—Procl. of Gov.
Indiana (1884)—1913. Third Fri. in April.
Iowa (1887)—Procl. by Governor.
Kansas (1875)—Option of the Governor.
Kentucky (1886)—In the fall by procl. of Gov.
Louisiana (1888-89)—Second Fri. in January.
Maine (1887)—Option of Governor.
Maryland (1889)—Second Fri. in April. Procl. of Governor.
Massachusetts (1886)—Last Sat. in April.
Michigan (1885)—Procl. of Gov., usually last Fri. in April.
Minnesota (1876)—Procl. of Gov., usually last part April.
Missouri (1886)—1889. First Fri. after first Tues. April.
Montana (1888)—Second Tuesday May.
Nebraska (1872)—April 22 (birthday J. S. Morton).
Nevada (1887)—Procl. of Governor
New Hampshire (1886)—Procl. of Governor.
New Jersey (1884)—By law, second Fri. April.
New Mexico (1890)—Second Fri. Mar. Procl. of Gov.
New York (1889)—1889. Fri. after 1st of May.
North Carolina (1893)—1915. Fri. after Nov. 1st.
North Dakota (1882)—Option of Governor.
Ohio (1882)—Procl. of Gov. About middle of April.
Oklahoma (1898)—1901. Fri. fol. 2d Mon. in March.
Oregon (1889)—Second Fri. in April.
Pennsylvania (1885)—Procl. of Governor.
Porto Rico ....—Last Fri. in November.
Rhode Island (1887)—1896. Second Fri. in May.
South Carolina (1898)—1898. Third Fri. in Nov.
South Dakota ....—No law, gen. observ. in April.
Tennessee (1875)—1887. Appointed by County Superintendents in November.
Texas (1890)—1889. Feb. 22.
Utah ....—April 15, by statute.
Vermont (1885)—Opt. of Gov., usually 1st Fri. May.
Virginia (1892)—1902. Procl. of Gov. In spring.
West Virginia (1883)—Usually observ. 2d Fri. April.
Wisconsin (1889)—Proc. of Gov., usually 1st Fri. May.
Washington (1894)—Procl. of Gov., usually 1st Fri. May.
Wyoming ....—1888. Procl. of Gov., usually 1st Fri. in May.

## ASTRONOMICAL CONSTANTS.

MEAN solar parallax, 8″.80. Nutation constant, 9″.21.

Aberration constant, 20″.47. Annual precession, 50″.2534+0″.000222 (t—1900).

Obliquity of the ecliptic, 23° 27′ 8″.26—0″.4684 (t—1900).

Annual diminution of obliquity, 0″.4684.

Moon's equatorial horizontal parallax, 57′ 2″.63.

Moon's mean distance from the earth (centre to centre), 238,857 miles.

Sun's mean distance from the earth (astronomical unit), 92,897,400 miles.

Velocity of light, 186,324 miles per second.

Light travels unit of distance—viz. 92,897,400 miles in 498.580 seconds.

Length of the Year—Tropical (equinox to equinox, 365.2421988 days. Sidereal or absolute revolution, 365.2563704 days. Anomalistic (from perihelion to perihelion), 365.259643 days.

Length of Day—Sidereal, 23 hours 56 minutes 4.091 seconds (mean solar time). Mean solar, 24 hours 3 minutes 56.555 seconds (sidereal time).

Length of the Month—Synodical (from new moon to new moon), 29 days 12 hours 44 minutes 2.8 seconds. Tropical, 27 days 7 hours 43 minutes 4.7 seconds. Sidereal (absolute revolution), 27 days 7 hours 43 minutes 11.5 seconds. Anomalistic (from perigree to perigree), 27 days 13 hours 18 minutes 33.1 seconds.

Dimensions of the Earth—Equatorial radius, 3,963.34 miles. Polar radius, 3,949.99 miles. Eccentricity of the oblate spheroid, 0.0819981.

### ASTRONOMICAL SIGNS AND SYMBOLS.

| | | | | | |
|---|---|---|---|---|---|
| ☉ | The Sun. | ♂ | Mars. | ☌ | Conjunction. |
| ☾ | The Moon. | ♃ | Jupiter. | □ | Quadrature. |
| ☿ | Mercury. | ♄ | Saturn. | ☍ | Opposition. |
| ♀ | Venus. | ♅ | Uranus. | ☊ | Ascending Node. |
| ⊕ | The Earth. | ♆ | Neptune. | ☋ | Descending Node. |

Two heavenly bodies are in "conjunction" (☌) when they have the same *Right Ascension*, or are on the *same meridian*, *i. e.*, when one is due *north* or *south* of the other; if the bodies are near each other as seen from the earth, they will rise and set at the same time; they are in "opposition" (☍) when in opposite quarters of the heavens, or when one rises as the other is setting. "Quadrature" (□) is half way between conjunction and opposition. By "greatest elongation" is meant the greatest apparent *angular* distance from the sun; the planet is then generally most favorably situated for observation. Mercury can be seen with the naked eye only at this time. When a planet is in its "ascending" (☊) or "descending" (☋) node it is passing through the plane of the earth's orbit. The term "Perihelion" means nearest to the sun, and "Aphelion" farthest from the sun. An "occultation" of a planet or star is an eclipse of it by some other body, usually the moon.

## THE ZODIAC.

THE sun's apparent yearly path among the stars is known as the ecliptic. The zone 16° wide, 8° on each side of the ecliptic, is known as the zodiac. Beginning at the point on the ecliptic which marks the position of the sun at the vernal equinox, and thence proceeding eastward, the zodiac is divided into twelve signs of 30° each, as follows:

Spring Signs.
1. ♈ Aries. The Ram.
2. ♉ Taurus. The Bull.
3. ♊ Gemini. The Twins.

Summer Signs.
4. ♋ Cancer. The Crab.
5. ♌ Leo. The Lion.
6. ♍ Virgo. The Virgin.

Autumn Signs.
7. ♎ Libra. The Balance.
8. ♏ Scorpius. The Scorpion.
9. ♐ Sagittarius. The Archer.

Winter Signs.
10. ♑ Capricornus. The Goat.
11. ♒ Aquarius. The Water-Bearer.
12. ♓ Pisces. The Fishes.

These signs are named from the twelve constellations of the zodiac; with which the signs coincided in the time of the astronomer Hipparchus, about two thousand years ago. Owing to the precession of the equinoxes, that is to say, to the retrograde motion of the equinoxes along the ecliptic, each sign in the zodiac has, in the course of two thousand years, moved backward 30° into the constellation west of it; so that the sign Aries is now in the constellation Pisces, and so on.

## ECLIPSES IN 1923.

### TOTAL ECLIPSE OF THE SUN.

THE year 1923 is notable for a total eclipse of the sun, the first since 1918 to be visible in the United States and the last until 1925. The path of total obscuration will be 105 miles wide and the central line will pass among the islands off the southern coast of California. The northern limit of totality will lie one mile to the northeast of Santa Barbara, twenty-five miles to the southwest of Los Angeles, ten miles to the southwest of Long Beach, and seventeen miles to the northeast of San Diego. California is the only State in which the total phase will be visible.

In the year 1923 there will be four eclipses in all, two of the sun and two of the moon.

1. A small partial eclipse of the moon on the night of March 2, visible in the United States, beginning at 9h. 28m. P.-M., and ending at 11h. 36m. P. M., Eastern standard time. Visible generally in Europe, the Atlantic Ocean, and in North and South America.

Magnitude 0.376 (moon's diameter = 1.0). First contact with the shadow is 54° from the north point of the moon toward the east. Last contact is 20° from the north point toward the west.

2. An annular eclipse of the sun, March 17. Visible generally as a partial eclipse in South America south of latitude 15° S. and in Africa south of latitude 10° N. The annular phase will be visible in Patagonia, the Falkland Islands, Southern Africa and in Madagascar.

### PARTIAL ECLIPSE OF THE MOON.

3. A small partial eclipse of the moon visible in the United States the morning of August 26, beginning at 4h. 52m. A. M., and ending at 6h. 27m. A. M., Eastern standard time; the moon setting eclipsed in the Eastern States. Visible generally in North America, the Pacific Ocean and Australia.

Magnitude 0.168 (moon's diameter = 1.0). First contact with the shadow is 140° from the north point of the moon toward the east. Last contact is 171° from the north point toward the west.

4. As already noted, a total eclipse of the sun, September 10, visible as a partial eclipse over the whole of North America and the West Indies. The path of central or total eclipse begins in the Pacific Ocean near Kamchatka, passes to the south of the Aleutian Islands, skirts and overlaps the coast of California, passes through Lower California, Mexico, Yucatan, the Caribbean Sea and ends at sunset near the Lesser Antilles.

### TOTAL ECLIPSE OF THE SUN, SEPTEMBER 10, 1923.

(Where visible as a total eclipse.)

The following table shows the places at which the sun on Sept. 10, 1923, will be in total eclipse, with the data relating thereto:

| PLACE. | Standard Time. | Eclipse Begins. | Totality Begins. | Totality Ends. | Eclipse Ends. | Distance From Central Line. |
|---|---|---|---|---|---|---|
| | | H. M. | H. M. S. | H. M. S. | H. M. | *Miles.* |
| Avalon, Cal | Pacific | 11 29 A.M. | 12 54 23 P.M. | 12 57 11 P.M. | 2 18 P.M. | 33 |
| Pt. Conception, Cal | " | 11 23 A.M. | 12 48 23 P.M. | 12 51 27 P.M. | 2 12 P.M. | 28 |

## THE MAGNETIC POLES.

THE geographical poles of the earth are the extremities of the imaginary line passing through its centre of gravity and about which it revolves, and are therefore symmetrically located with regard to the equator.

The magnetic poles, however, are not coincident with the geographical poles, nor are they diametrically opposite to each other. Prior to the recent attempt of Amundsen to determine the north magnetic pole, the only other was by Capt. James Ross in June, 1831, who found the dip of the magnetic needle to be 89° 59′ .5, in latitude 70° 5′ .2 N. and longitude 96° 45′ .8 W., which is in King William Land, Canada. The result of Amundsen's observations has not yet been published by the Norwegian authorities.

For the south magnetic pole, from a consideration of all the results available, according to the United States Coast and Geodetic Survey, the position latitude 72° .7 S. and longitude 156° E. has been tentatively adopted. These values are only roughly approximate, and for that reason are given only in degrees and tenths.

By reason of the annual variation of the magnetic needle, it is believed that the magnetic poles are not stationary, but have a slow motion around the geographical poles.

## THE MOON.

Of all the secondary planets the earth's satellite is by far the most interesting and important. The moon completes her circuit around the earth in a period whose mean or average length is 27 days 7 hours 43.2 minutes; but in consequence of her motion in common with the earth around the sun, the mean duration of the lunar month—that is, the time from new moon to new moon—is 29 days 12 hours 44.05 minutes, which is called the moon's synodical period. If the earth were motionless in space the moon's orbit would be nearly an ellipse, having the earth in one of the foci; hence her distance from the earth varies during the course of a lunar month. Her mean distance from the earth is 238,857 miles. Her maximum distance, however, may reach 252,715 miles, and the least distance to which she can approach the earth is 221,466 miles. Her diameter is 2,160 miles, and if we deduct from her distance from the earth the sum of the two radii of the earth and moon—viz., 3,963 and 1,080 miles, respectively—we shall have for the nearest approach of the surfaces of the two bodies 216,423 miles. Her orbit is a very intricate one, because the earth in moving around the sun carries the moon along with it; hence the latter is sometimes within and sometimes without the earth's orbit. Its form is that of a serpentine curve, always *concave* toward the sun, and its plane is inclined to the plane of the earth's orbit at an angle of 5° 9′, in consequence of which our satellite appears sometimes above and sometimes below the plane of the earth's orbit, through which she passes twice in a revolution. These points of intersection with the ecliptic are called nodes, and it is only at or near them that eclipses can occur. The nodes have a retrograde motion, which causes them to make an entire revolution in 18 years 218 days 21 hours 22 minutes and 46 seconds. Both sun and moon return to a node after 18 years and 11 days, so that an eclipse is followed by another of the same general character at the end of this period, which was well known to the ancients, who called it the Saros; and which was made use of by them in roughly predicting eclipses.

The moon always presents the same face to us, as is evident from the permanency of the various markings on her surface. This circumstance proves that she revolves on an axis, and the time of rotation is exactly equal to the time of revolution around the earth—viz., 27.32166 days. The moon's axis is not perpendicular to the plane of her orbit, but deviates therefrom by an angle of about 6° 41′. In consequence of this fact the poles of the moon lean alternately to and from the earth. When the north pole leans toward the earth we see somewhat more of the region surrounding it, and somewhat less when it leans the contrary way. This displacement is known by the name of libration in latitude. By reason of irregular motion in her orbit, we see more of her eastern or western edge at one time than at another. This phenomenon is known as libration in longitude.

The moon's surface contains about 14,657,000 square miles, or nearly four times the area of Europe. Her volume is 1-49 and her mass 1-81 that of the earth, and hence her density is about 3-5 that of the earth, or about 3 2-5 that of water. At the lunar surface gravity is only 1-6 of what it is at the earth, and therefore a body which weighs 6 pounds here would weigh only 1 pound there.

The centre of gravity of the earth and moon, or the point about which they both actually revolve in their course around the sun, lies *within* the earth; it is 1,050 miles below the surface.

The tides are caused mainly by the moon; the tide-raising power of moon and sun being as 11 to 5.

Astronomers cling to the old idea that the moon is a dead world, destitute alike of air and water. But the recent observations of W. H. Pickering made at Mandeville, Jamaica, go to show that many changes occur with the alternation of lunar day and night: Great snowfields form in the mountain valleys and then melt away; fog banks are seen and, very rarely, drifting clouds. The loftiest peaks are snow-capped. The moon's surface is pitted with volcanic craters; some of these measure 100 miles across. Each crater is surrounded by a mountain ring 1,000 to 20,000 feet in height. According to Pickering, there are few, if any, such large and continuously active volcanic regions upon the surface of our earth. But the activity of the lunar volcanoes is now confined to the quiet emission of steam jets like those found in our Yellowstone National Park. Certain variable dark areas on the moon may be due to vegetation.

### THE EARTH'S ATMOSPHERE.

The earth's sensible atmosphere extends more than 100 miles in height. The condition and motions of this aerial ocean play a most important part in the determination of climate, modifying, by absorbing, the otherwise intense heat of the sun, and, when laden with clouds, hindering the earth from radiating its acquired heat into space.

Each month the moon is said to be in perigee when nearest to the earth and in apogee when furthest from the earth. The average time from perigee to perigee, or from apogee to apogee is 27d. 13h. 18m. 33s.; and this period is known as the anomalistic month. The moon's distance when in perigee or apogee is not exactly the same in different months but varies considerably according to the phase and the month of the year. The distance is the very least when the full moon nearest to January 1 occurs at the time of perigee. And the distance is the very greatest when the new moon nearest to January 1 occurs at the time of apogee.

## HALLEY'S AND OTHER COMETS.

Of the great number of comets which have temporarily visited our solar system or have become permanent members of it none has surpassed Halley's in historical associations. It has a record dating back to B. C. 240; its visitations spread alarm and consternation throughout Europe during the Middle Ages; it was the first whose return was predicted by an Astronomer Royal of England, and will therefore, for these reasons, be an object of great scientific interest for all time. Its periodic time is 76.8 years, and in April, 1910, it made the perihelion passage for the twenty-ninth time.

### ENCKE'S COMET.

The second of the periodic comets to be discovered was Encke's, as Halley's was the first. Encke's Comet has the shortest period known,—namely, about forty months. The observed visitations, from January, 1819, to June, 1921, form an uninterrupted series, thirty-two in number.

Encke's is unique among comets in that its motion is constantly accelerating and its period is decreasing in proportion, being now 1,203 days as compared with 1,205 days in 1819. At first this was ascribed to a resisting medium; but it is more probably due to repeated passage of the comet through a cloud of meteors.

### COMETS OF 1843 AND 1882.

In the last 100 years only two comets have been brilliant enough to be seen by day with the unaided eye. Of these one was in February, 1843; the other in September, 1882. Together with the comet of 1668 and that of 1887, they form a comet group; each member, at perihelion, nearly brushes the sun's surface, that of 1843 having a velocity of 366 miles per second and passing halfway around the sun in two hours. These visitors are expected to return after six or seven centuries. The four comets were probably a single body until too close an encounter with the sun resulted in disruption.

### DONATI'S COMET.

This was the first comet of the nineteenth century and is known as the typical comet. In October, 1858, its tail reached halfway from the horizon to the zenith. Its period is 2,000 years.

## DOES THE MOON AFFECT WEATHER ON THE EARTH?

There has been a renewal recently of the controversy as to whether the moon at its changes of phases has any influence on the weather. United States Weather Bureau officials say there is no such influence, but the old legend to the contrary persists.

## DENSITY OF STARS.

From the photometric study of eclipsing binary stars it has been shown by Roberts and by Russell that the average densities of these stars is small, no more than one-eighth of that of the sun. On this and other grounds astronomers are of the opinion that stars are generally less dense than the sun; that is, that they occupy a larger volume when of equal mass. The sun is only 1.4 times as dense as water, or half as dense as glass, while our earth is 5.5 times as dense as water, or 4 times as dense as the sun.

We may suppose that certain meteors are efficacious for troubling the surface of the sun because they are subject to closer approaches to it. Turner was led to adopt the idea, formerly held by J. Herschel, while trying to represent the variable frequency of sun spots by a series of periodical terms. For a course of years certain constant values may be adopted for the coefficients of these terms, and then these values have to be altered. The epochs of all these perturbations, according to Turner, fall close to the time of the perihelion passage of the Leonides. It is true the distance of the Leonides from the sun, even at perihelion passage, is somewhat great and necessitates recourse to a secondary stream derived through the intervention of some planet. This theory finds a certain degree of confirmation in the Chinese annals, which record ancient increases in sun spots when the Leonides swarm must have passed close to Saturn.

## THE HEAT OF THE STARS.

The heat of three stars—Aldebaran, Capella and Betelgeuse—has been measured by R. G. Abbott and L. B. Aldrich of the Smithsonian Institution at the Carnegie Solar Observatory on Mt. Wilson, Cal.

The heat of the stars first was gathered and brought to focus by the 100-inch telescope. The heat and light then were passed through a prism and spread out into a rainbow-colored spectrum. The observers then measured the light in each color as well as the invisible heat.

As the hotter a body is the whiter and bluer is its light, the intensities of the heat in the various colors allowed an estimate of the temperature of the stars, which was fixed at approximately 10,000 degrees centigrade, or 18.000 degrees Fahrenheit.

## POLE STAR.

From June 16 to August 1 both the upper and lower transits take place during daylight. The azimuth at the time of greatest Eastern or Western elongation can be easily computed from the formula:

$$\sin A = \frac{\sin p}{\cos l}$$

where $A$ denotes the azimuth, $p$ the polar distance, and $l$ the latitude of the place.

### TIME OF GREATEST ELONGATION.

In the United States, the greatest Eastern elongation of Polaris occurs 5h. 55m. before upper transit and 6h. 3m. after lower transit; while the greatest Western elongation occurs 5h. 55m. after upper transit and 6h. 3m. before lower transit.

## STAR TABLE.

FOR IDENTIFYING THE PRINCIPAL FIXED STARS.

| Name of Star. | Magnitude. | Declination. | On Meridian. | Name of Star. | Magnitude. | Declination. | On Meridian. |
|---|---|---|---|---|---|---|---|
| | | ° ′ | Upper H. M. Lower H. M. | | | ° ′ | Upper H. M. Lower H. M. |

To find the time of the star's transit, add or subtract, according to the sign, the hours and minutes given in the "On Meridian" column, applying them to the time of the transit of the pole star given above. Thus, for α Andromedæ, February 11; lower transit of the pole star is 4h. 11m. 34s. A. M., to which add 10h. 29m., and we have 2h. 41m. P. M.; for December 1, we find 7h. 26m. P. M., etc.

### APPROXIMATE PARALLAX AND DISTANCE IN LIGHT-YEARS OF SOME OF THE PRINCIPAL FIXED STARS.

By light-years is to be understood the number of years light requires to travel from the star to us.

| Name of Star. | Magnitude. | Parallax. | Light-Years. | Name of Star. | Magnitude. | Parallax. | Light-Years. |
|---|---|---|---|---|---|---|---|

| αCanis Minoris (Procyon) | 0.5 | 0.330 | 10 | 85 Pegasi | 5.8 | 0.054 | 60 |

The determination of stellar parallax is one of the most difficult and refined problems in practical or observational astronomy. It is to find the angle which the semi-diameter of the earth's orbit subtends at the star—an angle always very small, as seen from the above table, and which cannot be measured directly but by various processes too complicated to be explained here.

During the last year calculations of astronomers, based on Prof. Einstein's relativity theory, have caused some doubt as to the accuracy of earlier estimates of the distances of remote stars.

## MAGNETIC DECLINATIONS.

OR VARIATION OF COMPASS FOR JANUARY, 1923—WITH THE ANNUAL CHANGE BETWEEN 1915 AND 1922 FOR SELECTED PLACES IN THE UNITED STATES.

A plus(+) sign to the annual change denotes that the declination is increasing, and a minus (—) sign the reverse.

(Specially prepared for THE WORLD ALMANAC in the Office of the United States Coast and Geodetic Survey.)

Latitude of a place is its angular distance from the equator and is measured by an arc of the meridian between the zenith and the equator. Longitude of a place is measured by the arc of the equator, intercepted between the prime meridian and the meridian passing through the place, or by the angle at the pole between these two meridians.

## HIGH-TIDE TABLES.

NOTE—The time as above given from April to October, inclusive, must be increased by one hour in order to obtain Daylight Saving Time.

HIGH-TIDE TABLES—*Continued.*

TIME OF HIGH WATER AT POINTS ON THE ATLANTIC COAST.

The standard time of high water at the following places may be found approximately for each day by adding to or subtracting from the time of high water at Governor's Island, N. Y., the hours and minutes annexed.

| | H. | M. | | H. | M. |
|---|---|---|---|---|---|
| Albany, N. Y. | add | 9 54 | New Haven, Conn. | add | 3 0 |
| Annapolis, Md. | add | 9 13 | New London, Conn. | add | 1 14 |
| Atlantic City, N. J. | sub. | 51 | Newport, R. I. | sub. | 31 |
| Baltimore, Md. | add | 11 5 | Norfolk, Va. | add | 1 21 |
| Bar Harbor, Me. | add | 2 31 | Norwich, Conn. | add | 1 55 |
| Beaufort, S. C. | add | 33 | Old Point Comfort, Va. | add | 49 |
| Block Island, R. I. | sub. | 41 | Philadelphia, Pa. | add | 5 56 |
| Boston, Mass. | add | 3 12 | Plymouth, Mass. | add | 3 4 |
| Bridgeport, Conn. | add | 3 2 | Point Lookout, Md. | add | 5 5 |
| Bristol, R. I. | sub. | 13 | Portland, Me. | add | 2 52 |
| Cape May, N. J. | sub. | 10 | Portsmouth, N. H. | add | 3 13 |
| Charleston, S. C. | sub. | 15 | Poughkeepsie, N. Y. | add | 4 36 |
| Eastport, Me. | add | 2 37 | Providence, R. I. | sub. | 2 |
| Fernandina, Fla. | add | 26 | Richmond, Va. | add | 8 53 |

| Isle of Shoals, N. H. | add | 3 1 | Rockport, Mass. | add | 2 55 |
| Jacksonville, Fla. | add | 1 30 | Salem, Mass. | add | 3 0 |
| Key West, Fla. | add | 2 19 | Sandy Hook, N. J. | sub. | 29 |
| League Island, Pa. | add | 5 26 | Savannah, Ga. | add | 50 |
| Marblehead, Mass. | add | 3 0 | Southport (Smithville), N. C. | sub. | 18 |
| Nahant, Mass. | add | 2 59 | Vineyard Haven, Mass. | add | 3 25 |
| Nantucket, Mass. | add | 4 4 | Washington, D. C. | | 0 |
| Newark, N. J. | add | 58 | Watch Hill, R. I. | add | 36 |
| New Bedford, Mass. | sub. | 19 | West Point, N. Y. | add | 3 2 |
| Newburyport, Mass. | add | 3 23 | Wilmington, N. C. | add | 1 56 |

EXAMPLE.—To find the approximate standard time of high tide at Atlantic City, N. J., on any day, find first the time of high water at New York under the desired date, and then subtract 51 minutes, as in the above table; the result is the time of high water required.

AVERAGE RISE AND FALL OF TIDE.

| PLACES. | Feet. | Inch. | PLACES. | Feet. | Inch. | PLACES. | Feet. | Inch. |
|---|---|---|---|---|---|---|---|---|
| Baltimore, Md. | 1 | 2 | New London, Conn. | 2 | 6 | San Diego, Cal. | 3 | 11 |
| Boston, Mass. | 9 | 7 | New Orleans, La. | None | None | Sandy Hook, N. J. | 4 | 8 |
| Charleston, S. C. | 5 | 2 | Newport, R. I. | 3 | 6 | San Francisco, Cal. | 3 | 11 |
| Colon, Panama | 0 | 11 | New York, N. Y. | 4 | 5 | Savannah, Ga. | 6 | 6 |
| Eastport, Me. | 18 | 2 | Old Point Comf't, Va. | 2 | 6 | Seattle, Wash. | 11 | 4 |
| Galveston, Tex. | 1 | 0 | Balboa, Panama | 12 | 6 | Tampa, Fla. | 2 | 2 |
| Key West, Fla. | 1 | 2 | Philadelphia, Pa. | 5 | 4 | Washington, D. C. | 2 | 11 |
| Mobile, Ala. | 1 | 6 | Portland, Me. | 8 | 11 | | | |

Highest tide at Eastport, Me., 218 inches.

VARIATIONS IN RAINFALL.

Cultivation of semi-arid lands does not cause any appreciable difference in the rainfall in that region, according to records of the Weather Bureau of the Department of Agriculture. Special attention has been given by the bureau to this subject and in arriving at this conclusion the specialists delved into the weather records for the last fifty years. During that period there has been a decided increase in the area under cultivation in the Great Plain States. If increasing the area of cultivation in any district increased the precipitation, the specialists point out, a steady rise in the annual rainfall of this region could be expected. Instead of a regular increase, the records show there are well-defined but comparatively short periods of increasing and decreasing rainfall, which cannot be due to cultivation.

The records of the average rainfall over the Western Great Plains show that for twenty-five years from 1868 to 1892 inclusive, it was 19.2 inches, and from 1893 to 1917 inclusive, 18.4 inches. Over the Southern Great Plains the average rainfall for the twenty-five years, from 1868 to 1892 inclusive, was 19.8 inches, and for the next twenty-five years only 17.8 inches.

WEATHER SEASONS NOT CHANGING, SAYS U. S. WEATHER BUREAU.

The coldest January at New Haven, Conn., since 1790 was in 1857. The coldest February occurred eight years after the warmest one. The coldest March was as late as 1870 and again in 1885. The coldest April was in 1874, and many years after the warmest one. The lowest temperature in May was in 1812, 1815, 1870, and 1882. The highest figures in June were in 1779, 1790, 1803, and 1876. In July the lowest was in 1816, with the warmest as early as 1780 and equalled in 1876. The coldest August occurred 61 years after the warmest. In September the coolest months were in the earlier years, but for October, November, and December the coldest year came after the warmest year in each case.

## WEATHER FLAGS.

OF THE WEATHER BUREAU, U. S. DEPARTMENT OF AGRICULTURE.

THE Weather Bureau furnishes, when practicable, for the benefit of all interests dependent upon weather conditions, the "Forecasts" which are prepared daily at the Central Office in Washington, D. C., and certain designated stations. These forecasts are telegraphed to stations of the Weather Bureau, railway officials, postmasters, and many others, to be communicated to the public by telegraph, telephone, "wireless" and mail or by means of flags or steam whistles. The flags adopted for this purpose are five in number, and of the forms and colors indicated below:

EXPLANATION OF WEATHER FLAGS.

| No. 1. White Flag. | No. 2. Blue Flag | No. 3. White and Blue Flag. | No. 4. Black Triangular Flag. | No. 5. White Flag with black square in Centre |
|---|---|---|---|---|
|  | | |  | |
| Fair weather. | Rain or snow. | Local rain or snow. | Temperature. | Cold wave. |

When number 4 is placed above number 1, 2 or 3, it indicates warmer; when below, colder; when not displayed, the temperature is expected to remain about stationary.

### WHISTLE SIGNALS.

A warning blast of from fifteen to twenty seconds' duration is sounded to attract attention. After this warning the longer blasts (of from four to six seconds' duration) refer to weather, and shorter blasts (of from one to three seconds' duration) refer to temperature; those for weather are sounded first.

| Blasts. | Indicate. | Blasts. | Indicate. |
|---|---|---|---|
| One long | Fair weather. | One short | Lower temperature. |
| Two long | Rain or snow. | Two short | Higher emperature. |
| Three long | Local rain or snow. | Three short | Cold wave. |

By repeating each combination a few times, with intervals of ten seconds, liability to error in reading the signals may be avoided.

The forecast messages are telegraphed at the expense of the Weather Bureau to places where they are distributed to nearby and local communities; they are furnished at the regular commercial rates and sent "collect." In no case are the forecasts sent to a second address in any place, except at the expense of the applicant.

---

## SMALL CRAFT, STORM AND HURRICANE WARNINGS

OF THE WEATHER BUREAU, U. S. DEPARTMENT OF AGRICULTURE.

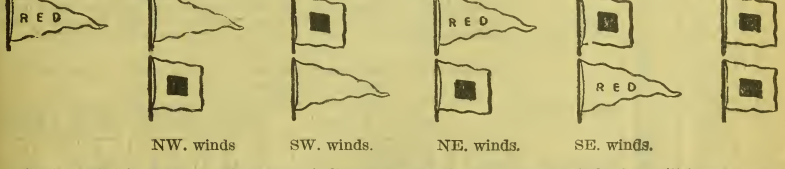
(For lantern signals, see reading matter below the cuts.)

### VERIFICATION OF FORECASTS.

The U. S. Weather Bureau in its Administrative Report, claims that its A. M. 36-hour forecasts throughout the whole country, averaged (1915-1919) 86.5 per cent. correct for weather, and 90.2 per cent. correct for temperature. For the Eastern New York locality, in the same period, it is claimed, the A. M. 36-hour forecasts were 85.7 per cent. correct as to weather, and 89.9 per cent. correct as to temperature. The highest percentage of accurate weather forecasts (92.6) was for Southern California; the lowest (81.6) in Upper Michigan. The highest accuracy in temperature forecasts (96.4) was in Florida; the lowest (84.4) in Montana.

All square flags shown here are red with black centre when displayed as warnings.

Small craft. Storm. Hurricane.



NW. winds SW. winds. NE. winds. SE. winds.

*Small Craft Warning*—A red pennant indicates that moderately strong winds that will interfere with the safe operation of small craft are expected. No night display of small craft warnings is made.

*Northeast Storm Warning*—A red pennant *above* a square red flag with black centre displayed by day, or two red lanterns, one above the other, displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *northeast.*

*Southeast Storm Warning*—A red pennant *below* a square red flag with black centre displayed by day, or one red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *southeast.*

*Southwest Storm Warning*—A white pennant *below* a square red flag with black centre displayed by day, or a white lantern *below* a red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *southwest.*

*Northwest Storm Warning*—A white pennant *above* a square red flag with black centre displayed by day, or a white lantern *above* a red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *northwest.*

*Hurricane, or Whole Gale Warning*—Two square flags, red with black centres, one above the other, displayed by day, or two red lanterns, with a white lantern between, displayed by night, indicate the approach of a tropical hurricane, or of one of the extremely severe and dangerous storms which occasionally move across the Great Lakes and Atlantic coast.

## NORMAL TEMPERATURE AND RAINFALL.

## RULES FOR FORETELLING THE WEATHER.

Adapted for Use with Aneroid Barometers.

A rising barometer.

A rapid rise indicates unsettled weather.

A gradual rise indicates settled weather.

A rise with dry air and cold increasing in Summer indicates wind from the northward; and if rain has fallen, better weather may be expected.

A rise with moist air and a low temperature indicates wind and rain from the northward.

A rise with southerly winds indicates fine weather.

A steady barometer

with dry air and seasonable temperature indicates a continuance of very fine weather.

A falling barometer.

A rapid fall indicates stormy weather.

A rapid fall with westerly wind indicates stormy weather from the northward.

A fall with a northerly wind indicates storm, with rain and hail in Summer, and snow in Winter.

A fall with increased moisture in the air, and heat increasing, indicates wind and rain from the southward.

A fall with dry air and cold increasing in Winter indicates snow.

A fall after very calm and warm weather indicates rain with squally weather.

The barometer rises for northerly winds, including from northwest by north to the eastward for dry or less wet weather, for less wind, or for more than one of these changes, except on a few occasions, when rain, hail or snow comes from the northward with strong wind.

The barometer falls for southerly wind, including from southeast by south to the westward, for wet weather, for stronger wind or for more than one of these changes, except on a few occasions, when moderate wind, with rain or snow, comes from the northward.

Duration of Different Kinds of Weather in the Several Storms—Vicinity of New York.

| Critical Winds. | Clear Hours. | Cloudy Hours. | Rain Hours. | Clearing Hours. |
|---|---|---|---|---|
| South to Southwest | 9 | 8 | 8.3 | 14 |
| South to Southeast | 14 | 13.4 | 15.6 | 15.4 |
| East to Northeast | 20 | 17.6 | 31 | 20.6 |

## WEATHER WISDOM.

A gray, lowering sunset, or one where the sky is green or yellowish-green, indicates rain. A red sunrise, with clouds lowering later in the morning, also indicates rain. A halo occurring after fine weather indicates a storm. A corona growing smaller indicates rain; growing larger, fair weather. A morning rainbow is regarded as a sign of rain; an evening rainbow of fair weather. A deep-blue color of the sky, even when seen through clouds, indicates fair weather, a growing whiteness an approaching storm. Fogs indicate settled weather. A morning fog usually breaks away before noon. Unusual clearness of the atmosphere, unusual brightness or twinkling of the stars, indicate rain. The first frost and last frost are usually preceded by a temperature very much above the mean.

## ABSOLUTE ZERO—ABSOLUTE TEMPERATURE.

The zero points on the Fahrenheit, Centigrade, and Reaumur thermometer scales are simply arbitrary. Absolute zero—the point at which bodies on the earth are entirely devoid of heat—exists at 459.4 degrees below the Fahrenheit and 273.1 degrees below the Centigrade zero points. This is the beginning of what is known in dynamic meteorology as Absolute Temperature, as determined by observations of the contraction of gases when cooled, and from thermo-dynamical considerations. Thus, water freezes at 273.1 degrees of Absolute Temperature on the Centigrade scale of registration.

## THE MEANING OF "1 INCH OF RAIN."

An acre of ground contains 43,560 square feet. Consequently, a rainfall of 1 inch over 1 acre of ground would mean a total of $43{,}560 \times 144$, or 6,272,640 cubic inches of water. This is equivalent to 3,630 cubic feet. As a cubic foot of pure water weighs about 62.4 pounds, the exact amount varying slightly with the density, it follows that the weight of a uniform coating of 1 inch of rain over 1 acre of surface would be $3{,}630 \times 62.4 = 226{,}512$ pounds, or 113¼ short tons.

The weight of 1 United States gallon of pure water is 8.345 pounds. Consequently a rainfall of 1 inch over 1 acre of ground would mean $226{,}512 \div 8.345 = 27{,}143$ gallons of water on the acre. This is equivalent to 603 barrels of 45 gallons each, and would be sufficient to fill a tank or pool about 20 feet square and 9 feet in depth.

A rainfall of 1 inch on a roof of 3,000 square feet capacity would mean a total volume of 432,000 cubic inches, or 250 cubic feet, available for the cistern (loss from splashing, etc., not considered). This is equal to 1,870 United States gallons, or about 41.5 barrels of 45 gallons each, enough to fill a cistern 8 feet in diameter to a depth of 4.97 feet.

# Record of the Year.

## Chronology, Dec. 12, 1921—Dec. 12, 1922.

### 1921—DECEMBER.

Dec. 12—At N. Y. City pleas of guilty to violation of the Sherman anti-trust law were entered in the Fed. Court by corporations and 10 individuals, members of the Nat. Terra Cotta Assoc.

Len Small and they were released at 10.40 P. M. The commutations were presented as Thanksgiving gifts to the prisoners. They began serving their sentences last week.
—Clemenceau visited Chicago slaughter house (Armour's) and Art Museum.
—The Irish bills ratifying the new Free State Constitution and embodying other necessary legislation under the Anglo-Irish Treaty were passed by the House of Commons. The bills were given their third final reading by unanimous vote after brief debate. They were then hurried to the House of Lords, where they received their formal first reading.

Nov. 29—At New York, Dr. K. A. Enlind, convicted of receiving ring stolen by A. E. Lindsay from Mrs. Florence James, got indeterminate penitentiary sentence.
—The Egyptian Cabinet resigned over Soudan question.
—Body of Mrs. Abe Becker, missing since April 6, was found in boiler pit, Bronx.
Nov. 30—Clemenceau left Chicago by way of Springfield, Ill., where he laid a wreath on Lincoln's tomb.
—Serge Trufanoff, known as Iliador the former monk, wife, and three children, reached N. Y.
—The State Council of Chile ratified the Tacna-Arica protocol.
—3 young Irishmen, Jos. Spooner, Patrick Farrelly, and John Murphy, alleged rebel bombers, were executed at Dublin by firing squad.
—98-foot motor boat Specjacks, owned by A. J. Gowan of Chicago, reached Miami, Fla., and ended 35,000-mile trip around globe, begun in September, 1921.
—A score or more of anti-water famine paraders were shot to death by police at Mexico City.

DECEMBER.

Dec. 1—Labor unions called general strike at Mexico City.
—Armed men guarded Clemenceau at home of Joseph Pulitzer, near St. Louis.
—Senators La Follette (Wis.) and Norris (Neb.) called secret Progressive conference at Washington attended by 13 Senators and 21 Representatives, at which was discussed plan for legislative programme.
—11 died when Canadian steamer Maplehurst sank in Lake Superior, at Portage Lake Canal breakwater.
—Fire at Newbern, N. C., destroyed 225 dwellings, 16 lumber mills and 20 stores.
—At New York, John T. Hettrick, the building trades "code of practice lawyer," who was twice convicted on separate indictments charging conspiracy to violate the Donnelly Anti-Trust Act, was suspended for three years from the practice of law in the State, by the Appellate Division of the Supreme Court, acting on complaint of the Grievance Committee of the Bar Association.
—Slain body of Christina Hervish, 17, was found near Paterson plank road, Wallington, N. J.
—It is reported that the tug Lizzie D., alleged rum-runner, has sunk off Long Island, N. Y., with 17 aboard.
—Impeachment charges were made in Congress against United States Attorney Gen. Daugherty by Representative Keller (Rep.), of Minnesota.

GREEK PRINCE BANISHED.

Dec. 2—Revolutionary military tribunal at Athens, Greece, sentenced to perpetual banishment Prince Andrew, brother of former King Constantine, on the charge that it was by his order that 40,000 Greek troops were sent across the Great Salt Desert to their death at the hands of Turks in Asia Minor. He is also deprived of rank in the army. Counter revolutions have broken out in several places in Greece.
—The United States seaplane, S-C II., from New York, reached Para, Brazil.
—The U. S. grows faster than its ideas do, said Clemenceau, in address at St. Louis.
—At Peking, the wedding of Hsuan Tung, the seventeen-year-old deposed Emperor of China, was celebrated with the pomp and ceremonial of imperial days. The former Emperor's bride was the Princess Kuo Chin Si.
—Hostility toward ratification of the Washington naval agreements in the Foreign Affairs Commission of the French Chamber of Deputies, placing Georges Mandel, reporter of the commission, on the minority side, was responsible for the resignation of M. Mandel, former Chief of Cabinet under Clemenceau, from the commission. While M. Mandel refuses to be quoted, it is known that the commission rejected his report recommending ratification by a vote of 26 to 16, with two members absent.
—Fire destroyed 162 dwellings at Terrebonne, Quebec; loss, $800,000.
Dec. 3—U. S. Atty. Gen Daugherty filed with House Judiciary Committee reply to Rep Keller's impeachment charges. He denied the accusations.
—Exiled Prince Andrew of Greece and wife left Phaleron on British warship.
—Ex-N. Y. Port Collector D. F. Malone made public report of his saving steamship Lusitania, when leaving N. Y., May 1, 1915, carried 5,400 cases of ammunition, but no guns, troops nor explosives.
—Switzerland defeated the proposed law providing for a levy on capital for governmental purposes by a vote of about seven to one. Not a single canton gave a majority for the capital tax. The total vote cast was 730,000 against the levy and 108,000 in the affirmative.
Dec. 4—Fourth session of the 67th Congress began at Washington. Dyer Anti-Lynching Bill was withdrawn from Senate. House adopted resolution authorizing retirement of Associate Justice Pitney from U. S. Supreme Court.
—Clemenceau spoke at Baltimore; then went to Washington.
—British House of Lords passed Commons bill establishing Irish Free State constitution.
—Permanent building trades workers' agreement was made at N. Y. to avert strikes in future.
—Four students died in fire at Colby College dormitory, Waterville, Me.
—Indictment against Madelynne Obenchain, charging murder of J. B. Kennedy, was dismissed at Los Angeles, and she was released from prison.
Dec. 5—U. S. Senate Committee on Agriculture made report recommending a constitutional amendment which would put inauguration day in January instead of March, wipe out the Electoral College, and have Congress convene in the January following the election.
—Mrs. Clara Phillips, serving life sentence for killing Mrs. Alberta Meadows, escaped from prison at Los Angeles.
—Fire destroyed Sulpician (R. C.) church and seminary, Oka, Quebec.
—At London, Gerard Lee Bevan, former Chairman of the City Equitable Fire Insurance Company, was sentenced in the Old Bailey to seven years' penal servitude. Bevan was found guilty on nine counts of an indictment for fraud and malversion.
—At Lausanne, Ismet Pasha, chief Turkish delegate at the Near Eastern Conference, came out against the proposed forced migration of Greeks to Greece and Turks to Turkey. He denied Dr. Fridtjof Nansen's figures about the number of refugees who are in a serious plight. Dr. Nansen was the League of Nations Commissioner in Anatolia investigating the situation. Ismet declared the Vatican note about the dangers menacing Christians in Turkey is not based on fact, and was a Greek move against Turkey.
—King George, by signing Irish Constitution Act, put Free State into existence at midnight, with Tim Healy as Governor-General.
—John Carrington was acquitted, at Danville, Ill., of charge of murdering his sister-in-law, Mrs. Lydia Carrington, Grape Creek, Aug. 2, 1903.
—Clemenceau called on President Harding.
—Benny Levinsky, clothing worker, was assassinated in labor feud, at N. Y.
Dec. 6—U. S. Ambassador Child told Lausanne Conference this country demands Straits of Dardanelles be kept open for all ships, including war vessels.

CLEMENCEAU CALLS ON WILSON.

—Clemenceau called on Woodrow Wilson, at Washington.
—Tim Healy was inaugurated at Dublin as Governor General of Irish Free State; the Dail met and re-elected Prof. Hayes Chairman.
—Six were killed when a Fokker scout plane and a Martin bomber collided 250 feet in the air over Langley Field, Va. The dead are: Major G. L. Gearhart, Iowa; Capt. B. A. Doyle, San Francisco; Sergt. A. T. Marsick, Cleveland; Private Tom Jordan, Deepstep, Ga.; Private Felix Blumka, Chicago; Private Leon Rolah, Philadelphia.
—Police killed bank robber at Danville, Cal., and recovered $9,000.
—U. S. steamer George Washington and British steamer Clyne Rock collided off Dover, England.
Dec. 7—Deputy Sean Hales, and Deputy Patrick O'Malley, Vice-Chairman of the Parliament Assembly, were assassinated at Dublin.
—Clemenceau lunched at the White House.
—With the approval of President Harding, Secretary of the Navy Denby announced a general order putting into effect a plan perfecting the organization of the navy afloat, with Admiral Hilary P. Jones as Commander in Chief of both the Atlantic and Pacific branches at all times.
—Brooklyn's first Probation Court formally opened.
—Twelve to fourteen years have been added to the average human life in the last half century by the progress in medical science, John M. Dodson, Dean of Bush Medical College, said in an address before the University of Chicago forum. Infant mortality, he said, had been cut in half; tuberculosis largely robbed of its terrors, and epidemics brought under control, but 600,000 still die in the United States annually from preventable diseases.

Dec. 7—At Burlington, Vt., a verdict for $465,000 was awarded Mrs. Dorrit Van Deusen Stevens Woodhouse in her $1,000,000 alienation suit against Mr. and Mrs. Lorenzo E. Woodhouse, parents of her husband, C. Douglass Woodhouse.

Dec. 8—President Harding, in joint message read by him to Congress, asked law to forbid strikes and demanded a "dry" Nation and also railway consolidation.

—A jury in New Brunswick, N. J., convicted Raymond Schneider of perjury in falsely accusing his erstwhile chum, Clifford Hayes, of the murder of the Rev. Edward Wheeler Hall and Mrs. Elenor Mills, choir singer.

—The business district of Astoria, the oldest city in Oregon, was destroyed by a fire which swept over thirty blocks. Hundreds of persons are homeless and property loss is estimated at $15,000,000. For ten hours the fire held sway. Shortly after noon dynamite stopped its progress.

RORY O'CONNOR EXECUTED.

—At Dublin, four Republican leaders were executed in the rear of Mountjoy Prison without trial and, according to the official report, "as reprisal for the assassination yesterday of Deputy Sean Hales and as a solemn warning to persons associated with those who are engaged in an assassination conspiracy against the Irish people's representatives." Rory O'Connor, Liam Mellowes, the two leaders of the Four Courts siege last summer; Joseph McKelvey and Richard Barrett were the victims of these first reprisals. Protests from various Labor members of the new Parliament and from many citizens of Dublin already have been heard. The Republicans were stunned only for a moment by the executions. In prompt counter-reprisal they entered Mercer's Hospital and killed a Free State soldier who was in bed there. The men escaped.

—Patrick Dealy, highway robber, escaped from Sing Sing prison.

Dec. 9—Conference on Reparations opened at London. Premier Bonar Law presided. The Allies agreed on German debt moratorium.

—N. Y. State Atty. Gen. Newton ruled that radio marriages are illegal, under the Domestic Relations Law, because the parties are not actually "in the presence" of the person performing the ceremony. Mayor Hylan of N. Y., in speech to Cook County Real Estate Board, at Chicago, boomed third party movement.

Dec. 10—Japan restored to China the Kiaochow territory, formerly German.

—Irish irregulars bombed homes of Free State officials at Dublin.

—In defiance of Mayor Hylan's order to Police Commissioner Enright to run the Ku Klux Klan out of the city, a white robed and hooded Klansman spoke from the pulpit of the Baptist Church, Gates and Washington Aves., Brooklyn.

—Dave Treadway, member of a posse of Federal fastnesses of Menifee County, Ky., in pursuit of a band of moonshiners who killed Federal Prohibition Agent Robert E. Duff, Dec. 9, was shot and killed, supposedly by a member of the outlaw band.

—King George appointed Duke of Abercorn the Governor General of North Ireland.

The Nobel Peace Prize was presented, at Christiania, to Dr. Fridtjof Nansen, the explorer, for his relief work in Russia and Asia Minor.

—Gen. Leonard Wood resigned as provost of the University of Pennsylvania.

Dec. 11—Allied Conference on Reparations, at London, adjourned to Jan. 2, 1923, at Paris. It was as impossible for the Tory Prime Minister Bonar Law to commit his Government to invasion of the Ruhr, demanded by Premier Poincare as the price of a German moratorium, as it was for his predecessor to do so.

—Clemenceau talked, at Chicago, to American Farm Bureau Federation Convention.

—The World (Labor) Congress Against War opened at The Hague.

—At Oxford, Miss., a verdict for the defendant was returned in the $100,000 damage suit of Miss Frances Birkhead, stenographer, against Gov. Lee M. Russell, based on charges of seduction and other allegations.

—At London, England, Frederick Bywaters and Mrs. Edith Thompson were sentenced to death for murder of the woman's husband.

—The Irish Free State Parliament was completed by the swearing in of the Senate. Only 45 of the 60 appeared for the ceremony in the Parliament Chamber of Leinster House. Some of the absentees are said to be hesitant about taking the oath.

—President Harding has approved the dismissal of Midshipmen Bruce H. Robinson and Stuart H. Hawkins, who were tried by general court martial at Annapolis recently and found guilty of hazing.

— At Warsaw rioting, in which there was loss of life and injury to many persons, marked the ceremony of the swearing in of Gabriel Narutowicz as President of Poland.

THE POPE CREATES EIGHT CARDINALS.

—The Pope, at secret consistory, created eight new Cardinals. They were: Monsignor Achille Locatelli, Nuncio in Lisbon; Monsignor Giovanni Bonzano, Apostolic Delegate to Washington; Monsignor Henriguez Rey y Casanova, Archbishop of Toledo; Monsignor Alexis Charost, Archbishop of Rennes; Monsignor Eugenio Tosi, Archbishop of Milan; Monsignor Arthur Stanislaus Touchet, Archbishop of Orleans; Monsignor Giuseppe Mori, Secretary of the Congregation Council of Jesuits, and the Rev. Father Franz Ehrle, formerly the Vatican Librarian.

—The 1922 United States cotton crop is estimated by Dept. of Agriculture at 4,767,262,000 pounds (9,964,000 bales); value, $1,134,608,356, not including lint and cotton seed.

## NEW GERMAN CABINET.

The new German Cabinet was constituted, on Nov. 21, 1922, as follows:

Chancellor, Wilhelm Cuno.

Vice Chancellor and Minister of Justice, Dr. Carl Heinze (People's Party).

Minister of Foreign Affairs, Herr von Rosenberg.
Minister of the Interior, Rudolph Oeser (Democrat).
Minister of Finance, Andreas Hermes (Centrist).
Minister of Economics, Johannes Becker (People's Party).
Minister of the Treasury, Dr. Heinrich Albert.
Minister of Transportation, Gen. Wilhelm Groener (Socialist-Democrat).
Minister of Posts and Telegraphs, Herr Stingl.
Minister of Food, Herman Mueller (Socialist).
Minister of Defense, Dr. O. Gessler (Democrat).
Minister of Labor, Dr. Heinrich Brauns (Centrist).

## FIRE LOSSES IN THE UNITED STATES.

(Estimated by the Journal of Commerce.)

| Year (Calendar). | Loss. | Year (Calendar). | Loss. | Year (Calendar). | Loss. | Year (Calendar). | Loss. |
|---|---|---|---|---|---|---|---|
| 1875 | $78,102,285 | 1887 | $120,283,055 | 1899 | $153,597,830 | 1911 | $217,004,575 |
| 1876 | 64,630,600 | 1888 | 110,885,665 | 1900 | 160,929,805 | 1912 | 206,438,900 |
| 1877 | 68,265,800 | 1889 | 123,046,833 | 1901 | 165,817,810 | 1913 | 203,763,550 |
| 1878 | 64,315,900 | 1890 | 108,993,792 | 1902 | 161,078,040 | 1914 | 221,439,350 |
| 1879 | 77,703,700 | 1891 | 143,764,967 | 1903 | 145,302,155 | 1915 | 172,033,200 |
| 1880 | 74,643,400 | 1892 | 151,516,098 | 1904 | 229,198,050 | 1916 | 214,530,995 |
| 1881 | 81,280,900 | 1893 | 167,544,370 | 1905 | 165,221,650 | 1917 | 250,753,640 |
| 1882 | 84,505,024 | 1894 | 140,006,484 | 1906 | 518,611,800 | 1918 | 290,959,885 |
| 1883 | 100,149,228 | 1895 | 142,110,233 | 1907 | 215,084,709 | 1919 | 269,000,775 |
| 1884 | 110,008,611 | 1896 | 118,737,420 | 1908 | 217,885,859 | 1920 | 330,853,925 |
| 1885 | 102,818,796 | 1897 | 116,354,575 | 1909 | 188,705,150 | 1921 | 332,654,950 |
| 1886 | 104,924,750 | 1898 | 130,593,905 | 1910 | 214,003,300 | | |

For fire losses in New York City see index. The 1906 figures in above table include the San Francisco conflagration-earthquake.

## DEATH ROLL OF 1922.

Abarbanell, J. R. (69), editor, N. Y., Nov. 9.
Abbott, Rev. Lyman (86), N. Y., Oct. 22.
Abbott, Wm. T., Chicago banker, Washington, D. C., May 29.
Adams, ex-Gov. Alva of Colo. (72), lawyer, Battle Creek, Mich., Nov 1.
Adams, Rear Admiral Jas. D. (73), Washington, D. C., Feb. 19.

Barrett, E. W. (56), editor, Birmingham, Ala., July 9.
Barto, Rudolph S., Pres. U. S. Feature Service Co., N. Y , Feb. 1.
Barton, Rear Admiral J. K. (69), Philadelphia, Dec. 23, 1921.
Baskerville, Dr. Chas. (51), chemist, N. Y., Jan. 28.
Bataille, Henry (50), dramatist, Paris, March 2.
Bates, Prof. Clifton W. of Brooklyn, Paris, March 3.
Baumgarten, Emile (56), art dealer, N. Y., Feb. 4.
Bayard, L. P. (46), golfer, Short Hills, N. J., July 3.
Bayliss, Raymond W. (30), N. Y. broker, Rye, N Y., Feb. 9.
Beach, Mrs. Emily (75), horsewoman, N. Y., Dec. 3.
Beach, Capt. Warren C., N. Y., Jan. 14.
Beatty, P. E. Bishop Coadj. Troy (56), Nashville, Tenn., April 23.
Beaumont, Admiral Sir Lewis (75), England, June 19.
Beck, Lieut. Col. Paul W. (45), aviator, Oklahoma City, April 4.
Belcher, Rev. F. J., Supt. Five Points Mission, N. Y., June 27.
Bell, Dr. Alex. Graham, (75), telephone inventor, Baddeck, Nova Scotia, Aug. 2.
Benedict XV. Pope (1854), (Giacomo della Chiesa), Rome, Jan. 22.
Benjamin, Park (74), lawyer, editor, Stamford, Conn., Aug. 21.
Benjamin, Mrs. Park (56), Goshen, N. Y., Sept. 11.
Bennett, Sam'l J., journalist, Tucson, Ariz., Dec. 25, 1921.
Bensel, John A. (59), civil engineer, Bernardsville, N. J., June 19.
Bensman, Matteo (45), composer, N. Y , April 8.
Bergen, Teunis J. (48), realty, Brooklyn, Feb. 27.
Borglum, Solon H. (54), sculptor, Stamford, Conn., Jan. 30.
Berolzheimer, Emil (60), pencil mnfr., Tarrytown, N. Y., May 25.
Bertillon, Dr. Jacques (70), finger print originator, Paris, July 7.
Beseler, Gen. Hans von (72), Potsdam, Ger., Dec. 22, 1921.
Bjerregaard, Carl H. A. (76), librarian, author, N. Y., Jan. 28.
Blackwood, Brig Gen. Wm. R. (84), Philadelphia, April 26.
Blair, Eugenie (50), actress, Chicago, May 13.
Blake, Henry T. (94), lawyer, New Haven, Conn., April 7.
Blandy, Harold F., U. S. relief worker, Ufa, Russia, May 17.
Bleecker, Jas. (87), Scarsdale, N. Y., Feb. 24.
Bloch, Rosa (42), Ger. Communist leader, Zurich, July 14.
Blunt, W. S. (83), poet, London, Sept. 11.
Bly, Nellie (Mrs. Eliz. Cochrane Seaman) (56), N. Y., Jan. 27.
Babcock, Prof. C. A., founder of "Bird Day," Oil City, Pa., Aug. 10.
Boese, Clifford (65), court clerk, N. Y., March 20.
Boland, H'y J., sec. to de Valera, Dublin, Aug. 1
Bonnat, Leon (89), painter, Paris, Sept. 8.
Bonner, Paul E. (54), banker, N. Y., Jan. 20.
Bonzo, Cardinal Valfre di (69), Rome, June 25.
Bosch, Peter (51), wall paper mnfr., Chicago, April 12.
Bourne, Miss Emily H., philanthropist, N. Y., March 23.
Brady, John R. (72), dancing teacher, N. Y., Dec. 13, 1921.
Braganza, Prince P. B de (75), Paris, July 12.
Brainerd, Chauncey C. (48), newspaper correspondent, Washington, Jan. 28.
Brooke, Alex. H. (63), sports writer, Philadelphia, Jan. 21.
Brann, Rev. H. A. (83), N. Y., Dec. 28, 1921.
Branner, Prof. John C. (72), Pres. Emeritis Stanford Univ., there, March 1
Brantly, Chief Justice Theo., Helena, Mont., Sept. 17.
Brinson, Congressman Sam'l M. (52), New Bern, N. C., April 13.
Briscoe, Capt. Wm. J., Bagio, Philippines, April.
Britt, Jonathan (92), oldest Odd Fellow, Uba City, Cal., Feb. 14.
Brock, Sir Thos. (75), sculptor, London, Aug. 22.
Broome, Isaac (86), sculptor, Trenton, N. J., May 4.
Brown, Elos R. (65), Rep. leader, of Watertown, Cape Vincent, N. Y., Sept. 24.
Brown, Frank L. (59), Sec. World Sunday School Asso., Brooklyn, March 23.

The Carnegie Corporation, during its fiscal year Oct. 1, 1921 to Oct. 1, 1922, donated to various colleges and organizations $3,816,510. Among the largest of the gifts were: to New York University, $300,000; to University of Cincinnati, $200,000; California Institute of Technology, $150,000; Georgia School of Technology, $150,000; Stevens Institute of Technology, $100,000; Flora MacDonald College, $50,000; Kings College, Windsor, N. S., $40,000; to the Institute of Economics, $1,650,000; American School of Classical Studies at Athens, $200,000; National Research Council, $182,500; Marine Biological Laboratory, $100,000; National Institute of Public Administration, $60,000; the President's Conference on Unemployment, $50,000; American Council on Education, $50,000; Institute for Educational Research, $45,000; American Classical League, $30,000; American Fine Arts Society, $25,000; Committee of Establishment of Permanent Organization for Improvement of Law, $25,000; Libraries at Braddock, Homestead and Duquesne, Pa. $25,000; public libraries at Washington, D. C., $167,000.

Carnegie Corporation to College of William and Mary, in Virginia, $25,000 for library.

Carnegie Corporation of New York sets aside $1,600,000 for establishment and maintenance of Institute of Economics in Washington, D. C.

Josephine Carrier, by will, to Berkshire Industrial Farm at Canaan, Conn., $20,000; residuary estate to be divided equally between American Red Cross and Evangelistic Committee of 541 Lexington Ave.

Mrs. Lydia C. Chamberlain of Des Moines, Iowa, by will, to Columbia University for establishment of fellowships, $500,000.

Mrs. Helen T. Cole of Hotel Biltmore, New York, by will, to Presbyterian Hospital, $150,000; and to Dr. W. Laurence Whittemore of hospital, $10,000.

Mayor James Couzens, Detroit, to new Children's Hospital, $1,000,000 in securities.

S. F. Cowdrey, by will, to New Rochelle for public park, his country place on Davenport's Neck.

Charles R. Cross of Brookline, Mass., by will, to Harvard College and Harvard Observatory, $100,000.

Edmund J. Curley of Monte Carlo and New York, by will, to Metropolitan Museum of Art, $25,000; to Good Samaritan and St. Joseph's Hospitals at Lexington, Ky., each $10,000.

Mrs. A. Gertrude Cutter, by will, to Hospital for Deformities and Joint Diseases, $796,704; City of Newburyport, Mass., $50,000; to Presbyterian, Methodist Episcopal and Mount Vernon Hospitals and American Society Prevention of Cruelty to Animals, each $20,000; to Society for Prevention of Cruelty to Children, $25,000.

Robert W. De Forest and Emily Johnston De Forest to the Metropolitan Museum of Art, "American Wing," estimated to cost $2,000,000.

Cleveland H. Dodge to American Colleges in Near East, $165,000.

George Doheny, lawyer and banker, of Syracuse, N. Y., by will, to St. Joseph's Hospital, $250,000; to Memorial Hospital, House of Providence, Onondaga Orphans' Home, Homeopathic Hospital, St. Vincent Orphan Asylum, Syracuse Home Association, Syracuse Free Dispensary and St. Mary's Maternity Hospital, each $150,000.

J. B. Duke to Trinity College, Durham, N. C., $1,125,000.

Educational Foundation of Commission for Relief in Belgium to University of Brussels, 15,000,000 francs. This makes a total, it was announced, of 110,000,000 francs given by this foundation to Belgian educational institutions. This includes a previous gift of 20,000,000 francs to the University of Brussels, 20,000,000 francs to the University of Ghent, 20,000,000 to the University of Liège, 20,000,000 to the University of Louvain, 5,000,000 to the School of Mines, Mons, and 10,000,000 to the Higher Colonial School, Antwerp.

Arthur B. Emmons of Providence, R. I., by will, to Museum of Fine Arts of Boston, $50,000; to Children's Hospital of Boston, $25,000; to Newport Hospital, $25,000; to Redwood Library, to People's Library, Berea College, Hampton Normal Institute, and Tuskegee Institute, each $10,000.

Amos F. Eno, by will, to American Museum of Natural History, $272,000.

Marshall Field, Chicago, pledges $50,000 per year for five years to Field Museum of Natural History; Stanley Field gives $200,000 to clear off building deficit, and $6,500 to cancel last year's operating deficit.

John H. Flagler, by will, to St. Luke's, the New York and the Presbyterian Hospitals, share and share alike, $1,000,000; to the St. Cecilia Club, $70,000.

Henry Ford buys Burroughs Farm and gives it to John Burroughs Memorial Association; also establishes fund to preserve it.

Charles Garland inherited fortune of about $800,000; to American Fund for Public Service.

Edwin Gould to Veterans' Mountain Camp of American Legion, $10,000. Last spring Mr. Gould gave $20,000 toward purchase of property at Big Tupper Lake in Adirondacks.

Edwin Gould has provided funds for building in this city a Temporary Home for Orphans, to be used as a clearing house for the Sheltering Arms, the Society for Half Orphans and Destitute Children and the Leake and Watts Home of Yonkers, to care for them while pedigrees are taken and investigations made.

St. Joseph's Hospital, St. Vincent Asylum and House of Providence, $1,000 each; residue of $100,000 estate to Grimes Foundation.

Frank Grossbard, by will, $100,000 to be distributed through the Brooklyn Federation of Charities.

Mrs. Edward S. Harkness, who owns a summer place at Goshen Point, Conn., purchased Hoffman property adjoining her estate to establish a Home for Convalescent Children.

Mrs. Stephen Harkness to Fifth Avenue Presbyterian Church, $750,000 for parish house.

Harkness Family Fund to Joint Committee on Methods of Preventing Delinquency, $165,000.

Mrs. Stephen V. Harkness to establish the Commonwealth Fund for "The Welfare of Mankind, $16,000,000.

Mrs. Stephen V. Harkness of New York City, to Yale University, $3,000,000 to increase salaries of members of Yale faculty.

Rush C. Hawkins estate to Norwich University, $350,000.

August Heckscher of New York to Munich, Bavaria, 10,000,000 marks for hospital for shell-shocked soldiers.

Alfred S. Heidelbach, banker, of New York, London, and Paris, by will, to Mount Sinai Hospital, $150,000; to Hebrew Orphan Asylum, Institute for Improved Instruction of Deaf Mutes, Children's Charitable Union, Sanitarium for Poor Children, and Lenox Hill Hospital, $5,000 each.

A. Barton Hepburn, by will, to Hepburn Hospital at Ogdensburg, $250,000; to Middlebury College, Vt., $200,000; to Columbia University, $150,000; to St. Lawrence University at Canton, N. Y., $100,000.

A. Barton Hepburn to Hepburn Hospital at Ogdensburg, N. Y., $500,000.

Mrs. Irene Botsford Hoffman of Stockbridge, Mass., and Santa Barbara, Cal., by deed, her $60,000 estate known as Overbrook, in Stockbridge, to Stockbridge Vacation House, Inc.

Mrs. Sarah L. Holden of Newburgh, N. Y., by will, to maternity hospital connected with St. Luke's, $100,000; to fund for A. F. Holden Memorial Home for Aged Women, $100,000 and two large buildings on Grand Street, Newburgh.

Margaret A. Howard, a Fifth Avenue modiste, by will, $400,000 to establish the Margaret A. Howard Home for Indigent Needlewomen and residue of estate to maintain it.

Henry E. Huntington of Los Angeles, Cal., announces his purpose to give the public his art collections and his library, the finest in the world; enough money will go with the treasures, valued at several millions of dollars, to keep the collections intact for all time.

Mrs. H. B. Hyde, widow of founder of Equitable Life Assurance Soc., by will, $1,000,000 to four hospitals, Presbyterian, $50,000; New York Orthopedic, $25,000; Babies', $15,000, and Woman's, $10,000.

Mrs. Alice Tobey Jones of Wareham, Mass., bulk of $3,000,000 estate eventually to Bide-a-Wee Home Association, Inc., of New York, and Mass. Soc. for Prevention of Cruelty to Animals.

Mrs. Harriet Judson of Brooklyn, by will, to Harriet Judson Branch of Y. W. C. A., $10,000 cash and four-fifths of residue of estate (estate more than $1,000,000).

Col. and Mrs. Anthony B. Keuser of Bernardsville, N. J., to State of New Jersey for park, tract of land east and southeast of Port Jervis, known as High Point property, more than 10,000 acres.

Geo. Gordon King, Newport, R. I., by will, to P. E. Domestic and Foreign Miss. Soc., $10,000; to St. George's Preparatory School of Newport, $10,000; to Trinity and to United Congregational Churches of Newport, each $5,000.

Mrs. Mary J. Kingsland, by will, to Grace Church, Sheltering Arms New York Society for Relief of Ruptured and Crippled, Nursery and Child's Hospital, Diocesan Convention of the Protestant Episcopal Church, General Theological Seminary, Teachers' College and New York Protestant Episcopal Mission Society, $50,000 each. New York House and School of Industry, Children's Aid Society, New York Association for Improving the Condition of the Poor, Charity Organization Society, and the Tarrytown Hospital Association, each $25,000, and St. Luke's Hospital, $20,000.

In addition to these bequests, the executors paid as their share in the residuary estate to Grace Church, $326,000, and a like sum to the Metropolitan Museum of Art, while $65,000 each was paid to the New York Association for the Blind, Society for the Relief of Ruptured and Crippled, Church Mission to Deaf Mutes, House of the Holy Comforter and the Berry School.

Fred Morgan Kirby of Wilkes-Barre, Pa., to Hobart College, $50,000.

Will of Miss Lucy Kirtland to N. Y. Assoc. for Blind, $10,000 in cash, $725, amount for which earrings were sold, and $250,000, residue of estate; also to Brooklyn Bureau of Charities, $5,000, and to St. Giles Home for Crippled Children, $3,000.

Mrs. Mamie Klein, by will, to Servants for Relief of Incurable Cancer as memorial to husband, Charles T. Klein, $500,000.

Mrs. Helen M. Knickerbocker, by will, to Hawley Home for Children, Saratoga Hospital and Bethesda P. E. Church, $25,000 each; Church Aid Fund of P. E. Church of N. Y., $25,000.

Jerome H. Koehler, by will, income of residuary estate for life to mother and sister, reversion to Yale University and Nu Deuteron Chapter of Phi Gamma Delta Fraternity.

Lasker family (Chairman of United States Shipping Board, President of Texas Star Flour Mills and others) to American Society for Control of Cancer, $50,000, in memory of Harry M. Lasker.

Jonas M. Libbey to Manhattan Eye, Ear and Throat Hospital, $5,000; to General Memorial Hospital and Woman's Hospital, $10,000 each, after certain personal bequests residue of estate goes to Columbia University for research in biological and pathological chemistry, electro-chemistry and electro-physics.

Samuel Mather of Cleveland for construction of medical school buildings at Western Reserve University, about $2,530,000.

Mrs. Calista S. Mayhew, widow of former Village President of South Orange, N. J., after a number of personal bequests, left bulk of $3,000,000 to various charities, viz., two-sevenths to Snow Hill Normal School, Ala.; two-sevenths to Good Will Home, East Fairfield; one-seventh to Tuskegee Institute, one-seventh to Hampton Normal Institute, one-seventh to Atlanta University.

A. W. Mellon, Secretary of Treasury, to Carnegie School of Technology, his Forbes St. residence for use of dormitory by girl students.

W. H. Merriman of Brooklyn by will, to Brooklyn Museum, art collection estimated to be worth $1,000,000.

Miss Phoebe Mills of White Plains leaves fortune of $500,000 to Presbyterian Church and hospitals and charitable institutions.

Frank A. Munsey, to Bowdoin College, Me., $100,000.

Nathaniel Myers, by will, to Hebrew Technical School for Girls, $42,350; 26 bequests of $1,000 each to various charitable and religious organizations of all denominations.

Miss Mary Oakley to numerous charitable and religious organizations and hospitals named, estate of $300,000.

Mrs. Lucy W. S. Opdycke, by will, to New York Assoc. for Improving the Condition of the Poor, $25,000.

James H. Ottley of New York and Glen Cove, L. I., to Nassau Hospital at Mineola, L. I.; the New York Infirmary for Women and Children, the New York Eye and Ear Infirmary, the Knickerbocker Hospital and New York University, $10,000 each.

Mrs. John E. Parsons, by will, to Catharine St. Mission, building in which Mission is housed and $450,000; to Home for Incurables in Fordham, $10,000; to Grace Church, $10,000.

Pennsylvania Railroad, in pensions, $26,777,976; $1,392,455 to officers, rest to men below rank of Division Supt.

Cora M. Perkins to Columbia University for chemical research, $30,000; to Trudeau Sanitarium at Saranac Lake and New York Soc. for Relief of Ruptured and Crippled, $5,000 each. After a number of personal bequests, residuary estate to Columbia University.

Mary Quinlan of Ridgewood, N. J., by will, to Carmelite Order at Englewood, N. J., $1,000, and $500 each to eleven other organizations.

Charles E. Rhinelander, by will, to Soc. for Relief of Ruptured and Crippled and the Seamen's Church Institute, each $25,000.

Baroness Solomon de Rothschild to City of Paris, estate of about 10,000,000 francs.

Canon and Mrs. J. Townsend Russell, 130 acres city property in Washington, D. C., to complete site for National Cathedral.

Heirs of Jacob H. Schiff to City of Frankfort, Germany, 2,000,000 marks for municipal purposes.

The charitable gifts of $1,350,000, made in will of Jacob Schiff: Federation for the Support of Jewish Philanthropic Societies, $500,000; Jewish Theological Seminary of America, $100,000; Union of American Hebrews Congregation, $100,000; Montefiore Home, $300,000; Harvard University, $25,000; Charity Organization Society, $10,000; Babies' Hospital, $5,000; Solomon and Betty Loeb Memorial Home, $25,000; New York Association for the Blind, $10,000; Metropolitan Museum of Art, $25,000; New York Public Library, $25,000; New York Zoological Society, $25,000; Tuskegee

Institute, $10,000; Hampton Normal, $10,000; New York University, $50,000; Jewish Theological Seminary, $50,000, and Henry Street Settlement, $50,000.

Mrs. Mary E. Scranton of New Haven, Conn., leaves residue of estate estimated at about $850,000 to charities.

Mrs. Julia Seligman of Deal, N. J., by will, to Mount Sinai Hospital, $25,000; to New York Post Graduate Hospital, $25,000; to other charities, $50,000.

Herman Sielcken, a German-American, by will, to Baden-Baden, $600,000 for a City Maternity Home for Poor Mothers.

William Sloane of Mount Kisco, N. Y., to International Committee of Y. M. C. A., $100,000; to Presbyterian Hospital, $100,000; to Yale University, $100,000; Metropolitan Museum of Art, $50,000; Museum of Natural History, $50,000; New York Public Library, $50,000; Brick Presbyterian Church, $50,000.

Delevan Smith, publisher of Indianapolis News, by will, to Methodist Episcopal Hospital, $100,000; to Indiana Historial Society, $150,000; to Lake Forest (Ill.) Hospital Assoc., $100,000; to Art Assoc. of Indianapolis, $20,000.

Mrs. Dexter Smith, Springfield, Mass., by will, to Wesleyan University, $100,000; to Springfield Hospital, $50,000.

Mrs. Harriet A. Smith of Springfield, Mass., by will, to Wesleyan University, $170,000; to Springfield Hospital, $120,000.

John H. Smith, class of 1868, Princeton, by will, to Princeton, funds for five scholarships in memory of ancestors.

Susie D. Smith of Forest Hills, L. I., to Jamaica Hospital and Church in the Gardens, Forest Hills, each $40,000; $5,000 and $10,000 bequests to numerous other charities.

Charles Steele, senior warden of St. Thomas's Episcopal Church, presents buildings for permanent choir school at cost of $100,000 to parish; and increased number of scholarships in school from two to ten, each being $500 a year.

Dr. Ernest G. Stillman to Palisades Interstate Park Commission, 600 acres bordering both sides of Storm King Highway.

Dr. Daniel M. Stimson to Presbyterian Church on University Place, $40,000; to Union College, $10,000; to New York Infirmary for Women and Children, $10,000; to Albany Law School, $5,000.

Mrs. William Straight to Vassar College, salary fund, $25,000.

Mrs. Anna M. Swift, widow of founder of Swift & Co. of Chicago, in charitable bequests, $500,000 (estate of nearly $5,000,000).

Hamilton B. Tompkins, by will, to Hamilton College, Utica, N. Y., $650,000.

Dr. Karl Von Ruck of Asheville, N. C., by will, $700,000 for scientific research into prevention and cure of tuberculosis (Von Ruck Research Laboratory, Inc.).

Mrs. J. T. S. Wells of Tacoma, Wash., and New York City, $300,000 estate in New York City (ultimately) to City and Suburban Homes Co. and Open Air Tenement Co.

Jacob Wertheim, by will, to Federation for Support of Jewish Philanthropic Societies, $100,000.

| University of Hongkong | 293,750 | | |

THE GENERAL EDUCATION BOARD.

General Education Board—*Chief Appropriations for the fiscal year 1921-1922:*

For Medical Schools and Departments—Baylor University, Dallas, Tex., $30,000; Johns Hopkins University, Baltimore, Md., $300,000; University of Cincinnati, Cincinnati, Ohio, $105,000; University of Colorado, Boulder, Col., $700,000; medical fellowships, $25,000—total, $1,160,000.

To colleges and universities for teachers' salaries, $5,141,223.

For co-operation with State universities and State Departments of Education in Southern States in the field of secondary and rural education $267,289.

Lincoln School—Equipment and other expenses, $477,363.

Fellowships and scholarships, $50,000.

For educational surveys, $189,300.

For Negro Education—For colleges and schools, $638,700; medical schools, $35,000; county training schools, $106,000; supervising industrial teachers of the Jeanes Foundation, $79,500; critic teachers, $12,000; scholarships, $15,000; miscellaneous purposes, $50,525—$936,725.

Total appropriations, $8,221,900.

## THE BUSINESS CYCLE AND UNEMPLOYMENT.

(By Edward Eyre Hunt, Secretary, President Harding's Conference on Unemployment.)

Early in 1923 results of the first serious attempt to estimate the direct economic losses caused by crises and business depressions will be made public in the report on the Business Cycle and Unemployment by a sub-committee of President Harding's Conference on Unemployment, which has been at work on the subject since March, 1922.

The President's Conference on Unemployment in 1921 suggested that an analytical study of the business cycle be prepared and an attempt be made to collect statistics and facts as to the methods for offsetting the bad results of those periods of expansion and depression which have been characteristic of our industries.

A committee on the business cycle was appointed by Secretary Hoover, consisting of Owen D. Young, Chairman, Clarence Mott Woolley, Joseph H. Defrees, Matthew Woll, Miss Mary Van Kleeck, and Edward Eyre Hunt, Secretary.

The so-called business cycle is that recurring process of booms and slumps which affects industry and business directly, and agriculture indirectly. The solution of this problem is to lop off from the peak in boom times to fill up the trough in depressions—in other words, to temper an industrial crisis by acting before the crisis becomes inevitable. If it can be accomplished, the idea is to plan for the future by applying a knowledge of the past.

This business cycle is marked by peak periods of boom between valleys of depression and unemployment. The peak periods of boom are times of speculation, overexpansion, extravagance in living, relaxation in effort, wasteful expenditure in industry and commerce, with consequent destruction of capital. The valleys are marked by business stagnation, unemployment, and suffering. Both of these extremes are vicious, and the vices of the one beget the vices of the other. It is the wastes, the miscalculations, and the maladjustments grown rampant during booms that make inevitable the painful process of liquidation. The most hopeful way to check the losses and misery of depression is therefore to check the feverish extremes of "prosperity." The best time to act is at a fairly early stage in the growth of the boom.

The committee, from the information in the bureau's report, and from other sources, has drawn up a series of recommendations and a plan of action which the Department of Commerce will submit for a nation-wide referendum to business generally. These recommendations deal with the question of what part of the cycle is controllable, the necessity for group action, the importance of information on the trend of current business and closer study of business problems, advance planning, financial stabilization, public works, reserve projects and employment exchanges.

# Financial and Economic Review of 1922.

By S. S. Fontaine, Financial Editor of The World.

While the world has begun during the last twelve months to make a reassuring recovery from the havoc of war under the reconstructive influence of four years of comparative peace, it cannot be said that the economic difficulties that beset many of the victims as well as victors of the great conflict have been composed or that the problems of lifting the prostrate to their feet, or restoring the social and financial balance of civilization, or setting to work along normal lines the productivity of the nations as a whole, and thereby re-establishing world trade and credit—the reward of labor and efficiency—have been solved. And until the solution is found the ablest minds in finance do not believe that full prosperity can come to any member of the family of nations, even to us, who have been blessed during the past year with abundance far out of proportion to that which has come to the greater part of our neighbors of the world.

In the restoration of sound underpinnings for our financial structure, in the reconstruction of our credit functions, in the revalorization of our securities to a marked degree, in the rehabilitation of our industries and our system of distribution and purveying, in the revival of our agricultural production on a fairly profitable plane, and in the reconciliation, generally speaking, of our major great productive forces, capital and labor, we have made great and satisfactory progress. And yet, while we maintain an attitude of aloofness from the councils of the world prostrate, while we are content to remain mere observers of their struggles to rise to the posture of upstanding nations of the world, we cannot, in all conscience, feel, on the threshold of the new year, that we have performed the full functions of the first citizen of the world.

With Germany facing imminent bankruptcy, due partly to the inexorable demands of her ravished neighbor, now become her implacable enemy, and very largely to her own fatalism and financial folly, with the Soviet Government knocking mainly at the gates of civilization for readmission and recognition, with the Turk standing at the moat of Europe's citadel with a firebrand whose flame an ill wind may at any moment carry to the magazine of the Balkans, whose explosions have heretofore shaken the foundations of civilization, neither the retrospect nor the outlook is sufficiently reassuring for us to sit down in snug comfort and consider ourselves immune from evils that menace our neighbors.

The Continental financial situation, as the writer has been pointing out in the columns of The World, is a canker that is gnawing at the world's vitality, whether we, in our heedless, headlong rush to mind our own business, pass it by like the careless engineer ignores the red signal that warns of the open drawbridge ahead. But in the long run it will be our business, and our very serious business, if we do not halt our pace to take counsel of our conscience and our common sense.

It may take time—years perhaps—months most likely—for the virus of this sore to spread through the veins of the entire political and financial system of civilization. Corrective measures, forceful as they may be required to be, are as yet available and may be employed effectively. As the surgeon with the greatest skill and resourcefulness, we must take our place at the operating table. We have grown beyond the irresponsibility of youth's estate in the family of nations. We may no longer absent ourselves from its councils nor put aside, pettishly or petulantly, the obligations and responsibilities of redblooded manhood; we may not, in honor, or in the charity of our hearts, refuse, like the Priest and the Levite, to kneel by the side of our sore beset wayfaring neighbor, to anoint and bind his wounds and bear him to the inn by the wayside, even if he has not the pence to pay his reckoning.

So far as our own domestic affairs are concerned, they have been gradually on the mend since the termination of the drastic deflation imposed by the country's financial mentors upon practically every form of enterprise through the rationing of credits and the placing of a premium on the commercial dollar, so prohibitive that it not only had the effect of restraining speculation but in many instances business initiative as well. It was a major operation which, though scientifically successful, has imposed upon the patient a protracted convalescence, from which he has only now emerged.

## RESUMPTION OF BUSINESS ACTIVITY.

The years 1920 and 1921 were twelve months of depression, accompanied by falling prices, although the trend was full of irregularities and the readjustments, particularly of costs of production, were not of a character to bring about a compensating reduction in the costs of living. Now that the tendency of domestic business is toward expansion, we have entered the first stage of secondary inflation, which has found its expression in increased costs of commodities without, generally speaking, a corresponding rise in the wage scale of the producers.

The year 1922 has been marked by a resumption of general business activity in most sections of the country and progress toward a complete restoration of the domestic, financial and industrial equilibrium has been retarded only by the differences that have developed between those two great agencies of production—capital and labor. The channels of distribution were for a time seriously clogged by the railroad strike, while the country's productive energies were impaired very seriously by the great coal strike, from whose debilitating influences the country's vigor has not yet made a full recovery.

Our foreign trade has shown throughout the year the unfortunate influences of Europe's financial prostration, which has not only weakened her productive power, which is the essential foundation for the rebuilding of her economic structure, but has impaired her purchasing power here, which, when world balance is maintained, furnishes our producers, and particularly our farmers, a market for their exportable surplus. We have still further restrained these agencies of reconstruction by the erection of a tariff wall around our trade confines, which not only prevents our customers abroad from trading with us on terms of equity and comity but imposes a still heavier burden upon our consumers, whose shoulders are already bowed by the heft of the tax load.

Generally speaking, the prosperity of our country depends very largely upon the returns from agricultural harvests, one of our greatest agencies in the yearly production of new wealth.

PRODUCTION (000 omitted).

| Crops. | 1922 (Preliminary). | 1921 (Dec. estimate). | 1916-20 average. |
|---|---|---|---|
| Corn, bus. | 2,896,108 | 3,080,372 | 2,830,942 |
| Wheat, bus. | 810,123 | 794,893 | 799,083 |
| Oats, bus. | 1,229,774 | 1,060,737 | 1,412,602 |

The price index of all crops on November 1 was 17.2 per cent. more than a year ago and 40.2 per cent. less than the average of the preceding five years. The production index is about 12 per cent. more than last year's aggregate production and 0.3 per cent more than the average of the preceding five years, 1916-1920.

According to a survey of economic conditions made by the National City Bank, the iron and steel industry is operating on about 80 per cent. of capacity, stimulated by liberal buying for the railroads, the building industry, automobile and implement manufacturers. It seems to have plenty of work ahead for the winter.

In the textiles buying has been stimulated by the rise of raw materials, wool, cotton and silk, all being in strong positions statistically. The industries are busy with capacity well sold up for several months. Merchants, however, continue to buy with caution, not convinced that the public will follow price advances far.

The building industry is experiencing the seasonal slowdown, but it is completing the greatest year of its history, and the plans in hand and contracts under negotiation give every reason to expect that this activity will continue through next year. In the opinion of experts building activity has been the largest single factor in the business recovery that has taken place.

On the whole the outlook for business during the winter months is good, with a promise of continuance next spring, providing developments in Europe are not unfavorable. The fact cannot be neglected that the prices of farm products are dependent upon Europe's taking its accustomed

supplies. The price level is not yet fully readjusted, but the gains made by farm products in the last two months have done much for the relief of that situation. Conditions still partake largely of the character of a rally, stimulated by shortage in certain lines. Many experienced observers do not believe that industrial costs are yet low enough to furnish a basis for stable prosperity.

GOLD RESERVES.

The extent to which the financial foundations of the country have been strengthened is shown by the heavy retirement of Federal Reserve notes in circulation, the contraction in the total earning assets of the regional institutions. There has been an increase of over $223,000,000 in our gold reserves. The banks now hold total gold reserves of $3,083,325,000. The following is a short summary of the increase or decrease in principal assets and liabilities of the Federal Reserve Bank on Nov. 29 as compared with Nov. 30, 1921, in millions of dollars:

| | Increase or decrease |
|---|---|
| Total reserves | +213.7 |
| Gold reserves | +223.4 |
| Total earning assets | —246.1 |
| Discounted bills, total | —532.2 |
| Secured by United States Government obligations | —161.1 |
| Other bills discounted | —371.1 |
| Purchased bills | +186.3 |
| United States securities, total | + 99.9 |
| Bonds and notes | +130.1 |
| Pittman certificates | —102.5 |
| Other Treasury certificates | + 72.3 |
| Total deposits | +117.4 |
| Members' reserve deposits | +137.3 |
| Government deposits | — 12.5 |
| Other deposits | — 7.4 |
| Federal Reserve notes in circulation | — 36.2 |
| Fed. Res. Bank notes in circ., net liab | — 55.0 |

While there have been some striking advances here and there in commodity prices, especially in farm products, which have greatly increased the purchasing power of the farmer who supplies over 60 per cent. of the purchasing power of the country as a whole, the index numbers of the price tables of 404 commodities, prepared by the Bureau of Labor, show an increase in the general level of only ¾ of 1 per cent. These index numbers of wholesale prices are as follows:

| | 1921. | 1922. | |
|---|---|---|---|
| | Oct. | Sept. | Oct. |
| Farm products | 124 | 133 | 138 |
| Foods | 140 | 138 | 140 |
| Cloths and clothing | 180 | 183 | 188 |
| Fuel and lighting | 189 | 244 | 226 |
| Metals and metal products | 116 | 134 | 135 |
| Building materials | 159 | 180 | 183 |
| Chemicals and drugs | 131 | 124 | 124 |
| Housefurnishing goods | 180 | 173 | 176 |
| Miscellaneous | 118 | 116 | 120 |
| All commodities | 142 | 153 | 154 |

Comparing prices in October with those of a year ago, as measured by changes in the index numbers of the above groups it is seen that the general level has increased 8½ per cent.

The work of reconstruction that has made such progress in the country during the year has naturally been reflected in an expansion in activity in the security markets, accompanied by a marked revalorization in the prices of stocks and bonds. The average daily trading in November was 921,000 shares against 708,000 shares in the preceding year.

The following is a retrospect of the stock market as of Dec. 2, 1922, prepared by Dow, Jones & Co., and showing the daily average prices at the close of twenty industrial and 20 railroad stocks for the periods indicated:

| | 20 Industrials. | 20 Rail's. |
|---|---|---|
| Low, 1921 | Aug. 24, 63.90 | June 20, 65.52 |
| High, 1922 | Oct. 14, 103.43 | Sept. 11, 95.99 |
| | 1922. | 1922. |
| Last high point | Oct. 14, 103.43 | Sept. 11, 93.99 |
| Last low point | Nov. 27, 92.03 | Nov. 27, 82.17 |
| Declined to | Oct. 31, 96.11 | Oct. 31, 89.25 |
| Rallied to | Nov. 8, 99.53 | Nov. 3, 91.11 |
| Declined to | Nov. 27, 92.03 | Nov. 27, 82.17 |
| Rallied to | Dec. 2, 95.91 | Dec. 2, 85.86 |

ENORMOUS STOCK DIVIDENDS.

One of the most notable financial developments of the year has been the enormous distribution of stock dividends, which, according to a compilation made by a reliable authority, has totalled $1,007,000,000 during the twelvemonth. This movement on the part of the superprosperous corporations of the country has undoubtedly been taken as a precaution against legislation by Congress with a view to making the surpluses of corporations subject to income tax levies by the Federal Government. Under the decision of the United States Supreme Court, which is the existing law, stock dividends are not taxable.

Singularly enough, the great disbursements call attention in a striking way to the futility, in one direction at least, of the decision rendered years ago by this supreme tribunal of the United States ordering the dissolution of the Standard Oil Trust under the Sherman Anti-Trust Law. Financial analysts call attention to the fact that when the original Standard Oil Company of New Jersey with its thirty-three subsidiaries was ordered dissolved it had a total capitalization of $100,000,000, which was selling in the market for about $400,000,000.

During the last year, and principally within the last three months, seven of these independent units, namely, Standard Oil of New Jersey, Standard Oil of New York, Standard Oil of California, Ohio Oil, Vacuum Oil, Atlantic Refining, Standard Oil of Kentucky, have disbursed $781,324,311 in stock dividends.

## REVIEW OF THE BOND MARKET FOR 1922.

By Burton L. Read.

Market values of bonds in 1922 have reflected a continued lowering of money rates up to the fall months, followed by a firmer tendency in money due to crop-moving requirements and increasing activity of business.

As reflected by the Dow, Jones & Co. average of forty corporation issues, the general level of bond prices at the middle of September was about equal to that of May, 1917, shortly after America's declaration of war against Germany, and more than twenty points above the low mark of May, 1920, which marked the extreme depression of investment values due to the war and ensuing over-expansion of credit. The change in money and credit conditions which brought about this recovery is shown by a decline in the interest rate on prime commercial paper from 8 per cent. in the summer of 1920 to 4 per cent. or less in the corresponding period of 1922.

Bond market changes for about eight years may be seen by the following comparison of average prices:

| Year. | High. | Low. | |
|---|---|---|---|
| | | (To Dec. 1, 1922.) | |
| *1922 | 92.12 | (Sept. 14) 84.34 | (Jan. 4) |
| 1921 | 84.13 | (Dec. 7) 75.11 | (June 22) |
| 1920 | 80.40 | (Jan. 12) 71.96 | (May 21) |
| 1919 | 86.53 | (Jan. 8) 78.39 | (Dec. 16) |
| 1918 | 88.58 | (Nov. 14) 81.94 | (Sept. 24) |
| 1917 | 96.25 | (Jan. 18) 82.19 | (Dec. 26) |
| 1916 | 95.67 | (Nov. 27) 93.66 | (Aug. 31) |
| †1915 | 94.64 | (Nov. 24) 89.64 | (Sept. 16) |

* To December 1. † From April 1.

On Nov. 29, 1922 the average stood at 88.42, showing the extent of the autumn reaction.

A distinguishing feature of the bond market year has been the advance in all Liberty Loan issues to record high prices, in all cases well over par. In the 4¼ per cent. loans the apex of the rise occurred in July, two months earlier than the highest point of the advance in corporation bonds. Extreme range of the more active Government securities has been as follows:

| | High. | Low. |
|---|---|---|
| | (To Dec. 1, 1922.) | |
| Liberty first 3½s, 1932-'47 | 103.02 (Oct., 1922) | 86.00 (July, 1920) |
| Liberty first converted 4¼s, 1932-'47 | 101.78 (July, 1922) | 84.00 (May, 1920) |
| Liberty second converted 4¼s, 1927-'42 | 101.50 (July, 1922) | 81.10 (May, 1920) |
| Liberty third 4¼s, 1928 | 101.98 (July, 1922) | 85.60 (Dec., 1920) |
| Liberty fourth 4¼s, 1933-'38 | 101.86 (July, 1922) | 82.00 (May, 1920) |
| *Liberty-Victory 4¾s, 1922-'23 | 101.00 (June, 1922) | 94.70 (May, 1920) |
| †United States Treasury 4¼s, 1947-'52 | 100.14 (Oct., 1922) | 98.90 (Oct., 1922) |

* July 26, 1922, all Victory 4¾% notes designated A, B, C, D, E, or F, approximately $1,000,000,000, were called for payment December 15. Balance due June 15, 1923. Quotations only for uncalled notes.

† Refunding issue of 1922. Listed on New York Stock Exchange October 25.

From the prices of Liberty Bonds, as shown above, losses of approximately three to three and one-half points occurred in later months due to increased business activity, firmer money rates and the issue of a new refunding loan in October. On Nov. 29 the Liberty first 3½s closed at 100.08, first 4¼s at 98.32, second 4¼s at 97.84, third 4¼s at 98.40, and fourth 4¼s at 98.08.

Foreign Government bonds also have sold at much advanced prices, reflecting both the improved money market situation and financial improvement in the issuing countries. But this group as a whole has shown a wider reaction, owing to a heavy volume of new flotations, and in a part of the list, especially French and Belgian loans, to the uncertainty over reparations and unsettling influence of the Near East disturbance.

High and low price range of the principal Allied loans floated in this country is shown by the following table:

| Bond. | High. | | Low. (To Dec. 1, 1922.) | |
|---|---|---|---|---|
| Kingdom of Belgium 25-year s.f. 7½s, 1945 | 109½ | (Apr., 1922) | 94 | (Dec., 1920) |
| Kingdom of Belgium 20-year s.f. 8s, 1941 | 108⅝ | (Apr., 1922) | 96¾ | (Mar., 1921) |
| French Republic 25-year s.f. 8s, 1945 | 108¾ | (May, 1922) | 93 | (Nov., 1922) |
| French Republic 20-year s.f. 7½s, 1941 | 104¾ | (Apr., 1922) | 91 | (Nov., 1922) |
| United Kingdom of Great Britain and Ireland 20-year 5½s, 1937 | 106⅞ | (Aug., 1922) | 80½ | (Dec., 1919) |
| United Kingdom 10-year convertible 5½s, 1929 | 110⅞ | (July, 1922) | 83 | (Aug., 1920) |
| Kingdom of Italy 6½s, 1925 | 96¾ | (July, 1922) | 79 | (Dec., 1920) |

The two French loans touched their lowest points in November, 1922, recovering to 97¾ and 92¾ respectively at closing prices November 29. Belgian 7½s closed November 29 at 100½, Belgian 8s at 99¾, United Kingdom 5½s of 1937 at 102⅛, convertible ten-year 5½s at 110½, reflecting the strong sterling market, and Kingdom of Italy 6½s at 93½.

Based on figures for the eleven months to and including November, total bond dealings on the New York Stock Exchange for the year 1922 will approximate $4,150,000,000, making a new high record. For 1921 the total was $3,086,000,000, and for 1920, the previous high record year, it was $3,887,000,000. These figures compare with $955,000,000 in 1915, the first year in which dealings reflected war stimulation.

Total for eleven months to the end of November was $3,836,000,000, of which amount about 40 per cent. was in Liberty and Victory bonds, including the new Treasury issue of October. It is important to note the changing ratio of Government bond dealings in late years. In 1917, when Liberty bonds first appeared on the market, the proportion of such dealings was 27.8 per cent. In 1918 it rose to 70.9 per cent. and in 1919 to 76.8 per cent., which was the maximum. In 1920 it declined to 72.7 per cent., in 1921 to 60.7 per cent., and, as noted, a further very pronounced decline in this ratio has occurred in 1922.

Dealings in foreign bonds, relatively unimportant before the war, have been steadily increasing. The total for 1922 may be estimated at well in excess of $500,000,000. Transactions in domestic corporation bonds since the year 1915 have more than doubled.

While the only definite statistics available are those of Stock Exchange trades, such figures represent only a small proportion of aggregate transactions, as the greater part of all bond sales take place directly between bankers or between the banker and the investor. The above record is mainly significant as showing the general trend in total bond investments and dealings in the various classes.

## NEW FINANCING.

Bond and note flotations in eleven months from January to November, inclusive, 1922, may be stated at approximately $4,635,817,000, not including United States Government issues. The Government during this period sold Certificates of Indebtedness, Treasury Notes, and Treasury Bonds to an aggregate amount of $3,922,000,000, making a total of Government and other financing of about $8,557,817,000.

In the following summary of financing, other than United States Government, the total of State and municipal issues is supplied by the Daily Bond Buyer. Figures for corporation securities are based principally on the compilations of the Commercial and Financial Chronicle, and in the division of foreign loans the statistics have been prepared by the Guaranty Trust Company of New York.

**Bond and Note Issues.**
January to November (inclusive), 1922.

| *Domestic Loans.* | |
|---|---|
| State and Municipal | $1,177,699,000 |
| Railroad | 595,239,000 |
| Public Utility | 645,521,000 |
| Farm Loan | 366,665,000 |
| Industrial and Miscellaneous | 1,049,019,000 |
| Total domestic | $3,834,143,000 |
| *Foreign Loans.* | |
| Government and Municipal—Other than Canada | $422,608,000 |
| Canada | 206,119,000 |
| Corporation—Other than Canada | 136,115,000 |
| Canada | 36,831,500 |
| Total foreign | $801,674,700 |
| Total foreign and domestic | $4,635,817,700 |

For purposes of comparison the appended figures from the Commercial and Financial Chronicle give totals of domestic and foreign financing (other than United States Government) for previous full yearly periods:

| Year. | Total Issues. |
|---|---|
| 1921 | $4,231,320,000 |
| 1920 | 4,010,048,000 |
| 1919 | 4,361,188,000 |

It will be noted that the total for eleven months of 1922 exceeds that of each of the complete years of 1919 to 1921.

The record volume of tax-exempt issues, including State, municipal, and farm loan bonds, is a feature of 1922 financing. State and municipal issues have about tripled as compared with the output previous to the participation of the United States in the World War. This has been due to a variety of causes, of which one that has contributed largely is the tax-exempt character of such bonds, resulting in a heavy demand for these securities by investors subject to the surtax rates of income tax. Increased cost of public improvements has added to the amount of bonds issued; also the extensive movement toward construction of roads. An important item in this class of securities has been the issue of about $350,000,000 of bonds by various States for soldier bonus purposes, this figure being the aggregate as reported by the Bond Buyer, to Nov. 16, 1922, including earlier years.

Farm Loan bonds include two joint issues of the Federal Land Banks, of $75,000,000 each, the remainder consisting mostly of bonds of the Joint Stock Land Banks, with a small amount issued by individual Federal Banks. These bonds, like State and municipal issues, are in the tax-exempt class.

Of the domestic and foreign loans in the above tabulation, approximately 20 per cent. were issued for refunding purposes. The remainder represent new capital. In the case of United States Government issues the proportion is much larger. Compared with the total of $3,922,000,000 of new issues, as above stated, the Government paid off in the eleven months $2,432,595,000 of maturing obligations, in cash or by exchange for new securities. This does not include payments on account of Victory notes and other obligations in December.

While the above figures deal with bond financing only, a large additional volume of capital has been raised by stock issues. According to Dow, Jones & Co., the total of stock issues in the eleven months period to Nov. 30, 1922, was $710,272,000.

## FOREIGN LOANS FLOATED IN AMERICA IN 1922.

The following compilation of foreign Government and municipal loans floated in the United States from January to November, inclusive, 1922, has been prepared for The World Almanac by the Guaranty Trust Company of New York:

| Issue. | Coupon. | Maturity. | Amount in Dollars. | |
|---|---|---|---|---|
| *Far East.* | | | | |
| Dutch East Indies | 6s | 1947 | $ 40,000,000 | |

‡ Total through October only.
(a) Issued in Pounds Sterling.
(b) Issued in Guilders.
(c) Issued in Kroner.
(d) Issued in Chilean Pesos.
(e) Issued in French Francs.

In addition to Government and municipal issues, bonds of foreign corporations have been floated in the United States in the same period to the amount of $136,115,000, omitting Canada, and $36,831,500 of Canadian companies, making a total of $172,947,200, and aggregate of all foreign issues, $801,674,700. In addition, stock issues of foreign companies amounted to $7,075,000.

Of the foreign corporation loans, $64,995,000 were issues of railroads, $8,761,000 of public utilities, and $99,190,000 of industrial companies. The largest foreign loan in this class was that of $40,000,000 for the Paris-Lyons-Mediterranean Railroad Company. Countries represented, other than Canada, include France, Holland, Belgium, Denmark, Cuba, Australia, and Brazil.

## PLAN FOR CONSOLIDATING UNITED STATES RAILROADS.

The Interstate Commerce Commission opened in Washington on Nov. 17, 1922, hearings in the matter of consolidation of the railway properties of the United States into a limited number of systems. The roads immediately concerned in the first hearing were those covered in the group systems Nos. 14 and 15 of the tentative plan prepared by the commission.

The following table gives the outstanding capital stock, funded debt and the total mileage owned, leased and controlled by the four companies immediately concerned as of Dec. 31, 1921. It shows an aggregate stock and bond capitalization of almost $2,500,000,000.

| | Outstanding Stock. | Funded Debt. | Mileage. |
|---|---|---|---|
| No. Pacific... | $248,000,000 | $453,513,600 | 11,287 |
| Gt. Northern. | 249,478,250 | 257,721,515 | 11,475 |
| Burlington.... | 170,839,100 | 173,619,300 | 9,393 |
| St. Paul..... | 233,725,100 | 574,240,055 | 16,106 |
| Total..... | $902,042,450 | $1,458,094,470 | 48,261 |

Of the outstanding capital stock of the Burlington 97.09 per cent. is owned in equal parts by Northern Pacific and Great Northern, and the two roads guarantee an important part of the bonded debt of the controlled road.

The tentative plan which the Interstate Commerce Commission put out is herewith presented. The commission finds for the purposes of this tentative plan that the railway properties of the continental United States may be consolidated under the statute into the following systems:

### SYSTEM No. 1—NEW YORK CENTRAL.

New York Central.
Pittsburgh & Lake Erie.
Rutland.
Michigan Central.
Chicago, Kalamazoo & Saginaw.
Cleveland, Cincinnati, Chicago & St. Louis.
Cincinnati Northern.
Western Maryland.
Fonda, Johnstown & Gloversville.
Lake Erie & Pittsburgh.
Central Indiana.
Pittsburgh, Chartiers & Youghiogheny.
Monongahela.
Boston & Maine.
Maine Central.
Bangor & Aroostook.
And all railway properties controlled by the above carriers through lease, stock ownership, or otherwise, except:
Lake Erie & Western and Toledo & Ohio Central. (Both now controlled by New York Central.)
Zanesville & Western and Kanawha & Michigan. (Both now controlled by Toledo & Ohio Central.)
Indiana Harbor Belt, now controlled by New York Central, 30 per cent.; Michigan Central, 30 per cent.; Chicago & North Western, 20 per cent.; Chicago, Milwaukee & St. Paul, 20 per cent.

### SYSTEM No. 2—PENNSYLVANIA.

Pennsylvania.
West Jersey & Seashore.
Long Island.
Baltimore, Chesapeake & Atlantic.
Cumberland Valley.
Maryland, Delaware & Virginia.
New York, Philadelphia & Norfolk.
Pittsburgh, Cincinnati, Chicago & St. Louis.
Waynesburg & Washington.
Grand Rapids & Indiana.
Cincinnati, Lebanon & Northern.
Ohio River & Western.
Louisville Bridge & Terminal.
Wheeling Terminal.
Toledo, Peoria & Western.
Lorain, Ashland & Southern.
Lake Erie & Pittsburgh.
Central Indiana.
Pittsburgh, Chartiers & Youghiogheny.
Monongahela (see No. 1 also for last four).
And all other railway properties controlled by any of the above carriers under lease stock ownership, or otherwise, except the Norfolk & Western and railway properties controlled by it, which may be included in system No. 9, Norfolk & Western.

### SYSTEM No. 3—BALTIMORE & OHIO.

Baltimore & Ohio.
Sandy Valley & Elkhorn.
Staten Island Rapid Transit.
Reading system, comprising the Philadelphia & Reading, Central Railroad of New Jersey, and various others.
Cincinnati, Indianapolis & Western.
Chicago, Indianapolis & Louisville.
New York, New Haven & Hartford.
Central New England.
Lehigh & New England.
Lehigh & Hudson.

### SYSTEM No. 4—ERIE.

Erie.
Chicago & Erie.
New Jersey & New York.
New York, Susquehanna & Western.
Delaware & Hudson.
Delaware, Lackawanna & Western.
Ulster & Delaware.
Bessemer & Lake Erie.
Buffalo & Susquehanna.
Pittsburgh & Shawmut.
Pittsburgh, Shawmut & Northern.
Lorain, Ashland & Southern.
Wabash lines east of the Missouri River.

### SYSTEM No. 5—NICKEL PLATE-LEHIGH VALLEY.

Lehigh Valley.
New York, Chicago & St. Louis.
Toledo, St. Louis & Western.
Detroit & Toledo Shore Line.
Lake Erie & Western.
Wheeling & Lake Erie.
Pittsburgh & West Virginia.
Bessemer & Lake Erie.

### SYSTEM No. 6—PERE MARQUETTE.

Pere Marquette.
Detroit & Mackinac.
Ann Arbor.
Detroit, Toledo & Ironton.
Boyne City, Gaylord & Alpena.

### SYSTEM No. 7—NEW ENGLAND

New York, New Haven & Hartford.
New York, Ontario & Western.
Central New England.
Boston & Maine.
Maine Central.
Bangor & Aroostook.
Lehigh & Hudson River.
Lehigh & New England.

### SYSTEM No. 7A—NEW ENGLAND-GREAT LAKES.

Same as system No. 7 with addition of the following, which otherwise with the exception of the Buffalo, Rochester & Pittsburgh, may be included in system No. 4, Erie. That carrier may be included in system No. 5, Nickel Plate-Lehigh Valley.
Delaware & Hudson.
Ulster & Delaware.
Delaware, Lackawanna & Western.
Buffalo, Rochester & Pittsburgh.
Pittsburgh & Shawmut.
Pittsburgh, Shawmut & Northern.

### SYSTEM No. 8—CHESAPEAKE & OHIO.

Chesapeake & Ohio.
Hocking Valley.
Virginian.

### SYSTEM No. 9—NORFOLK & WESTERN.

Norfolk & Western.
Toledo & Ohio Central.
Zanesville & Western.
Kanawha & Michigan.
Kanawha & West Virginia.

### SYSTEM No. 10—SOUTHERN.

Southern.
Alabama Great Southern.
Georgia, Southern & Florida.
Mobile & Ohio.
Southern Railway in Mississippi.
Northern Alabama.
Cincinnati, New Orleans & Texas Pacific.
New Orleans Great Northern.
Alabama & Vicksburg.

SYSTEM No. 11—ATLANTIC COAST LINE-LOUISVILLE & NASHVILLE.

Atlantic Coast Line.
Atlanta & West Point.
Charleston & Western Carolina.
Louisville & Nashville.
Nashville, Chattanooga & St. Louis.
Louisville, Henderson & St. Louis.
Western Railway of Alabama.
Richmond, Fredericksburg & Potomac.
Norfolk Southern.
Atlanta, Birmingham & Atlantic.
Winston-Salem Southbound.
Roanoke to Winston-Salem branch of Norfolk & Western.
Florida East Coast.
Carolina, Clinchfield & Ohio.
Georgia & Florida.
Gulf, Mobile & Northern.
Mississippi Central.

SYSTEM No. 12—ILLINOIS CENTRAL-SEABOARD.

Illinois Central.
Yazoo & Mississippi Valley.
Central of Georgia.
Seaboard Air Line.
Lynchburg, Va., to Durham, N. C., branch of Norfolk & Western.
Gulf & Ship Island.
Tennessee Central.
Carolina, Clinchfield & Ohio.

SYSTEM No. 13—UNION PACIFIC-NORTH WESTERN.

Union Pacific.
St. Joseph & Grand Island.
Oregon Short Line.
Oregon-Washington Railroad & Navigation Co.
Los Angeles & Salt Lake.
Chicago & North Western.
Chicago, St. Paul, Minneapolis & Omaha.
Lake Superior & Ishpeming.
Wabash lines west of the Missouri River.

SYSTEM No. 14—BURLINGTON-NORTHERN PACIFIC.

Chicago, Burlington & Quincy.
Northern Pacific.
Chicago Great Western.
Minneapolis & St. Louis.
Spokane, Portland & Seattle.

SYSTEM No. 15—MILWAUKEE-GREAT NORTHERN.

Chicago, Milwaukee & St. Paul.
Great Northern.
Chicago, Terre Haute & Southeastern.
Duluth & Iron Range.
Duluth, Missabe & Northern.
Green Bay & Western.
Spokane, Portland & Seattle.
Butte, Anaconda & Pacific.

SYSTEM No. 16—SANTA FE.

Atchison, Topeka & Santa Fe.
Gulf, Colorado & Santa Fe.
Colorado & Southern.
Fort Worth & Denver City.
Denver & Rio Grande.
Western Pacific.
Utah Railway.
Northwestern Pacific.
Nevada Northern.

SYSTEM No. 17—SOUTHERN PACIFIC-ROCK ISLAND.

Southern Pacific Company.
Nevada Northern.
Chicago, Rock Island & Pacific.
Chicago, Rock Island & Gulf.
Arizona & New Mexico.
El Paso & Southwestern.
San Antonio & Aransas Pass.
Trinity & Brazos Valley.
Midland Valley.
Vicksburg, Shreveport & Pacific.
Chicago, Peoria & St. Louis.

SYSTEM No. 18—FRISCO-KATY COTTON BELT.

St. Louis-San Francisco.
St. Louis Southwestern.
Louisiana Railway & Navigation Co.
Chicago & Alton.
Missouri, Kansas & Texas.
Trinity & Brazos Valley.
San Antonio, Uvalde & Gulf.

SYSTEM No. 19—CHICAGO-MISSOURI PACIFIC.

Chicago & Eastern Illinois.
Missouri Pacific.
Kansas City Southern.
Kansas City, Mexico & Orient.
Kansas, Oklahoma & Gulf.
Texas & Pacific.
Fort Smith & Western.
Louisiana & Arkansas.
Gulf Coast Lines.
International & Great Northern.

Certain lines such as the Minneapolis, St. Paul and Sault Ste. Marie and the Central Vermont, which are controlled by Canadian carriers, have not been specifically included in this tentative plan because these lines form parts of through trans-continental Canadian systems in active competition with systems above set forth.

The carriers included in this tentative plan comprise most of the Class I. steam railroads, but very few of those in Class II. and Class III. Those not so included, whether industrial common carriers, terminal carriers, interurban electric railways operated as a part of general steam railroad systems of transportation or engaged in the general transportation of freight, "short lines," or others, will be considered at the hearings to be hereafter assigned so that in the plan to be ultimately adopted provision can be made for their inclusion in the systems.

Water carriers where now controlled by carriers by rail will be considered as being included tentatively in the systems in which the controlling rail carrier has been included.

## RAIL ACT TINKERING OPPOSED.

The Railway Business Association at its annual meeting in New York, Nov. 9, 1922, adopted this resolution:

"Prosperity is here. Let us make it last. Recovery in agriculture, industry and trade has its mainstay in railway building. It was the replacement and addition of locomotives, cars, tracks, terminals and accessories which largely revived general business. Railway improvements must continue if the traffic is to be carried. Car shortages are upon us. October almost brought a new peak in car loadings. Shippers are confronted by congestion in freight, limit upon industry and sacrifice of farm products.

"The foundation of railway purchases is the confidence of railway managers and investors. For Congress to consider early amendments to the Transportation Act would open the door to assaults upon the policy which is designed to give the roads an opportunity to make sufficient earnings. To let it clearly be seen that no amendments of any kind are under serious consideration will leave all concerned free for the work of railway rehabilitation and preparation for the coming burden of traffic.

"We urge that Congress refrain at this time from all amendments to the Transportation Act."

## GOVERNMENT PAYMENTS AND LOANS TO CARRIERS.

Secretary of the Treasury Mellon, in his annual report to Congress, listed the payments made to various railroads up to Nov. 15, 1922, for the reimbursement of deficits on account of Federal control. The total from Nov. 16, 1921, to Nov. 15, 1922, was $1,949,181; the grand total, $5,139,550.

The payments to carriers from Nov. 16, 1921, to Nov. 15, 1922, for the guarantee provided for in Sec. 209 of the Transportation Act of 1920 as amended amounts to $19,622,040 and the total payments to Nov. 15, 1922, amounted to $450,090,804.

The loans to carriers under Sec. 210 of the same act showed that the loans outstanding on Nov. 15, 1921, amounted to $238,208,184.

New loans made from Nov. 16, 1921, to Nov. 15, 1922, were $58,419,450.

Repayments during that period were $77,425,512.

The loans outstanding Nov. 15, 1922, were $219,202,122.

The total amount of money that the Government has loaned out to the carriers was $317,886,667. Of this amount, $98,684,545 had been repaid up to Nov. 15, 1922.

The Treasury held securities of railroads on June 30, 1922, as follows:

Obligations of carriers accrued under Sec. 7 of the Federal Control Act, approved March 21, 1918, $55,867,000.

Equipment Trust 6% Gold Notes, acquired by Director General of Railroads pursuant to Federal Control Act of March 21, 1918, as amended, and act approved Nov. 19, 1919, to provide for the reimbursement of the United States for the motive power, cars, and other equipment ordered for carriers under Federal control, $49,999,800.

Obligations of carriers acquired pursuant to Sec. 207 of the Transportation Act approved Feb. 28, 1920, as amended, $116,646,500.

Obligations of carriers acquired pursuant to Sec. 210 of the Transportation Act approved Feb. 28, 1920, as amended, $233,991,830.

Total United States railroad securities owned by the Government, $456,505,130.

# Labor Review for 1922.

(By John J. Leary, Jr.)

Developments in the labor world in 1922 fall naturally into two classifications—the spectacular and the non-spectacular—and, as is frequently the case, the non-spectacular was on the whole the more important.

Of the spectacular developments, the successful fight of the miners to retain the 1920 wage scales, and the unsuccessful strike of the railroad shopmen were easily the more important, with the strike of New England cotton mill hands against lower wages and longer hours, still on in the early days of November, a good third.

The less spectacular developments included the conversion of a mass of unemployment of peak proportions in January to an actual shortage of unskilled labor, in some sections and of skilled men in some trades, notably building, before the summer was half through, and a change in the wage trend from a sharp curve downward to an almost equally sharp upward curve. With these the "open shop" drive, always in evidence when the labor reservoir is full to overflowing, slowed down until it all but stopped.

For the shift in the wage trend, called to the attention of the least observing by an increase in the wages of the unskilled of 20 per cent. by the United States Steel Corporation in late August, the speeding up of industry and the consequent absorption of the labor slack and restriction of immigration were mainly responsible, with the fight waged by the miners a contributing factor of no small value. Had they accepted, or been compelled to take a cut, their reduction would unquestionably have had an adverse effect upon wages in other lines.

The shopmen's strike, costly though it was to the carriers, the unions and their members and to the general public, also contributed to this result—a negative value, perhaps, to those injured, and intangible to all others, but worth bearing in mind in appraising the results of that strike.

Taken altogether, therefore, and bearing in mind that the 1,100,000 who suffered large direct losses through these major strikes constitute something less than 3 per cent. of the number scheduled by the Census Bureau as engaged in gainful occupations, it is clear that labor, organized and unorganized, finds itself much better off than it was at the beginning of the year. This applies as strongly to the so-called "white collar" classes as to those who do manual labor.

Unquestionably the loss of the shopmen's strike has caused a loss in membership that will be felt for a considerable time to come, but the probabilities are that the close of the year finds the unions, as a whole, stronger numerically than they were on January 1, losses in the railroad unions being largely, if not altogether, offset by heavy gains of the United Mine Workers as a result of their strike, and gains in other craft organizations.

Official figures as to union membership are, as in the past, unobtainable. However, taking the 3,195,000 dues-paying members reported by Secretary Frank Morrison to the annual convention of the American Federation of Labor in June as a base, adding the 600,000 then on strike and not paying dues, and allowing another 600,000 for the "Big Four" railroad brotherhoods and miscellaneous unions not affiliated with the federation, the total union membership of the country as the year closes is not far from 4,400,000, or about the 1921 level when the federation reported 3,906,520, and membership in the non-affiliated unions was somewhat larger.

## THE COAL STRIKE.

Of the two great strikes in 1922, the most stubbornly contested was that of the coal miners who, on April 1 downed tools in both anthracite and bituminous fields. This general strike, precipitated in the bituminous fields by the failure of the operators of the Central Competitive Field to keep an agreement to confer on wages prior to April 1, and in the anthracite fields through inability of operators and miners to agree upon wage schedules, was, when all camouflage was stripped away, a contest to maintain the old wage scales. In the soft coal fields, the desire of the operators was a return to the scale made in 1917 to which 26 per cent. was added in the 1920 scale fixed by President Wilson's bituminous commission. In the hard coal fields, the operators matched a demand for a 20 per cent. increase on the part of the union with a demand for a 22 per cent. reduction.

Both groups of operators stressed competition as reason for demanding reductions—the bituminous operators that of the non-union fields, and particularly those of West Virginia, and the anthracite operators that of bituminous coal, in the raw, or in the form of coke and gas, and fuel oil. Necessity of placing miners' wages in line with the wages paid other industries was also urged. Against these, the United Mine Workers, through their chief spokesmen, President John L. Lewis, and Vice President Philip Murray, urged the cost of living, the hazards of the industry and that, large though the increases of 1920 might be over prewar wages, the existing rates were justified because the prewar rates were unconscionably low. The chief reliance of the miners, however, was the 100 per cent. membership in the hard coal country and in 70 per cent. of the bituminous territory.

The strike began on April 1, when approximately 550,000 union miners quit work, followed within the next few weeks by 90,000 men in the non-union fields of Pennsylvania and West Virginia. The ability of the union to cripple the Connellsville coke field, non-union for a generation, and to take thousands more out of other equally strong non-union districts in Central Pennsylvania was the surprise of the strike, and in the opinion of many, the determining factor in enabling the union to carry its point. Whether this be so or not, it is a fact that important producing interests had confidentially informed official Washington that by taking one field away from the union the non-union output of the country with the stocks above ground April 1 would be sufficiently large to break the strike. This information checked with data prepared by a Government bureau but withheld from publication.

Actual figures as to the stocks above ground April 1 were also withheld, the total of 63,000,000 tons or 43,000,000 above the minimum of safety, estimated by the Geological Survey as of that date, omitting such items as fuel in transit, in consumers' hands and at the head of the lakes, as to make it comparatively valueless. The acutal figures, as prepared by Federal experts, and published in advance of the strike in The World, showed 120,000,000 tons available. That this estimate was the more nearly accurate is shown by the fact that it was not until late summer, when the difference in non-union production and national consumption was far in excess of 63,000,000 tons, that the Administration felt called upon to intervene to force a settlement.

This took the form of conferences in Washington where the President proposed an immediate resumption of mining and the submission of all disputed points to arbitration. This was declined by John L. Lewis, acting for the miners, who shortly thereafter called a joint meeting of Central Competitive Field Operators and union leaders in Cleveland. This conference met August 7, when it was expected operators representing the bulk of Central Field tonnage would agree to renew the old scale, this to be followed by a like renewal in other union fields whose scales for more than twenty years have been based on that of the Central Field. This plan failed, whereupon a second conference, embracing operators and miners from all fields, agreed on August 15 to renew the old scales to run to March 31 next and to set up machinery for the making of a new agreement to be signed before that date. To this agreement operators representing an annual tonnage of 60,000,000 were immediate parties. Within a fortnight the entire union tonnage of the country had accepted the agreement, and Mr. Lewis had accomplished what the operators and a large part of his membership had felt to be impossible—the avoidance of a reduction.

Securing this, the union chief waived the demand for a six hour day and five day week framed at a national convention held in March and other demands of lesser importance imposed by the radical element in the organization. These demands, however, were later agreed upon by union representatives as the basis on which they will enter new negotiations in January, 1923.

## IN THE ANTHRACITE FIELD.

Following the bituminous settlement, the union chiefs and the anthracite operators, headed by Samuel D. Warriner, resumed peace negotiations in Philadelphia, first meeting on August 17. Here the operators insisted upon arbitration of future disputes as a condition of renewing the old scales. After a fortnight's negotiations, in which Senator George Wharton Pepper and Secretary of Labor James J. Davis actively intervened, it was agreed on September 4, to extend the old scale to August 31, 1923, without conditions. In reaching this agreement, the fact that Congress was expected to authorize the appointment of a fact finding commission served to mollify the operators whose final proposal,

prior to signing, was an inquiry by a joint board whose findings would be binding on neither side.

This board, subsequently authorized by Congress, was named by President Harding on October 9, and organized October 17, with John Hays Hammond, of Gloucester, Mass., the noted metal mining engineer, as Chairman. With Mr. Hammond on the board, the President named Thomas Riley Marshall, of Indiana, former Vice President of the United States; Judge Samuel Altschuler of Chicago; Clark Howell, editor of the Atlanta, (Ga.,) Constitution; George Otis Smith, director of the United States Geological Survey, Washington; Dr. Edward T. Devine, sociologist, New York; and Charles P. Neill, former Commissioner of Labor, Washington. Each is to receive a salary of $7,500 a year.

Under the Winslow-Borah law, providing for its appointment, the commission is required to make a report of conditions in the bituminous industry by Jan. 15, 1923, and on anthracite by July 10. To attain the material for these reports, the commission is authorized to investigate all phases of the coal industry including, among other things, the advisability of nationalizing the mines. In making up the commission, President Harding declined to name representatives of operators or miners.

As stated by the commission, following its organization, its object is "to endeavor to get all the essential facts touching the coal industry to the end that practical measures may be found to insure a constant supply of this most necessary commodity at as reasonable prices as are consistent with fair wages and profit to those engaged in the industry. The policy of the commission will be to invite and welcome every suggestion and offer of assistance from the mine workers, operators, dealers and consumers of coal."

Settlement of the strike in the old union fields left 90,000 newly organized miners in the Connellsville and other Pennsylvania fields, previously non-union, unprovided for. In these fields the strike remains in effect, the union in order to concentrate its strength there calling off late in October, the strike in Mingo County, West Virginia, that in the two years it was on, cost the union $2,000,000 in benefits, upward of two score lives and caused the uprising of union miners in August, 1921, that required the use of United States troops to end.

The cost of the strike in the soft coal fields is impossible to estimate because of the overdeveloped state of that branch of the industry which, had there been no strike, would have kept practically all of those who struck in the unionized fields on part time, or less, most of the summer. In the anthracite part of the industry, which has been practically a full time basis for years, the losses to the combatants, based mainly on figures furnished by the Anthracite Bureau of Information, were as nearly as can be estimated, $250,000,000. Of this amount, the loss in wages, is placed at $125,738,400. The balance includes cost of labor in maintaining the mines while idle, $35,000,000, lost profits $11,000,000, and uninsurable damage to mines, which, with losses incidental to inability to mine at capacity for months on some properties, cost the operators tens of millions more.

The loss to the public in tons of anthracite approximated 35,000,000 or about 45 per cent. of the annual supply. As this cannot be made up for months, the Atlantic seaboard consumers, chief users of hard coal, will have to do with something like a 50 per cent. supply of normal and rely on bituminous and other substitutes for the balance of its fuel this winter. Users of bituminous are more fortunate, the supply from union and non-union fields subsequent to the breakdown of the shopmen's strike being at a rate that threatens a surplus before the spring of 1923.

## THE SHOPMEN'S STRIKE.

The shopmen's strike, begun three months after the miners quit work, was a factor in forcing a settlement of the coal strike, through impeding the flow of non-union coal from the South which at one time touched, according to the United States Geological Survey, the high level of 5,500,000 tons a week. Threatening since the spring of 1920, when the roads were released from Government control, the dangers of a strike first became really acute in June when at meetings of the shopcraft unions held in Cleveland as an adjunct to the convention of the American Federation of Labor, John L. Lewis joined in the deliberations. Just what arguments the miners' leader used was not disclosed, but it was not until after his arrival and participation in their conferences that Bert M. Jewell, President of the Railway Department of the American Federation of Labor and his associates served notice on the United States Railroad Labor Board of intention to strike July 1.

As officially stated, the causes of the strike were the reduction of wages averaging 12 per cent., effective July 1; changes in working conditions previously ordered by the board, and the practice of some roads, condemned by the board, of leasing shop and other work to private contractors to place it beyond the jurisdiction of the board, and thereby permit lower labor costs. It was an evasion of the spirit if not the letter of the Esch-Cummins act, under which the board was created, and as such was condemned by railroad executives not resorting to the practice as well as by the unions. Of these grievances, the contracting out and changes in rules were the most serious, the latter depriving the men on many roads of conditions they had enjoyed twenty or more years.

Actually, the strike was the outcome of the struggle begun by the unions before the roads were returned to their owners in 1920 to retain as much as possible of what they had gained during the period of Government control, including the national agreements and of the executives to restore as nearly as possible, prewar conditions.

In this contest, the roads had attained two general reductions in wages and changes in rules contained in the national agreements that cut heavily into the earnings of the shopmen. Abrogation of the national agreements had been approved by the board, conditional on agreements between unions and executives, but had not been made effective because the unions insisted on writing the national agreements into all system contracts. The changes in rules and wages ordered by the board with the contracting out practice previously referred to, and the refusal of the Pennsylvania Railroad to obey a ruling of the board fixing the manner in which employed representatives on wage boards were to be selected, led to the taking of the strike votes and the decision of the union heads to resort to a test of strength. It was the feeling of many, if not of a majority of the union heads, that only by a strike could they prevent the gradual destruction of their organizations and the whittling down of wages and favorable working conditions. They further argued that the board was unable or unwilling to protect them, citing the contracting out practice and the Pennsylvania case as proofs.

Though notice of the intention of the unions to strike July 1 was served on the Labor Board a week in advance of that date, the board took no official action until June 30 when it issued subpoenas to carriers and union heads to appear before it and show cause why they should not be ordered to refrain from interrupting traffic. The carriers were represented in force, but the union chiefs, never legally subpoenaed, were missing, having departed for their several headquarters to direct the strike, a necessary precaution according to Bert. M. Jewell, to prevent a headless, disorganized and disorderly movement.

The board, after some delay, did secure the attendance of two union heads who had not approved strike votes. One of these, Daniel W. Helt, chief of the signalmen, never did permit his men to quit. The others, Timothy Healy, President of the stationary firemen, issued the necessary approval a few days later. At this meeting, the executives agreed to obey all rulings of the board, including a majority of those who had previously contracted out work and who agreed to abandon the practice.

## AGAINST ORDERS OF THE BOARD.

Ignoring the board, the shopcrafts in a letter to T. DeWitt Cuyler, as Chairman of the Association of Railway Executives demanded that the roads restore the second cut made by the board and working conditions changed by it. This demand was refused and no peace being in sight the board on July 11 declared the strike not against the roads, but against its orders and that men who took strikers' places were not to be considered strike-breakers and were entitled to official and public support.

The programme of the strike leaders called for all crafts other than telegraphers and train service men ("Big Four" brotherhoods and the Switchmen's Union of North America) who were not affected by the changes in wages and rules and the "contracting out" practice to down tools. It failed in that the Brotherhood of Maintenance of Way Men and Shop Laborers declined to authorize a strike of the 400,000 men under its jurisdiction as did the International Brotherhood of Signalmen with 16,000 members. The Brotherhood of Clerks and Freight Handlers struck only in spots. This left the burden to be carried by the machinists, blacksmiths, boilermakers, sheet metal workers, electricians and carmen who quit generally on July 1 and the stationary firemen who officially went on strike ten days later. The shops of practically every road in the country were crippled and the movement of trains was made difficult by the walkout of car inspectors, but with reserve rolling stock, and the drafting of men from supervisory and other forces, the roads maintained fairly close schedules while rebuilding

their forces. Only in the West and South were any considerable number of trains cancelled.

The strike leaders had not counted on an early victory. On the contrary, they told their followers and the public it would be a matter of weeks before the breaking down of rolling stock would compel the executives to surrender. Stated otherwise, they hoped to win by a process of attrition. It soon became apparent, however, that the roads were more than holding their own and rebuilding their forces and, abandoning their demands, the strike leaders on July 14 proposed to send the strikers back to work, conditional on their being given their old places and seniority ratings, the Labor Board to give re-hearings on all matters in dispute. The proposal was rejected by the roads, acting through Mr. Cuyler. They insisted that all strikers must return as new men and juniors to (a) those who remained at work and (b) men employed after July 1 and lose the preference as to class of work to be done, hours of duty, etc., that was theirs prior to the strike by reason of long service.

The next move for peace came when the President called both sides to the White House for conferences. Out of this grew a proposal, accepted by the unions, but rejected by the Association of Railway Executives that in effect was restoration of the status quo ante, with the strikers retaining all seniority rights. Following this, the "Big Four" brotherhoods sought to make peace at conferences in New York City, but nothing resulted. Eventually, on September 23, an agreement was reached on what has come to be known as the Willard-Jewell plan between the unions and roads that had been unable for one reason or another to rebuild their forces to their entire satisfaction.

## THE WILLARD-JEWELL PLAN.

This agreement as published in a special circular by the Railway Department of the American Federation of Labor, dated Chicago, September 14, was in the form of a memorandum reading as follows:

"1. In order to bring to an end the existing strike of employees upon the undersigned railroads and relieve the country from the adverse effects thereof and to expedite the movement of essential traffic, the following memorandum of agreement is made upon the understanding, which the parties hereto accept, that the terms hereof shall be carried out by the officers of the companies and the representatives of the employees in a spirit of conciliation and sincere purpose to effect a genuine settlement of the matters in controversy referred to below. This paragraph does not apply to or include strikes in effect prior to July 1, 1922.

"2. All men to return to work in positions of the class they originally held on June 30, 1922, and at the same point. As many of such men as possible are to be immediately put to work, at present rates of pay, and all such employees who have been on strike be put to work or under pay not later than thirty days after the signing of this agreement, except such men as have been proved guilty of acts of violence which in the opinion of the commission, hereinafter provided for, shall be sufficient cause for dismissal from service.

"3. The relative standing as between themselves, of men returning to work and men laid off, furloughed or on leave of absence, including General Chairmen and others who were as of June 30, 1922, properly on leave of absence, will be restored as of June 30, 1922, and they will be called back to work in that order.

"4. If a dispute arises as to the relative standing of an employee or if any other controversy arises growing out of the strike that cannot be otherwise adjusted by the carrier and said employee or the duly authorized representatives thereof, the matter shall be referred by the organization, parties to this agreement, the employees or the carrier in the interest of any employee who may be aggrieved, to a commission to be established and constituted, as hereinafter provided, for final decision by a majority vote.

"5. The commission referred to in paragraph 4 hereof shall be composed of six representatives to be named by the chief officers of the organization parties hereto and six railroad officers or representatives selected from and by the railroads agreeing hereto. This commission shall be constituted within fifteen days from the signing of this agreement and shall have jurisdiction to decide all cases that may properly be referred to it on or before May 31, 1923, but not thereafter.

"6. Inasmuch as this agreement is reached for the purpose of composing in a spirit of compromise this controversy, all parties hereto agree that neither this settlement nor any decision of the commission above provided for shall be used or cited in any controversy between these parties or between the railroads signing the same or any other class or classes of their employees in any other controversy that may hereafter arise.

"7. Both parties pledge themselves that no intimidation nor oppression shall be practised or permitted against any of the employees who have remained at work or have taken service or as against those who resume work under this understanding.

"8. All suits at law now pending as the result of the strike to be withdrawn and cancelled by both parties."

Under this it will be noticed that the unions abandoned the claim to seniority save "as between themselves" and the earlier position that any settlement would have to be on a national basis. The process of settlement with individual roads is still under way up to Nov. 15, 1922, though so far as any visible effect on transportation the strike, still on officially, ceased in late summer.

## HEAVY COST OF THE STRIKE.

The cost of the strike to the railroads has been estimated at $150,000,000. Through it they succeeded, on many of the more important roads, in loosening, if not entirely breaking the hold of the unions upon their shop employees and by the formation of new associations, or company unions, have in some instances paved the way to escape from the remaining provisions of the national agreements by amending or deleting rules held by them to be onerous, such as that forbidding piece work, and rid their payrolls of men who for one reason or another were objectionable.

The cost to the strikers in wages is estimated by the Labor Board at $177,535,524. It also cost many thousands of them positions earned by long service, and it cost the unions in membership.

Against these losses, the union leaders balance the claim that by striking they checked further reductions in wages which, they assert, were due after January 1. The further claim is made by them that though the loss in membership may be considerable it is small as compared with what would have resulted from a policy of non-resistance, and that it will be much easier to rebuild the membership than it would be had the membership been allowed to shrink because of apparent unwillingness to strike no matter how serious the grievances might appear to the rank and file. In these contentions experts in trade union matters not connected with the shopmen are inclined to agree while questioning the strategy of calling a strike at a time when the executives of important roads were prepared and not altogether unwilling for a test of strength. In this criticism, however, the value of hindsight over foresight is once more apparent.

Compared with other great railroad strikes, such as that of 1877 or the Debs American Railway Union strike of 1894, the strike was remarkably free from violence. At such places as Bloomington and Aurora, Illinois, and Denison, Texas, there was much disorder, necessitating the use of United States Marshals and militia. In New York, State troopers were used at several points. Charges, as yet unsustained so far as the public record goes, as this is written, were made of deliberate wrecking of trains and the killing of employees and passengers. Disorders, however, were by no means general, and, as measured by previous industrial disputes, rarely serious, the one thing that more than anything else alienated public opinion being the desertion of trains by their crews at isolated points, particularly in the great western desert.

## DAUGHERTY'S STRIKE INJUNCTION.

This fact, however, did not prevent Attorney General Harry M. Daugherty applying to the United States District Court in Chicago on September 1, when the strike was practically over, for a blanket injunction restraining the strike leaders, their associates and members from further interfering with transportation and, among other things, forbidding picketing, publication by advertisements or in the form of interviews of anything calculated to prolong the strike or interfere with traffic. In many respects it was the most sweeping order ever asked for in a labor dispute. Over the bitter protest of the unions, Judge Wilkerson issued the order requested by the Attorney General, which remains in force pending review by higher courts.

Because of this, an effort was made to impeach Mr. Daugherty in the House of Representatives, the Committee on Judiciary, to which it was referred, tabling the resolution by a party vote. Since then Mr. Daugherty has declared he will welcome a thorough investigation.

The promise made to the Brotherhood of Maintenance of Way men of a re-hearing of their case, a large if not the chief factor in keeping that group out of the strike, was kept by the Railroad Labor Board, which in October granted an increase of two cents an hour over the July 1 scale, making the minimum for this class of labor 25 cents an hour.

in making this award the board estimated that it added $20,000,000 to the annual wage bill of the roads, and that through remaining at work during the strike, the men received "about $147,656,866 which they would have lost."

Within the labor organizations the most important development of the year was the announcement of William G. Lee that hereafter the "Big Four" brotherhood will not function as a whole, the trainmen and conductors' organizations working as one unit and leaving the engineers and firemen, with the Switchmen's Union of North America, a rival of the trainmen, to work as another unit. This split, really in effect for over a year, had its beginning in 1918 in Lee's refusal to stand back of the now almost forgotten Plumb plan.

In the American Federation of Labor, the most important move was the drive launched at the Cincinnati convention for an amendment to the Constitution abrogating the power of Federal and State Supreme Courts to nullify acts of Congress or Legislatures by holding them to be unconstitutional.

## FEDERAL UNEMPLOYMENT

Proposals for the prevention of future unemployment crises and for the reduction of the normal number of workless men in the country were put forth by Secretary of Labor James J. Davis in his annual report. He said:

"Less than a year ago it was estimated that between five and six million workers were without jobs. We were in the throes of one of the greatest industrial depressions we had ever known. There was a grave danger that the mere operation of the law of supply and demand would force a drastic rearrangement of wages which would seriously depress our standard of living and radically alter our whole economic structure. The Nation fought its way through this period of unemployment, and today the demand for labor practically equals the supply. We are back at normal in our employment. But we have made the startling discovery that normal in America means that approximately a million and a half workmen are detached from any payroll.

"Here we have two problems to meet—to prevent a recurrence of the employment depression which threw between five and six million men into idleness and to reduce the number of our workingmen who are daily without means of livelihood.

"We have a powerful agency in meeting both of these problems in the United States Employment Service, which, fully organized and equipped, would have its finger at all times upon the pulse of the labor supply and demand of the country. The past year this service, with its co-operating agencies, proved its effectiveness. It listed between 2,500,000 workers seeking employment, and placed nearly 1,500,000 of them in jobs without expense to the worker or employer. . . .

"The lesson of the past year seems to be not so much a problem of an actual dearth of employment but rather one of inability of the American workmen to adjust themselves to changing circumstances. I would urge upon every idle workman that when there is inactivity in his trade he use every effort to adapt himself to some other line of work. Manifestly, the skilled workman can, if he will, do work of some other kind, but my experience has been that too often when idleness is forced upon him he rejects the thought of other employment for one or more of several reasons: He may not be able to secure as high wages in other employment; he may be under the impression that the secondary employment will lose him prestige in his primary occupation."

The Secretary, after reviewing the work of the conciliation service, said:

"The limitations of appropriations have made it impossible for me to work out some plans which I hope I may have the opportunity to work out during my term of office. I believe with the creation of an organization such as I have in mind and with an appropriation of approximately $1,000,000 per year, this gradually to be increased with the growth of industry, practically every labor controversy can be adjusted and nearly every strike can be avoided.

"When the conciliation service began its work, 70 per cent. of the disputes in which its intervention was sought had already reached the strike stage. Recently conditions have so improved and the services of the department have been so generally recognized that less than 30 per cent. of the cases before the service have reached the point where work was suspended. . . .

"The success of the conciliation methods of the department is adequately demonstrated by the record of disputes in which the good offices of the department, through commissioners of conciliation, have been used, from the beginning of the present Administration, March 4, 1921, to June 30, 1922, a period of sixteen months. In that time a few more than 500 cases of strikes and threatened strikes and lockouts have been acted upon by department officials. Three hundred and forty-five cases were satisfactorily adjusted by the commissioners of conciliation, fifty-nine were adjusted by the commissioners of conciliation in co-operation with local officials and agencies, and thirty-nine cases were pending or in the process of adjustment. The period of industrial readjustment through which the country has been passing made the settlement of industrial disputes more difficult, but despite that fact nearly 90 per cent. of the controversies in which the department used its good offices were equitably and satisfactorily adjusted. Without doubt these settlements did much to aid in the stabilizing of the generally disturbed industrial situation. Nearly a million and a half workers were involved in the disputes under consideration."

## THE HERRIN MINE KILLINGS.

The Special Grand Jury of Williamson County, Illinois, which investigated the massacre of coal miners in Herrin, Illinois, made its final report Sept. 23, 1922. It returned 214 indictments against seventy-four men: for murder, forty-four; for conspiracy to murder, fifty-eight; for rioting, fifty-eight; and for assault with intent to murder, fifty-four.

The trials began on November 13. It took one month and the examination of 220 talesmen to secure a jury, which was filled on December 8. The opening speeches were made December 13, and the trial was in progress as this Almanac went to press.

The miners' union has raised a fund which will be used for the defense of union men who have been indicted. The union refused to co-operate in any way with the Grand Jury.

Of the seventy-four men under indictment, fifty-five were at once arrested and admitted to bail furnished in a blanket bail bond by prominent citizens of the locality of the State where the massacre took place.

### TEXT OF THE REPORT.

The text of the Grand Jury's report follows:

"We, the special Grand Jury of Williamson County, empanelled to make an investigation of the crimes committed in and about the strip mine near and in about Herrin on Wednesday and Thursday, June 21 and 22, 1922, and heedful of the instructions given by Your Honor to make a thorough investigation of the facts and circumstances, with a view of fixing the responsibility of the killing of some twenty-four persons and the wounding of many others, beg to report that we have examined approximately 300 witnesses, and from their testimony learned these conditions:

"About the middle of June of this year, after suspension of the coal industry as the result of a strike of the United Mine Workers of America, the Southern Illinois Coal Company decided to operate a strip mine owned by it and located about midway between Marion and Herrin. The miners apparently raised no objections to the mining of coal by the use of steam shovels, but when the company began to ship there was bitter resentment on the part of the miners.

"The coal company aggravated this resentment by employing armed guards and closing the public established highways traversing the mine property and treating as trespassers citizens attempting to use the accustomed highways.

"The flaunting of arms in a community devoted almost exclusively to mining was conducive to strife. It was a challenge certain to be accepted, and for four or five days preceding the tragedy it was known by the authorities that a conflict was inevitable.

"The State Administration showed it undoubtedly realized the acute situation by sending to Williamson County Colonel Hunter of the Adjutant General's staff. This representative of the State testified that he recognized upon his arrival in Marion the imminence of a conflict, and immediately asked the Adjutant General to send State troops to protect property and conserve the peace. This request Colonel Hunter renewed several times before the actual conflict, and was invariably asked by the Adjutant General of Illinois if the Sheriff of Williamson County had asked for troops.

"The Adjutant General denied his authority to order them into Williamson County except upon the Sheriff's request, which, as Your Honor knows, is not the law.

COUNTY SHERIFF A UNION MAN.

"Melvin Thaxton, the Sheriff of Williamson County, is the holder of a card in the miners' union and a candidate for County Treasurer at the forthcoming election.

"Either because of loyalty to the union or from fear for his candidacy the Sheriff would make no demands for troops nor did he take adequate measures to preserve the peace.

"From the evidence heard, the attack of June 21 upon the men employed at the strip mine was the result of a conspiracy which had been several days in the perfecting, the object of which was the closing of the strip mine. Sheriff Thaxton could not have been unaware of the developments of this plan.

"On Monday, June 19, State Senator W. A. Sneed, District President of the United Mine Workers of this district, received from John L. Lewis, President of the United Mine Workers of America, a telegram as follows:

William Sneed, President Sub-District 10, District 13, United Mine Workers of America, Herrin, Ill.:

Your wire 18th. Steam Shovel Men's Union was suspended from affiliation with American Federation of Labor some years ago. It was ordered suspended from the mining department of the A. F. of L. at the Atlantic City convention.

We now find that this outlaw organization is permitting its members to act as strikebreakers at numerous pits in Ohio. This organization is furnishing steam shovel engineers to work under armed guards under no agreement which exists by and between this organization and the mining department or any branch of the A. F. of L. permitting them to work under such circumstances.

We have through representatives officially taken this question up with the officers of the Steam Shovel Men's Union and have failed to secure any satisfaction.

Representatives of our organization are justified in treating this crowd as an outlaw organization and in viewing its members in the same light as they do any other common strikebreaker. JOHN L. LEWIS.

"A copy of this telegram was posted and read in various places. Following the publication of the telegram from President Lewis preparations for an attack upon the mine were made. The hardwares in all the cities of Williamson County were searched for firearms. The weapons were either taken by force or upon a verbal assurance that the local would pay for hem.

"The men working at the strip mine were evidently ignorant of being strikebreakers. The men operating the steam shovel were affiliated with a union, even though unrecognized by the A. F. of L.

"The guards were told they were to protect valuable machinery and did not wake to the real situation until noon of June 21, when bullets were flying in the mine in such volume as to compel them to take refuge in the office and to seek safety under the steel railroad cars on the strip mine property.

"Superintendent McDowell telephoned a number of times to Colonel Hunter for protection and was invariably informed by the latter that the Sheriff could not be found. Finally Colonel Hunter suggested a flag of truce, which was displayed by the mine defenders, but caused no abatement of the fire.

"In the evening of June 21, upon the return to Marion of Sheriff Thaxton, a conference was held between the Sheriff, Colonel Hunter and officers of the miners' union, at which it was stated that the officials of the coal company were willing to discontinue the operation of the strip mine and the union officials were willing that the workmen employed there should be permitted to depart in safety. The substance of this agreement was transmitted to Superintendent McDowell at the strip mine.

ATTACK ON THE MINE.

"Nevertheless at the break of day the following morning firing began in a severe volume, the attacking party having crept up in the cover of the darkness. They were checked sufficiently to permit of a parley, and after a time a spokesman for the strip mine workers asked to speak to the leader.

"A long range conversation was held and it was agreed by the spokesman of the attacking party that safe conduct would be accorded the men if they laid down their arms and marched out with hands up.

"This was done and from behind the earth embankments created by the shovel operators came a great number of unarmed men and more from the surrounding hills until the forty-seven surrendering men were surrounded by the many hundreds of men mostly armed.

"The captive men were marched down the road toward Herrin in double file. After they had marched about one mile Superintendent McDowell, being crippled and unable to keep up with the procession, was taken by members of the mob and shot to death. The remainder of the captives were marched on the public road and were stopped at the power house of the interurban railroad, about three miles from Herrin. Here a change in the leadership took place and the man who had guaranteed the safety of the men who had surrendered was deposed and another leader installed.

"The new commander ordered the captive men to march into the woods adjacent to and around the power house. Here the new leaders directed that only those in the crowd who had guns should follow into the woods, and those who were unarmed should remain without.

"The surrendered men were then marched some 200 yards back of the power house to the vicinity of a barbed wire fence, where they were told they would be given a chance to run for their lives under fire.

"The firing began immediately, and thirteen of the forty-seven non-union men were killed and most of the others severely wounded.

"The mob pursued those who had escaped and two were hung to trees, six were tied together with a rope about their necks and marched through the streets of Herrin to an adjacent cemetery, where they were shot by the mob and the throats of three were cut. One of six survived.

ATROCITIES AND CRUELTIES.

"The atrocities and cruelties of the murders are beyond the power of words to describe. A mob is always cowardly, but the savagery of this mob in its relentless brutality is almost unbelievable. The indignities heaped upon the dead did not end until the bodies were interred in unknown graves.

"On the first day of attack upon the mine two union miners were killed by answering shots from the men in the strip mine and another so seriously injured as to die subsequently from his wounds.

"It has been difficult for this Grand Jury to determine who fired the shots from the strip mine which caused the deaths of the union miners. When asked to present evidence to the Grand Jury which would tend to fix the responsibility, counsel for the miners' union announced that they would lend no aid to the Grand Jury.

"The Grand Jury has made no attempt to determine the equities between the operators and the miners in the strike controversy. It has had but the sole thought of bringing to the bar of justice the persons who committed the crimes which have brought such universal criticism upon the people of Williamson County.

"Without discrimination, we feel keenly the horror of the tragedy. We protest, however, against the intimation that all the people of Williamson County are lawless and un-American. The development of the mining industry in Williamson County and the surrounding counties has tremendously increased the population within the last decade.

"All of the adjoining counties contributed their quota of marauders, and the entire shame of the inhuman murders should not rest upon Williamson County alone.

"It is true the electorate of the county is responsible for those of its supine, weak and cowardly officials who permitted the disorders to grow from the desultory rioting into a hideous massacre. Those evils can be corrected by the great majority of the population who believe in law and order asserting themselves and no longer consenting to be intimidated by a disorderly minority.

PUBLIC OFFICIALS CULPABLE.

"The Adjutant General's office and the Sheriff's office alternated in passing responsibility, with neither taking decisive action to prevent disorders and protect property.

"The ease with which firearms were obtained causes the Grand Jury to believe that legislation should be enacted to regulate or prohibit the manufacture or indiscriminate sale of firearms.

"We condemn the laxity of the local police in the various cities wherein stores were looted for firearms without interference by them.

"We commend the State's Attorney of Williamson County, Delos Duty, for his courage and fidelity to his oath of office, and we express our gratitude to the Attorney General of Illinois, and his efficient assistants, who have greatly facilitated the great task confronting the Grand Jury.

"In concluding this report the Grand Jury begs leave to state that it has indicted some forty persons for murder, fifty-eight for conspiracy to commit murder fifty-eight for rioting and five for assault to murder, and your jury asks leave for a recess of thirty days for the purpose of completing its labors.

"The Grand Jury is deeply grateful to the many representative law abiding citizens of Williamson County for their assistance and encouragement in its efforts to enforce the law fearlessly and impartially."

## BRITISH LABOR PARTY'S PLATFORM.

The British Labor Party won 142 seats in the British Parliamentary election of November 15; the poll returning 344 Conservatives, 142 Laborites, 60 Independent Liberals, 57 Lloyd George Liberals, and 12 others. Its parliamentary leader, J. Ramsay Macdonald, is leader of the opposition in the House of Commons.

The National Executive of the Labor Party on October 25 issued the following manifesto, which sets out the official policy of Labor for the general election. The manifesto is signed by all the members of the Labor Party Executive Committee:

The Coalition has been destroyed and a Conservative Government has been formed to carry out a policy of naked reaction. Labor is appealing to the men and women of the country on a policy of international peace and national reconstruction.

Revision of the peace treaties, which have caused greater international wrongs than they removed, is the first step to peace.

German reparations must be brought within Germany's capacity to pay.

Turkey's relations with Europe and the freedom of the straits can only be dealt with in an international conference attended by representatives of all countries concerned.

Labor is working for an all-inclusive League of Nations, with power to deal with international disputes by methods of judicial arbitration and conciliation. Through the League of Nations an agreement can be reached for a limitation of armaments with general disarmament as the goal.

Labor advocates the recognition of the real independence of Egypt and self-government for India.

Labor demands the prompt and cordial acceptance of the new Constitution of the Irish Free State, and supports every effort to make Ireland united, prosperous and contented.

Labor recognizes the urgent need of lifting from the trade and industry of the country the deadweight burden of the national debt. It therefore proposes the creation of a war debt redemption fund by a special graduated levy on fortunes exceeding £5,000.

Labor will not penalize thrift, but will require some restitution from the profiteers out of the huge fortunes made in the war.

To secure the necessary annual revenue Labor advocates a system of taxation which will distribute the burden fairly according to "ability to pay."

It proposes an increase of the death duties on large estates and of the supertax on large incomes. Incomes below £250 a year would be exempt from taxation, and there would be a reduction in the tax on all incomes under £500 a year, with a steeper graduation of the scale above that limit.

Taxation of land values will secure to the community socially created wealth now diverted to private hands.

Labor is in principle opposed to indirect taxation. It stands for an untaxed breakfast table and wishes to free trade and industry from all burdensome imposts, whether customs, excise, or stamp duties.

Labor attaches the utmost importance to economy in the public administration. But we do not believe in starving the public services. Least of all do we countenance the notion of economies at the expense of the poor for the benefit of the rich. Reduced expenditure on the children's education and health, the safety of the workers, and the well-being of mothers and babies is the costliest kind of waste.

By a revision of the national grants-in-aid to local authorities we believe an equitable reduction of rates in all the severely pressed districts can be secured.

Unemployment and low wages caused largely by the policy of the Liberal and Unionist Government have brought distress to the bulk of the working people. Labor's policy is to provide work or maintenance for the unemployed by reopening trade with foreign countries, by the national organization of production, and by a large program of necessary and useful public works.

The plight of agriculture can only be dealt with by a bold policy of reorganization. Those who produce the nation's food must not go hungry. Labor proposes to require the landlords to sacrifice rents rather than to ask the farm workers to accept starvation wages. We advocate the restoration of the Agricultural Wages Board to enforce an adequate national wage standard. We propose also the establishment of representative Councils of Agriculture to promote all-round improvement in the use of the land, the reduction of transport charges, the development of co-operative methods and the fostering of rural industries.

Revision of the game laws, improved school facilities, more and better cottages, increased hospital accommodation, and fuller opportunities of recreation are included in Labor's rural policy.

Labor is resolved to change as speedily as possible by constructive measures the social and economic system which confers unfair privileges on the few and undeserved hardship on the many.

The working of this system has brought unemployment and reduced wages to the workers, suffering and starvation to their families, loss of opportunities for full mental and physical development to their children, anxiety and worry to the salaried and professional workers and small traders.

Labor means to bring about a more equitable distribution of the wealth produced by the common effort of the workers by hand and brain.

Our industrial policy involves the prompt nationalization of mines as recommended by the Sankey Commission, and the nationalization of railways, with an increased share of control for the workers, an improved Workmen's Compensation Act, and other measures for the protection of the workpeople.

We oppose all attempts to interfere with the Trade Boards.

Our social program includes a national scheme of housing which will end the scandal of a homeless population and replace the slums by decent homes.

More generous provision for the old-age pensioners has been one of Labor's constant demands, and is one we shall continue to press. We shall also urge the removal of the present unjust deductions from old-age pensioners where friendly society or trade union benefits or small savings exist, whereby thrift is at present penalized.

We stand for the complete supersession of the Poor Law and the institution of a system of pensions for widowed mothers.

Labor will strive to stop the continual attempts now being made to cut off or cut down the ex-service men's pensions. It demands the conversion of conditional into permanent pensions, and it will resist all attempts to transfer the mentally or physically infirm to the Poor Law. In our view the rule to be applied by the Pensions Ministry throughout its administration should be "Fit for service, fit for pension."

The Labor Party has always declared its opposition to measures which increase the power of the wealthier classes to frustrate the people's will. The Parliament Act must stand, and there must be no restoration of the Lords' veto.

Our policy is to remove all existing disabilities affecting women as citizens, voters and workers. Adult suffrage, reform of Parliamentary procedure, and control of Ministers by the House of Commons are included in our program to make the people's will effective by constitutional means.

In accordance with these democratic principles Labor must stand for the control of the liquor traffic according to the people's will.

The task of Government is to raise the standard of life and labor for those whose work of hand and brain increases the nation's wealth. Parliaments have in the past been too much concerned to protect the privileges and extend the power of the rich. Labor wants to increase the happiness and prosperity of the poor by better housing, better schooling, better living, better health, more leisure, more freedom, more opportunities for enjoying the good things of life.

We shall defend the school as we defend the home and we aim at providing the rising generation with full protection from harmful and degrading moral and social conditions.

Labor's program is the best bulwark against violent upheaval and class wars. Democratic government can be made effective in this country without bloodshed or violence. Labor's policy is to bring about a more equitable distribution of the nation's wealth by constitutional means. This is neither Bolshevism nor Communism, but common sense and justice.

This is Labor's alternative to reaction and revolution.

An analysis of the popular vote in the election shows that 13,643,000 votes were cast out of a possible 20,000,000, or approximately 68 per cent. Before the advent of Woman Suffrage the total electorate was 12,000,000 in round numbers, which was increased by approximately 8,000,000 women's votes.

The popular vote by parties was as follows: Conservatives, 5,378,634; Labor, 4,232,739; Asquithian Liberals, 2,614,761; Georgian Liberals, 1,572,204; all others, 343,870. These figures are for the contested seats only, which numbered 547, as 68 seats were uncontested, with an electoral poll of about 500 000. Thus the Conservatives are really a minority Government.

## COMPARATIVE WHOLESALE PRICES OF COMMODITIES.

THE following data from "Bradstreet's Journal" show ruling prices on November 1 for commodities:

| COMMODITIES. | 1922. | 1921. | 1920. | 1917. | 1915. | 1913. |
|---|---|---|---|---|---|---|
| FOODSTUFFS, ETC. | | | | | | |
| Wheat, No. 2, red Winter, in elevator, per bu. | $1.3725 | $1.335 | $2.38 | $2.27 | $1.25 | $0.98 |
| Corn, No. 2, mixed, in elevator, per bush. | .845 | .61 | 1.33 | 2.15 | .76 | .80 |
| Oats, in elevator, per bush. | .55 | .47 | .66 | .65 | .415 | .445 |
| Barley, No. 2 (Milwaukee), per bush. | .65 | .69 | 1.07 | 1.44 | .64 | .79 |
| Rye, Western, per bush. | .98 | 1.05 | 1.99 | 1.98 | 1.08 | .70 |
| Flour, straight Winter, per barrel | 5.75 | 6.00 | 10.50 | 10.75 | 5.20 | 4.15 |
| Beeves, best, native steers (Chic.), per 100 lbs. | 12.50 | 9.75 | 17.25 | 17.65 | 10.30 | 9.70 |
| Sheep, prime (Chic.), per 100 lbs. | 7.00 | 4.25 | 7.50 | 12.50 | 6.50 | 5.15 |
| Hogs, prime (Chic.), per 100 lbs. | 8.05 | 7.20 | 15.10 | 19.50 | 7.50 | 8.00 |
| Milk (New York), per quart | .125 | .1225 | .131 | .10 | .06 | .0505 |
| Eggs, State, fresh (New York), per dozen | .54 | .50 | .72 | .46 | .35 | .38 |
| Beef, family, per barrel | 15.00 | 15.00 | 25.00 | 32.00 | 18.00 | 19.00 |
| Pork, new mess, per barrel | 29.00 | 25.00 | 31.00 | 48.50 | 17.00 | 23.25 |
| Bacon, short ribs, smoked (Chic.), per lb. | .1375 | .10 | .20 | .30 | .11875 | .1250 |
| Hams, smoked, per lb. | .22 | .25 | .37 | .29 | .17 | .16 |
| Lard, Western steam, per lb. | .11 | .1025 | .1975 | .25 | .0915 | .1070 |
| Butter, creamery, State, best, per lb. | .50 | .45 | .615 | .4625 | .2875 | .32 |
| Cheese, choice East factory, per lb. | .265 | .22 | .285 | .2625 | .1575 | .155 |
| Mackerel, No. 1, bays (Boston), per barrel | 32.00 | 25.00 | 25.00 | 27.00 | 21.00 | 22.00 |
| Codfish, large dried, per quintal | 11.00 | 14.00 | 14.00 | 10.50 | 8.00 | 8.00 |
| Coffee, Rio, No. 7, per lb. | .1075 | .0825 | .0775 | .08625 | .07 | .1075 |
| Sugar, granulated, per lb. | .07 | .055 | .13 | .084 | .0515 | .0435 |
| Tea, Formosa Oolong, superior, per lb. | .25 | .19 | .20 | .28 | .185 | .17 |
| Molasses, New Orleans, prime, per gallon | .57 | .30 | .95 | .53 | .40 | .35 |
| Salt, fine domestic, sacks, 224 pounds | 1.59 | 1.87 | 2.27 | 1.42 | 1.10 | 1.08 |
| Rice, domestic, good, per lb. | .0725 | .0675 | .13 | .095 | .05875 | .065 |
| Beans (New York), choice marrow, per 100 lbs. | 7.00 | 6.00 | 10.50 | 14.25 | 8.25 | 5.35 |
| Peas, choice (New York), per 100 lbs. | 6.50 | 5.50 | 10.00 | 10.00 | 4.95 | 3.00 |
| Potatoes, Eastern, per 180 lbs. | 2.75 | 4.25 | 3.50 | 4.00 | 2.50 | 2.10 |
| Apples (State), per barrel | 5.00 | 5.00 | 4.25 | 2.50 | 2.50 | 2.50 |
| Lemons, choice, per box, 300s | 8.00 | 6.00 | 2.00 | 10.50 | 4.00 | 5.50 |
| Raisins, layer, per lb. | .13 | .165 | .245 | .095 | .085 | .0725 |
| HIDES, LEATHER, TEXTILES. | | | | | | |
| Native steer hides, No. 1, per lb. | .225 | .145 | .27 | .335 | .26 | .1975 |
| Hemlock, packer, middleweight, No. 1, per lb. | .35 | .34 | .52 | .50 | .34 | .31 |
| Cotton, middling uplands, per lb. | .247 | .211 | .25 | .2525 | .1195 | .1410 |
| Wool, Ohio & Pa. X, washed (Boston), per lb. | .57 | .345 | .65 | .75 | .30 | .23 |
| Silk, best No. 1, filature, per lb. | 8.40 | 6.05 | 6.45 | 6.10 | 3.75 | 3.875 |
| Print cloths, 64s (Boston), per yard | .08 | .065 | .10 | .075 | .03625 | .04 |
| Standard sheetings (Boston), per yard | .15 | .13 | .20 | .15 | .0750 | .0825 |
| METALS, COAL, OILS. | | | | | | |
| Iron ore, old range, Bess'r, hematite, per ton | 5.95 | 6.45 | 7.45 | 5.95 | 3.75 | 4.40 |
| Pig, No. 1, foundry, Eastern (N. Y.), per ton | 34.27 | 24.52 | 55.52 | 33.00 | 16.75 | 16.13 |
| Steel billets, Bessemer (Pittsburgh), per ton | 40.00 | 29.00 | 55.00 | 60.00 | 25.00 | 22.00 |
| Steel rails, Standard (Pittsburgh), per ton | 43.00 | 45.00 | 55.00 | 38.00 | 28.00 | 28.00 |
| Tin plate, American (Pittsburgh), per 100 lbs. | 4.75 | 5.25 | 9.00 | 12.00 | 3.10 | 3.40 |
| Steel beams (Pittsburgh), per ton | 44.80 | 35.84 | 69.44 | 89.60 | 26.00 | 27.00 |
| Silver, commercial bars (N. Y.), per ounce | .9925 | .9925 | .995 | .9075 | .49625 | .59625 |
| Copper, Electrolytic (N. Y.), per lb. | .13625 | .125 | .185 | .2350 | .178751 | .1650 |
| Lead, pig, Western (New York), per lb. | .068 | .047 | .0775 | .0795 | .0490 | .043375 |
| Tin, pig, spot (New York), per lb. | .37 | .2675 | .435 | .6055 | .35875 | .40 |
| Quicksilver (San Fran.), per flask, 75 lbs. | 71.00 | 38.00 | 72.00 | 105.00 | 95.00 | 38.50 |
| Anthracite, stove sizes (New York), per ton | 10.35 | 10.56 | 10.46 | 6.175 | 5.35 | 5.25 |
| Bituminous (Pitts.), f. o. b. Chic., per ton | 8.50 | 6.75 | 7.60 | 4.10 | 3.40 | 3.55 |
| Connellsville coke, per short ton, f. o. b. | 7.50 | 3.25 | 16.50 | 6.00 | 2.60 | 1.90 |
| Petroleum, crude, in barrels (N.Y.), per barrel | 3.00 | 2.50 | 6.10 | 3.50 | 1.80 | 2.50 |
| Petroleum, refined, in cases, per gallon | .15 | .13 | .19 | .0865 | .0775 | .0875 |
| Cottonseed, crude, prime (N. Y.), per lb. | .075 | .0775 | .095 | .1715 | .0765 | .0694 |
| NAVAL STORES AND BUILDING MATERIALS. | | | | | | |
| Rosin, good strained (Savannah), per barrel | 6.80 | 3.80 | 11.40 | 6.00 | 4.40 | 3.60 |
| Turpentine, machine, reg. (Savannah), per gal. | 1.555 | .6725 | 1.275 | .45 | .505 | .42 |
| Tar, regular (Wilmington, N. C.), per barrel | 2.89 | 2.60 | 4.50 | 3.50 | 2.00 | 2.20 |
| Brick, Hudson River, hard, per M. | 15.00 | 15.00 | 18.00 | 8.00 | 6.50 | 6.00 |
| Lime, Eastern common, per barrel | 3.75 | 3.63 | 5.20 | 1.90 | 1.20 | .92 |
| Cement, dom. (Portland), spot, per barrel | 3.20 | 2.50 | 4.10 | 2.12 | 1.67 | ..... |
| Nails, wire, from store, base price, per keg | 2.70 | 2.90 | 4.25 | 4.00 | 1.90 | 1.90 |

| 1915.... | 101 | 101 | 96 | 100 | 97 | 93 | 99 | 93 | 99 | 126 | 89 | 120 | 101 |
| 1916.... | 108 | 107 | 108 | 106 | 109 | 111 | 109 | 103 | 102 | 135 | 159 | 146 | 114 |
| 1917.... | 124 | 126 | 152 | 152 | 142 | 175 | 139 | 127 | 125 | 211 | 253 | 169 | 146 |
| 1918.... | 153 | 155 | 186 | 196 | 178 | 211 | 165 | 151 | 156 | 203 | 188 | 176 | 168 |
| 1919.... | 164 | 164 | 201 | 205 | 209 | 134 | 182 | 177 | 174 | 218 | 224 | 205 | 186 |
| 1920.... | 172 | 168 | 201 | 194 | 206 | 187 | 197 | 183 | 188 | 245 | 371 | 353 | 203 |
| 1921.... | 153 | 147 | 166 | 158 | 181 | 114 | 148 | 135 | 164 | 176 | 182 | 145 | 153 |

The yearly average index numbers for "all articles combined" in the above table includes also, round steak, chuck roast, plate beef, hens, cheese, bread, corn, rice, coffee, and tea. Figures since 1913 are based on 100 as the 1913 index number.

# Scientific Progress in 1922.

(Compiled by the National Geographic Society, Washington, D. C. Gilbert Grosvenor, President.)

*ARCHAEOLOGY AND PALEONTOLOGY.*

Neil M. Judd, Director of the National Geographic Society's Pueblo Bonito Expedition, continued his work in the exploration of prehistoric Pueblo Bonito, in Chaco Canyon, northwestern New Mexico, during the year 1922. About thirty-five secular rooms and five kivas, or ceremonial chambers, were added to the 1921 series of previously unexplored habitations, leaving approximately one-half of Pueblo Bonito yet to be excavated. A considerable collection of valuable antiquities was forwarded to the United States National Museum, and entirely unexpected data was gathered in relation to the culture sequence at this vast aboriginal village. In the 1921 World Almanac it was predicted that exploration of Pueblo Bonito would disclose evidence of immigration from other centres of ancient human activity. Such evidence has now been obtained and it bids fair to alter existing beliefs as to the commingling of prehistoric Pueblo peoples in that section of the southwest where their characteristic arts reached their highest form. The work shows that the ancient village was erected on a slight elevation, which has since been buried by shifting sand and the silt deposited by wandering flood waters during the uncounted centuries that have passed since abandonment of the stone-walled town.

The Field Museum of Natural History of Chicago sent an archaeological expedition to Panama and an ethnological one to the Malay Peninsula The former is attempting to trace the relationship between the Mayas and the Incas and the latter to study the origin and follow the migrations of the Malay and Negrite races. Another expedition under the auspices of the same institution sought fossil specimens in the Santa Cruz beds of Patagonia, in the Pampean formation of northern Argentina and amid the cave deposits of Brazil.

The American Museum of Natural History of New York put expeditions into the field in search of fossils in Snake Creek beds in Nebraska, in the Siwalik Hills of India, and in eastern Asia.

Excavations undertaken by the French on the site of ancient Carthage reveal three cities within twenty feet of the surface, the oldest that of Hannibal, the second that of the Caesars.

The Los Angeles Museum of History, Art and Science has assembled a complete skeleton of the sabre-toothed tiger which roamed the earth about 500,000 years ago. The bones were found in the La Brea pits in the city of Los Angeles.

Scientists of the Bishop Museum, Honolulu, who have been attempting, in conjunction with Yale University, to solve the mystery of the origin of the Hawaiian race, conducted work on the Island of Guam to ascertain whether the Polynesian civilization there was antecedent to the Polynesian migration to Hawaii and, if so, what other racial influences submerged the Polynesian culture now extinct in Guam, which fact forms the basis for the belief that the settlement of that island was prior to the migration to Hawaii. Evidences of the primitive Polynesian civilization were found in the similarity of war implements unearthed in Guam to those used subsequently by the Polynesians in Hawaii. Skulls found in Guam also bear a marked resemblance to those of Hawaiians.

In an effort to unearth the history of the great mammalian families which were cradled in Asia and eventually spread to the ends of the earth, and of whose beginnings little is known but that told by the few discovered fossils of India, China and Burma, the Chinese Geological Survey is engaged in a study of the fossil history of China and Mongolia, with the aid of Prof. C. P. Berkey of Columbia University and Walter Granger, of the American Museum of Natural History. At the same time the Geological Survey of India co-operated with Barnum Brown in the Siwalik Hills, in Bugti, and in Burma.

The Jewish Palestine Exploration Society undertook the work of excavating the site of the Acropolis of Tiberias and that of the Obelisk of Absalom on the Mount of Olives. It also was authorized to make soundings near the source of the Siloa, in the vicinity of the ruins of the Wall of Nehemiah.

Prof. W. F. Hover, of the University of South Dakota, excavated a number of mounds which point to the conclusion that the prehistoric mound-builders of the Mississippi Valley included that State within their domain.

Excavations at Civita Lavinia, the site of ancient Lanuvium, Italy, brought to light a fine Roman theatre.

One of the galleons of the Spanish Armada was discovered in the mud of Tobermory Bay, Scotland.

In excavations in Bologna, Italy, parts of an old Roman arena were discovered.

The base of what is believed to have been a statue of Pisistratus the Tyrant was found in Greece with the name of Endolos, the sculptor, still legible.

Dr. J. A. Mason, University of Chicago, located the ruins of what is thought to have been a great city on the Magdalena River, in Colombia.

On a brick dug up at Nippur is recorded the first loan definitely secured by collateral of which the world has knowledge. It was for thirty bushels of dates and pledged the borrower's field and fief estate.

A cave in the open veldt on the Zeerust Railway near Koster, South Africa, was discovered containing vast numbers of mummified birds and animals.

Harold J. Cook discovered a small molar tooth belonging to an anthropoid primate in the Pliocene beds of Snake Creek, Nebraska. It is evidently that of a primate hitherto unknown to paleontologists.

Excavations were continued by the Metropolitan Museum of Art's expedition to Egypt on the pyramid Amenemhat I., copying pictures in the ruins at Thebes was continued, and the tomb of Queen Aashait was further studied. She was small, stout and wore bobbed hair.

In Bone Cave, at the Broken Hill Mine, Rhodesia, a skull of pre-human type was found which seems to represent the transitional stage between the erect ape-man Pithecanthropus, discovered in Java, and the Neanderthal man. Other bones were also discovered, making one of the finest paleontological finds yet recorded.

Parts of a new Sauropod Dinosaur skeleton were found in the Ojo Alamo formations of New Mexico.

Excavations were carried on by the Italian Government at Rome, Ostia, and Pompeii. The latter particularly have yielded much valuable material.

The remains of a giant prehistoric armadillo of the tertiary period were unearthed forty-five feet under ground in the course of city works excavations in Rosario, Brazil.

Dr. William H. Holmes advanced the idea that Mayan culture is the outgrowth of Buddhist missionaries who, he thinks, reached American shores a thousand years before Columbus, and many years before Ericsson.

A Harvard expedition excavated the tombs of a series of Ethiopian queens. Some had their attendants buried with them. In one case 388 retainers appear to have been buried thus.

A fossil fish of Devonian times, perhaps four hundred million years old, was studied at the Field Museum. It came from the bottom of the primeval ocean where Leroy, New York, now stands. The brain, nerve canals, arterial canals and ear structure were well preserved.

*ASTRONOMY.*

Prof. A. A. Michelson, of Chicago University, in addition to his work on measuring stars, spent a part of the year testing some phases of the Einstein theory. In order to determine the matter of the deflection of the rays of light by the sun, Prof. Michelson is proposing to build a steel vacuum tube a mile long and a foot in diameter, and to despatch two rays of light in opposite directions, the one in the direction of the earth's rotation and the other opposite thereto. If they arrive at their respective goals in identically the same length of time the Einstein theory will have been shown to lack foundation in one of its vital aspects. Prof. Michelson also worked on the problem of the closer determination of the velocity of light. He hopes to measure this eventually with an accuracy down to one part in a million, in other words down to a fraction of a mile per second. He is now working on the immediate task of reducing the measurement of its velocity down to an error of not more than two miles per second. This will be of aid in triangulation work, the determination of distances between points, etc.

Approximately 2,000 hitherto unknown nebulae were discovered by Donald H. Menzel at the Harvard University at Arequipa, Peru. Of the 800 brightest, approximately a third appear to be spirals.

The 300,000 photographic plates made by the Harvard Astronomical Observatories over a period of a third of a century are now being used to determine the distance of the stars they record. This is done by studies of their spectra. With the nearer

stars, where parallax measurements are possible, the two methods check up admirably.

The Australian expedition for studying the total eclipse of the sun on Sept. 20 had fine weather and got splendid sets of photographs. The expeditions that chose Christmas Island as a base for observations failed, for, although they had travelled half way round the earth for the six minutes of totality, the clouds obscured the phenomena. The necessary work has not yet been done to determine whether the Einstein theory was supported or shown untenable by the eclipse.

Prof. W. W. Campbell, of Lick Observatory, succeeded in measuring the amount of curvature in a ray of light passing through a gravitational field through the study of a series of photographs of stars near the limb of the sun. His work is said to bear out the eclipse observations of 1919 and to confirm the Einstein theory. The bending of light waves in gravitational fields, the distortion of the oval orbits of the sun's planets and the shifting of the spectral lines toward the red end of the spectrum in the case of light coming from stars of appreciable mass were the things Einstein predicted would be found to take place if his theory were sound. Campbell has shown that the first takes place; others have proved that the second holds good in the case of Mercury, and work now being done tends to show that the spectral lines do shift toward the red in light coming from stars known to possess mass. Einstein is said to be drifting back toward the corpuscular as opposed to the wave theory of light.

Dr. Harlow Shapley, the new director of the Harvard Observatory, suggests that the changes of climate in the earth resulting now in glacial ages well down in the temperate zones and tropical ages in the polar regions were due to the passage of the solar system through dense dust clouds known as "coal sacks," such as exist in the constellation of Orion. This resulted in part of the heat of the sun being cut off. At other times it has passed through sections of space free from dust which let the sunlight through in all its intensity.

Dr. Hartmann, of La Plata Observatory, Argentina, announced the discovery of a new planet between the orbits of Mars and Jupiter. It is about fifteen and one-half miles in diameter.

After many years of drilling it was announced that the core of the Canon Diablo Meteor probably had been found. It has been estimated that the meteor may have been 1,500 feet in diameter. It is supposed to have displaced 1,000,000 tons of sandstone, thrown out 200,000 tons and uplifted 300,000,000 tons. The fragments found show 92% iron and nearly 8% nickel, with platinum and iridium present to the extent of ¾ ounce per ton.

Dr. C. G. Abbott, of the Astrophysical Observatory of the Smithsonian Institution, announced that he had developed a solar stove, consisting of a parabolic cylindrical mirror with a polished aluminum surface, which focuses the sun's rays on a tube of mineral oil, which in turn communicates the heat to two ovens in an iron reservoir containing two sealed ovens of the fireless cooker type. Dr. Abbott expressed the belief that in the fluctuations of the temperature of the sun, our weather is cooler when the sun is hotter, and hotter when the sun is cooler, this being due to a bombardment of electrons when the sun is hottest, which produces a cloud screen for the earth.

Prof. J. S. Plaskett announced the measurement of a spectroscopic binary star in which he found one of these celestial twins to be 75 times as heavy and 15,000 times as bright, and the other 63 times as heavy and 12,000 times as bright as our sun. They burn with a heat of about 30,000° Fahrenheit.

Ohio Wesleyan University is planning to install a 61-inch reflecting telescope to be used in teaching more than for research.

Lowell Observatory reported a huge white spot on Mars, covering 300,000 square miles of Martian territory.

### *BIOLOGY.*

The American Museum of Natural History had expeditions in Ecuador, South Australia, Peru, Eastern Brazil, British Guiana, the Dominican Republic, and elsewhere, studying animal life in its various phases and collecting specimens.

The Danish Deep Sea Expedition investigated numerous biological problems incident to marine life in the open sea in tropical American waters. It found that the common eel spends its "sea periods" in West Indian waters. One species returns to American streams and the other crosses the Atlantic and visits the streams of the European west coast.

The Field Museum of Natural History sent zoological and botanical expeditions to the mountains of Peru and an expedition to study the aboriginal tribes of the Island of Hainan, China.

Through the support of the Mexican Government and the National Geographic Society, the California Academy of Science, the San Diego Museum of Natural History, the Scripps Institution for Biological Research, and the Pacific Division of the American Association for the Advancement of Science united their forces and sent an expedition to the west coast of Mexico to study the problem of the southern fur seal, the elephant seal, and the sea otter, until lately thought to be extinct, but recently found to exist in small numbers. Steps are being taken looking to a treaty between Mexico and the United States protecting these small, struggling herds.

Prof. W. J. V. Osterhout, of the department of botany, Harvard University, has found that plants resist electrical currents when normal and do not when dead. Their resistance to electrical currents goes down in the same ratio as a wound approaches to a mortal nature. Ultimately Dr. Osterhout believes it may be possible to predict certain aspects of the behavior of living matter, immensely complicated as it is, just as now we predict the course of the tides of the oceans.

Rollo H. Beck, of the American Museum of Natural History, headed the Whitney South Sea Expedition for the collection of botanical and zoological material in a five-year cruise among the South Sea Islands.

Dr. E. C. Rosenow, of Rochester, Minn., announced that he had perfected a serum which, injected into human beings in the early stages of sleeping sickness, has produced a cure.

Dr. Pozerski, of the Pasteur Institute, has built a curious apparatus with which he can produce the same rhythmic oscillations as are encountered on ships at sea. With it he has found that guinea pigs and hens are immune and that 30 per cent. of the dogs developed attacks of seasickness. Dr. Pozerski is using the instrument in his researches for a cure of this malady.

The study of rickets at Johns Hopkins University resulted in the discovery of a fourth type of vitamin (vitamin D). Investigations in the treatment of this same disease at Columbia University indicated that sunlight may produce vitamins directly in the human blood. Whether it produces new ones or merely increases the activities of those already in existence is not definitely known, but X-ray photographs and blood analyses corroborate the assertion that sunlight produces the same effect on the impaired bones as cod liver oil, the vitamin content of which is a specific for rickets. The Department of Agriculture discovered vitamin in meats.

Dr. Serge Voronoff announced that his laboratory experiments indicated that it is possible to transplant all the vital organs of a chimpanzee to human beings. He plans to present a full report to the world on all of the transplantations as made to date, to tell of their consequences.

Plans are being developed by Scandinavian scientific societies for the establishment of a tropical station for biological research in the Dutch East Indies. The probable site of the station will be in the Kei Islands, where what is really deep water fauna is found at comparatively small depths of from 200 to 300 metres.

The International Health Board of the Rockefeller Foundation agreed to provide the League of Nations with a fund for five years maintenance of an international epidemiologic intelligence service. It also made a three-year appropriation to put into effect a scheme for the international exchange of public health personnel.

The United States Department of Agriculture announced the completion of a series of experiments, begun in 1917, demonstrating that citrus fruits can be stored like apples, ripening off of the tree. After a curing process of three weeks, during which time the temperature of the fruit is maintained at about 70°, it is put into cold storage. The sugar content does not increase appreciably during storage but the acid content does decrease markedly.

It was announced that Dr. Philip Rantjen had succeeded in isolating the germ of pernicious anaemia and in developing an antitoxin and serum therefor.

### *CHEMISTRY.*

A new light alloy named "silumin" has made its appearance in Europe. It contains 14 per cent. silicon and 86 per cent. aluminum. It is about 10 per cent. lighter than usual alloys of aluminum, zinc and copper, and 25 per cent. stronger than those alloys, and has double the elongation properties they possess.

It was announced that Germany had discovered a substitute for coal, made by combining several chemicals with native minerals, which has heat producing qualities equal to those of anthracite.

The claim is made that the substitute costs only one-half as much as coal.

An instrument was perfected capable of measuring currents of electricity flowing from ore bodies where they are generated by the chemical action of water, air and minerals on the ore—a sort of electrical divining rod.

Dr. Charles P. Steinmetz succeeded in producing a bolt of artificial lightning in which he got a discharge of 10,000 amperes at over 100,000 volts, that is, a horsepower of over 1,000,000. A piece of small tree exposed to the discharge was mechanically torn to pieces. A piece of wire struck by the flash vanished into dust.

It was announced that the transmutation of metals has finally been accomplished through treatment of tungsten in heat of from 50,000 to 60,000°. Dr. Gerald L. Wendt and C. E. Irion, working at the University of Chicago, were able to change that element into helium.

Princeton University announced that Prof. E. Newton Harvey had succeeded in producing a continuous cold light. The substance, which glows without producing heat, comes from a small crustacean about the size of a flea. It is non-luminous if kept away from oxygen. With a flask of the substance one may read a newspaper three or four feet away.

Georges Urbain, professor in the Sorbonne, announced that he had succeeded in isolating a new element which he called "celtium." He was assisted in his researches by Frederick Webb, a graduate of the Harvard School of Applied Chemistry.

The United States Bureau of Mines announced that it had worked out a new method of refining copper ores. The finely ground ore is leached by the use of hot sulphur dioxide gas in the new process.

At a meeting of the American Chemical Society it was announced that a new food is produced from seaweed kelp which contains iodine, both in organic and inorganic combination, this food being valuable in the treatment of goitre.

Dr. H. B. Russell of London succeeded in restoring the heart beat of a patient after it had ceased for more than an hour. He accomplished this by the injection of a stimulant, the massaging of the heart with the hands inside the pericardium and the final injection of adrenalin. At the end of an hour the man began to breathe, and lived again.

Announcement was made of the formation of a syndicate for the development and perfection of a process of coloring motion pictures in their natural tints, invented by Daniel Comstock, former member of the faculty of the Massachusetts Institute of Technology. In this process the negative is developed just as in an ordinary film, and then is passed through additional chemical baths and processes for fixing the colors in tints natural to the objects shown on the film. It is said that the cost of treating the film is negligible.

## *ENGINEERING.*

Important results were obtained in the direction of transmitting motion pictures by radio. Many applications for patents have been filed in the Patent Office.

An instrument designed to guide aircraft when the ordinary magnetic compass is unreliable won the Magellanic premium awarded annually by the American Philosophical Society. The award was made jointly to Paul R. Heyl and Lyman J. Briggs of the United States Bureau of Standards. It is known as the "earth inductor" compass.

An instrument known as the "superphone" has been perfected by the Signal Corps of the Army. It is based on the "wired wireless" or "line radio" invented ten years ago by Major-General George O. Squier. The invention consists of a small portable set of instruments, which may be installed in any office or residence in a few minutes and connected directly with existing telephone lines. High frequency alternating currents are employed.

The General Electric Company demonstrated before a group of engineers the possibility of communication between moving trains. The representatives of four big eastern railroads and a party of radio experts and engineers witnessed the test of conversations being carried on between a moving trolley on the Schenectady Railroad and a substation three miles away, the trolley wire being the carrier of the message. The message is carried by another current of different frequency, superimposed on the one used for driving the vehicle. During its journey over the trolley wire this carrier current, properly modulated by speech, is drawn off by special apparatus, and used to operate a telephone instrument. At any point along the line, with the proper apparatus the message may be picked off the wire and carried a short distance through the air to a conveniently located telephone.

It was reported that a new daylight motion picture projection machine has been developed. It reverses the present plan of picture projection, the light being reflected behind the screen instead of from the rear of the theatre.

The United States Government conducted experiments with a searchlight possessing 1,100,000 candle power. The light has been seen at a distance of 100 miles from New York. Sometimes, at great heights, its rays are reflected by half-formed clouds of irregular shape in which the moisture is still so attenuated that the stars shine through, sometimes the under side of a cloud stops and reflects the whole beam.

Herr Hentzen, student flyer of the Hanover (Germany) Technical School, established the world's record for sustained flight in a motorless airplane (glider). He stayed up more than three hours and was able to rise more than 1,000 feet above the starting point.

An aeronautical lighthouse, with a searchlight said to give a flash visible at a distance of 200 miles, was being set up on Mt. Africa, nine miles from Dijon, where it will be permanently used as a guiding light for the great airways to the east and south of Europe.

Spanish engineers have been considering the matter of an undersea tunnel beneath the Straits of Gibraltar. The Federal Government approved a plan to span San Francisco Bay with a combined tube, bridge, trestle and fill.

Plans were afoot to secure legislation for the construction of a Boulder Canyon Dam with which to regulate the waters of the Colorado River and to prevent the yearly floods that do such damage in the Imperial Valley of California. Under the proposals that will go before Congress, the water of the Colorado River will be used for power purposes as well as irrigation.

The Queenston-Chippewa Power Canal for the utilization of the surplus water of Niagara Falls neared completion. The water brought through this channel without a fall will have a head of 305 feet.

The United States Navy Department announced the perfection of an instrument which is able to detect the echo of a sound passing from shipboard to the bottom of the sea, where it is reflected back to the ship. This very greatly simplifies the task of sounding the depths of the ocean.

The Western Maryland Railway decided to increase the capacity of its Port Covington grain elevator to 5,800,000 bushels, making it the largest in the world.

Work progressed during the year in the construction of the trans-Zambesi Railway which will ultimately figure in the Cape-to-Cairo route.

The President ordered work to proceed on the Wilson Dam in the Muscle Shoals project. This work was undertaken through the availability of $600,000 from an unexpended fund.

The Westinghouse Electrical Manufacturing Company tested out a large gyro-stabilizer designed to eliminate seasickness by preventing the rolling of ships. The stabilizer weighs 120 tons and will be installed on the Shipping Board steamer Hawkeye State. It is said that the stabilizer can be used also to roll ships, this being effective in moving stranded vessels from shoals.

Plans were in the making for the transmission of a large volume of electric energy from Norway and Sweden to Denmark, the cables being laid under the Kattegat.

The British Government granted a concession for the hydro-electric development of the River Jordan.

A device for checking up the operation of airplanes, showing both the action of the plane and the movements the pilot made in the control of his machine, has been worked out under Government auspices. A trio of recording devices makes up the system, the record being made on a photographic film.

Construction work was begun in Detroit on what is said to be the longest and largest single-span suspension bridge in the world. It is being built under the joint authority of the Dominion Parliament and the United States Congress. The bridge's span is to be 1,803 feet, 203 feet longer than the Williamsburg Bridge. The lower deck will contain four electrified railway tracks, the upper two roadways carrying six lanes of traffic, two sidewalks and two trolley tracks.

Japan is undertaking to build a submarine tunnel four miles long under the Moji-Shimonoseki Channel. It is estimated that the work will cost 18,000,000 yen and will not be completed before 1929.

Work was started on the Delaware River bridge connecting Philadelphia and Camden. The bridge is expected to cost $28,000,000.

The United States Navy Department succeeded in perfecting an airplane catapult with which it can launch a service-type airplane, carrying a pilot and passenger, from the deck of a battleship.

Ground for the Jersey City land shaft of the Hudson River vehicular tunnel was broken May 31.

A new link of approximately 45 miles in the International Railway of Central America was opened on March 17. This part of the line extends from Cojutepeque to San Salvador, giving Salvador direct railway connection with La Union.

San Francisco started work on the Hetch Hetchy water supply project, which next to those of New York and Boston, will be the largest in America. It will carry 400,000,000 gallons of mountain water to the San Francisco metropolitan area every day. This water will pass through huge wheels installed in electric power plants, and yield 200,000 horsepower of electricity before arriving at the Golden Gate.

A new locomotive capable of delivering more power for its weight than any other engine in the world and producing more energy from every ton of coal was tried out on the New York Central lines. It has a "booster," which turns the trailing wheels into driving wheels, thus adding 26 per cent. to the drawbar pull in starting on all grades. The locomotive weighs 167 tons.

### *GEOGRAPHY.*

**North America**—Most of the expeditions on the North American Continent during the past year had archaeological researches as their object. The work done by Neil M. Judd in the National Geographic Society's investigations of Chaco Canyon, and that by Dr. J. Walter Fewkes, representing the Smithsonian Institution, in the Mesa Verde National Park, yielded much material. The expedition of the National Geographic Society is described under Archaeology. Dr. Fewkes undertook his work on a large mound in the neighborhood of Mummy Lake. Here he found a rectangular building about 70 feet square and one story high, accurately oriented to the cardinal points, with a circular tower midway in the western wall.

Popocatepetl, the great volcano south of Mexico City, was in eruption on Dec. 12, 1921. It entered a period of great activity in January.

Three earthquakes were experienced at Elsinore and Monroe, Utah, Sept. 29 and Oct. 1, 1921, caused by the slipping of the blocks of the earth's crust on the great Sevier fault, largest in the known world, damaging buildings and causing thousands of tons of rock to tumble from cliffs bordering nearby canyons. The Chicago Weather Bureau reported an earthquake whose centre of disturbance was 2,865 miles southwest of Chicago, Oct. 15, 1921. Severe earthquake shocks, centring in the state of Vera Cruz, were reported from Mexico from Nov. 1 to 4, 1921. Shocks were reported in Kingston, Jamaica and Guatemala City, Nov. 25, 1921.

The University of California announced that Dr. Andrew C. Lawson has discovered a method by which earthquakes may be foretold. The discovery is based on observations made at Lick Observatory on Mount Hamilton and the stations on both sides of the great San Andreas rift, along which occurred the earthquake of April, 1906.

Rockwood, Tenn., reported an earthquake of considerable intensity on Dec. 15, 1921. Georgetown and Fordham Universities reported shocks at a distance of 2,500 miles south of Washington on Dec. 18, 1921. Panama experienced an earthquake lasting about a minute, but doing no damage, on Jan. 2, 1922. Five seismic disturbances occurred on Jan. 8, 9, 10, according to the Balboa Meteorological Station in Panama.

Ometepe Volcano, Nicaragua, was in active eruption Jan. 10, doing considerable damage. Concepcion, near Granada, also was active.

With Los Angeles as the centre, earthquake shocks in Southern California broke window panes and cracked plaster Jan. 17, 1922. Shocks of considerable intensity and quick succession were felt during the month of January, 1922, on the Island of Guadeloupe and the surrounding islands.

The University of Washington reported an earthquake shock Jan. 26. Shocks were felt on Jan. 31 throughout the coast regions of Northern California and Oregon. It was said that the earth shifted its axis slightly on Jan. 31 and that millions of tons of solid rock somewhere off the western coast of United States slipped a hundred feet or so to make the necessary adjustment. The violence of this slip was attested by the quavering seismographs which in some instances were thrown from the recording rolls, while a "strong machine" at Berkeley, California, was set in motion for the first time in many years. Two craft arriving in San Francisco Feb. 1 reported having felt earthquakes some miles off the north California coast. Their masters believed their ships had grounded, so sharp were the shocks.

The wireless operator at Kenai on Feb. 9 reported clouds of steam rising from Mount Redoubt on Cook Inlet.

Granada, on the northwest shore of Lake Nicaragua, reported that part of its cathedral and other buildings were damaged by an earthquake on Feb. 15.

The steamship Hollywood reported having encountered, 240 miles northeast of New Caledonia, from Jan. 5 to 7, immense areas of volcanic dust, at some places extending several feet below the surface and so dense as to give the water a slushy consistency. The ashes had a yellowish tint. Black smoke was observed arising in columns from the crater of Mount Jefferson, near Madras, Oregon, on March 9.

Southern California reported earthquake shocks on March 10 which at San Luis Obispo were severe enough to break an oil pipe line. Several earth shocks were recorded on the seismograph at St. Louis University on March 22. These shocks were also felt in Western Tennessee and in the vicinity of Hickman, Kentucky.

The volcano Chaparrastique in Southeastern Salvador was reported in eruption on March 11. The volcano Santa Maria was reported in active eruption on July 2, covering the Chuva and Colombo regions with ashes and doing great damage to the surrounding country.

**South America**—An expedition was sent to Peru by the Royal Society to study the adaptation of man to life at or above the altitude of 14,000 feet. The advantages of Peru for this type of investigation are that, being near the Equator, the effects of altitude are less complicated by those of cold than in higher latitudes; the Central Railway of Peru, the highest standard-gauge railway in the world, ascends the Andes to an altitude of 15,885 feet; a mining population lives and works in localities situated above 14,000 feet. It is said that the porters of the town of Cerro de Pasco, in the Andes, raise ore 600 feet from the mines and carry many loads of 160 pounds a day. There is probably no other population which carries on such heavy work in so rare an atmosphere.

Dr. Henry H. Rusby, Dean of the College of Pharmacy at Columbia University, was compelled by sickness to relinquish his leadership of the Mulford biological expedition in the Amazon Basin. To the date of his departure collections included 25,000 insects, 12,000 botanical specimens, and large numbers of fishes and reptiles.

The following earthquakes were reported from South American points during the year ending Oct. 1, 1922: Four sharp shocks felt in Lima, Peru, Nov. 2, 1921, were thought to centre near Ica; on Nov. 14, a shock whose centre was estimated as only 60 miles distant; the seismographs of the Lima Geographical Society registered a violent earthquake at a point estimated to be in Northern Peru on Dec. 18. A strong earth shock occurred March 1 in the western part of the Province of Mendoza, Argentina.

**Europe**—After playing a quiescent role since 1906, during which time a main cone grew to a height of about 230 feet, Vesuvius became active again, causing the cone to collapse. Since that time a new cone has formed, but lava flows thirty feet wide are reported from fissures in its side. Mt. Etna was in eruption in March and for some time thereafter, with streams of lava flowing from all sides of its crater.

Earth shocks of such violence that the people abandoned their houses occurred in San Lorenzo, Nuoro, Italy, Dec. 1, 1921. Four violent earthquake shocks occurred in the vicinity of Terni, about 50 miles from Rome, May 27. A long series of earth shocks occurred in northern Serbia, beginning on March 23. A number of hot springs came up through earth fissures caused thereby.

Earthquake shocks experienced in the city of Massa e Carrara, on the Tuscan coast of Italy, were of such intensity as to cause the people to spend the night of October 25, 1921 in the open fields.

A landslide destroyed the cathedral, the post office and many dwellings in the town of San Fratello, Sicily, Jan. 9, 1922. The landslide was believed due to heavy rainfalls. The city hall and two churches were wrecked and 500 people made homeless by landslides in Corato in May. The city is situated over an underground lake and cave-ins are frequent. The Government plans to drain this.

**Asia**—The expedition led by Gen. C. G. Bruce in a second attempt to climb Mt. Everest failed to reach the summit of the world's highest mountain. **Geoffrey Bruce and George Finch succeeded in reaching an altitude of 27,300 feet**, leaving only 1,800 feet to be scaled. The previous highest point reached by a mountain climber was 24,583 feet, made by the Duke d'Abruzzi in 1910.

An expedition led by Professor Gregory undertook to determine exactly where the Himalayas end. To the north of Assam a range extends at right angles

to the Himalayan range, curving to the south and west. To the east of this range another continues in the general direction of the Himalayas, and extends eastward into China. To determine which of these is the main range and therefore the eastern extension of the Himalayas is the object of the expedition.

Tokio experienced its worst earthquake in twenty years on Dec. 9, 1921. Many houses were damaged, a number of people were injured and the water mains of the city broken.

Frederick McCormick reported having witnessed a great eruption of the volcano Karimskaya, in Kamchatka, which has 65 volcanoes. He viewed it from Semlachik. "Above a mountain ridge which lay between we could see, without the aid of glasses, the expulsion of showers of rocks, many of which must have been larger than ships, as they flew through the sky in giant parabolas." It was reported that the temperature of the water in Kronotskii Bay was raised 5½ degrees by the eruption. Mt. Asama-Yama, 90 miles northwest of Tokio, erupted large quantities of smoke and ashes, with a loud report, on April 21. An earthquake followed, which did some damage in Tokio, killing several natives, slightly damaging the American Embassy and breaking some of the exhibits at the Peace Exposition. In Yokohama the Chinese quarter was largely destroyed and the water works disrupted. Eight earthquake shocks were registered in Formosa during the early half of September. The culminating one destroyed several buildings.

**Africa**—The joint Anglo-French commission for the delimitation of the Darfur-Wadai boundary was engaged in settling the boundary issue between the kingdom of Darfur which belongs to the British Empire and that of Wadai which belongs to France.

An account of the expedition organized by Prince William of Sweden for zoological research in the region of Kirunga volcanoes, north of Lake Kivu, was published. The expedition passed through the Kenya colony and Uganda. Near Lake Kivu it was found that the eruption of a new volcano in December, 1912, had destroyed most of the vegetation but that new growth was coming back in many spots. About 1,000 mammals, 1,700 birds, and several hundreds of reptiles were carried back to Stockholm.

**Polar**—Donald B. MacMillan and his party returned from the Frozen North, Sept. 7, bringing back much data and many specimens. He found Hecla Strait frozen solid, evidence that the ice never leaves Fox Channel, and that existing maps of Baffin Island are incorrect. Also he found traces of the Norsemen, who apparently had visited the Baffin Bay country, probably from Greenland, in the eleventh century.

The Shackleton-Rowett expedition returned to South Africa without finding any new lands in the Weddell Sea regions of the Antarctic, which it had undertaken to explore. Sir Ernest Shackleton, the commander, died during the cruise and was buried on the sub-Antarctic island of South Georgia.

Knud Rasmussen reported that his expedition had successfully wintered on Danish Island in Lyon Inlet, Melville Peninsula, and was planning a sledge expedition for the autumn of 1922, beyond the Barren Lands and along the Northwest Passage to Bering Sea and back.

Roald Amundsen postponed his projected airplane flight across the North Pole, owing to the bad weather and heavy ice prevailing in the region he would have to traverse in his ship, the Maud, in order to reach a point for starting his airplane trip.

**Oceanica**—The following more or less severe earthquake shocks were reported from the islands of the Pacific: severe shocks in Guam on Dec. 16, and 17, 1921; five persons were killed and many injured by a severe quake that shook the city of Cebu and vicinity on Feb. 28, 1922, shaking down concrete walls and corrugated roofs of a number of buildings. Melbourne, Australia, reported a violent quake on April 10. A series of earthquakes, lasting forty days in the Taupo thermal district, New Zealand, began on May 10.

*GEOLOGY.*

A geological expedition to study the gem producing areas of Brazil, the gold and iron producing areas of Peru and Bolivia, and the nitrate regions of Chili was continued in the field by the Field Museum of Chicago.

A proclamation by President Harding set aside a 593-acre tract in the Nevada National Forest as the Lehman National Caves Monument. Located at the base of Mt. Wheeler, this cave, at an altitude of 7,200 feet, has remarkable stalagmitic and stalactitic formations.

The Aussee Sandling, a mountain 5,000 feet high not far from Vienna, was in the process of crumbling, over 3¾ miles of territory being involved. Large masses of rock and forest were reported moving down into the valleys. The explanation offered was that the heavy rains of last year caused the disintegration of the chalky limestone core and the consequent movement of the superimposed strata.

A Norwegian expedition to Nova Zembla found traces of land vegetation and fresh water fish dating from Devonian times. Twelve ocean level marks subsequent to the glacial epoch were found.

Fossil plants found in abundance in the Fort Union section of North Dakota show that what is now a treeless plain was alternately a hardwood and conifer forest and a sub-tropical jungle. Fig trees and fan palms grew profusely at one time and hardwoods and conifers at another.

The Germans undertook to extract gold from the waters of the River Eder.

Rock salt deposits were discovered near Whycocomagh, Cape Breton.

Radioactive deposits were found in the Congo region of Africa, including two new minerals, which have been named "curite" and "kasolite." The crystals of these are soluble in nitric acid, thereby permitting the extraction of the radium salts without the usual calcination processes.

Drillings were carried on in Kilauea volcano, Hawaii, to determine the heat and steam pressure inside, to ascertain what chemical and other changes take place in lava flows of known date, and to disclose the possibilities of utilizing the volcano's energy as a source of power.

## PHOTOGRAPHIC FILM REPRODUCES SOUND.

The Pallo Photo Phone, now being developed by C. A. Hoxie, radio engineer, was shown to the public for the first time on Oct. 18, 1922, by the General Electric Company at its works in Schenectady, N. Y., the occasion being the visit of Thomas A. Edison to its 523 acres of factories on the Mohawk River.

The Pallo Photo Phone is a contrivance for recording sound upon a photographic film so that the sound may be reproduced in ordinary telephones, loud speakers, and in other ways. Mr. Edison saw it work. He saw two ordinary drums full of film, as in a motion picture projecting machine, with a horn nearby. A man speaks into the horn, his voice is recorded, not by a stylus on a wax plate as in a phonograph but by a dancing beam of light reflected by a mirror onto the photographic film. The film is developed, run through the machine again and out comes the voice, perfect, with delicate overtones and without the slightest "scratch."

As a motion picture and the voice of the actor or actors can be photographed on the same strip of film simultaneously there may possibly come of it the much sought after "talking movie," in which voice and movement are perfectly synchronized.

Louis T. Robinson of the general engineering laboratory describes it thus:

"The record is made by causing the sound waves to produce vibrations on an exceedingly minute and very delicate mirror. A beam of light reflected by this mirror strikes a photographic film which is kept in continuous motion. The film when developed shows a band of white with delicate markings on the edges which correspond to the sound which has been reproduced.

"On account of the exceedingly small size of the mirror, its low inertia, etc., it is possible by this means to produce a sound record which includes the very delicate 'overtones' which give quality to speech and musical sounds. This has not been so successfully accomplished by any other method of recording sound waves.

"The reproduction of the sound from the film is accomplished by moving the film in front of an exceedingly delicate electrical device which produces an electromotive force which varies with the amount of light that falls upon it.

"By an ingenious combination of vacuum tubes there has been produced an apparatus which responds to variation in the light falling on it with a speed which is so high that it can only be compared with the speed of light itself, or with the speed of propagation of wireless waves in space.

"Therefore, when this film is moved continuously in front of such a device the device produces an electric current which corresponds very accurately to the original sound wave. This electric current may be used to actuate a telephone or loud speaker. It was actually used recently to operate the radio transmitting station WGY of the General Electric Company."

# Aviation Progress and Records in 1922.

Marvellous achievements and advance in aviation in its various branches marked 1922. New inventions, new records and new departures featured the art of flying from the standpoint of military, naval, commercial and sport aviation. In every department great progress was made both in America and abroad. The development of the motorless glider from the initial planes making flights of two or three minutes to elaborate monoplanes and biplanes capable of sustained flights ranging from two to three hours was accomplished within the year.

New speed, duration and weight-carrying records were established and military and naval air manoeuvres demonstrated the constantly growing place of importance of the airplane in offensive and defensive warfare. If progress keeps step with predictions, during the next twelve months aviation may be expected to assume a position of the greatest importance in the life of nations throughout the world. The part that airplanes will play in future warfare has been stressed by military authorities of all countries. Rear Admiral W. W. Fullam, in a recent address, stated emphatically that, in his opinion, aircraft would win the next war.

Tests in theoretical bombing of Washington were repulsed by defensive airplane fleets, and in somewhat similar trials the British airplanes scored decisively over the navy. Based on this showing, Premier Lloyd George announced in the House of Commons the Government's decision to provide an aerial force of some 500 machines at a cost of some £2,000,000 per annum. It has been stated that a majority of these planes will be all-metal, varying in size, speed and carrying capacity. All nations are considering carefully the possibilities and prospects of aviation for both warlike and peaceful purposes.

Secretary of War Weeks stated that as a result of a two months' investigation by Brig. Gen. William Mitchell, Assistant Chief of Air Service, it was shown that European powers were spending more money and developing types of planes in advance of the United States. Demonstrations in the closing months of the year, however, appeared to indicate that the balance of plane superiority was shifting to this country. A campaign of aviation education has been proposed in Japan where it is said the plane forces are but three to a hundred as compared to English and American aerial equipment.

The commercial aviation reports from England indicate that the Government is considering the development of high power planes capable of carrying a hundred passengers. Cruising speed in excess of a mile a minute is stated to be entirely feasible and proposed routes would include frequent flights to America, Australia and India. As the result of the marvellous speed developed by American planes in the Pulitzer Trophy race at Detroit in October, Brig. Gen. William Mitchell, upon his return to Washington, said, that in view of his world record speed flight over a kilometre course at the rate of 224.48 miles per hour, flying at the rate of 300 miles per hour within five years was not improbable. A twenty-eight-hour mail service, between New York and San Francisco and three hours between New York and Chicago, were also predictions likely to be realized in the near future, according to Second Assistant Postmaster General Paul Henderson in a talk before the Aeronautical Chamber of Commerce in September.

Among the latest developments reported during the closing months of 1922 were an automatically controlled plane, demonstrated in England, which, by the aid of a new devised stabilizer, flew 200 miles without being actuated by a human agency. A somewhat similar plane tested at Washington which flew ninety miles in Army Air Service experiments was declared to be more dependable than the human aviator, being especially steady in "bumpy" air currents.

A new dirigible observation balloon was also successfully tested at Dayton, O., late in October.

French aeronauts report the building of a tailless plane which has developed high speed. Dr. George H. Madelung, designer of the Hanover motorless glider that established a three-hour flight record, predicted that under certain wind and weather conditions, flights of several hundred miles and altitude ascensions to extreme heights were not impossible. Brig. Gen. Mitchell announced that the United States had produced four types of plane capable of a sustained speed in excess of 200 miles per hour.

The French Army tested out on Oct. 26 an armored aerial dreadnought that mounted a 75-millimetre field gun; it was manufactured by the Scheider Steel Works.

Senator Wadsworth introduced in the present Congress a bill which provides for the creation of a Bureau of Civil Aeronautics in the Department of Commerce to encourage and regulate the operation of civil aircraft. It would be the duty of the commissioner of this bureau to safeguard life and property by the proper inspection and certification of commercial aircraft and the licensing of pilots. The bill provides for the establishment of rules and regulations governing the air; encouraging the laying out of new air routes, fields, and stations; investigation of the causes of accidents, and the survey and promotion of the industry so that it may be best fitted to serve the Nation. It prohibits the lunacies of dangerous trick flying.

All the leading governmental and civil agencies connected with aviation have indorsed this bill and urged that it be passed. The Senate passed it on Feb. 14. Then it went to the House, where it has been resting in the Committee on Interstate and Foreign Commerce, of which Representative Samuel E. Winslow of Massachusetts is Chairman.

Great Britain and France enacted codes immediately after the armistice.

## UNITED STATES NATIONAL AIRPLANE RACES.

Held at Selfridge Field, Mount Clemens, Mich., Oct. 12-13-14, 1922, The United States National Airplane Races were the competition feature of the season, seven events being held with special trophies, prizes and purses. Entrants were drawn from all parts of the nation, and the United States Army and Navy were strongly represented, the service entries winning a majority of the contests.

The Pulitzer Trophy Race was the most important event, two world records, one for 100 kilometres and the other for 200 kilometres, being created during the race. It was the third competition for the Pulitzer Trophy, the deed of gift which reads: "The Pulitzer Trophy, donated by Messrs. Ralph Pulitzer, Joseph Pulitzer, Jr., and Herbert Pulitzer to the Aero Club of America, shall be perpetual and shall be competed for annually by airplanes under rules prepared each year by the Contest Committee of the Aero Club of America, and shall be awarded each year to the Aero Club represented by the pilot of the winning airplane, and this club shall be entitled to the possession of the trophy until one month prior to the next succeeding contest, at which time the trophy shall be returned to the Aero Club of America. The Contest Committee of the Aero Club of America, with the consent of the Board of Governors, has the privilege of conducting each annual contest for the Pulitzer Trophy, or of assigning this privilege, under sanction, to any other club or organization.

"Gold, silver and bronze plaques will be given by the donors to the pilot winning first, second and third places in every contest for the Pulitzer Trophy."

The winners have been:

1920—Lieut. C. C. Moseley, Verville-Packard airplane.

1921—Bert Acosta, Curtiss navy racer.

1922—Lieut. R. L. Maughan, Curtiss H. S. pursuit plane.

The results of United States National Airplane Races were as follows, the names of those who finished only being given:

*LIBERTY ENGINE BUILDERS' TROPHY.*

*Total Distance, 257.74 Miles (Ten Laps of 25.774 Miles). Cash Prizes: First, $1,200; Second, $600; Third, $200.*

NOTE—Jones and Worthington tied for second place.

Points awarded winner of race and those finishing within 20 minutes of the winner—Harris, 600; Jones none—finished 26 minutes late; Worthington, none—finished 55 minutes late.

Points awarded for self-starter—Harris, none; Jones, 100; Worthington, 100.

## OTHER NOTABLE CONTESTS.

**The Midwestern Flying Meet** was held at Monmouth, Ill., June 15-17. The names and performances of the winners and seconds in the main events of the meet are as follows:

*Free For All Cup Race*—Class "A"—horse power no limit; three heats—15 miles each. First: E. Hamilton Lee, Mail DH, 400 h. p., fastest heat, 8m. 30s.; second: James M. Curran, SVA, 220 h. p., fastest heat, 8m. 33s.

*Free For All Cup Race*—Class "B"—horsepower, 150 limit; three heats—15 miles each. First: Harry Smith, Bellanca CF, 90 h. p., fastest heat, 9m. 15s.; second: Shirley Short, Oriole K-6, 150 h. p., fastest heat, 11m. 22s.

*Free For All Cup Race*—Class "C"—OX 90 horse power only; three heats—15 miles each. First: Walter H. Beech, Laird Swallow, 90 h. p., fastest heat, 10m. 52s.; second: E. M. Laird, Laird Swallow, 90 h. p., fastest heat, 11m. 37s.

*Altitude Cup Contest*—Same instrument used on all machines. First: Shirley Short, W. A. Yackey, Breguet, 300 h. p., 20,000 ft.; second: James M. Curran, SVA, 220 h. p., 17,800 ft.

*Acrobatic Cup Contest*—First: Walter H. Beech, Laird Swallow, 21 points; second: Dan Hunter, Canuck, 20 points.

*Parachute Jump for Spot Landing Cup*—First: Edward Kohlstedt (Smith Pack), distance from spot, 300 ft.; second: Aaron Rowe (Hardin Pack), distance from spot, 1,000 ft.

*Gliding Contest*—Dead engine from 2,000 ft., last man on the ground is the winner. Winner: Harry Smith, Bellanca CF; second: Walter H. Beech, Laird Swallow.

## *DEUTSCH DE LA MEURTHE CUP RACE.*

Held at Etampes, France, September 30.

| Nation'lity. | Type. | Pilot. | Engine Type and H. P. | Time (Min., Sec.) Over Distance. | | | | | | | |

Won by No. 9; second, No. 8; third, No. 3.

## *NATIONAL BALLOON RACE.*

Started from Milwaukee, Wis., May 30. Entrants—Roy Donaldson, Springfield, Ill., balloon capacity, 50,000 cubic feet; Major Oscar Westover, Washington, balloon capacity, 80,000 cubic feet; Ralph Upson, Detroit, 65,000 cubic feet; Capt. John Berry, St. Louis, 78,000 cubic feet; Lieut. Commander J. P. Norfleet, Lakehurst, N. J., 75,800 feet; Lieut. W. Freed, Pensacola, Fla., 70,000 cubic feet; J. C. McKibben, St. Louis, 77,500 cubic feet; Warren Rasor, Brookville, Ohio, 50,000 cubic feet; Lieut. James T. Neely, Ross Field, Cal., 80,160 cubic feet; Capt. Harold Weeks, Langley Field, Va., 80,000 cubic feet; Bernard von Hoffman, St. Louis, 80,000 cubic feet; Ward T. Van Norman, Akron, Ohio; 77,600 cubic feet; H. E. Honeywell, St. Louis, 78,000 cubic feet.

Results, as checked by United States Coast and Geodetic Survey, Department of Commerce, Washington, D. C.—

| Entrant. | Aid. | Landed Near. | Distance Miles. | Entrant. | Aid. | Landed Near. | Distance Miles. |
|---|---|---|---|---|---|---|---|
| Westover | Bond | St. Jerome, Can. | 866.5 | McKibben | Muller | Auxvasse, Mo. | 350.5 |
| Honeywell | Wade | Neosho, Mo. | 553.4 | Neely | Jordon | Bay Village, O. | 325.3 |
| Reed | Mullenax. | Eminence, Mo. | 431.0 | Weeks | Burt | Witt, Ill. | 275.2 |
| Van Orman | Morton | Fayette, Mo. | 370.6 | Berry | Ramsdill. | Monticello, Ill. | 205.0 |
| Rasor | Williams. | Fulton, Mo. | 359.3 | Von Hoffman | Vencill | Fort Wayne, Ind | 197.4 |
| Upson | Andrus | Chardon, Ohio | 356.3 | Norfleet | Shade | Hancock, Mo. | 416.1 |

The first three place winners, or substitutes, win the right to compete in the Gordon-Bennett International Race.

## *GORDON BENNETT INTERNATIONAL BALLOON RACE.*

Started from Geneva, Switzerland, August 6. Results:

| Pilot. | Nation. | Landed. | Distance. | Time. | |
|---|---|---|---|---|---|
| | | | *Miles.* | H. | M. |
| DeMuyter | Belgium | Oknitsa, Roumania | 852.53 | 25 | 40 |
| Honeywell | United States | Tapio-Szecso, Hungary | 659.28 | 26 | 30 |
| Bienaime | France | Mor, Hungary | 573.53 | 19 | 32 |

Other entrants were: Labrousse, of Belgium, landed at Steinamanger, Hungary; Armbruster, of Switzerland, landed at Kirschschlag, Austria; Westover, of the United States, landed at St. Gotthard, Hungary.

Eighteen competitors, representing six nations, started. DeMuyter was awarded first prize and trophy on distance, and Capt. H. E. Honeywell, of St. Louis, who finished second, the duration prize.

## WORLD'S RECORDS RECOGNIZED BY INTERNATIONAL AVIATION FEDERATION, Corrected to Nov. 1, 1922.

*Class A (Free Balloons)*—

No. 1. Duration—H. Kaulen (Dec. 13-17, 1913), 87 hours.

No. 2. Distance—Berliner (Feb. 8-10, 1914), 3,052 kilometres (1,896.86 miles).

No. 3. Altitude—Suring & Berson (June 31, 1901), 10,800 metres (35,434.8 feet).

*Class B—Dirigibles (Airships)*—

No. 1. Duration—Castracane & Castruccio (June 25, 1913), 15 hours.

No. 2. Distance—Castracane & Castruccio (July 30, 1913), 810 kilometres (493.31 miles).

No. 3. Altitude—Cohen (June 18, 1912), 3,080 metres (10,105.5 feet).

No. 4. Maximum Speed—Castracane & Castruccio (July 30, 1913), 64 kilometres, 800 metres per hour (40.26 miles per hour).

*Class C—Airplanes*—

No. 1. Duration—Ed. Stinson & Lloyd Bertaud at Roosevelt Field (Dec. 30, 1921), J. L.-6 monoplane, 26h. 19m. 35s.

No. 2. Distance—L. Boussoutrot and Jean Bernard, over the course from Villesauvage to La Marmogne. (June 3-4, 1920), Goliath-Farman airplane with two 260 h. p. Salmson motors.

No. 3. Altitude—Lieut. MacReady, at Dayton, Ohio (Sept. 28, 1921), Lepere biplane, Liberty motor, 400 h. p., 10,518 metres (34,509.5 feet).

No. 4. Speed for the Following Recognized Distances: 100 kilometres (62.137 miles)—Lieut. R. L. Maughan, at Detroit, Mich., Oct. 14, 1922, Curtiss High Speed Pursuit plane with 375 h. p. Curtiss D-12 motor, 18m. 6.78s., equalling 205.31 miles per hour, or 330.4 kilometres per hour.

200 kilometres (124.274 miles)—Lieut. R. L. Maughan, at Detroit, Mich., Oct. 14, 1922, Curtiss High Speed Pursuit plane with 375 h. p. Curtiss D-12 motor, 36m. 12.17s., equalling 205.94 miles per hour, or 331.46 kilometres per hour.

500 kilometres (310.685 miles)—No record.

1,000 kilometres (621.37 miles)—Lucien Boussoutrot and Jean Bernard, over the course from Villesauvage to La Marmogne (June 3-4, 1920), Goliath-Farman airplane with two 260 h. p. Salmson motors. 10h. 19m. 46s.

1,500 kilometres (745.64 miles)—Lucien Boussoutrot and Jean Bernard, over the course from Villesauvage to La Marmogne (June 3-4, 1920), Goliath-Farman airplane with two 260 h. p. Salmson motors, 16h. 42m. 8s.

2,000 kilometres (1,242.74 miles)—No record.

No. 4. Maximum Straightaway Speed—Timed over a 1 kilometre course, during which contestant shall make two complete trips in each direction, the average speed for four trips to constitute time.—Brigadier Gen. William Mitchell, at Detroit, Mich., Oct. 18, 1922, Curtiss High Speed Pursuit plane with 375 h. p. Curtiss D-12 motor. Time of flights: 9.17; 10.95; 9.25; 10.76 seconds. Average, 224.48 miles per hour, or 361.28 kilometres per hour. (Subject to I. A. F. ratification.)

No. 5. Records Carrying Useful Load:

Duration—Useful load carried, 1,500 kilos. (3,306.9 lbs). Capt. C. T. R. Hill, at Cricklewood, England (June 4, 1920), Handley-Page (W-8) airplane with two 450 h. p. Napier Lion motors, 1h. 20m.

Distance—No record.

Altitude—Useful load carried, 250 kilos. (551.1 lbs.)—Jean Le Boucher, at Bourget (July 6, 1921), Breguet Rateau airplane, 280 h. p. Renault motor 6,782 metres (22,251.7 feet).

Altitude—Useful load carried, 1,500 kilos. (3,306.9 lbs.)—Capt. C. T. R. Hill, at Cricklewood, England (May 4, 1920), Handley-Page (W-8) airplane with two 450 h. p. Napier Lion motors, 4,267 metres (14,000 feet).

## *WORLD'S RECORDS FOR RUBBER DRIVER MODEL AIRPLANES.*

Revised to September, 1922. by Illinois Model Aero Club.

| Type of Model. | Kind of Contest. | Record. | | Held By |
|---|---|---|---|---|
| | | Feet. | Seconds. | |
| Twin Pusher, hand launched | Duration | ..... | 265 | R. Jaros. |
| Twin Pusher, hand launched | Distance | 5,337 | ..... | Thomas Hall. |
| Twin Pusher, R. O. G. | Duration | ..... | 209 | R. Jaros. |
| Twin Pusher, R. O. G. | Distance | 4,029 | ..... | W. Schwietzer. |
| Twin Pusher, Hydro | Duration | ..... | 172 | B. Pond. |
| Tractor, hand launched | Duration | ..... | 240 | D. Lathrop. |

| Tractor, R. O. G. | Duration | ..... | 227.4 | P. Breckenridge. |
| Tractor, R. O. G. | Distance | 2,685 | ..... | P. Breckenridge. |
| Tractor, Hydro | Duration | ..... | 116 | L. Hittle. |
| Indoor, hand launched | Duration | ..... | 170 | B. Pond. |
| Scale Model | Duration | ..... | 21 | R. Jaros. |

## SPEED TESTS.

Speed records over measured courses were broken several times during 1922, although it is not certain that all times will be recognized by the I. A. F., due to lack of official timers, observers and other technicalities. The best times were made late in the season. They follow:

### One Kilometre.

(Average for four laps, two in each direction.)

| Pilot. | Date. | Speed. Km. P. H. | M. P. H. |
|---|---|---|---|
| *Sadi-Lecointe, France | Sept. 18, 1921 | 330.275 | 205.22 |
| Brack-Papa, Italian | Aug. 29, 1922 | 336.468 | 209.08 |
| Sadi-Lecointe, France | Sept. 21, 1922 | 341.717 | 212.34 |
| Gen. Mitchell, United States | Oct. 18, 1922 | 360.496 | 224.48 |
| †Lieut. Maughan, United States | Oct. 16, 1922 | ..... | 248.50 |
| ‡Lieut. Maughan, United States | Oct. 16, 1922 | ..... | 232.22 |
| §Lieut. Maughan, United States | Oct. 16, 1922 | ..... | 229.00 |

*World's record for 1921 as recognized by I. A. F.
† 1 lap; ‡ 4 laps; § 8 laps. Official timing, observing doubtful.

### 100 and 200 Kilometres.

| Place. | Date. | Pilot. | Plane. | Time Over Distance. 100 Km. M. S. | 200 Km. M. S. |
|---|---|---|---|---|---|
| Detroit | Oct. 14, 1922 | Lieut. Maughan | Army-Curtiss | 18 6.78 | 36 12.17 |
| Detroit | Oct. 14, 1922 | Lieut. Maitland | Army-Curtiss | 18 57.46 | 37 37.16 |
| Detroit | Oct. 14, 1922 | Lieut. Brow | Navy-Curtiss | 19 11.56 | 38 29.04 |
| Detroit | Oct. 14, 1922 | Lieut. Williams | Navy-Curtiss | 19 48.70 | 39 38.75 |

## DURATION, DISTANCE, AND ALTITUDE FLIGHTS.

A number of long duration flights, both over restricted territory, cross-country, and cross-water, featured the season of 1922. Several world's records were broken and rebroken and other flights would have qualified in this category had the necessary technical recording details been arranged in advance. All claims for aviation records have to be filed with the International Aviation Federation and rigid rules observed. Every claim is carefully investigated and passed upon solely on the basis of these regulations. As a result it is frequently months after the performance that these claims receive official recognition. The details of the more prominent flights, regardless of their ultimate status from a record standpoint, follow:

Dec. 30-31, 1921—Edward Stinson and Lloyd Bertaud flew continuously for 26h. 12m. 35s. over Roosevelt Field, New York, in a Larsen all-metal plane driven by a 185 h.p. Bavarian Motor Works engine. The flight ended when oil in the lubrication tanks froze in zero weather. Accepted as world's record by I. A. F.

Oct. 5-6, 1922—Lieuts. J. A. Macready and O. G. Kelly, U. S. A. S., flew continuously for 35h. 18m. 30s. over Rockwell Field, Coronado, Cal., exceeding by close to nine hours the flight of Stinson and Bertaud. Macready and Kelly intended to try for a transcontinental flight when they took off and little preparation was made for recording a duration flight over restricted territory when fog prevented the cross-country flight. They used the army monoplane T-2, motored by a 400 h.p. Liberty engine.

Oct. 13-14, 1922—Lieut. Bossoutrot and M. Drouhin flew continuously for 34h. 14m. 7 1-5s. around Paris, France, with start and finish at La Bourget airport, under supervision of Aero Club of France. They used a Farman Goliath plane with two 300 h.p. Renault engines and appeared to comply with all I. A. F. record requirements. The plane travelled approximately 3,200 miles at an altitude ranging from 600 to 5,000 feet, the latter height being reached as the gas tanks lightened.

Nov. 3-4, 1922—Lieuts. J. A. Macready and O. G. Kelly flew from San Diego, Cal., to Indianapolis, Ind., 27h. 52s., approximate time, without stop in an endeavor to establish a non-stop transcontinental flight. They were forced to land when the engine burned out. The flight was made in the Army monoplane T-2 with a 400 h.p. Liberty engine. In an endeavor to keep the engine going the aviators poured soup, coffee, and milk, their food supplies, into the engine to replace the water leaking out when the cylinder jackets cracked under the strain of continuous engine operation in storms and rapidly changing temperatures. Unofficial charts showed approximately 2,200 miles covered or five-sevenths of the distance between San Diego and New York. The plane carried at the start 725 gallons of gasoline, 30 gallons of oil and 20½ gallons of water.

Sept. 4-5, 1922—Lieut. J. H. Doolittle, U. S. A. S., flew from Pablo Beach, Fla., to Rockwell Field, San Diego, Cal., in 21h. 20m. actual flying time and 22h. 35m. lapsed time with one stop at Kelly Field, Tex., to replenish fuel tanks. He used a special De Haviland plane and was estimated to have covered approximately 2,275 miles.

Calbraith P. Rodgers, flying a Wright Model B, started from New York City, on Sept. 17, 1911, and landed at Pasadena, Cal., Nov. 5, 1911. His longest single flight was 133 miles.

Robert G. Fowler flew across the continent from West to East, landing at Jacksonville, Fla., on Feb. 17, 1912. He was 122 days on the way.

The late Lieut. W. D. Coney, Army Air Service, negotiated a flight similar to the one recently completed by Lieut. Doolittle, his total flying time being 22h. 27m., but it took him several days to accomplish his journey.

The complete record of non-stop duration flights of record proportions since the early days of aviation follows:

Nov. 12, 1906—Santos-Dumont, 21s.
Oct. 26, 1907—Henry Farman, 52s.
Jan. 13, 1908—Henry Farman, 1m. 28s.
Sept. 21, 1908—Wilbur Wright, 1h. 31m. 25s.
Dec. 31, 1908—Wilbur Wright, 2h. 20m. 23s.
Aug. 27, 1909—Henry Farman, 3h. 4m. 56s.
Nov. 3, 1909—Henry Farman, 4h. 17m. 53s.
July 10, 1910—Olieslaegers, 5h. 3m. 5s.
Oct. 28, 1910—Tabuteau, 6h.
Dec. 18, 1910—Henry Farman, 8h. 12m. 23s.
Sept. 1, 1911—Maurice Farman, 11h. 1m. 20s.
Sept. 1, 1912—Fourny, 13h. 17m. 57s.
Feb. 4, 1914—Langer, 14h. 7m.
Apr. 24, 1914—Poulet, 16h. 28m. 56s.
June 24, 1914—Basset, 18h. 10m.
June 28, 1914—Landmann, 21h. 50m.
July 10, 1914—Boehm, 24h. 14m.
June 4, 1920—Bossoutrot and Bernard, 24h. 19m.
Dec. 30-31, 1921—Bertaud and Stinson, 26h. 19m. 35s.
Oct. 7-8, 1922—Macready and Kelly, 35h. 16m. 30s.
Oct. 14-15, 1922—Bossoutrot and Drouhin, 34h. 14m. 7 1-5s.

### ALTITUDE FLIGHTS.

Oct. 23—Etampes, France, Mountofier, 32,866 feet. New French record, but some 1,700 feet short of world's record of 34,509 feet made by Lieut. J. A. Macready at Dayton, Ohio, Sept. 28, 1921.

### PARACHUTE JUMP.

June 12—Capt. A. W. Stevens made a parachute jump over Dayton, Ohio, from an airplane at an approximate height of 24,206 feet. His equipment consisted of a double parachute 28- and 18-foot spread respectively. The smaller parachute, for emergency use only, was not opened. An oxygen tank was also strapped to the jumper. From the time Capt. Stevens jumped from the plane until he landed five miles beyond Jamestown, Ohio, the drift amounted to some thirty miles and the time consumed in the drop in the four and one-half mile jump was more than twenty minutes.

## UNITED STATES AIR MAIL SERVICE.

(Compiled for The Almanac by Second Assistant Postmaster General Paul Henderson.)

| Month. | Trips Possible (Scheduled.) | Trips Attempted. | Mileage Possible (Scheduled.) | Miles Travelled With Mail. | Mail Carried, (Pounds.) | No. of Letters Advanced. | Cost of Service. |
|---|---|---|---|---|---|---|---|
| 1921. | | | | | | | |
| July | 624 | 623 | 131,450 | 130,555 | 77,276 | 3,091,040 | $109,799 |
| August | 693 | 689 | 136,974 | 134,549 | 84,680 | 3,387,200 | 106,986 |
| September | 657 | 651 | 127,706 | 125,914 | 88,401 | 3,536,040 | 102,988 |

| 1922. | | | | | | | |
| January | 699 | 633 | 136,880 | 119,966 | 93,283 | 3,731,320 | 116,553 |
| February | 635 | 558 | 124,960 | 107,944 | 92,902 | 3,716,080 | 86,898 |
| March | 729 | 690 | 144,720 | 134,503 | 123,312 | 4,932,480 | 95,884 |
| April | 675 | 652 | 134,000 | 127,634 | 116,303 | 4,652,120 | 80,066 |
| May | 702 | 694 | 139,360 | 136,973 | 121,888 | 4,875,520 | 79,611 |
| June | 702 | 697 | 139,360 | 138,185 | 132,904 | 5,316,160 | 78,480 |
| Total | 8,228 | 7,887 | 1,629,250 | 1,537,927 | 1,224,723 | 48,988,920 | $1,215,167 |

### NOTES ON THE ABOVE TABLE.

Temporary service from Elko to Ely, Nevada, was begun Oct. 19, 1921. East day service on the Elko-Ely route was begun Feb. 15, 1922.

Trips defaulted, 341; trips uncompleted, 211; fog or storm trips, 2,433; clear-weather trips, 5,454; forced landings, 760 (of which 281 were due to mechanical causes); total miles travelled, including ferry and test, 1,727,265; per cent. of performance, 94.39.

Time in flight, 19,036 H., 53 M.; cost per hour, $63,83; cost per mile, $0.7035.

Gasoline used, 502,631; cost of gasoline, $149,027; cost of repairs and accessories, $226,735; cost of pilots, $174,407; cost of mechanics and helpers, $172,892.

Length of New York-San Francisco route—2,680 miles.

Number of airplanes in service—80.

There were no fatal accidents, it is stated, in the last year.

**Commercial Aircraft Operations in United States, 1921.**

| | |
|---|---|
| Estimated No. of aircraft in operation | 1,200 |
| Estimated total mileage | 6,500,000 |
| Estimated number of persons flown | 250,000 |
| Operators making reports | 125 |
| Equip. of these operators (No. mach.) | 500 to 600 |
| Mileage flown by these operators | 2,907,245 |
| No. of pass. carried by these operators | 122,512 |
| Pounds of freight carried by these opera | 123,227 |
| Number of flights by operators | 130,736 |
| Average duration of flights | 21 min. |
| Average charge per short flight | $9.00 |
| Avg. charge per mile, inter-city flight | .55 |
| Average charge per lb. of freight | .33 |
| States in which operations were carried on | .34 |

Operators reporting as above had in 1921 but 146 air terminals for seaplanes and airplanes. Only sixteen of the 146 were publicly owned or controlled.

**Data on Aircraft Manufacturing.**

| | |
|---|---|
| No. of plants, prod. and exp. in 1921 | 25 |
| Invested capital | $10,000,000 |
| Number of persons employed | 5,000 |

States in which plants are located: New York, Ohio, Kansas, Rhode Island, Michigan, New Jersey, California, Washington, West Virginia and Wisconsin.

No. of trades required in aircraft constr. ..... 72

**Commercial Aeronautics, 1921.**

| 1921. | No. of Flights. | Miles Covered. | Passengers Carried. | Weight of Goods Carried. |
|---|---|---|---|---|
| Belgium (Jan.–Sept. 30) | 1,224 | 161,800 | 2,199 | 28,000 lbs. |
| France | 6,221 | 1,457,437 | 10,336 | 396,000 lbs. |
| Great Britain (Oct. 1920–Sept. 1921) | 22,676 | 533,700 | 41,956 | 94,000 lbs. |
| Holland (April 17–Oct. 15) | 1,000 | 465,000 | 1,511 | 30,856 kgs. |
| United States | 130,736 | 2,907,245 | 122,512 | 123,227 lbs. |

Holland service did not operate during winter months. Holland mileage is in kilometres.

**Aircraft Appropriations, United States and Foreign.**

| United States 1921 | |
|---|---|
| Air mail | $1,250,000 |
| Army air service | 19,200,000 |
| Naval air service | 13,413,431 |
| National advisory com. for aeronautics | 200,000 |
| | $34,063,431 |

| Foreign 1921 | |
|---|---|
| Argentina | $271,263.17 |
| Belgium, francs | 22,000,000 |
| Canada | $1,625,000 |
| Chile | $500,000 |
| Czechoslovakia, kroner | 6,800,000 |
| Cuba | $10,970.76 |
| Ecuador, sucres | 20,000 |
| Great Britain | £19,033,400 |
| France (1922), francs | 436,000,000 |
| Italy, lire | 64,760,000 |
| Japan, yen | 43,000,000 |
| Mexico, pesos | 6,000,000 |
| Peru | $500,000 |
| Portuguese East Africa, escudes | 100,000 |
| Roumania, leis | 35,000,000 |
| Serbia, dinars | 12,000,000 |

**Foreign Subsidies for Civilian Aviation.**

| Country 1922 | |
|---|---|
| Algiers, francs | 1,000,000 |
| Belgium, francs | 3,000,000 |
| Czechoslovakia, kroner | 6,000,000 |
| France, francs | 45,832,000 |
| Great Britain | £200,000 |
| Netherlands, florins | 370,000 |
| Switzerland, francs | 150,000 |

In the United States there is no subsidy for civilian aviation.

The report of the Royal Dutch Air Service Lines on operation up to August 1st, 1922, is as follows:

From January 1st to August 1st on the line Amsterdam-Paris 332 flights were made, 272 passengers, 10.6 tons of merchandise and 300 lbs. of mail were transported.

On the line Amsterdam-London from April 18th until August 1st 230 passengers, 30.2 tons of merchandise and 1.1 tons of mail were transported.

Thus on 593 flights, covering a total of about 112,700 miles, 502 passengers, 40.8 tons of merchandise and 1.2 tons of mail were transported from January 1st to August 1st, 1922.

## MOTORLESS GLIDERS IN CONTEST.

The rapid development of the motorless glider or sailplane attracted international attention in 1922. There were several glider meets abroad and new duration records were made and broken frequently. A number of prominent aviators took part in the tests and also in constructing the gliders. The leading record flights follow:

| Date. | Place. | Pilot. | Duration. H. | Duration. M. | Passengers. | Plane. |
|---|---|---|---|---|---|---|
| Oct. 21 | Lewes, England | Moneyrolle | 3 | 21 | 0 | Tandem Monoplane. |
| Oct. 21 | Lewes, England | Olley | | 49 | 1 | Tandem Monoplane. |
| Aug. 24 | Gersfeld, Germany | Hentzen | 3 | 07 | 0 | Single Decker. |
| Aug. 19 | Gersfeld, Germany | Hentzen | 2 | 10 | 0 | Single Decker. |
| Aug. 19 | Gersfeld, Germany | Maertens | 1 | 06 | 0 | Single Decker. |
| Oct. 20 | Lewes, England | Gray | 1 | 04 | 0 | Monoplane. |
| Aug. 27 | Gersfeld, Germany | Fokker | | 13 | 1 | Biplane. |

No description of the Moneyrolle plane has been received in this country up to press time, but Hentzen's Greif and Maertens's Vampire have been described in cable despatches from The World correspondent as follows: Both Maertens's Vampire and Hentzen's Greif were built at the expense of a group of students at the Hanover Technical High School interested in the science of aerial navigation and of the Hanover Society for Aerial Navigation. They embody the result of wide experience, unceasing study and experiments gathered under the leadership of Prof. Brial and put to practical use by the constructing engineers of the Hanover railway car factory under the supervision of Hentzen.

Hentzen's machine, the Greif, his latest creation, may be described as a monoplane, a fuselage of wood occupying the centre between the two wings, with which it is connected by a number of levers that enable the pilot to make his machine ascend or drop, the wings being movable. These consist of stout linen of light weight stretched over wooden frames. The span of both wings, inclusive of the fuselage, measures not quite twelve yards. The area of both wings is about fifteen square yards.

The steering apparatus, very much like that of an ordinary airplane, but much lighter in weight, extends behind from two rods about three metres long. The other details of construction are kept strictly secret.

Maertens's Vampire is a little heavier than Hentzen's Greif. Prof. Brial of the Hanover Technical High School states that the flights of Maertens and Hentzen had proved conclusively that sailing through the air without motors was possible if the atmospheric conditions permitted it, which in Germany they did at least on 200 days of the year.

## CROSS-WATER FLIGHTS.

Several long distance continent to continent flights over ocean stretches featured aviation in 1922. Among those attempted were the hydroplane flights of Lieut. Walter Hinton from New York to Rio de Janeiro; Capts. Sacadara and Coutinho from Lisbon, Portugal, to Pernambuco, Brazil, and Major W. T. Blake, the English aviator's proposed round-the-world flight.

Capts. Sacadara and Coutinho, the Portuguese aviators, arose from the water near Lisbon on March 30 and alighted at Las Palmas, Canary Islands, the same day, a distance of about 700 miles. Unfavorable weather delayed departure until April 5, when the 800-mile flight to St. Vincent, Cape Verde Islands, was made the same day. Further delay for proper weather conditions retarded flight until April 18, when the flight was resumed from Porto Praya, Cape Verde Islands, to St. Paul Rocks, in mid-Atlantic, a distance of 900 miles. The jump was made in one day but the plane was badly damaged in alighting. The aviators then went to the Island of Fernando Noronha, off the South American coast, where another plane was secured. To complete the trip record the aviators on May 11 flew back from Fernando Noronha to and around St. Paul Rocks. On the return trip motor trouble caused a descent and the second plane was wrecked. The aviators were rescued by the steamship Paris City and returned to Fernando Noronha. A third plane was secured and the flight resumed on June 5, arriving at Pernambuco the same day after a 275-mile flight. On June 17 they completed their trip at Rio de Janeiro.

Lieut. Walter Hinton started his New York to Brazil flight on Aug. 17. Some 8,500 miles will be covered by intermittent stages. Hinton drove the Sampaio Correia II., a powerful seaplane, and after several stops at Atlantic seaports, including St. Petersburg, Fla., hopped off for Key West on Sept. 4. Arriving at Port-au-Prince, Haiti, there was a delay of several weeks while new engines were installed. On Oct. 7, Lieut. Hinton resumed flight. Details of the later portions of the trip are shown in the following table.

| Date. | Flown. From | To | Miles Flown. | Flying Time in Minutes. |
|---|---|---|---|---|
| Oct. 7.... | Port-au-Prince, Haiti..... | San Domingo..... | 254 | 182 |
| Oct. 8.... | San Domingo..... | San Juan, Porto Rico..... | 220 | 150 |
| Oct. 11.... | San Juan, Porto Rico..... | Point-a-Pitre, Guadeloupe..... | 300 | 330 |
| Oct. 12.... | Point-a-Pitre, Guadeloupe..... | Fort de France, Martinique..... | 200 | 150 |
| Oct. 15.... | Fort de France, Martinique..... | Port of Spain, Trinidad..... | 250 | 326 |
| Nov. 20.... | Port of Spain, Trinidad..... | Siddi..... | 303 | 305 |
| | | Total..... | 1,527 | 1,443 |

On Nov. 20 the plane reached South America, twenty-five miles from Georgetown, British Guiana. The flight, dependent upon favorable weather, was being continued when The Almanac went to press.

Major W. T. Blake arose from Croydon, England, on May 24, in his attempted 30,000-mile flight around the world. After a number of minor accidents and delays the aviators reached Sibi, British Beluchistan, near Quetta, on July 25. Later the trip was temporarily abandoned.

## BUILDING AND LOAN ASSOCIATIONS.

(By H. F. Cellarius, Cincinnati, O., Secretary United States League of Local Building and Loan Associations.)

Fiscal year ended June 30, 1922.

| Rank | States. | No. of Associations | Total Membership. | Total Assets. | Rank | States. | No. of Associations | Total Membership. | Total Assets. |
|---|---|---|---|---|---|---|---|---|---|
| 1 | Pennsylvania... | 2,997 | 1,193,372 | $546,884,501 | 23 | Minnesota..... | 75 | 26,000 | $12,400,000 |
| 2 | Ohio..... | 778 | 1,152,121 | 525,696,242 | 24 | Utah..... | 16 | 24,570 | 12,284,112 |

## AMONG THE BOOKS OF 1922.

(By E. W. Osborn.)

It may occur to some future historian of America to write of 1922 as the year of the Literary Deluge. Certainly there has been in the months just past a flow of books calculated to distract the reviewers and conceivably to bewilder the readers of the nation. The flood was due to a degree, undoubtedly, to troubles in the printing and binding trades which caused the holding back of many books announced for the preceding season. The effects were visible too of the stemming of the tides of publication during the war years.

Fiction easily and naturally cuts the far larger figure on the book lists of 1922. The writing of a novel, once a good deal of a feat, has become a thing commonplace. An added wonder of the world is the number of people who can tell a story in writing at least readably well. In this field the year brought forth numerous notable books, but none that fairly may be said to loom like a Woolworth structure in type.

An interesting feature of the year's literary record is the number of books of earlier seasons which linger in the current reading lists. This is shown not alone in the tables of best sellers quoted herewith. It appears in the continued call for such works as "Ambassador Morgenthau's Story," the demand for which has received fresh stimulation within a recent period by the publication of its author's new book, "All in a Lifetime." These two volumes furnish pages of American history and character which it is well for any student of our national system and its workings upon the world and the individual to have in hand.

### RICH OUTPUT OF BIOGRAPHY.

In biography and autobiography the publication seasons of 1922 have been rich. Some presentations besides the Morgenthau work have been "My Memories of Eighty Years," by Chauncey M. Depew; "Hugo Münsterberg: His Life and Work," by the great psychologist's daughter Margaret; "E. H. Harriman," by George Kennan; "The Life of Clara Barton," by William E. Barton; "My Boyhood," by John Burroughs; "Prime Ministers and Presidents," by Charles H. Sherrill; "The Life of Elizabeth Cady Stanton," by Harriot Stanton Blatch and Theodore Stanton; "Letters of James Gibbons Huneker," edited by Josephine Huneker; "The Life of Sir William Harcourt," by A. G. Gardiner; "Madame de Staël: Her Trials and Triumphs," by Lieut. Col. A. C. P. Haggard; "William Dean Howells," by Delmar Gross Cooke; "The Story of a Varied Life," by W. S. Rainsford; "My Life and Work," by Henry Ford; "My Experiences at Scotland Yard," by Sir Basil Thomson; "Rossetti and His Circle," by Max Beerbohm; "George Washington," by William Roscoe Thayer; "The Real Lincoln," by Jesse W. Weik; "Glimpses of Authors," by Caroline Ticknor; "The Wandering Years," by Katherine Tynan, an autobiographical story covering the Irish revolution; "David Lubin: A Study in Practical Idealism," by Olivia Rossetti Agresti; "Gambetta and the Foundation of the Third Republic," by Harold Stannard; "The Maturity of James Whitcomb Riley," by Marcus Dickey; "From Seven to Seventy," the autobiography of Edward Simmons, the American artist; "Memories of a Hostess," a chronicle of eminent friendships, from the diaries of the late Mrs. James T. Fields; "Jefferson Davis: His Life and Personality," by Morris Shaft; "The Home Life of Swinton," by Clara Watts Dunton; "Pasteur and His Work," by Dr. L. Descour; and Lives of Westinghouse; of Ik Marvel, by Henry G. Prout and Waldo H. Dunn; and "Life of Cardinal Gibbons," by Allen Sinclair Will.

Demanding rather special attention in the line of biography are the two volumes of the letters of Franklin K. Lane, with their marvels of self-revelation; "Mr. Lloyd George," by E. T. Raymond; "The Life and Letters of Walter H. Page," by Burton J. Hendrick; and "Woodrow Wilson and World Settlement," a voluminous work, including many documents of vital importance, prepared by Ray Stannard Baker.

Hailed as biography out of the ordinary, also, is the study of Napoleon III., called "The Second Empire," by Philip Guedalla. And closely allied to biography were such books of the year as "Pomp of Power," a book by an unnamed author on "inside" men of the late critical hour; "Painted Windows," by the "Gentleman with a Duster," who wrote "The Mirrors of Downing Street," and who is said to be Harold Begbie; and "Eminent Europeans," the just-published work of Eugene S. Bagger.

Books of specialized interest referring to matters and people of the stage and the concert room include "The Print of My Remembrance," by Augustus Thomas; "My Years on the Stage," by John Drew; Pierre V. R. Key's life of Caruso, memory records of Calvé and Tetrazzini, and the gossipy "My Life and Some Letters" of Mrs. Pat Campbell.

As the publication year drew toward a close, there appeared from the tireless pen of H. G. Wells a volume of 450-odd pages called "A Short History of the World," thought profitable to read as a sort of introduction to that "Outline of History" which maintains a persistent place among serious best-sellers. Incidentally, it may be noted that the year past has brought a four-volume "Outline of Science," edited by Prof. J. Arthur Thomson, to pay tribute to the titular popularity of the "Outline" idea.

### ON QUESTIONS OF THE DAY.

Lothrop Stoddard's "The Revolt Against Civilization," pointing out the "menace of the underman," has become one of the bitterly discussed books of the year, its fame supplementing that of the same author's "The Rising Tide of Color." Other books of 1922 dealing with crises of the times include "The Crisis in the Churches," by Rev. Dr. Leighton Parks; "Railroads and Government," by Frank Hatch Dixon; "Europe—Whither Bound?" by Stephen Graham; "Senescence: the Last Half of Life," by G. Stanley Hall; "New Churches for Old," by John Haynes Holmes; "Neighbors Henceforth," by Owen Wister; "International Relations," by the late Lord Bryce; "Washington and the Riddle of Peace," reflections upon the Disarmament Conference by H. G. Wells; "America Faces the Future," by Durant Drake; "The New Constitutions of Europe," by Howard Lee McBain and Lindsay Rogers; "The Threefold Commonwealth," by Rudolph Steiner; "The New Idealism," by May Sinclair; "Industry and Human Welfare," by William L. Chenery; "Socialism and the Average Man," by William H. Doughty, Jr.; these and books uncounted, impossible to list here, on the problems of Russia, Asia, Europe in general, the League of Nations. If it were possible to settle the troubles of this old earth by the making of many books, the job would be already at a stage calling for a date of celebration.

As this far from complete summary of the year in letters is being compiled there appear the four volumes of John Buchan's "The History of the Great War," constituting the most elaborate work in its line which has as yet come from the presses anywhere.

Useful books on our Government and the judiciary, new to readers of 1922, include "The Supreme Court in United States History," by Charles Warren; "The Constitution of the United States: Its Sources and Its Application," by Thomas James Norton, and "International Law: Chiefly as Interpreted and Applied by the United States," by Charles Cheney Hyde; "Our Republic," by S. E. Forman.

A catalogue of the year's travel books would read something like a gazetteer of the known world. The earth has been covered literally from pole to pole, and has been girdled at every degree of latitude. Illustrating the extremes of research, there are Stefansson's "Northward Course of Empire" and H. G. Ponting's "The Great White South." Frederick O'Brien has added gratefully to the number of his charming books of the South Seas.

The poetic event of the year was the publication in America, December 1, of the "Last Poems" of A. E. Housman, a volume following more than a quarter of a century after that immortal creation in verse, "The Shropshire Lad." The English edition was a few weeks earlier than the American, and those readers gloated justifiably who were able to get copies. In this country the offerings by poets well known and hitherto unknown were generous in number and hopeful in quality. What they proved principally was that the poetic spirit is abroad with us and that the foundation of another magazine of verse, Caprice, was not without a reason in rhyme.

Scientific books of 1922 were enough to form a large circulating library by themselves. It is encouraging to note the number of them which were devoted to a popularizing on lines of accuracy and sanity of various brands of science. Evidently the day is pretty well past of the mystery in laboratory or observation tower. Psychoanalysis, a pseudo-science, became during the year a fertile feeder to writers given to the exploitation of novel themes. Close upon its prints followed the Coué system of healing as a breeder of letters, with books by its original practitioner and his quickly developed interpreters.

The year's output of books on sports has been marked chiefly by the volumed counsels of the vaunted champions of tennis and golf. Of treatises

on indoor games the balance inclined heavily toward further illumination of means and methods in auction bridge. There will be no excuse for us hereafter if we do not as a nation speak of these things by the book.

## FICTION'S HIGH LIGHTS.

Coming at last to the year's fiction, which, as we have said, ranks numerically first, we pause an instant to remark with pride upon the continued appearance on best-seller lists of the novel "Maria Chapdelaine." To that offering of a preceding season, the book crop of 1922 brought only one equal in point of pure literary beauty, Walter de la Mare's "Memoirs of a Midget"—although the "Abbe Pierre" of Jay William Hudson drew near to the quality of these two masterpieces.

On points alone, "Main Street" retains a place in the best-seller ranks as the year's calculations end. Really, Mr. Lewis's first great success has been succeeded by his second, the speeding "Babbitt." The new book is generally conceded to be far better and stronger than the other. It is true too that whereas A. S. M. Hutchinson's "If Winter Comes" appears at the top of the Bookman's list, it is really his "This Freedom" which holds the major attention of American readers as 1923 swings into line.

However, it is not with best-sellers in special that we have to do here but with the fiction in general of a season which was fiction's own as judged by the array of solid bindings. And here we find our own bewilderments. Having other work to do even thus early in a new year, we cannot go into the business of a wholesale cataloguing of last year's novels. Two books of the spring seem to us best to have represented two of the extremes in American fiction writing of the times. These books are Mrs. Wharton's "The Glimpses of the Moon," and F. Scott Fitzgerald's "The Beautiful and the Damned." About Henry Sidnor Harrison's "Saint Teresa" we might write with more evident reservation, although we liked that too after getting over the first shock of having a saint beat a man up and almost stab him to death at her own fireside. We disposed of that matter finally as one of the reactions upon Mr. Harrison's creative spirit of a late ruthless war. However, we are getting off our appointed track in writing like this. We are here on the present occasion not to review the novels of the year in a technical sense but merely to permit them—a few of them—to march past.

To the thing in hand, therefore, and let us see what we can recall of stories the late reading of which does not, in memory, suggest the misspent moments of a year now dead. Without trouble we bring to mind "Broken Barriers," another of Meredith Nicholson's telling tales of American life. This book stood high on the passing list. Along the parade with it we catch on the march such books of all fictional sorts as Jackson Gregory's "The Everlasting Whisper," a California tale of the whirlwind quality; "Sleeping Fires," not one of Gertrude Atherton's best; "The Van Roon," by J. C. Snaith; "The Covered Wagon," a tale of pioneer America, by Emerson Hough; "Adrienne Toner," the story of an unfortunate Anglo-American wedding, by Anne Douglas Sedgwick; "Bennett Malin," Elsie Singmaster's latest story of life in a distinctive American circle; "Indelible," a first novel by Elliott H. Paul; "The Head of the House of Coombe," companion to "Robin," by Mrs. Frances Hodgson Burnett; "Lucretia Lombard," by Kathleen Norris; "Gentle Julia," by Booth Tarkington; "Merton of the Movies," by Harry Leon Wilson; "One Man in His Time," by Ellen Glasgow; "Joanna Godden," by Sheila Kaye-Smith; "Barbara Justice," by Diana Patrick; "Lilia Chenoworth," by Lee Wilson Dodd; "Simon Called Peter," by Robert Keable; "Linda Lee, Inc.," by Louis Joseph Vance; "Big Peter," a British melodrama, by Archibald Marshall; "Dancers in the Dark," a runner-up to "The Beautiful and the Damned," by Dorothy Speare; "Mr. Prohack," Arnold Bennett's story showing how sudden riches need not mean disaster; "Crome Yellow," by Aldous Huxley; "The Kingfisher," by Phyllis Bottome; "Birthright," by T. S. Stribling; "Way of Revelation," by Wilfrid Ewart; "Oh, Susanna!" a novel of seafaring, by Meade Minnegerode; "The Secret Places of the Heart," by H. G. Wells; "Life and Death of Harriet Frean," by May Sinclair; "The Rustle of Silk," by Cosmo Hamilton; "The Great Prince Shan," by E. Phillips Oppenheim; "Intrusion," by Beatrice Kean Seymour; "Playing With Soul," by the Countess de Chambrun; "The Tale of Triona," by W. J. Locke; "Pippin," by Archibald Marshall; "Spinster of This Parish," by W. B. Maxwell; "Cappy Ricks Retires," by Peter B. Kyne; "The Cathedral," by Hugh Walpole; "The Three Lovers," by Frank Swinnerton; "The Judge," by Rebecca West; "The Just Steward," by Richard Dehan; "December Love," by Robert Hichens; "Spellbinders," by Margaret Culkin Banning; "On Tiptoe," by Stewart Edward White; "The Mother of All Living," by Robert Keable; "The Red Knight," by Francis Brett Young; "Valley Waters," by Charles D. Stewart; "The Driver," by Garet Garrett; "Fielding Sargent," by Elsa Barker; "Black Pawl," by Ben Ames Williams; "Command," by William McFee; "Certain People of Importance," by Kathleen Norris; "Babel," by John Cournos; "Heartbeat," by Stacy Aumonier; "Captain Blood," by Rafael Sabatini; "Peregrine's Progress," by Jeffery Farnol; "The Man Who Lived in a Shoe," by Henry James Forman; "The Evil Shepherd," by E. Phillips Oppenheim; "A Vagrant Tune," by Bryan T. Holland; "Captain Sazarac," by Charles Tenney Jackson; "In the Days of Poor Richard," by Irving Bacheller; "A More Honorable Man," by Arthur Somers Roche; "Anne Severn and the Fieldings," by May Sinclair; "Old Crow," by Alice Brown; "The Red Tremaynes," by Eden Phillpotts; "Escape," by Jeffery E. Jeffery; "One of Ours," by Willa Cather; "The Room," by C. B. Stern; "Tutor's Lane," by Wilmarth Lewis; "The Love Story of Aliette Brunton," by Gilbert Frankau; "The Wind Bloweth," by Donn Byrne; "Fool's Hill," by Leona Dalrymple; "Her Unwelcome Husband," by W. L. George; "Flowing Gold," by Rex Beach; "The Vehement Flame," by Margaret Deland; "Martin Pippin in the Apple Orchard," by Eleanor Farjeon; "Judith of the Godless Valley," by Honoré Willsie; "Rough-Hewn," by Dorothy Canfield; "1492," by Mary Johnston; "Joseph Greer and His Daughter," by Henry Kitchell Webster; "Still Life" and "The Things We Are," by John Middleton Murray; "The Breaking Point," by Mary Roberts Rinehart; "One Thing Is Certain," by Sophie Kerr.

Glancing over the year's fiction in the large, we become aware of an inclination to break away from novels of the "Moon-Calf" type. A healthful sign, this, as we look at things. Ben Hecht's "Gargoyles" appears also to belong to an order doomed to the discard. Work fulfilling none of the promise of his "Erik Dorn." Mystery stories, persistently dear to the hearts of the general readers, came forth in multitude in 1922. The success of "Captain Sazarac" and "Captain Blood" indicated a renewed interest in good and ruddy tales of piracy.

The year past revealed a still further advance in the movement to establish books of the play firmly in the lists of current literature. Two good results are quite possible from this movement. Knowledge of the dramatic way of telling a story may be extended usefully among the readers of the land; writers of plays may be moved to practise a greater clarity and precision of style. To make a hit at once in the library and on the stage would seem to be an object worth working for.

We have neglected to mention in this review the books of humor which came from the presses of last year. There were lots of them. Most of the lot held laughter for a moment. We recall no classic of comicality among them. Absent from our reckoning too are the innumerable handbooks of trades and professions, and the multiplied guides to such novelty outfits as those of the radio system. To give place and title to these and to the whole run of publications for this and that would require the pages upon pages of a cumulative index. If we knew of any subject which had not its share in the literature of 1922, we should feature it gladly in fullface print.

## THE BEST SELLERS OF 1922.

The final table of best-selling books in the American trade, in 1922, has been prepared by the Bookman, now under the editorship of John Farrar, from month-to-month reports made to the magazine. The list, comprising ten titles each in fiction and in general literature, is as follows:

### FICTION.

"If Winter Comes," by A. S. M. Hutchinson.
"Helen of the Old House," by Harold Bell Wright.
"Her Father's Daughter," by Gene Stratton-Porter.
"The Last Man," by Zane Grey.
"Brass," by Charles G. Norris.
"Head of the House of Coombe," by Frances Hodgson Burnett.
"Main Street," by Sinclair Lewis.
"Gentle Julia," by Booth Tarkington.
"Marie Chapdelaine," by Louis Hemon.
"Robin," by Frances Hodgson Burnett.

### GENERAL.

"Outline of History," by H. G. Wells.
"Queen Victoria," by Lytton Strachey.
"The Mirrors of Washington," Anonymous.
"The Americanization of Edward Bok," by Edward Bok.
"Story of Mankind," by Hendrik Van Loon.

"The Mirrors of Downing Street," Anonymous.
"The Mind in the Making," by James Harvey Robinson.
"Woodrow Wilson as I Know Him," by Joseph P. Tumulty.
"Painted Windows," Anonymous.
"Outwitting Our Nerves," by Jackson and Salisbury.

Not all the books here named are of last year's publication. Some of them have been carried over from the preceding season. Nor, if the lists were to be revised in accord with the returns merely of the last quarter of 1922, would they stand as given herewith. Reading times change and best-sellers change with them. It may be added that during the year these novels also made brief appearances among the best sellers: "Pride of Palomar," by Peter B. Kyne; "This Freedom," by A. S. M. Hutchinson; "The Breaking Point," by Mary Roberts Rinehart; "The Country Beyond," by J. O. Curwood; "The Brimming Cup," by Dorothy Canfield; "Three Soldiers," by John Dos Passos; "The Girls," by Edna Ferber; "Saint Teresa," by H. S. Harrison; "Cytherea," by Joseph Hergesheimer; "The Vehement Flame," by Margaret Deland; "Alice Adams," by Booth Tarkington; "Glimpses of the Moon," by Edith Wharton; "Certain People of Importance," by Kathleen Norris and "Babbitt," by Sinclair Lewis. Also brief appearances on the general list were made by "Margot Asquith," "The Outline of Science" and "The Conquest of Fear."

## ART OUTLOOK OF THE YEAR.

By Henry Tyrrell.

AMERICA is absorbing as never before the historic art treasures of the world. At the same time the practical development of native arts and crafts in all directions goes forward to meet and remould tradition, in the light of new accessions from abroad. New York, as metropolis and entreport of the country, becomes more a. more each year the modern centre, in all that term implies, for present and future artistic activity.

From every quarter of the globe the heirlooms of antique art are being shipped by dealers to enrich our museums and private galleries, which latter already are conceded to surpass in resources, if not in actual accumulations, the famous individual collections of the Old World. And, as instanced notably by the great Morgan collections, these privately gathered riches of art gravitate eventually to the public museums.

Meanwhile, aided by the ever-increasing volume of press and other pictorial publicity, this varied pageant of art passes before the eyes of millions—artists, amateurs, students, commercial designers, merchants, salespeople and laymen in general, at once raising the standard of taste and supplying the means to gratify it. Art and industry join hands. The result of this association is a dawning period of progress and cultural development along modern democratic lines, in which every individual plays either an active or a passive part, and the master artists of the future are born.

To the celebrated art collection of Joseph E. Widener at Lynnewood Hall, Philadelphia, have been added during the past year three of the major works of Rembrandt—namely, the two famous portraits of a man and a woman from the imperial Russian collection of Prince Youssupoff, at a reputed valuation of $750,000; and the third (final) version of the "Descent from the Cross," the Dutch master's greatest religious painting, at a price stated, not unplausibly, to be $500,000. This gives thirteen prime Rembrandts to the Widener collection, which already contained "The Mill," one of the Magisterial landscape paintings of the world; "The Circumcision," from the English collection of Lord Spencer of Althorpe; "St. Paul," from the Lord Wimbourne collection; the superb "Saskia," and Rembrandt's own self-portrait, from the Rothschild collection.

This Rembrandt aggregation represents the high standard maintained throughout all the historic schools represented at Lynnewood Hall, which so eminent an authority as Dr. Wilhelm R. Valentiner has called "an absolutely new type of art collections, developed in America by our private collectors—a type which undoubtedly foreshadows the great collections of the future." That is to say, a comparatively small number of works of art, but each individual piece of the very highest order in its kind, all chosen for liking as well as for quality, therefore harmonious, and arranged in settings that not only give them beautiful display but enhance their aesthetic and educational value by significant groupings and contrasts.

The opportunities now afforded for forming such a collection are quite unprecedented, as Europe cannot compete with America when heirlooms and masterpieces get into the market. The bankrupt Old World is parting with treasures once held as "priceless," and it is only the New World that has the ultimate price.

Gainsborough's "Blue Boy" ($640,000) and Sir Joshua Reynolds's "Mrs. Siddons as the Tragic Muse," from the Duke of Westminster's Grosvenor House collection, and Raeburn's "Sir Walter Scott" ($45,000) from the Burdett-Coutts sale at Christie's, are three more English pictures which have joined the innumerable caravan of European art setting toward America. The "Blue Boy" now gives added distinction to the private galleries of Henry E. Huntington, at his California residence.

These are war-time and post-war prices, but they have set a standard which is not likely to recede, and which undoubtedly has a stimulating effect on the valuation of assured American classics. Stuart, for example, has mounted as high as $75 000, while Homer, Inness and Fuller have sold latterly at from $40,000 to $50,000, and perhaps a dozen contemporaneous Americans might be named who regularly fetch from $15,000 to $30,000, which compares favorably with the French Barbizon and modern impressionist painters.

The Carnegie Institute of Pittsburgh, which holds its 22d annual exhibition in April, has its advisory committees in Paris and London. This international salon is a fixture of first-class importance. The Carnegie routine events rank with those of the Metropolitan and Brooklyn Museums, the National Academy, New York, the Pennsylvania Academy, Philadelphia, the Corcoran Gallery, Washington, and the Chicago Art Institute.

The special art collections, classes and lecture courses at the principal universities, such as Harvard, Yale, Columbia, Cornell, and Princeton, are significant developments of the last decade. The Metropolitan Museum, with an average popular attendance of over 1,100,000 annually, has a wide system of extension work, as well as continuous free lecture courses, from October to May, for members, students, industrial designers, salespeople, children, and the public generally. The still wider scope of the Brooklyn Institute and Museum, embracing music, drama and the sciences, also apportions in its schedules a liberal allowance to the arts.

The New York University, in co-operation with the Art-in-Trades Club, offers this year a novel and progressive course in interior decoration, illustrated with special loan exhibitions, and drawing upon the Metropolitan Museum's rich resources in the way of furniture, textiles, silverware, and all the decorative arts and crafts.

The Art Centre of New York, occupying its own commodious building and exhibition galleries, and now in its second year of prosperous existence, consists of a mutually co-operative organization of seven societies, as follows: American Institute of Graphic Arts, Art Alliance of America, New York Society of Craftsmen, Pictorial Photographers of America, Society of Illustrators, Art Directors Club, and the Stowaways. Its purpose is to advance the native decorative crafts and the industrial and graphic arts by bringing together all sorts and conditions of art workers for profitable publicity leading to the direct contact of art producers and art buyers.

The New York art season at full tide, with its average of 200 public art shows of various kinds simultaneously, is a spectacle not to be matched anywhere else in the world, unless possibly in Paris.

The ultimate meaning and moral of all this activity is the application of art to business, in which America bids fair to lead the world. With its inherent grandeur of architecture in commercial and public buildings, the liberal art patronage of some of its leading merchants, and the slow but unmistakable movement toward civic beautification, New York is marked for the nation's centre of art.

And withal, the great West—Middle, North and South—is in some ways outdoing the East. Take, for instance, the attendance of 58,473 persons in the first fortnight of the recent annual exhibition at the Art Institute of Chicago. All through the country there is direct and tangible evidence of the growth of art interest in the many exhibitions and sales of paintings, particularly American paintings, at the provincial museums and commercial galleries.

When the people who work find out for themselves that art is not a special privilege for the few, and that it pays to give thought to quality and embellishment even in the humblest everyday articles of utility and trade, the artistic future of the Nation is assured.

## MUSIC AND OPERA IN 1921-22.

By Deems Taylor.

A few figures will probably give the best idea of the enormous—one might say appalling—quantity of music that is heard in New York in a given year. Roughly speaking, the musical season of 1921-22 began on Sunday, Sept. 28, 1921, and ended on Sunday, May 21, 1922. During that period there were announced in the columns of The World just 997 musical events (this figure includes only such as took place on Manhattan Island; there were probably 200 additional in Brooklyn and the Bronx). Of these, twenty-three were ballet performances, 167 were orchestral concerts, 241 were operatic performances, and 567 were concerts and recitals. These were all public performances for which an admission was charged. If one included free concerts and recitals of a more or less private nature, one could safely raise the total figure to 1,200 or 1,500.

It is therefore obviously impossible in a survey such as this to give more than the briefest summary of the more important happenings of the 1921-22 season.

### OPERA.

First, both in actual number of separate presentations and in public interest, comes grand opera. Four opera companies were heard in New York last season, and there were only a few weeks when one or another of them was not giving performances.

The San Carlo Opera Company, under the management of Fortuno Gallo, played a four weeks' engagement at the Manhattan Opera House, beginning Sept. 26, 1921. The company is primarily a travelling one, without extravagant pretensions, but it gave creditable performances of the standard Italian repertoire at popular prices.

The Metropolitan Opera House opened its doors on Nov. 14 with Verdi's "La Traviata," Amelita Galli-Curci, the Italian coloratura soprano, singing the title role, and incidentally making her debut as a member of the Metropolitan Opera Company. The death of Enrico Caruso had deprived the Metropolitan of its greatest star, and there was considerable curiosity, and some misgiving, as to how the management would repair the loss.

Two of the Metropolitan's new singers, however, soon answered the question. Maria Jeritza, the Viennese soprano, who made her first appearance in Korngold's opera, "Die Tote Stadt," sprang into instant favor, made a sensational success in "Tosca," and was thereafter firmly established as a popular idol. Feodor Chaliapin, the great Russian basso, made an almost equally profound impression, although he appeared in only one role throughout the season, the name part in Moussorgsky's "Boris Godunoff."

The company gave 221 performances, of which 166 took place at the Metropolitan Opera House and ten at the Brooklyn Academy of Music, the remainder being given in Philadelphia, Pa., and Atlanta, Ga. Thirty-seven operas were presented, including four novelties and three revivals. The novelties were Erich Korngold's "Die Tote Stadt," in German, Edouard Lalo's "Le Roi d'Ys" and N. Rimsky-Korsakoff's "Snyegurochka," in French, and Mozart's "Cosi Fan Tutte," in Italian. The last two were the most interesting. The revivals, none of which was of great musical importance, were Massenet's "La Navarraise," in French, and Verdi's "Ernani" and Catalani's "Loreley," in Italian.

The new productions were generally well mounted and sung. Especially notable were Joseph Urban's scenery for "Ernani," "Le Roi d'Ys," and "Cosi Fan Tutte," and Boris Anisfeld's gorgeous settings for "Snyegurochka." Louis Hasselmans, an excellent French conductor, formerly with the Chicago Opera Company, joined the company for the second half of the season, replacing Albert Wolff, who resigned to become the head of the Opera Comique in Paris.

Titta Ruffo, the Italian baritone, made his first appearance as a member of the Metropolitan, and achieved fair success. Considerable discussion was aroused by the announcement that Geraldine Farrar, the American soprano, was to leave the company at the end of the season. Many of her admirers felt that she was being forced out, but it is probable that financial reasons played a large part in her failure to sign a new contract.

The Chicago Opera Company, under Mary Garden's direction, played a season of five weeks at the Manhattan Opera House, opening on Jan. 23, 1922, with Saint-Saens's "Samson et Dalilah." The company gave excellent performances of an extensive repertoire, including Debussy's "Pelleas et Melisande," Strauss's "Salome," and John Alden Carpenter's ballet-pantomime, "The Birthday of the Infanta." On Feb. 14 the Chicago Company gave the first New York performance of Serge Prokofieff's "The Love for Three Oranges," an opera with a fantastic and amusing libretto, but which proved rather a disappointment musically. Boris Anisfeld's colorful settings were noteworthy.

Lucien Muratore, the great French tenor, was stricken with appendicitis immediately after his first New York appearance, and did not return to the company until Feb. 23, when he appeared with Miss Garden in Fevrier's "Monna Vanna." The season as a whole was not a profitable one, and this fact, coupled with the impending sale of the Manhattan Opera House to a fraternal organization, caused the directors of the Chicago Company to announce that the current season would be their last in New York for several years.

Early in May, 1922, the Russian Grand Opera Company, an organization that had been touring the Orient, gave a season of four weeks at the New Amsterdam Theatre. The personnel and scenic equipment of the company were mediocre, but the performances gave New York operagoers a chance to hear several Russian operas that had never before been presented here, notably Dargomijsky's "Roussalka," Rimsky-Korsakoff's "The Tsar's Bride," and Chaikovsky's "Cherevichky."

### THE ORCHESTRAS.

The orchestral season was an exceptionally heavy one. The National Symphony Orchestra, founded two years previously, was merged with the Philharmonic, the latter giving 75 subscription concerts under four conductors—Josef Stransky, Willem Mengelberg, Artur Bodanzky, and Henry Hadley. The New York Symphony Orchestra, under Walter Damrosch, with Albert Coates, as guest conductor, gave 50 concerts; the Boston Symphony, under Pierre Monteux, and the Philadelphia Orchestra, under Leopold Stokowsky, gave ten New York concerts each.

The Harvard University Orchestra, a student organization, and the Cleveland Orchestra, under Nikolai Sokoloff, each gave a concert in Carnegie Hall; Pablo Casals, the cellist, conducted the New York Symphony Orchestra in two concerts, and Willem van Hoogstraten, a young Dutch conductor of exceptional ability, twice conducted the Philharmonic. He was later chosen as one of the conductors of the Stadium concerts given during the summer of 1922.

Richard Strauss, the famous German composer, visited America for the first time since 1905, and conducted the Philadelphia and Philharmonic Orchestras in ten concerts at Carnegie Hall, the Metropolitan Opera House, and the Hippodrome. The programs of these concerts were largely made up of Strauss's own orchestral works. The Society of the Friends of Music, directed by Artur Bodanzky, likewise gave ten concerts with an orchestra recruited from the players at the Metropolitan Opera House.

There were several notable performances, the most interesting of all being a concert given on Feb. 28 for the benefit of the American Academy at Rome, at which an orchestra of 300 players, made up of members of the New York Symphony, Philadelphia, and Philharmonic organizations, played an extensive program under the direction of four different conductors. The Philharmonic, under Willem Mengelberg's direction, gave five consecutive performances of Gustav Mahler's Third Symphony.

Thirty-six new works were played during the season, the most interesting being Karol Szymanowski's second symphony and Charles M. Loeffler's settings of three Irish poems (Boston Symphony), Ravel's "La Valse" (Philharmonic), Vaughan-Williams's Fantasy on a Theme by Thomas Tallis (New York Symphony) and Arnold Schoenberg's Five Orchestral Pieces (Philadelphia). Vincent d'Indy, the French composer, twice conducted the New York Symphony Orchestra in performances of

his new symphonic poem, "On the Shores of the Seas."

## SINGERS AND PLAYERS.

The recital season was marked by the return of several famous singers and by the appearance of several interesting new ones. The vocal event of the year, probably, was the reappearance of Emma Calvé, the French contralto, in her 57th year, who gave several recitals and concerts with tremendous success, her great voice being still in almost perfect condition. Edmond Clément, the French tenor, and Elena Gerhardt, the German Lieder singer, were also heard for the first time in several years.

Among the notable new singers were Edith Bennet, Maria Ivogun and Clare Dux, sopranos; Amy Ellerman, contralto; George Meader and Vladimir Rosing, tenors; John Barclay, baritone. Nina Koshetz and Feodor Chaliapin, both Russians, had been heard in New York before, but were virtually newcomers, and were notably successful in concert. Other well known singers who gave New York recitals last season were Eva Gautier, Sophie Braslau, Marguerite d'Alvarez, Ernestine Schumann-Heink, Reinald Werrenrath, Emilio de Gogorza and John McCormack. Mr. McCormack was taken seriously ill with septic sore throat in the spring and was obliged to cancel all his later engagements. For a time it was feared that he had lost his voice, but he recovered completely.

Many new violinists appeared, among them Bronislaw Huberman (his first New York visit since his appearance twenty-five years ago as a boy prodigy), Ferenc Vecsey, Emil Telmanyi, Miron Poliakin and Erna Rubenstein. The last-named, a girl of sixteen, made the most notable début of the season, appearing several times with orchestras, and giving three successful New York recitals. Most of the players whose fame is already established were heard during the season, notably Jascha Heifetz, who returned from a world tour, Erika Morini, Paul Kochanski, and Fritz Kreisler.

Four new pianists of the first rank loomed upon the musical horizon. These were Elly Ney, Artur Schnabel, Alexander Siloti and Myra Hess. The last named, an English woman, was possibly the most successful. Alfredo Casella, the Italian modernist composer, also gave several pinao recitals, and Serge Prokofieff, composer of "The Love for Three Oranges," played twice at Aeolian Hall. Other recitals included those by Harold Bauer, Ernest Schelling, Josef Hofmann, Sergei Rachmaninoff, Ossip Gabrilowitsch, Wilhelm Bachaus, Ignaz Friedman, Percy Grainger and Leo Ornstein.

A new cellist, Felix Salmond, an Englishman, made his New York début last season, with immediate success. He seems to deserve the adjective "great." No other new cellists of exceptional worth were discovered, but there was fine playing by several of the established artists, particularly Pablo Casals, Hans Kindler and Cornelius Van Vleet.

## OTHER MUSIC.

In the field of chamber music the Flonzaley, the Letz and the London Quartets gave their usual series of concerts, with a successful début by the Chicago String Quartet. Other concerts were given by the New York Chamber Music Society and the Chamber Music Art Society, two organizations that combine stringed and wind instruments.

There was considerable good choral music. The Oratorio Society, vastly improved in quality under its new conductor, Albert Stoessel, gave a good "a cappella" concert and an excellent performance of Bach's St. Matthew Passion music. The Schola Cantorum, under Kurt Schindler, performed Bach's B minor mass and gave an interesting concert of Italian music that included first American performances of Pizzetti's Lament and Malipero's St. Francis of Assisi. The Schumann Club, directed by Percy Rector Stephens, gave two farewell concerts and disbanded, after eight seasons. A fine concert of unaccompanied music was given by the St. Olaf Choir of Northfield, Minn., in the Metropolitan Opera House on January 17. The magnificent Mendelssohn Choir of Toronto gave concerts in Carnegie Hall on April 4 and 5, 1922, the first a program of unaccompanied music, the second offering, with the Philharmonic Orchestra, the first New York performance of Vaughan-Williams's Sea symphony.

There were several other organizations that cannot be strictly classed as either vocal or instrumental. Among them are the Beethoven Society, with a volunteer membership of famous artists, which gave a series of concerts; the Society of the Friends of Music, which produced choral as well as orchestral works, and the International Composers' Guild, which gave a valuable series of concerts of modern and ultra-modern music at the Greenwich Village Theatre.

## FIRST NIGHTS OF PLAYS IN NEW YORK IN 1922.

The first nights of plays produced in New York City from Jan. 1 to Dec. 1, 1922, were as follows:

"Rosa Machree," "He Who Gets Slapped," Jan. 9; "The Blue Kitten," Jan. 13; "Elsie Janis and Her Gang," Fritz Leiber in Shakespearian plays, Jan. 16; "Aglavaine and Solysette," Jan. 20; "The National Anthem," Jan. 23; "The Deluge," Jan. 27; Lambs' Public Gambol, Jan. 29; "The Voice From the Minaret," Jan. 30; "The Czarina," Jan. 31.

"Pins and Needles," "The Nest," Feb. 1; "The Pigeon," Feb. 2; "Chauve Souris," Feb. 3; "The Blushing Bride," "The Law Breaker," "Thank U," and Frank Fay's Fables, Feb. 6; "The Cat and the Canary," Feb. 7; "Fedora," Feb. 10; "Desert Sands," "Montmartre," Feb. 13; "Mme. Pierre," Feb. 15; "The French Doll," "To the Ladies," Feb. 20; "The Rubicon," "For Goodness Sake," Feb. 21; "Mrs. Warren's Profession," Feb. 22; "Bavu," Feb. 25; "Your Woman and Mine," Feb. 27.

"Gulbor," March. 1; "The First Man," March 4; "Back to Methuselah," "Broken Branches," "Madeline of the Movies," and "Up the Ladder," March 6; "The Rose of Stamboul," March 7; "The Hairy Ape," March 9; "The Hotel Mouse," "The First Fifty Years," March 13; "The Truth About Blayds," March 14; Ruth Draper's Recitals, beginning March 19; "Voltaire," and brief return of "Liliom," March 20; "The Hindu," March 21; "Candida," "Just Because," March 22.

"The Green Ring," "Taboo" (special matinees), April 4; "Letty Pepper," April 10; "Make It Snappy," April 13; De Wolf Hopper's Comedians, April 15; "The Goldfish," "Ladybug," April 17; "Salut du Monde," April 22; "The Shadow," "The Charlatan," "Creditors," April 24; "The Night Call," "La Rafale" (French), April 25, "The Bronx Express," April 26; "Chains of Dew," April 27; "An Actress," April 30.

"Partners Again," "What the Public Wants," and "Le Retour," May 1; "The Red Geranium," "The Advertising of Kate," "Go Easy, Mabel," "La Belle Aventure," May 8; "Billeted" (revival), May 9; "Fanny Hawthorne," May 11; "Kempy," May 15; "The Rotters," "Salome," May 22; "Able's Irish Rose," "Makers of Light," May 23; "The Drums of Jeopardy," "Red Pepper," May 29; "Heads I Win," May 30.

"The Pinch Hitter," June 1; "Ziegfeld Follies," "The Rivals," June 5; "The House of Lorrimer," June 6; "Pin Wheel Revue," June 15; "Strut Miss Lizzie," June 19; "Morn to Midnight," June 26.

"Spice of 1922," July 6; "Sue Dear," July 10; "Plantation Revue," July 17; "Ginger Box Revue," July 31.

"Whispering Wires," Aug. 7; "Shore Leave," Aug. 8; "The Monster," Aug. 9; "Lights Out," "Lonely Wives," Aug. 14; "Manhattan," Aug. 15; "The Woman Who Laughed," Aug. 16; "Fools Errant," "Tons of Money," Aug. 21; "The Old Soak," "Daffy Dill," Aug. 22; "A Serpent's Tooth," Aug. 24; "Scandals," "The Gingham Girl," Aug. 28; "I Will if You Will," "The Torch Bearers," Aug. 29; "So This Is London," Aug. 30; "Her Temporary Husband," Aug. 31.

"Molly Darling," Sept. 1; "Better Times," Sept. 2; "Hunky Dory," "Sally, Irene and Mary," "The Endless Chain," Sept. 4; "The Plot Thickens," Sept. 5; "Wild Oats Lane," Sept. 6; "Dreams for Sale," Sept. 11; "Greenwich Village Follies," "Why Men Leave Home," Sept. 12; "The Awful Truth," Sept. 18; "Orange Blossoms," "It's A Boy," Sept. 19; "Banco," "The Passing Show," Sept. 20; "East of Suez," Sept. 21; "The Exciters," Sept. 22; "La Tendresse," "Spite Corner," "On The Stairs," Sept. 25; "Rose Bernd," Sept. 26; "Loyalties," Sept. 27; "Thin Ice," Sept. 30.

"Malvaloca," "The Yankee Princess," "The Lady in Ermine," Oct. 2; "Dolly Jordan," "That Day," Oct. 3; "Revue Russe," Oct. 5; "The Evergreen Lady," Oct. 7; "R. U. R.," Oct. 9; "Queen o' Hearts," "The Faithful Heart," Oct. 10; "Swifty," Oct. 16; "To Love," Oct. 17; "The Fool," "Music Box Revue," Oct. 23; "The Last Warning," Oct. 24; "The World We Live In," "Persons Unknown," Oct. 25; "Springtime of Youth," Oct. 26; "Six Characters in Search of an Author," Oct. 30.

"Forty-niners," "Up She Goes," Nov. 6; "Rain," Nov. 7; "Little Nellie Kelly," "The Adventuress" (French special performances), "Merton of the Movies," Nov. 13; "The Love Child," "The Romantic Age," "Virtue?" Nov. 14; "Hamlet," Nov. 16; "The Texas Nightingale," "The Lucky One," "Comedie Francaise," Nov. 20; "The Bootleggers," "Liza," Nov. 27; "The Bunch and Judy," Nov. 28.

## AMERICAN RELIEF AID FOR RUSSIAN FAMINE VICTIMS.

Prepared for The World Almanac by the American Relief Administration, Herbert Hoover, *Chairman*, 42 Broadway, New York City.

The American Relief Administration, a private charitable organization, has, since 1919, carried on child-feeding or general relief work in twenty-three European countries, the most extensive operations having been in the following: Austria, Armenia, Czechoslovakia, Constantinople, Free City of Danzig, Finland, Hungary, Jugo-Slavia, Esthonia, Lithuania, Latvia, Northern France, Poland, Roumania, and Russia, and with the American Friends Service Committee in Germany. In Austria, Czechoslovakia and Poland, the American Relief Administration turned over its relief work to organizations in these countries subsidized by their Governments. Prior to June, 1922, the American Relief Administration had withdrawn its work from all the other countries excepting Russia and Turkey.

During the early summer of 1921, reports began to appear in the press of a severe drought in the great grain producing region of Russia along the Volga River. By the first of July it was obvious that this region was threatened with one of the worst famines in history.

During July, Maxim Gorky, in behalf of the Russian people and with the approval of the Soviet Government, appealed to the world for aid. The American Relief Administration, through its Chairman, Herbert Hoover, answered this appeal and offered its service and that of co-operating organizations to combat the famine, with the proviso that Americans held as prisoners in Russia should be released. On Aug. 20, 1921, an agreement between the American Relief Administration and Soviet Russia was signed at Riga, with practically the same stipulations that had been agreed to by the Governments of the countries in which other American Relief Administration missions have operated.

The Soviet Government agreed to bear all costs of discharging, storage, handling, and transportation within Russia, and from the ports in countries adjacent to Russia through which relief supplies were to be imported, as well as all local costs of administration, preparation and distribution. On its part the American Relief Administration, in accordance with its fundamental policy, agreed to distribute relief without regard to race, religion or social or political status and to permit none of its personnel to engage in commercial or political activity.

### EXTENT OF THE FAMINE.

The first areas affected by the drought comprised the provinces along the Volga and Kama Rivers in Eastern European Russia: Astrakhan, Tzaritzin, the Kirghiz Republic, German Communes, Saratov, Simbirsk, the Tartar Republic, of which Kazan is the capital, the Mahri and Chuvash oblasts, Ufa, Orenburg and the Bashkir Republic. The effects of a similar drought in the southern Ukraine were not greatly felt until the spring of 1922, when the famine region was extended to include Odessa, Nikolayevsk, Ekaterinoslav, Zaporosh, Donetz, and the Crimea. As a natural result of the food shortage throughout Russia, a number of larger cities, particularly Petrograd and Moscow, were affected.

Subsequently, in the summer of 1922 it was found necessary to extend the relief work on a smaller scale into the provinces of Perm, Viatka, Votskaya, Nijni-Novgorod, and Penza.

Headquarters of the American Relief Administration were established in Moscow in September, 1921, and feeding was immediately started on an initial program of 1,000,000 children, which was reached on the first of January, 1922, and extended until on Aug. 1, 1922, the American Relief Administration was feeding approximately 10,500,000 destitute individuals in the famine areas along the Volga River, in the Ukraine and Crimea, and in the cities of Petrograd and Moscow. Of this number 4,200,000 were children.

### AT A COST OF $60,000,000.

The total resources of the American Relief Administration for Russian relief have amounted to approximately $60,000,000. These resources have been derived as follows:

The Congress of the United States, on Dec. 24, 1921, authorized the use of $20,000,000 still remaining with the United States Grain Corporation for the purchase of corn, seed grain and preserved milk for Russian relief; it also authorized the use of $4,000,000 worth of surplus United States Army medical supplies. The Soviet Government gave the American Relief Administration $11,433,000 for the purchase of seed; the American Red Cross allocated $3,600,000 toward the American Relief Administration medical program; the American Jewish Joint Distribution Committee donated approximately $5,000,000 for general relief. The balance has been contributed by co-operating organizations or directly from the American public.

Between Jan. 1 and Aug. 1, 1922, the American Relief Administration shipped into Russia a total of over 750,000 tons of American food, seed, medical supplies and clothing.

In addition to its relief program the American Relief Administration undertook the largest single medical relief program that has ever been carried out. This program included the rehabilitation of hospitals and ambulatories throughout the famine regions with medicines and equipment, the sanitation of towns and cities and the inoculation against typhoid, paratyphoid, smallpox and cholera, of hundreds of thousands of persons.

To enable persons in other countries to send food to their relatives and friends in Russia, the American Relief Administration established a food remittance system whereby any one might send the sum of $10, or multiples thereof, to the New York, London or European offices of the American Relief Administration for which a standard package of scientifically selected foodstuffs was delivered to the designated beneficiary anywhere in Russia. Up to Nov. 1, 1922, over 440,000 persons had purchased food remittances to the total value of over $9,400,000.

Because the lack of clothing is almost as acute as the lack of food, the American Relief Administration in October, 1922, set up a clothing remittance system similar to the food remittance plan. For $20 a clothing package is delivered in Russia.

According to the official figures of the Soviet Government the Russian harvest of 1922 was sufficient, if efficiently and evenly distributed, to feed the adult population. There are, however, still a great number of orphans and refugees who are in need. It is estimated that the total number of 3,000,000 children will be in need of food during the winter and spring 1922-23. The American Relief Administration has sufficient resources to care for 2,000,000 of these children.

In addition to its Russian program, the American Relief Administration, with specially donated funds, has given extensive relief to Russian refugees in Constantinople and to intellectuals in Poland and Austria.

### APPRECIATION FROM RUSSIA.

Maxim Gorky wrote Herbert Hoover this letter, thanking America for the past year's work of the American Relief Administration in Russia:

"BERLIN, July 30, 1922.

"Prof. Geron Davis informs me that you kindly consented to send individual packages to scientists and men of letters in Moscow and Petrograd. Needless to say your generous assistance is worthy of the greatest praise. Nevertheless, permit me to express my feelings of gratitude to all citizens of the United States of America and complete satisfaction with the humanitarian work of the American Relief Administration, of which you are Chairman. In the past year you have saved from death three and one-half million children, five and one-half million adults, fifteen thousand students, and have now added two hundred or more Russians of the learned professions. I am informed that this charity cost America fifty-nine million dollars, figures which are sufficiently eloquent.

"In all the history of human suffering I know of nothing more trying to the souls of men than the events through which the Russian people are passing, and in the history of practical humanitarianism I know of no accomplishment which in terms of magnitude and generosity can be compared to the relief that you have actually accomplished. It seems to me very important that such great generosity developed during these past years of universal cruelty—cruelty which is ruining Europe, following as it does the terrible war which shook the foundations of European culture. It is not only the physical help which is valuable but the spiritual succor to the minds of mankind which are tormented by the events of the past years and sick, due to cruelty and hate.

"The generosity of the American people resuscitates the dream of fraternity among peoples at a time when humanity greatly needs charity and compassion. Your help will be inscribed in history as a unique, gigantic accomplishment worthy of the greatest glory and will long remain in the memory of millions of Russian children whom you saved from death. I believe that the recollection of American self-sacrifice in saving children will make these same children better, more generous men and women. Permit me, with all my heart, esteemed Mr. Hoover, to wish you and your assistants continued good health and stout hearts."

## THE AMERICAN RED CROSS.

(Contributed by the Organization.)

THE American Red Cross operates under its charter by act of Congress of Jan. 5, 1905, "to furnish volunteer aid to the sick and wounded, or armies in time of war in accordance with the conventions of Geneva; to act in matters of voluntary relief and in accord with the military and naval authorities as a medium of communication between the American people and their army and navy; to continue and carry on a system of national and international relief in time of peace and to apply the same in mitigating the suffering caused by pestilence, famine, fire, floods and other great national calamities, and to devise and carry on measures for preventing the same."

Warren G. Harding is President of the American Red Cross and John Barton Payne is Chairman of the Central Committee, the governing body composed of eighteen persons, six of whom represent the Federal Government. National Headquarters is located at Washington, D. C., and from it the activities of 3,627 chapters are directed through six divisional headquarters. From National Headquarters also relief operations in foreign countries are directed.

The annual report of the American Red Cross is audited by the War Department and transmitted to Congress through that department. The report for the last fiscal year shows that 2,679 Red Cross chapters were assisting disabled World War veterans and their families, in addition to which the National Organization maintained 604 Red Cross workers in Government hospitals to assist Veterans' Bureau patients. Members of the army and navy were served by the Red Cross at 272 posts and stations.

During the year the Red Cross administered emergency relief and assisted in the rehabilitation of victims in seventy-two disasters. Public Health nurses were maintained by 1,036 chapters; health centres by 286; other health activities by 620; first aid classes by 272; life-saving classes by 324; home hygiene and care of the sick classes by 523; nutrition work by 205. Volunteers gave a variety of services; production was carried on in 1,302 chapters, while by 742 chapters Red Cross home service was extended to assist the civilian population. The following shows the expenditures by the national organization (exclusive of chapters) of the Red Cross during the fiscal year ended June 30, 1922, and budget for the fiscal year ending June 30, 1923:

| | Expenditures Fiscal Year 1921-1922. | Budget Fiscal Year 1922-1923. |
|---|---|---|
| Assistance to disabled ex-service men and women | $2,665,132.06 | $3,030,692.90 |
| Service and assistance to 3,600 Red Cross Chapters and their branches | 1,818,450.39 | 1,293,240.80 |
| Disaster relief | 911,222.60 | 750,000.00 |
| Hospital and other services to the regular army and navy | 360,618.26 | 306,300.00 |
| Assist'nce to oth. organizat'ns co-operat'g in wk. related to Red Cross activities | 163,527.85 | 200,000.00 |
| Other activities in the United States | 246,254.76 | 130,406.99 |
| Med. & hospital supplies for dist. by American Relief Adm. in Russia | 1,182,185.96 | 1,834,044.83 |
| Completion child health programme in Europe | 1,990,890.02 | 641,314.10 |
| Completion and liquidation of general relief operations abroad | 2,124,371.84 | 810,718.15 |
| Assistance to League of Red Cross Societies | 350,000.00 | 200,000.00 |
| Management | 654,193.95 | 493,154.70 |
| Total | $12,475,847.69 | $9,739,872.47 |

American National Red Cross expenditures abroad on account of the World War, July 1, 1917, to June 30, 1922:

| | | | | | |
|---|---|---|---|---|---|
| France | $141,536,000 | Balkans | $12,595,000 | Vienna, Budapest | $5,069,000 |
| Belgium | 4,472,000 | Palestine & Nr. East. | 9,538,000 | Siberia | 21,602,000 |
| Italy | 23,654,000 | Poland | 17,258,000 | Other foreign | 21,142,000 |
| Great Britain | 13,553,000 | Czecho-Slovakia | 875,000 | | |
| Switzerland | 1,388,000 | Russia & Baltic States | 13,087,000 | Total | $285,769,000 |

From April 1, 1914, to July 1, 1917, the period before the United States entered the war, the expenditures abroad were $3,337,000.

Revenues of National Headquarters during the fiscal year ending June 30, 1922, were $4,906,385.11, or $7,569,462.58 less than expenditures. There having been at the beginning of the fiscal year a balance of $33,507,769.93, there was on June 30, 1922, a balance of $25,938,307.35. There having been budgeted for the fiscal year ending June 30, 1923, $9,739,872.47 and $12,617,204.90 set aside for continuing certain specified activities, there remained June 30, 1922, unallotted funds totalling $3,581,229.98, in addition to which there were total endowments and a general reserve totalling $7,713,262.58. The foregoing figures do not include chapter revenues and expenditures.

The membership of the American Red Cross at the end of the last fiscal year was 4,000,000.

## NEAR EAST RELIEF.

Near East Relief operates under its charter by act of Congress of Aug. 6, 1919, "to provide relief and to assist in the repatriation, rehabilitation, and re-establishment of suffering and dependent people of the Near East and adjacent areas; to provide for the care of orphans and widows and to promote the social, economic and industrial welfare of those who have been rendered destitute, or dependent directly or indirectly, by the vicissitudes of war, the cruelties of men, or other causes beyond their control." Its field of operation is Constantinople, and the adjoining territory in European Turkey, Thrace, Anatolia, Armenia, Cilicia, Kurdistan, Syria, Palestine, Mesopotamia, Persia and Transcaucasia, including Russian Armenia and Georgia. The administrative centres abroad are at Constantinople, Beirut, Tiflis and Bagdad. Annual report is made to Congress.

The organization is indorsed by President Harding and Congress; by the National Information Bureau; by the churches, Protestant, Catholic and Jewish; by civic, commercial, industrial, fraternal, educational and social organizations; by American and foreign officials in Europe, Turkey and other countries of the Near East.

The Central headquarters of Near East Relief are at 151 Fifth Ave., New York City. In every state of the Union there is a branch office, and most of the larger states have a State Director. European headquarters are at Geneva.

The officers of Near East Relief are: James L. Barton, Chairman; John H. Finley, Vice Chairman; Charles V. Vickrey, General Secretary; Cleveland H. Dodge, Treasurer; and Frank L. Polk, General Counsel. The Executive Committee are: Edwin M. Bulkley, Chairman; James L. Barton, Cleveland H. Dodge, Abram I. Elkus, Harold A. Hatch, William B. Millar, Henry Morgenthau, George A. Plimpton, Walter George Smith, Charles V. Vickrey, and Stanley White.

This organization succeeded the Armenian and Syrian Relief Committee originally established in 1915 following an appeal for American relief to victims of massacres coming from Henry Morgenthau, then United States Ambassador to Turkey.

Near East relief has saved at least 1,000,000 women and children from starvation. Approximately 300 American workers compose its present overseas staff, with hundreds of native helpers. It maintains 38 hospitals and 59 clinics; 88,401 patients were recorded in the last monthly report. It supports 124 orphanages; 64,107 children are wholly dependent; 50,000 others partially dependent. In addition, Near East Relief has a constructive program of training for self-support—industries of various types adapted to the vocational training of men, women and children being conducted at most relief stations, and in connection with the orphanages. At Rodosto 5,000 refugees were established on farm lands; agricultural development of 16,000 acres organized in the Caucasus. The total value of Near East Relief operations to date approximates $73,000,000.

The Auditor's Report, covering the period ending Dec. 31, 1921, as submitted in the report made to

Congress, shows that up to then the net cash relief contributions had been $51,361,805; that relief payments had been made amounting $49,290,499; that relief appropriations had been made in addition of $2,507,574, to be cared for by the incoming contributions.

In addition the Near East Relief received flour previous to 1921 through the United States Relief Administration valued at $12,800,000, and it values the buildings, land, transportation, equipment, service, food and other supplies contributed in the Near East at $5,000,000. Cost and other supplies received since this report to Congress was printed bring the amount up to the $73,000,000 mentioned above.

When the Smyrna disaster occurred Near East Relief food and supplies accumulated for regular orphanage work were rushed from Constantinople warehouses to the scene, and personnel conducted evacuation service, feeding, medical and personal service stations at the centres sought by fleeing refugees before and after the fire. Later, under the direction of President Harding's Co-ordinating Committee, Will H. Hays, Chairman; Archibald B. Roosevelt, Executive Secretary, the work was carried on to meet the appalling emergency which rapidly spread through Eastern Thrace to Greece.

In appointing this committee, which consists of the Governors of the several States and over 100 citizens of prominence throughout the United States, President Harding in his telegram to each, said: "More than a half-million suffering human beings, the majority women and children, are dependent on the benevolence of America. The Red Cross and Near East Relief committees, working in harmony and supported by all benevolent organizations, are responding to the call. The Co-ordinating Committee is helping develop the money raising campaign and bringing into concerted action all the forces possible."

## SHEPPARD-TOWNER MATERNITY ACT.

The Sheppard-Towner Act "for the promotion of the welfare and hygiene of maternity and infancy and for other purposes," passed by the Senate by a vote of 63 to 7, and by the House by a vote of 279 to 39, was signed by the President and became a law on Nov. 23, 1921.

The act provided for the current fiscal year (1922) $10,000 for each State accepting the provisions of the act, and an additional sum of $1,000,000. Of this additional amount, not more than $50,000 was to be used for Federal administration, and the remainder was to be apportioned to the States and granted, if matched dollar for dollar by State appropriations, $5,000 to each State, the remainder to be apportioned on the basis of population.

After the fiscal year 1921-22, the authorized annual expenditure is $5,000 unmatched to each State and to be matched dollar for dollar, an additional $5,000 plus a prorated amount of the remaining $710,000 of the additional $1,000,000, after a maximum of $50,000 has been deducted for Federal administration.

The Federal board was changed from a Board Advisory to the Children's Bureau to the Federal Board of Maternity and Infant Hygiene, composed of the chief of the Children's Bureau, the Surgeon General of the U. S. Public Health Service, and the Commissioner of Education. The board is given authority to approve or disapprove the plans submitted by the State, and to withhold further certification of the Federal funds to a State if the money is not properly expended.

Local administration in the States is in the Child Hygiene or Child Welfare Division of the State agency of health, or, where such a division does not exist, the agency designated by the State.

The board has laid down no plan of work which a State must follow, nor has it made approval of plans contingent on complying with certain conditions, each plan being considered on its merits.

The bill was the direct outgrowth of the series of investigations on maternal and infant mortality made by the Federal Children's Bureau during the nine years of its existence. These investigations, besides dealing with the social, economic, industrial and civic conditions surrounding mothers and infants, reveal a morbidity and a mortality which, authorities agree, are to a great extent preventable.

In 1915 the infant mortality rate in the United States birth registration area was 100 per thousand births and the maternal mortality rate 6.1. In 1920 the infant mortality rate had fallen to 85.8, but the maternal death rate was 8. The total number of maternal deaths in the death registration area in 1920 was 16,776.

The States that are not in the birth registration area are: Alabama, Arizona, Arkansas, Colorado, Florida, Georgia, Idaho, Illinois, Iowa, Louisiana, Missouri, Nevada, New Mexico, North Dakota, Oklahoma, South Dakota, Tennessee, Texas and West Virginia.

Up to date 42 States have accepted the terms of the act—all except Maine, Massachusetts, Rhode Island, New York, Louisiana, and Washington. Twelve of these acceptances (New Hampshire, Delaware, New Jersey, Maryland, Virginia, South Carolina, Georgia, Kentucky, Mississippi, Minnesota Oregon and New Mexico) are by State Legislatures and the remaining 30 by Governors pending the next regular session of the Legislature.

The New York Legislature, though refusing to accept the act on the ground of paternalism, increased by $130,000 its previous child hygiene appropriation of $30,000 and created a division of maternity and infancy.

Payments have been made up to Oct. 30, 1922, to 41 States from 1922 funds, and to 38 States from 1923 funds. Of the 41 States that have received payments from 1922 funds, 22 matched their full allotment, 5 matched part of their allotment, and 10 accepted the $5,000 granted outright without matching. Of the 38 States that have received payments from 1923 funds, 13 matched their full allotment, 15 matched part of their allotment, and 10 accepted the $5,000 granted outright without matching.

The maximum amounts available to the States for the fiscal year ending June 30, 1922, were: Granted by the Federal Government if matched by the State, apportionment based on population, $237,500; to it is added a grant outright of $5,000 to each State, $240,000; grand total $477,500.

The maximum amounts available to the States for the fiscal year ending June 30, 1923, are:

| STATE. | Apportioned on basis of population. | Granted if matched. Total (if matched)* | Grand Total†. |
|---|---|---|---|
| | | *Cents omitted* | |
| Total | $710,000 | $950,000 | $1,190,000 |
| Alabama | 15,836 | 20,836 | 25,836 |
| Arizona | 2,253 | 7,253 | 12,253 |
| Arkansas | 11,817 | 16,817 | 21,817 |
| California | 23,112 | 28,112 | 33,112 |

*Includes $240,000 granted if matched ($5,000 to each State).

†Includes $240,000 granted outright ($5,000 to each State) in addition to amounts granted if matched.

The State of Massachusetts, by order of the Legislature, attacked the constitutionality of the law in a petition to the Supreme Court on Sept. 8, 1922.

## IRISH FREE STATE.

The Anglo-Irish Treaty which is the first step toward the establishment of the Irish Free State was signed at London by the plenipotentiaries of Dail Eireann and the British Cabinet early on the morning of Dec. 6, 1921. (See the WORLD ALMANAC for 1922 for the full text of the treaty.) It was ratified in principle by the British Parliament ten days later and was subsequently converted into an act (the Irish Free State Agreement Act), passing its final reading on March 31, 1922, and receiving the royal assent on the same day.

After a prolonged debate in the Chamber of Deputies (Dail Eireann) it was ratified, Jan. 7, 1922, on behalf of the Irish Republican Government, by a vote of 64 to 57. In this debate Arthur Griffith, chief of the delegation that had helped frame the compact, took no part, leaving the matter of its defense entirely in the hands of Michael Collins whose ability as a parliamentarian was until then scarcely known. He managed to secure its ratification on the plea that the treaty was not a final, terminating agreement but a first measure toward peace and to be entirely superseded by another document—the Constitution.

"It gives Ireland," he declared, "not that ultimate freedom that all nations hope for, but freedom to achieve that end."

The opposition to the treaty was led by President Eamon De Valera, who characterized it as a "surrender of sovereign rights in return for a vague promise." He made several unsuccessful attempts to have the treaty placed on the table in order that he might introduce a new motion for a substitute agreement which was referred to in the debates as "Document No. 2." The treaty was passed, however, without alteration and two days later, Jan. 9, De Valera resigned as President of the republic. A motion to re-elect him, introduced in the Chamber immediately on receipt of his resignation, failed of acceptance by two votes.

On Jan. 10, 1922, Arthur Griffith, the founder of Sinn Fein, and Vice President since 1919, was elected President to succeed De Valera, receiving the support of a large portion of "De Valera's minority," in consequence of his having pledged to "carry on the republic" as a government separate and distinct from the Provisional Free State Government as provided for in the treaty.

Griffith chose as his Cabinet: Michael Collins, Minister of Finance; George Gavan Duffy, Minister for Foreign Affairs; Eamon Duggan, Minister for Home Affairs; William Cosgrave, Minister for Local Government; Kevin O'Higgins, Minister for Economic Affairs; Richard Mulcahy, Minister for Defense; Ernest Blythe, Minister for Trade and Commerce; Michael Hayes, Minister for Education; Joseph McGrath, Minister of Labor; and J. J. Walsh, Postmaster General.

Exercising his prerogatives as President, Griffith appointed Michael Collins as Chairman of the Provisional Government which was to take over the management of the British regime in Ireland. Thus appointed, Collins convoked the Parliament for Southern Ireland which had been provided in the Government of Ireland Act (Westminster) of 1920 but which had never sat owing to the refusal of the Irish to recognize Britain's right to create it. The membership of this Parliament corresponded to that of Dail Eireann with the exception that two Unionist members, elected to represent Trinity College, Dublin, were included also. It convened on Jan. 14, "De Valera's minority" abstaining, and ratified in its turn the Anglo-Irish Treaty. The vote taken was unanimously in favor of ratification.

Two days later, then (Jan. 16) Michael Collins with his staff of assistants accepted the "surrender" of Dublin Castle. A slight hitch in the ceremonies was caused by Collins's refusal to take the oath of Privy Councillor to His Majesty, George V., but administrative powers were handed over on his affirming that he intended to do his utmost to put the treaty into effect and would take the oath after a popular election on the question of the treaty should have released him of his oath to the republic. This irregularity was set right by the Lord Lieutenant's explaining that Collins was "governing by courtesy" and as his own deputy, not the King's. Finally, on Jan. 19, the Post Office was handed over to Irish control.

In the meanwhile, on Jan. 12, a general amnesty was granted by royal warrant to all prisoners held on charges of having participated in the Irish uprising. More than a thousand were involved, all of whom were released within a few hours of the issuance of the warrant. On Jan. 13, the first detachment of "Black and Tans" was withdrawn from Ireland and three days later the first contingent of military.

On Jan. 15, De Valera, as President of the military and political organization of Sinn Fein, convoked the Executive Council and succeeded in putting through his demand that the Ard Fheis (Supreme Assembly) meet on Feb. 7 to discuss the split that had occurred in the party as a result of the divergent attitudes taken with reference to the treaty.

### NEGOTIATIONS OVER THE BOUNDARY.

The Craig-Collins pact was entered into on Jan. 21, following an accidental meeting on a railroad train between Michael Collins and Sir James Craig, Premier of the Belfast Parliament. In this it was agreed: (1) That the Boundary Commission provided for in the treaty to re-arrange the line of demarcation between the North and the South should be altered so as to be made up of one representative for each of the two Parliaments; (2) that the boycott of Ulster in the South should be discontinued, in return for which the Northern Government should protect Catholics as against pogroms and unfair discrimination in industry; (3) that both Governments should unite to facilitate the settlement of the railroad strike that had been threatening for several months; (4) that both Governments should endeavor to find a more suitable federal agency for dealing with problems affecting all Ireland than is provided by the Council of Ireland, the constitution of which was included in the Government of Ireland Act of 1920; (5) that a further meeting should be held to discuss the question of an amnesty to be granted to political prisoners taken since the truce of July 11, 1921, and not, therefore, released under the general amnesty of Jan. 12.

At a second meeting between Craig and Collins in Dublin on Feb. 2, Collins demanded that Counties Tyrone and Fermanagh which were over 60 per cent. Sinn Fein be ceded to the Free State along with large portions of other counties and the City of Derry. Craig declared that the North was prepared to submit to the Boundary Commission only questions dealing with the "rectification in detail" of the boundary which was to remain substantially where it was. The conference broke down and Craig went straightforth to London where he was received by the Prime Minister on Feb. 3.

Two days after this, Collins was in London with Duggan and Griffith, both signatories of the treaty, to bear witness to guarantees made by the British Premier as to the interpretation to be put upon the words of the compact regarding the function of the Boundary Commission. Lloyd George admitted the contention of the Free State delegation. He also admitted having guaranteed before the peace negotiations were opened in July, 1921, that he would protect the territorial integrity of the North as it then was, or being forced to an agreement, that he would not consent to the further restriction of the Northern Parliament's jurisdiction without first consulting Belfast. He justified his breach of this promise by saying that a moment had arrived when the Irish delegation was prepared to sign the treaty and he could not morally take a chance on deferring the acceptance of the pact several days with the expectancy that that moment would ever again arrive. New plans were then formulated, Craig agreeing that a national policy and constitution be settled by the Parliamentary representatives of all Ireland. His agreement, however, was conditioned on an early election in the South and the return to Parliament of a substantial majority of Free Staters.

The meeting of the Ard Fheis which had been called for Feb. 7 was postponed to Feb. 21 owing to the inability of Collins and Griffith to leave the London conference before that time. On the second day of its sitting, Feb. 22, a treaty of peace was arranged between the Free State advocates and the Republicans, and the Sinn Fein party thus kept together. It was agreed that the general election when it was held was to be on the issue not of the treaty but of the Constitution, which was to be prepared beforehand, and that in no event was an election to be held before the expiration of three months. The agreement reached with Craig a few days before at London was thus held in abeyance.

The campaigning for the election had begun before the settlement of its date. The attack on the treaty was begun by De Valera in Cork on Sunday, Feb. 19. His chief argument was that by taking an oath of allegiance to the British Crown the Irish Deputies would in effect make British subjects of the entire Irish nation. Collins replied to this on the opening of the Free State campaign at Dublin on March 5, declaring that the Free State was a "stepping-stone to a republic" and that the oath would be binding only during the stepping-stone period. Labor entered the campaign on a nationalization-of-public-utilities platform. It re-

fused to take a stand on the treaty, promising to sit with the Government in Dail Eireann in event of its defeat and as a Republican opposition in the Parliament of South Ireland in event of its popular acceptance.

Dail Eireann, which adjourned after making Griffith President, met again on Feb. 28. A motion to rescind ts previous acceptance of the treaty was introduced by De Valera and defeated. A motion then was put forward to make a new register of voters, the last registration having taken place before the outbreak of the World War. This motion was referred to the President, Griffith, who declared that a new register could not be made in time for the general election, which was set for May 22. The practical reason given by De Valera for wanting the voting lists revised was that nearly half of the Republican Army were under twenty-nine years of age and thus deprived of the franchise.

## SPLIT IN THE FORCES.

Following the appointment of several brigades of the Irish Republican Army to do duty under the direction of the Provisional Free State Government, a split in the force became evident that extended to the smallest command. Men who were opposed to the treaty gradually segregated themselves from the others, who, they claimed, were being used for political purposes. In the South extremely few brigades were willing to accept the commands of their superiors in the Provisional Government and brigades from the West and East were sent into the areas of the Southern commands to take over on behalf of the Provisional Government the barracks that had been vacated by the British military and the "Black and Tans." This process led during the first week in March to a concentration of forces of both Republican and Free State troops in the city of Limerick and the posting of a proclamation by the Republican commander complaining against the Defense Minister's bringing the army into politics until after the election. For a while it appeared as though civil war would then and there break out but the crisis was averted by the Free State's withdrawing from Munster all but Munster brigades and leaving to the Republicans their portion of the barracks there.

On St. Patrick's Day, March 17, a new crisis was very nearly brought about by De Valera's "marching through blood" speech. This amounted to an attack on the "stepping-stone" argument by showing that ultimately the change from Free State to republic would have to be an unconstitutional one and one therefore that would necessitate the shedding of blood. But instead of shedding the blood of Britishers, he said, the Irish people of that future generation would have to fight against Irishmen sworn to uphold the Free State. Thus, he concluded, "the march to the republic would be through the blood of Irishmen."

On the same day President Griffith, by a Presidential proclamation, banned the Army Council Convention which had been called for March 26 to discuss ways and means of dealing with political partisanship among members of the General Staff. Attendance at the convention was declared punishable by court martial. When, on March 26, the convention met, therefore, the political split in the army organization was rendered irremediable. The work of the convention consisted in repudiating the authority of Dail Eireann for having ratified the treaty and in setting up an alleged military dictatorship of the republic until the formation of a new Dail. Henceforth the troops of the dictatorship refused obedience to the General Staff and became known as "irregulars."

On March 25, the night before the "outlawed" army convention, a body of Republican soldiers of the Belfast City Brigade raided the Orange Hall in Dublin and threw the place open as a shelter for the Catholic refugees from the North. The Craig-Collins pact had been repudiated in the North and consistent efforts were made to drive the Catholic population from their homes in Belfast. In attacks made on Catholic districts, 85 persons were killed and over 280 wounded during the month of February alone. In March the numbers had increased and several hundred Catholic families had sought refuge in the Free State. Of the persons killed, about one-sixth were Protestants, some of them casual passers-by, but most of them members of lynching parties. Two days after the seizure of the Orange Hall the Masonic Hall was also taken over for the same purpose and penniless refugees who could not be accommodated in the two "barracks" were billeted out on Unionist families of Dublin who by family ties or associations were connected with the Carsonites of the North.

On March 30 a treaty of peace was signed at London by Michael Collins on the one hand and Sir James Craig on the other. The import of this was that it provided for the representation of Catholics on the police force of Belfast and for a special court of two Judges, one Catholic and one Protestant, to try, without jury, persons charged with lynching. Previously, no jury could be found to convict on a charge of crime against Catholics. The treaty was broken, however, before any of these reforms could be put into effect. An effort on the part of the irregular forces in the South to re-establish the Ulster boycott, which had been removed by the original Craig-Collins pact of January 21, was pointed to by Craig as an indication of bad faith.

## CIVIL WAR.

The irregulars celebrated the anniversary of the uprising of 1916 by seizing the Four Courts on April 14. This was occupied as the general headquarters of the irregular forces and hastily fortified. Efforts were made to secure its evacuation, and when it appeared that the Free State would employ regular troops to force out the men under Rory O'Connor and Liam Mellows, the Archbishop of Dublin interceded. Successive peace conferences were held. Labor called a strike in protest against a possible outbreak of civil war, and on April 24 not a single stroke of work was done throughout Ireland. The Archbishop's peace conference finally broke down on April 29, and on May Day additional irregular troops entered the city and occupied the Ballast House, the Kildare Street Club, and the Sunlight House. These, with the Four Courts, form the four best strategic points in Dublin. In the meanwhile the irregulars throughout the country had been running up bills for supplies. These they paid after having engineered a series of raids on local branches of the Bank of Ireland and taking off whatever cash happened to be handy. They left in return sight drafts of the Provisional Government for the amounts taken.

Civil war broke out in Munster on May 3. The following day, however, a truce was signed covering four days and a "Committee of Ten," five Free Staters and five Republicans, were appointed by Dail Eireann "to explore every possibility of agreement between the two sections of the army." Two days later the Ballast House was evacuated. This, however, was a political move to pacify labor, which was being gradually estranged from the Republican viewpoint by irregular tactics resulting in the throwing of men out of work. The truce was extended day by day until on May 20 the Collins-De Valera pact was signed. In accordance with this, the general election, which had in the meanwhile been postponed to June 16, was to be held; a National Coalition panel representing both parties was to be put forward; the number of candidates of each division of Sinn Fein was to equal its representation in the extant Dail; that any other interest was free to contest the election against the National Coalition Party; that after the election the President's Cabinet was to include four Republican Ministers and five Free Staters. The initial consequence of the pact was that the election was not to be fought on the issue of the treaty or Constitution which was to be put into effect on the Government's own authority and without committing the nation during the five years of the Government's life. After that the question of Free State or republic was to be decided by the people.

The British Cabinet was frank in its demand for an explanation of this pact. It suspected the pact of being an open violation of the treaty. Collins, however, was able to show that without it there could be no hope for an election before the legal lapse of the treaty.

On June 5 the Coalition agreement was unanimously accepted by Dail Eireann and De Valera managed to secure for it the support of the irregular army commanders, O'Connor and Mellows. Over the irregulars, it appears, De Valera never had any authority and their repudiation of the Dail's authority in March did not apparently receive his support.

Since the acceptance of the treaty in January a committee of experts in political science had been gathering frequently under the headship of Darrel Figgis to frame a Constitution. This was completed and on June 7 was brought to London and submitted "informally and confidentially" to the British Cabinet. The imprimatur of this body was secured and the text of the Constitution was made public. Two days later the polling took place. Of the Coalition candidates put forward, 88 were returned. Labor secured 15 seats. But individuals who had run as independent candidates on pro-treaty platforms defeated 15 of the anti-treaty candidates of the Coalition panel. The number of Free Staters in the new Dail was increased to 70 as against 33 Republicans. In view of this fact the election was interpreted as indicating the popular acceptance of the treaty.

Six days after the Irish election had taken place and before the returns had been completed, the

assassination occurred in London of Field Marshal Sir Henry Wilson, military dictator of Northern Ireland. The assassination was attributed to Sinn Fein, though it was subsequently proved at the trial of the assassinators that they had never belonged to any branch of the I. R. A. A serious threat to declare the treaty violated and send back the British armed forces into Ireland was made by the Cabinet and Collins, to defend the position of the Provisional Free State Government, opened a general campaign against the irregular forces by attacking the Four Courts on June 28.

Collins was severely criticised for not convoking Dail Eireann before he had started civil war. His use of arms against the Four Courts was also objected to, it having been supposed that if at any time occasion arose to drive the irregulars out, a cordon could be thrown about the place and prevent the garrison's receiving its food supply.

By July 5, all men of military age were drafted into the regular forces and ordered mobilized. Two days thereafter, Cathal Brugha, commander of the irregulars, in occupation of the Gresham Hotel, died of wounds he had received in the fighting. With the fall of the Four Courts after an artillery siege of five days, Rory O'Connor and Liam Mellows were taken prisoner and sent to Mountjoy Prison. Waterford was bombarded on July 20 and taken the following day, a few hours after Limerick had fallen. The movement on Cork began on Aug. 10 and the city was taken without a fight on Aug. 11.

The day after the capture of Cork, Arthur Griffith died in Dublin and ten days after his chief had succumbed Michael Collins was killed in action near Cork (Aug. 22).

The transatlantic cables were cut by irregulars outside of Cork on Aug. 29.

The Provisional Free State Government, left without a head, was embarrassed next by a strike of postal employees who refused to accept a cut in wages which they considered disproportionate to the lowering of living costs. The strike continued from Sept. 7 to 30. It was met finally by the Government's agreeing to graduate the cut over a period of a year.

### THE PRESENT GOVERNMENT.

On Sept. 9 Dail Eireann met and elected William Cosgrave President. Then resolving itself into the Parliament for Southern Ireland it elected the same man Chairman of the Provisional Free State Government. Since that date the distinction between the two positions and between the two assemblies has been lost. Cosgrave appointed as his Cabinet: Ernest Blythe, Minister for Local Government; Desmond Fitzgerald, Minister for Foreign Affairs; P. J. Hogan, Minister of Agriculture; Joseph McGrath, Minister for Trade and Commerce; Richard Mulcahy, Minister of Defense; J. J. Walsh, Postmaster General; Eoin MacNeill, Minister of Education, and Kevin O'Higgins, Minister for Home Affairs. The portfolios of Labor and Economic Affairs were given to the Minister for Trade and Commerce.

Throughout July, August, September and part of October, civil war continued to be waged without respite. On Oct. 10 the Bishops and Archbishops took cognizance of this in a pastoral letter which declared all members of the irregular forces excommunicated from the Roman Catholic Church, subject only to appeal to the Holy See at Rome.

On Oct. 14 several excerpts from correspondence of De Valera and other irregular leaders, all of which had been intercepted by the Provisional Government, were published in a "White Paper." These prove generally that De Valera had no control over the irregular army council and was not therefore personally responsible for the acts of the irregulars up at least to the date of the intercepted letters.

On Oct. 25 Dail Eireann unanimously adopted the Constitution that had been presented to the people before the June election.

Owing to the change of Ministry and dissolution of Parliament in London, the Irish Constitution Bill was not brought before Parliament until Nov. 24. It was, however, promptly passed by the House of Commons and sent to the Lords, who passed it on Dec. 5.

### NOW A COMMONWEALTH.

King George signed the proclamation constituting the Irish Free State on Dec. 6; Timothy M. Healy was sworn in as Governor General, and the Free State came legally into operation at 5 P. M., when the Dail convened as the Chambers of Deputies of the Irish Free State Parliament and the Irish flag of green, white and orange replaced the British Union Jack over the Viceregal Lodge.

Prof. Hayes was re-elected as Speaker and William Cosgrave President of the Dail Cabinet, was elected without opposition President of the new Executive Council. President Cosgrave that night announced his list of thirty nominations for the Senate; the more prominent of them were: the Earl of Granard, the Earl of Wicklow, the Earl of Kerry, the Marquis of Headfort, Baron Glenavy, the Earl of Mayo, the Earl of Dunraven, Gen. Sir Bryan Mahon, Sir Horace Plunkett, Sir Thomas Edmonds, Martin Fitzgerald of the Freeman's Journal, Henry Guinness, a governor of the Bank of Ireland; Dr. George Sigerson, professor of biology, University of Dublin; William Butler Yeats, poet; the Dowager Countess of Desart and Mrs. Wyse Power.

On the following day Deputy Sean Hales was shot and killed and Deputy Speaker Pat. O'Maille wounded on their way to Parliament. In retaliation four Republican leaders were executed the next morning at Mountjoy Prison, the official report saying: "as reprisal for the assassination and as a solemn warning to those associated with them who are engaged in an assassination conspiracy against the Irish peoples' representatives." These men were Rory O'Connor, Liam Mellowes, the two leaders of the Four Courts seige in the summer, Joseph McKelvey and Richard Barrett.

Previously Erskine Childers, perhaps the ablest of De Valera's lieutenants, who had been captured on Nov. 10, had been tried for the unlawful possession of a revolver, found guilty and after prolonged legal struggle was executed on Nov. 24. This followed the execution of four other irregulars on a similar charge a few days before.

Deputy Miss Mary McSwiney, who after her arrest carried on a hunger strike in Mountjoy Prison was released after the 24th day, on Nov. 27.

The Irish budget was submitted to the Dail Eireann on Oct. 6. It provided for expenditures for the fiscal year ending March 31, amounting to £37,700,586, which was equal to the total of the British revenue from the taxation of Ireland in 1920. The cost of the army was estimated at £7,245,000. As compensation for property that had been destroyed £10,000,000 was allowed; for education £4,000,000; for pensions, £1,800,000 and Post Office, £2,750,000.

Both Houses of the Ulster Parliament at Belfast voted unanimously on Dec. 7 to "contract out" of the Irish Free State.

## NEW PRESIDENT OF POLAND ASSASSINATED.

Gabriel Narutowicz, who was elected President of Poland by the National Assembly in Warsaw on Dec. 9, 1922, and who had taken over the supreme authority from Marshal Pilsudski on the 14th, was assassinated on Dec. 16, while visiting an art exhibition in Warsaw.

When the election took place a pitched battle followed his unexpected choice, in which four were killed and over 100 injured. The opposition came mainly from the Nationalists representing the purely Polish population who asserted that he was elected by the votes of the Jews, Ukrainians, Germans and Russians, receiving only 186 Polish votes while 227 Polish votes were cast for Count Zamoyski

Maciej Rataj, newly elected Speaker of the House is to act as President pending a new election by the National Assembly.

### NEW PRESIDENT OF URUGUAY.

Jose Serrato, nominee of the Colorado Party, was elected President of Uruguay for the four year term beginning March 1, 1923, on Nov. 26, by a majority of 6,000 in a total vote of 238,000.

## DEATHS AND INJURIES FROM ACCIDENTS IN THE UNITED STATES.

Estimates as to the number of deaths from accidents in the United States in 1922 range from 75,000 to 95,000; and estimates as to the total of injuries by accidents vary from 2,000,000 to 12,000,000. There is no way of finding out the actual number either of deaths or of accidents. The United States Census Bureau's figures as to the deaths and causes thereof cover only the so-called registration area, which excludes many of the States. Even in the registration area, the figures are not complete, inasmuch as many death certificates give only the final, not the contributory, cause of death. The estimates of casualty and insurance companies are based, likewise, on official death certificates, and are open to the same objection. Industrial corporations and workmen's compensation boards get a little closer to the facts, but only as to industrial injuries and deaths.

## RISE OF THE FASCISTI TO POWER IN ITALY.

By a swift, almost bloodless revolution, the Fascisti, headed by Benito Mussolini, seized the Italian Government on Oct. 30, 1922, ousting the Government headed by Premier Facta. The coup d'etat followed the Congress of the Fascisti at Naples the week previous, when Mussolini on Oct. 26 declared:

"I take a solemn oath that either the Government of the country must be given peacefully to the Fascisti, or we will take it by force."

Having seized the Government, Premier Mussolini, who took the portfolio of Foreign Affairs, declared in the Italian Senate on Nov. 27, 1922: "People forget that liberty is a duty and not a right. I am not afraid of words. Therefore I proclaim myself the Prince of Reaction. But I will not follow an anti-proletariat policy; I will not oppress the proletariat, but will elevate them materially and spiritually—not because their number entitles them to special rights. No great nation can be created when workmen are obliged to suffer from a low standard of living."

There was much excitement all over Italy, especially in the ranks of the monarchists, who believed that Mussolini and his Fascisti intended to set aside the House of Savoy, then declare a republic. Mussolini, however, appeared before the King and later upon the balcony of the Quirinal, calling for cheers for the royal family, declaring that he and his followers wanted merely the reins of governmental authority to gain their ends for the good of Italy and had no purpose to upset the existing forms of government. He pledged his loyalty to the Crown, calling upon his followers to repeat his pledge.

His general outline of policy included the transfer of the Government railways, telephones, telegraphs, tobacco factories and other unprofitable governmental monopolies to private hands, and thus lift the enormous load of direct and indirect taxation from the people—which averaged one-fifth of their total income—enabling the practically bankrupt National Treasury to balance its budget.

The Chamber of Deputies on November 25, by a vote of 225 to 90 gave the Mussolini Government full powers for bureaucratic and fiscal reforms until Dec. 31, 1923. The Senate vote two days later was unanimous.

The municipal elections in Milan, which had been one of the centers of the strongest opposition to the Fascisti, were held on December 12; they resulted in the Fascisti winning by a majority of 21,567 over all others, the vote standing: National Bloc (Fascisti), 87,363; Socialists, 45,254; Maximalists, 17,259; Communists, 2,288.

Premier Mussolini made up his Cabinet thus:

Premier, Minister of the Interior and Foreign Affairs, Benito Mussolini.

Minister of War, Gen. Armando Diaz (Monarchist, but no party affiliation).

Minister of Marine, Vice-Admiral Thaon di Revel (Monarchist, but no party affiliation).

Minister of Treasury, Prof. Luigi Einaudi (Nationalist).

Minister of Industry, Theophile Rossi (Nationalist).

Minister of Finance, Signor di Stefani (Fascista).

Minister of Colonies, Luigi Fedorzoni (Nationalist).

Minister Liberated Regions, Signor Giuriati (Fascista).

Minister of Justice, Aldo Oviglio Quirnal.

Minister of Education, Signor Gentilo (Democrat).

Minister of Agriculture, Luigi Capitanio (Fascista).

Minister of Public Works, Signor Carnazza (Nationalist).

Minister of Posts and Telegraphs, Signor di Cesara (Nationalist).

Minister of Social Welfare, Stefano Cavazzoni (Catholic).

Once the leader of the Italian Socialists, now the avowed enemy of everything that smacks of socialism in its red forms—syndicalism, sovietism, or communism—Benito Mussolini is the idol of the Italian working and middle classes, and as Premier has gripped Italy with a power that has hitherto been unknown in any Cabinet of modern times. Mussolini is almost six feet in height, with eyes slightly protuberant, but steady, with a firm, square jaw, and rigidly set lips. He is a veteran of the World War, and received more than 100 wounds. He is known as a "revolutionary socialist to the core." Yet his present "Fascisti movement" is one of extreme patriotism and imperialism, and its present purpose is the destruction of all forms of "red" socialism.

Fascista is an Italian word meaning a member of the "Fascio," which means a bundle of sticks. The word drew its origin from the old Roman lictors, the bodyguards of the ancient Roman Consuls, who carried an axe with the handle surrounded by a bundle of sticks (fasces).

The emblem of the Fascisti in Italy is the black shirt, usually of silk, and a stout cane, although the military branch of the organization carry arms, principally revolvers. Khaki trousers of the military type usually complete the costume. (fasces.)

Mussolini, before the fatal days of August, 1914, was in constant collision with the Italian authorities. He led the Socialist outbreak before the war that required 300,000 troops to put down. But no sooner had the two Kaisers loosed their "dogs of war" than Mussolini's inherent, instinctive sense of right asserted itself. Mussolini was then editor of one of the powerful Socialist organs of Italy, the Milanese Avanti, or Forward. Pacifists in the Socialist party did their best to keep Italy from entering the struggle against German imperialism, and when Mussolini discovered their determination not to "see the light," he severed his connection with the Avanti and started an opposition paper, the Popolo d'Italia, with the avowed purpose of preaching intervention. He remained with this newspaper until his class was called to the colors, and he left for the front in August, 1915. There was nothing of the theorist in the man—he was eminently practical, and after the collapse of Russia and the introduction of Bolshevism, Mussolini's paper thundered daily against the "Red Terror" that threatened for a time to lay strong hands upon the newly annexed provinces of Italy.

Three years ago, Italian workers, urged on by these conquered Slavs, under the influence of Bolshevism, were seizing factories and turning Italy into a second Russia (in 1919). In those days a man with a white collar who appeared on the streets in north Italian towns was almost certain to be set upon and badly beaten by communistic workmen.

Mussolini's action was swift. Ex-soldiers, out of jobs and looking for excitement, formed Mussolini's weapon. He organized, in January, 1919, a mere handful of these men, and swooped down upon the great industrial cities in defiance of the lax governmental authorities, and challenged the Communists to combat. Incidents like that at Bologna developed, where the Fascisti took entire charge of the city's industry for weeks.

The Fascisti adopted a system of swooping down suddenly upon towns and villages where communistic trouble was fermenting, and spread themselves all over it, flourishing clubs, revolvers and chanting their battle cry against Bolshevism.

After four months of guerilla warfare, the Socialists and the Fascisti signed a truce, substituting a "court of last resort, whose judgment shall be final." This agreement was entered into on Aug. 15, 1921. It was kept with more or less friction until the seizure of the Facta Government.

In the meanwhile, the numbers and power of the Fascisti grew amazingly, and at present he has more than 2,000,000 followers. At the Naples Congress, in October, 1922, the organization had grown to the following porportions: 600,000 in the political group not under military discipline; 800,000 drawn from trade unions, which until recently had been socialistic, and 350,000 active combatants, armed, drilled and kept in a state of rigid military discipline, organized on the model of the legions of Rome. Signor Dino Grandi, a member of the Italian Parliament and Secretary of the Fascisti group in that body, puts their strength thus:

"We have 800,000 workingmen in our ranks, organized into National Trade Unions according to their respective trades. We enroll 400,000 rural laborers, 55,000 sailors and longsboremen, 50,000 clerks, 200,000 factory operatives, 55,000 railway and tramway servants, 10,000 factory and post office employees, and 20,000 workers in other lines."

In addition, the Fascisti have associated with themselves the Nationalists, an organization which takes no part whatever in active fighting, but which comprises farmers and others in entire sympathy with the Fascisti movement.

The Fascisti, and the masses of Italy, were opposed to the system of elections giving proportional representation in the Chamber of Deputies as set up as a compromise three years before by Premier Nitti. The Socialist Deputies were too much in power in governmental affairs, according to the Fascisti, in their war upon the organization. The calling of the Fascisti Congress in October, 1922, was to find means of ousting this system.

Following Mussolini's success in Italy, the movement, or rather similar organizations are springing up all over Europe and threaten to engulf the Governments of Central Europe particularly. The menace is particularly strong in Bavaria, where there is a Fascista army of 60,000. There are also strong organizations active in Hungary, the Austrian Tyrol, Czechoslovakia, and the beginning of organizations in Mexico.

# Big Problems of 1922-1923.

## FOREIGN DEBTS OWED TO THE UNITED STATES.

Secretary of the Treasury Andrew W. Mellon, in his annual report to Congress, made public Dec. 6, 1922, in regard to the inter-Allied debts due the United States Government said:

"The obligations of various foreign governments held by the Treasury on November 15, 1922, aggregated **$10,045,282,026.60**, principal amount, and may be classified as follows:

"(1) **$9,386,311,178.10** representing loans made by the Secretary of the Treasury, with the approval of the President, under the Liberty bond acts.

"(2) **$574,876,884.95** received from the Secretary of War and the Secretary of the Navy on account of sales of surplus war material under the act of July 9, 1918.

"(3) **$84,093,963.55** received from the American Relief Administration on account of relief supplies furnished under the act of Feb. 25, 1919.

"In addition to the above, the United States Grain Corporation, the entire stock of which is owned by this Government, holds obligations of various foreign governments amounting to **$56,858,802.49**. It is expected that these obligations, which were acquired by the Grain Corporation on account of sales of flour for relief purposes under the act of March 30, 1920, will also be turned over to the Treasury Department for custody upon the completion of the pending liquidation of that corporation. Notes of the Polish Government amounting to about **$24,000,000** are also held by the War Department and the United States Shipping Board. It is understood that these obligations were received on account of sales of surplus war material by the former and transportation services by the latter, and that the amounts may be subject to further adjustment.

"The balance of the credit which was granted to the Czechoslovak Republic to assist that Government in the repatriation of its troops from Siberia was $6,072,834.36 at the beginning of the fiscal year 1922. The movement of these troops was carried out by the War Department and the Shipping Board, and on May 29, 1922, the Czechoslovak Republic used $717,834.36 out of this credit to reimburse the Shipping Board for its services. The balance to the credit of that republic is now $5,355,000, and whatever may remain after all payments to the War Department have been completed will be withdrawn.

"It is not contemplated that any further advances will be made by the Treasury against the credits in favor of Greece.

"The following statement shows the amount of advances which have been repaid up to Nov. 15, 1922 (cents omitted):

| COUNTRY. | To Nov. 16, 1921. | Nov. 16, 1921, to Nov. 15, 1922. | Total. |
|---|---|---|---|
| Belgium | $1,522,901 | $440,552 | $1,963,454 |
| Cuba | 1,425,000 | 834,500 | 2,259,500 |
| France | 46,714,861 | 17,357,868 | 64,072,720 |
| Great Britain | 110,681,641 | 30,500,000 | 141,181,641 |
| Roumania | 1,794,180 | ..... | 1,794,180 |
| Serbia | 605,326 | 48,564 | 653,890 |
| Total | $162,743,911 | $49,181,485 | $211,925,397 |

"The $30,500,000 repaid by the British Government during the past year was on account of the obligations of that Government given for purchases of silver under the Pittman Act.

"The repayments made by the Governments of Belgium and Serbia and substantially all of those made by France during the past year represent the unused balances of advances made by the Treasury to those Governments and turned over by them to the Commission for Relief in Belgium and to the American Relief Commission to be expended for relief purposes. These unused balances were returned to the Treasury to be applied as payments on account of the principal of the obligations of the respective Governments.

### NO REPAYMENTS OF PRINCIPAL.

"No repayments of principal have been made on any of the obligations acquired under the acts of July 9, 1918, Feb. 25, 1919, or March 30, 1920.

"The following table shows the amount of interest paid on foreign obligations acquired by the Treasury under the Liberty bond acts (cents omitted):

| COUNTRY. | To Nov. 15, 1921. | Nov. 16, 1921, to Nov. 15, 1922. | Total. |
|---|---|---|---|
| Belgium | $10,907,281 | ..... | $10,907,281 |
| Cuba | 1,442,922 | $416,810 | 1,859,733 |
| Czechoslovakia | 304,178 | ..... | 304,178 |
| France | 129,570,376 | ..... | 129,570,376 |
| Great Britain | 247,844,685 | 103,312,500 | 351,657,185 |
| Greece | 1,159,153 | ..... | 1,159,153 |
| Italy | 57,598,852 | ..... | 57,598,852 |
| Liberia | 861 | ..... | 861 |
| Roumania | 263,313 | ..... | 263,313 |
| Russia | 4,872,811 | 2,612,744 | 7,485,555 |
| Serbia | 636,059 | ..... | 636,059 |
| Total | $454,600,495 | $106,842,054 | $561,442,550 |

"Great Britain's interest payments during the past year were made as follows (cents omitted):

| DATE OF PAYMENT. | Interest on obligations given for Pittman silver advances. | Interest on other obligations. | Total. |
|---|---|---|---|
| Apr. 15, 1922 | $1,372,500 | ..... | $1,372,500 |
| May 15, 1922 | 915,000 | ..... | 915,000 |
| Oct. 16, 1922 | 915,000 | $50,000,000 | 50,915,000 |
| Nov. 15, 1922 | 610,000 | 50,000,000 | 50,610,000 |
| Total | $3,812,500 | $100,000,000 | $103,812,500 |

"On page 58 of the Annual Report of the Secretary of the Treasury for the fiscal year 1920 reference was made to two special funds arising out of the liquidation of certain property of the Russian Government and held for Russia by the Secretary of the Treasury, aggregating $2,143,601.07. On Aug. 3, 1922, these funds were applied (1) to cancel the unpaid balance of the interest, amounting to $1,808,506, which became due on Russian obligations, May 15, 1918; and (2) as part payment of the unpaid balance of the interest due November 15, 1918. Most of the funds which the Treasury has received in payment of interest on Russian obligations represent the proceeds of liquidation of the financial affairs of the Russian Government in this country.

"The following statement shows the amount of interest paid by each foreign government on obligations acquired under the act of July 9, 1918, on account of sales of surplus war material (cents omitted):

| COUNTRY. | To Nov. 15, 1921. | Nov. 16, 1921, to Nov. 15, 1922. | Total. |
|---|---|---|---|
| Belgium | $2,79,,351 | $1,379,429 | $4,176,780 |
| France | 20,038,719 | 20,859,564 | 40,898,283 |
| Latvia | 126,266 | ..... | 126,266 |
| Poland | 1,290,620 | ..... | 1,290,620 |
| Russia | 10,179 | 40,580 | 50,760 |
| Total | $24,263,137 | $22,279,573 | $46,542,711 |

"The only interest payment received to date on foreign obligations acquired under the act of Feb. 25, 1919, was one of $181,017.17 on Russian obligations, which was paid on Aug. 5, 1922.

"The Treasury understands that no interest has been paid on the obligations held by the United States Grain Corporation, acquired under the act of March 30, 1920."

The Secretary of the Treasury quotes in full his statement of August 24, called out by the Lord Balfour note sent out by the British Government August 1, regarding the status of the obligations of foreign governments held by the United States, and particularly the origin of the indebtedness of the British Government to the United States. In part he said:

"A number of inquiries have been received, as a result of statements recently published, with respect to the exact status of the obligations of foreign governments held by the United States. Especial attention has been directed to the origin of the indebtedness of the British Government, amounting to about **$4,135,000,000**. It has been said that

this liability was not incurred for the British Government, but for the other allies, and that the United States, in making the original arrangements, had insisted in substance that though the other allies were to use the money borrowed, it was only on British security that the United States was prepared to lend it. It is apparent from the inquiries which have reached the Treasury Department that it is supposed that this, in substance, is the explanation of the existing indebtedness of Great Britain.

"In answer to these inquiries it should be said that the obligations of foreign governments, in question, had their origin almost entirely in purchases made in the United States, and the advances by the United States Government were for the purpose of covering payments for these purchases by the Allies.

"The statement that the United States Government virtually insisted upon a guaranty by the British Government of amounts advanced to the other allies is evidently based upon a misapprehension. Instead of insisting upon a guaranty, or any transaction of that nature, the United States Government took the position that it would make advances to each Government to cover the purchases made by that Government and would not require any Government to give obligations for advances made to cover the purchases of any other Government. Thus, the advances to the British Government, evidenced by its obligations, were made to cover its own purchases, and advances were made to the other allies to cover their purchases. . . .

"The respective borrowing nations each gave their own obligations for the money advanced by the United States and that no guaranty of the obligations of one borrowing nation was asked from any other nation."

## OBLIGATIONS OF FOREIGN GOVERNMENTS HELD BY UNITED STATES.

The total obligations of foreign governments held by the United States, together with the interest accrued and remaining unpaid thereon as of the last interest period prior to or ending with Nov. 15, 1922, is shown in this table from the report of the Secretary of the Treasury, submitted to Congress. The table is the recapitulation of the four tables below which show how the several obligations were incurred (cents omitted):

| COUNTRY. | Principal. | Interest. | Total indebtedness. |
|---|---|---|---|
| Armenia | $11,959,917 | $1,677,256 | $13,637,174 |
| Austria | 24,055,708 | 2,886,685 | 26,942,394 |
| Belgium | 377,123,745 | (a) 60,073,383 | 437,197,129 |
| Cuba | 7,740,500 | (b) | 7,740,500 |
| Czechoslovakia | 91,887,668 | 14,404,536 | 106,292,205 |
| Esthonia | 13,999,145 | 2,089,625 | 16,088,771 |
| Finland | 8,281,926 | 1,012,436 | 9,294,362 |
| France | 3,340,746,215 | 503,386,035 | 3,844,132,250 |
| Great Britain | (c) 4,135,818,358 | (d) 611,044,201 | 4,746,862,560 |
| Greece | 15,000,000 | 750,000 | 15,750,000 |
| Hungary | 1,685,835 | 202,300 | 1,888,135 |
| Italy | 1,648,034,050 | 284,681,434 | 1,932,715,485 |
| Latvia | 5,132,287 | 643,576 | 5,775,864 |
| Liberia | 26,000 | 3,518 | 29,518 |
| Lithuania | 4,981,628 | 747,244 | 5,728,872 |
| Nicaragua | 170,585 | (a) | 170,585 |
| Poland | 135,662,867 | 17,618,809 | 153,281,676 |
| Roumania | 36,128,494 | 5,864,104 | 41,992,599 |
| Russia | 192,601,297 | 39,712,670 | 232,313,968 |
| Serbia | 51,104,595 | 7,994,087 | 59,098,683 |
| Total | $10,102,140,829 | $1,554,791,908 | $11,656,932,737 |

**Obligations acquired under Liberty Bond acts:**

| COUNTRY. | Principal. | Interest due Nov. 15, 1922. |
|---|---|---|
| Belgium | $347,251,012 | $60,073,383 |
| Cuba | 7,740,500 | (b) |
| Czechoslovakia | 61,974,041 | 10,136,141 |
| France | 2,933,405,070 | 503,386,035 |
| Great Britain | (c) 4,135,818,358 | (d) 611,044,201 |
| Greece | 15,000,000 | 750,000 |
| Italy | 1,648,034,050 | 284,681,434 |
| Liberia | 26,000 | 3,518 |
| Roumania | 23,205,819 | 3,925,703 |
| Russia | 187,729,750 | 39,214,326 |
| Serbia | 26,126,574 | 4,611,738 |
| Total | $9,386,311,178 | $1,517,826,483 |

**Obligations acquired from sales of surplus war material (act of July 9, 1918):**

| COUNTRY. | Principal. | Interest. |
|---|---|---|
| Belgium | 29,872,732 | (a) (b) |
| Czechoslovakia | 20,612,300 | $2,959,392 |
| Esthonia | 12,213,377 | 1,832,006 |
| France | 407,341,145 | (b) |
| Latvia | 2,521,869 | 252,014 |
| Lithuania | 4,159,491 | 623,923 |
| Nicaragua | 170,585 | (a) |
| Poland | 59,678,604 | 7,042,817 |
| Roumania | 12,922,657 | 1,938,401 |
| Russia | 406,082 | 10,152 |
| Serbia | 24,978,020 | 3,382,349 |
| Total | $574,876,884 | $18,041,057 |

**Obligations acquired by American Relief Administration on account of relief (act of Feb. 25, 1919):**

| COUNTRY. | Principal. | Interest. |
|---|---|---|
| Armenia | $8,028,412 | $1,204,261 |
| Czechoslovakia | 6,428,089 | 964,213 |
| Esthonia | 1,785,767 | 257,618 |
| Finland | 8,281,926 | 1,012,436 |
| Latvia | 2,610,417 | 391,562 |
| Lithuania | 822,136 | 123,320 |
| Roumania | 51,671,749 | 7,750,762 |
| Russia | 4,465,465 | 488,192 |
| Total | $84,093,963 | $12,192,368 |

**Obligations held by United States Grain Corporation on account of sales of flour (act of March 30, 1920):**

| COUNTRY. | Principal. | Interest. |
|---|---|---|
| Armenia | $3,931,505 | $472,995 |
| Austria | 24,055,708 | 2,886,685 |
| Czechoslovakia | 2,873,238 | 344,788 |
| Hungary | 1,685,835 | 202,300 |
| Poland | 24,312,514 | 2,825,229 |
| Total | $56,858,802 | $6,731,998 |

(a) No interest due on Nicaragua notes until maturity, as is also the case of certain Belgian obligations aggregating $2,284,151.40.

(b) Interest has been paid as it became due.

(c) Includes $61,000,000 of British obligations which were given for Pittman silver advances and for which an agreement for payment has been made.

(d) Great Britain paid $50,000,000 on Oct. 16, 1922, and $50,000,000 on Nov. 15, 1922, on account of interest on other than Pittman silver obligations.

## AMERICAN BANKERS KEENLY INTERESTED.

The question of the Allied debts was the major topic of discussion at the 48th Annual Convention of the American Bankers' Association which opened with 12,000 delegates, in New York, on Oct. 3, 1922. Thomas W. Lamont, of J. P. Morgan & Co., in welcoming the delegates that day, said, "Over a year ago the British realized that the Germans could, or would, never pay anything like the reparations total fixed in the Versailles Treaty. Later, the Belgian Government became similarly convinced, and now, in France, as I have talked there with many classes of representative Frenchmen, there has come to be the same recognition of the fact that Germany cannot pay the huge totals set forth.

"The French Government, however, has not unnaturally taken the position that it could make no official acknowledgment of such a general fact until such time as a possible settlement was offered. The French thesis is that if Germany cannot pay

what she has promised to pay, let her come forward and state just why she cannot, and what and when she can pay; when they receive such a proposition they will be prepared to act.

"Let us by investigation determine what, if any, of these debts are in any way uncollectable, and so should be written off in order to 'quit fooling ourselves.' Let us decide what others of these debtors are good in part, but must be given ample time to pay in—far longer, perhaps, than 25 years. Emphatically, let us figure to see whether the payment of these debts (which inevitably must mean a great increase in our import and a heavy decrease in our export trade) is going to prove an asset or a liability for American business."

Thomas B. McAdams, of Richmond, President of the association, made the Allied debts the subject of his address, pointing out that the United States must co-operate wholeheartedly in ending international chaos, and declared that permanent prosperity for the United States can come if this country uses her "resources in brain and money to help to bring about a practical solution of the chaotic situation now threatening to destroy the economic life of Europe." He declared "the Allied nations must throw aside unnecessary prejudices and reach an agreement as to modifying reparation payments which will fairly care for the needs of France and at the same time not utterly demoralize the industrial life of Germany."

Essentials, in his opinion, were the further reduction of armaments, the balancing of the French budget, realization by France of the unlikelihood of new German military aggression and the preparation by all countries of a readjustment of reparations and interallied debt, "upon a basis which fully recognizes the rights of the creditor and which will relieve the immediate burden of the debtor countries."

### M'KENNA'S CONCLUSIONS.

The chief address of the convention was made on Oct. 4 by Reginald McKenna, formerly Chancellor of the British Exchequer and now Chairman of the London Joint City & Midland Bank, Ltd., of London, which was devoted to the same subject, speaking, he emphasized, solely from the standpoint of a banker, and with nothing to do with politics. He said in part:

"In their report to the Reparation Commission the Bankers' Committee which sat early this summer in Paris laid stress upon the need to resume normal trade conditions between countries and to stabilize exchanges, and they came to the conclusion that neither of these aims could be accomplished without a definite settlement of the reparation and other international debts. There will be general agreement that there is no matter of more deep concern to the world's trade at the present time than reparation payments and international debts.

"The inevitable conclusion is that these international debts are far too great for the capacity of any of the debtor countries except England. She alone in her accumulated foreign investments has adequate resources with which to discharge her liability to the United States. Of the others, France has the greatest resources, but they are, I believe, quite insufficient to meet her obligations. The whole subject requires a rational reconsideration by the creditors, who must keep steadily in view immediate effect of the payment of these debts of the general trade of the world.

"England has the ability to pay, and, I can unhesitatingly assert her determination to honor her bond in full. I believe I am justified in asking you to treat England's debt to the United States as certain to be provided for, and, if this be conceded, we shall be free to consider the question of the remaining international debts, as one in which America and England are equally concerned and in which both have the same interest as creditors. . . .

"To sum up: The conclusion to which I am driven is that Germany can only pay now whatever she may have in foreign balances together with such amount as she can realize by the sale of her remaining foreign securities; that this payment is only possible if all other demands are postponed for a definite period long enough to insure the stabilization of the mark; and that future demands at the expiration of this period must be limited to the annual amount of Germany's exportable surplus at that time.

"Further, that England has the capacity to pay to the United States interest and sinking fund on her debt; but that the other debtors are none of them in a position to meet more than a small part of their external liabilities, and in the existing conditions of Europe a definite postponement of any payment by them is desirable in the interest of all the parties. The actual amount which the other debtors could ultimately pay should, as in the case of Germany, be ascertained by inquiry into their exportable surplus at a full and frank conference between creditors and debtors.

"I have strictly confined myself to a consideration of the economic aspect of reparations and international debts, how they are payable, the general capacity of a debtor country to pay, and the effect of payment. If I have become convinced that an attempt to enforce payment beyond the debtor's ability is injurious to the international trade of the whole world, lowers wages, reduces profits and is a direct cause of unemployment, the conclusion is founded solely on economic grounds and is uninfluenced by any political considerations or any regard to the moral obligations of the debtors."

### RESOLUTION OF THE CONVENTION.

The convention adopted this resolution:

"We call attention again to the seriousness of the foreign situation, especially of Europe, which is affecting detrimentally our own conditions and preventing even those industries in our country which are not dependent upon foreign trade from recovering fully from the depression which otherwise would be rapidly disappearing.

"There is no possibility of a healthy and normal situation in this country until the nations with whom we trade are able to pay us for what they import. As this can be done in the main only by the means of exports to us, we trust that the President will not hesitate to make use of the power granted him by the new tariff law to make such adjustments in the schedules as may be necessary from time to time for a restoration of our international commerce.

"We believe that the time has come for the Government of our country to formulate the principles on which it will be able to co-operate with other nations to bring about the needed rehabilitation of European countries and peace in the world.

"To this end we urge the Administration to consider the advisability of promptly making its representative upon the Reparation Commission an official of that body; we also recommend to Congress that there be granted to the Debt Funding Commission such further powers as will enable it to negotiate more effectively with the foreign nations now debtors of the United States."

### WORLD WAR FOREIGN DEBT COMMISSION.

The World War Foreign Debt Commission was created by the act of Feb. 9, 1922, authorized to refund or convert, and to extend the time of payment of the principal or the interest, of any obligation of any foreign Government now held by the United States of America, or any obligation of any foreign Government hereafter received by the United States of America (including obligations held by the United States Grain Corporation, the War Department, the Navy Department, or the American Relief Administration), arising out of the World War, into bonds or other obligations of such foreign Government in substitution for the bonds or other obligations of such Government now or hereafter held by the United States of America, in such form and of such terms, conditions, date or dates of maturity, and rate or rates of interest, and with such security, if any, as shall be deemed for the best interests of the United States of America. The commission cannot extend the time of maturity of such bonds beyond June 15, 1947, or fix the rate of interest at less than 4½ per cent. per annum; nor can it exchange the bonds or other obligations of any foreign Government for those of any other foreign Government, or cancel any part of such indebtedness except through payment thereof.

The Secretary of the Treasury is chairman of the commission and the President appointed on Feb. 21, 1922, Charles E. Hughes, Secretary of State; Herbert C. Hoover, Secretary of Commerce; Reed Smoot, United States Senator; and Theodore E. Burton, member of the House of Representatives, as the other members.

The commission organized April 18, 1922, and by resolution requested the Secretary of State to inform each of the Governments whose obligations, arising out of the World War, are held by the United States that the commission desires to receive any proposals or representations which the said Government may wish to make for the settlement or refunding of its obligations under the provisions of the act.

The Secretary of State so instructed the diplomatic representatives of this Government at the capitals of each of the foreign Governments indebted to the United States, with the exception of Armenia, Austria, Cuba, Greece, Liberia, Nicaragua, and Russia. This action was not taken in respect to the Governments above named, says the Secretary, for the following reasons:

"Armenia, Greece, and Russia: In none of these countries is there a Government recognized by the United States.

"Austria: Congress passed on April 6, 1922, a joint resolution giving the Secretary of the Treasury special authority to deal with the Austrian debt.

"Cuba: Interest and instalments of principal are

being regularly paid and no refunding is required.

"Liberia: An act authorizing a new loan, from the proceeds of which the existing loan will be repaid in full, has already been passed by the House of Representatives pursuant to request of the Department of State, and is now pending before the Senate.

"Nicaragua: This debt is regarded as already in funded form.

"In response to the invitation of this Government the following countries have designated representatives to negotiate with the commission: Belgium, Czechoslovakia, Finland, France, Great Britain, Hungary, Poland, Roumania, and Serbia."

In July, 1922, the French Government sent a special mission, headed by M. Jean V. Parmentier, director of the movement of funds of the French Treasury, to the United States, to discuss with the commission the French debt to this Government. M. Parmentier placed in the hands of the commission certain data relating to the financial and economic situation of France. He explained that the French Government did not consider it possible at the present time to enter into any definite engagements for a funding or settlement of its debt and desired to postpone for an indefinite period consideration of this matter, until the financial situation of France should become more clear, particularly as to reparation receipts from Germany. The commission's position on the subject was explained to M. Parmentier, and especially its desire that a funding of the French debt should take place in the near future. On Aug. 17, 1922, M. Parmentier informed the chairman of the commission that he had been keeping his Government informed of the progress made in the negotiations and that he had received a cable instructing him to return for a full discussion with his Government of the situation as it had developed.

### BRITISH VIEW OF THE DEBTS.

Lord Balfour in the British Government note of August 1, said:

"Speaking in general terms, the war debts, exclusive of interest, due to Great Britain at the present moment amount in the aggregate to about £3,400,000,000, of which Germany owes £1,450,000,000; Russia, £650,000,000, and our allies £1,300,000,000. On the other hand, Great Britain owes the United States about a quarter of this sum, say £850,000,000, at par of exchange, together with interest accrued since 1919."

An authoritative British Government statement carried by the Associated Press on August 25, said, in part:

"It is true that with the exception of the sum of about $140,000,000 which was lent to the British Government to be immediately re-lent to Russia for the purpose of Russian dollar expenditures in United States, the whole proceeds of the United States Government's advances to Great Britain were applied toward meeting Great Britain's expenditures in the United States.

"Answering a question in the House of Commons, Oct. 20, 1921, the Chancellor of the Exchequer said: 'I think the simplest method of expressing the position is to say that after the entry of the United States into the war this country borrowed from the United States Government $4,277,000,000 (£876,000,000 at par), and that during the period in which the country was borrowing from the United States Government the British Government advanced to its Allies £879,000,000. If we had not had to meet any calls for assistance from our Allies it would have been unnecessary for us to ask the United States Government's assistance.'"

### FRANCE LISTS WAR DEBTS.

In connection with the notification to the French Government that the American Debt Refunding Commission has been organized, the following balance sheet of French war debts in gold francs has been made public in Paris on May 3:

**Debtor.**

| | *Gold Francs.* |
|---|---|
| To the United States | 13,750,000,000 |
| To Great Britain | 12,500,000,000 |
| Total | 26,250,000,000 |

**Creditor.**

| | |
|---|---|
| From Italy | 1,000,000,000 |
| From Russia | 4,000,000,000 |
| From Belgium | 2,250,000,000 |
| From Jugo-Slavia | 500,000,000 |
| Other Allies, including Roumania | 1,250,000,000 |
| Total | 9,000,000,000 |
| Reparations due from Germany | 68,000,000,000. |
| Grand total | 77,000,000,000 |

The statement continued: "It is not pretended that the whole 68,000,000,000 due in reparations ought to be included in the war debt balance sheet, but it is held that at least 25,000,000,000 gold francs already spent by France for the account of Germany in the reconstruction work of Northern France ought to be so included. This would bring the credit side of the sheet to 34,000,000,000 gold francs, showing a balance in favor of France of 8,000,000,000 gold francs."

### BUDGETS AND LAND ARMAMENTS.

President Harding transmitted to the Senate on Dec. 12, 1922, the following figures prepared by the Department of State giving the totals of the budgets of twelve European states for 1922, and the allotments therein for land armaments; the figures are given in dollars calculated at the present rate of exchange:

| Countries. | Total. Budget. | For Land Armament. |
|---|---|---|
| | *Dollars.* | *Dollars.* |
| Austria | 5,039,228 | 69,423 |
| Belgium | 490,000,000 | 44,210,400 |
| Czechoslovakia | 602,300,000 | 98,523,600 |
| Finland | 55,042,800 | 7,741,800 |
| France | 2,508,905,700 | 243,588,600 |
| Great Britain | 4,213,300,000 | 288,449,000 |
| Greece | 47,558,000 | 29,988,000 |
| Hungary | 11,374,600 | 1,530,000 |
| Italy | 921,300,000 | 93,424,800 |
| Poland | 33,982 | 8,740 |
| Roumania | 63,289,600 | 7,173,400 |
| Serbia | 81,341,000 | 18,473,000 |

## CENTRAL AMERICAN STATES' CONFERENCE.

A conference of the five Central American states and the United States opened in Washington on Dec. 4, 1922. The invitation was extended by Secretary of State Hughes. In his opening address he told the conference that the United States had "no ambition to gratify at your expense, no policy which runs contrary to your national aspirations and no purpose save to promote the interests of peace and to assist you in such manner as you may welcome and solve your problems to your own proper advantage."

The agenda of the conference as set forth in the invitation was:

First, the signing of a treaty binding the five states to make effective and to extend the treaty signed in Washington on Dec. 20, 1907, for the promotion of friendly relations and co-operation among the five nations.

Second, adoption of measures in line with the limitation of armament worked out at the Washington conference to limit the military burdens of the five states and to set an example to the rest of the world, and in particular to the nations of this hemisphere.

Third, formulation of plans for the setting up of a tribunal of inquiry to adjust points or controversies which may arise in regard to the purpose of the treaties and which cannot be settled through diplomatic channels.

The invitation was the outgrowth of a meeting of the Presidents of Nicaragua, Honduras and Salvador on the U. S. S. Tacoma in Fonseca Bay, Aug. 20, 1922, for the discussion of measures for more peaceful relations between the countries and to discourage revolutionary activities. The treaty signed that day did not receive the assent of the Presidents of Guatemala and Costa Rica, although both countries reasserted their adherence to the treaty of 1907. The delegates to the conference were:

**Costa Rica:** Dr. Octavio Beeche, Minister of Costa Rica in the United States; Sr. Jose Andres Coronado, Minister of Foreign Affairs.

**Guatemala:** Sr. Francisco Sanchez Latour, Minister of Guatemala in the United States; Sr. Marcial Prem, Counsellor of the Legation in Washington.

**Honduras:** Dr. Alberto Ucles, former Minister of Foreign Affairs; Dr. Salvador Cordova, former Consul in New York; Sr. Raul Toledo Lopez, former Charge d'Affaires of Honduras in France.

**Nicaragua:** Sr. Emiliano Chamorro, Minister of Nicaragua in the United States; Sr. Adolfo Cardenas, Minister of Finance; Dr. Maximo H. Zepeda, former Minister of Foreign Affairs.

**Salvador:** Sr. Dr. Francisco Martinez Suarez, President of the Supreme Court of Justice; Sr. Don J. Gustavo Guerrero, Minister to Spain and Italy.

**United States:** Charles Evans Hughes, Secretary of State; Sumner Welles, American Commissioner in the Dominican Republic.

**Secretariat General:** Jordan Herbert Stabler, Secretary General; Cord Meyer, Secretary; Gustave Pabst Jr., Assistant Secretary; Jose Padin, Official Interpreter.

## NATIONAL WEALTH.

In June, 1920, in a paper read before the Bankers' Institute, London, Edgar Crammond estimated the national wealth of chief countries as follows: United States, $350,000,000,000 to $400,000,000,000; United Kingdom, $120,000,000,000; France, $92,500,000,000; Germany, $83,000,000,000; Italy, $35,500,000,000; Belgium, $12,000,000,000; Japan, $23,500,000,000.

United Kingdom—The national or capital wealth of the British Empire was estimated officially, in 1917, in Parliament, by a Crown Minister, at $130,000,000,000, divided as follows: United Kingdom, $80,000,000,000; Canada, $10,000,000,000; Australia, $6,000,000,000; New Zealand, $1,500,000,000; South Africa, $3,000,000,000; India and Ceylon, $18,000,000,000.

National wealth of other nations—Argentina (1916), $13,865,000,000; Denmark (1900), $2,000,000,000; Germany (1908), $83,000,000,000; Russia in Europe, $60,000,000,000; Austria-Hungary, $55,000,000,000; Turkey, Bulgaria, $4,000,000,000.

Japan, $43,000,000,000.

The total, or national, wealth of the United States was estimated at $300,000,000,000 on Feb. 1, 1921 ($2,800 per capita), by the Government Loan Organization.

United States National wealth in previous years: (1850), $7,135,780,000; (1860), $16,159,616,000; (1870), $30,068,518,000; (1880), $43,642,000,000; (1890), $65,037,091,000; (1895), $77,000,000,000; (1900), $88,517,306,775.

## GERMANY'S REPARATION PAYMENTS.

Andrew McFadyean, General Secretary of the Reparation Commission established under the Treaty of Versailles, issued for the Commission on Oct. 3, 1922, a "Statement of Germany's Obligations" under the heading of Reparations, etc., as of April 30, 1922. The tables, the principal ones, are presented herewith—were issued to give the economic public information as to Germany's payments under Part VIII. of that treaty, and the distribution of such payments between the Allied Powers. Emphasis was laid upon the fact that many of the figures are still entirely provisional, but it is expected that they will prove to be close approximations when definite determinations have been reached. Moreover, the figures of receipts and distribution do not always agree, as in the delivery of merchant shipping, owing to a divergence in the method of valuing the ships.

The first charge on Germany's payment was the cost of occupation as from the armistice, only the balance being available for reparation. These costs amounted to 2,131,904,000 gold marks (exclusive of the cost of the American Army which amounted to 1,010,614,000 gold marks), and in the event the sums actually received from Germany attributable to the costs of occupation were barely sufficient to meet this first charge. These costs were:

*COSTS OF THE ARMIES OF OCCUPATION.*

| | Gross Costs Thousands of Gold Marks | Paper Mark Receipts | Net Cost Thous'ds of Gold Marks |
|---|---|---|---|
| *At April 30, 1921:* | | | |
| Great Britain.... | 991,097 | 89,638 | 901,459 |
| France..... | 1,275,588 | 232,839 | 1,042,749 |
| Italy..... | 10,052 | ..... | 10,052 |
| Belgium..... | 194,599 | 16,955 | 117,644 |
| Total..... | 2,471,336 | 339,432 | 2,131,904 |
| *From May 1, 1921, to April 30, 1922:* | | | |
| Great Britain.... | 24,006 | 13,219 | 10,787 |
| France..... | 224,472 | 60,312 | 164,160 |
| Belgium..... | 41,138 | 5,494 | 35,644 |
| Total per year. | 289,616 | 79,025 | 210,591 |
| Grand Total to April 30, 1922 | 2,760,952 | 418,457 | 2,342,495 |

NOTE—The net cost of the American Army of Occupation at April 30, 1921, was 1,010,614,000 gold marks; for the year May 1, 1921, to April 30, 1922, it was 56,160,000 gold marks; grand total to April 30, 1922, 1,066,774,000. Therefore the grand total net cost of all the armies of occupation was 3,409,269,000 gold marks.

Costs incurred in the period up to April 30, 1921, are charged against liquid assets received between Nov. 11, 1918, and April 30, 1921; and in the following fiscal year are charged against deliveries in kind.

"On April 28, 1921," to quote the language of Secretary McFadyean, "the Commission notified the German Government of its finding that the total damage for which Germany was responsible amounted to 132 milliard gold marks; on May 5, 1921, the Commission notified the Schedule of Payments prescribing the time and manner for securing and discharging the entire obligation of Germany for reparation under Articles 231, 232 and 233 of the Treaty, the total obligation of Germany at this date being 132 milliards of gold marks, less '(*a*) The amount already paid on account of Reparation, (*b*) sums which may from time to time be credited to Germany in respect of State properties in ceded territories, etc., and (*c*) any sums received from other enemy or ex-enemy Powers in respect of which the Commission may decide that credit be given to Germany, plus the amount of the Belgian debt to the Allies, the amounts of these deductions and additions to be determined later by the Commission.'

"The Schedule prescribed the payment of a fixed annuity of two milliard gold marks and a variable annuity equivalent to 26% of the value of German exports. Further, the Schedule specifically provided for the payment within twenty-five days of one milliard of gold marks to represent the two first quarterly instalments of the fixed annuity.

"The third period opens with the request dated Dec. 14, 1921, from the German Government for a partial postponement of the payments prescribed by the Schedule. While considering this request the Commission, by a decision taken on Jan. 13, 1922, at Cannes, granted a provisional postponement of the Schedule instalments due on Jan. 15 and Feb. 15, replacing them by payments every ten days of 31 million gold marks, the first payment falling on Jan. 18.

"On March 21, the Commission granted Germany a partial moratorium for her schedule obligations for the year 1922, and decided that she should pay in that year 720 million gold marks in cash and effect deliveries in kind to the value of 1,450 million gold marks in cash, the obligations postponed being carried forward to the years following. This partial moratorium was provisional in the first instance, but subsequently confirmed on May 31, 1922, a date which falls outside the period covered by the accounts now published.

"At the same time a further accounting complication was introduced owing to the decision taken, at the wish of the Allied Governments concerned, as expressed in the Financial Agreement of March 11, 1922, that the costs of the Armies of Occupation as from May 1, 1921, should be repaid to each of the creditor Powers in so far as not already covered by the requisition of paper marks by the armies, out of the deliveries in kind actually received by them under the Schedule of Payments from May 1 to Dec. 31, 1921, and out of the deliveries for 1922 as arranged for that year by the moratorium of March 21, 1922. The effect is to produce retroactively a deficit in German reparation payments even before the period for which a partial moratorium was demanded."

The arrangement of March 11, 1922, between the Governments of Belgium, France, Great Britain, Italy and Japan, referred to above, provided that the payments made to the Armies of Occupation be fixed at the following annual amounts:

Belgian francs.....102,000,000
Pounds sterling.....2,000,000
French francs.....460,000,000

These figures are fixed on the basis of the following effective strength:

Belgian Army.....19,300 men
British Army.....15,000 men
French Army.....90,400 men

The payments were calculated on the basis of a

total amount of 220,000,000 gold marks. Out of this amount a sum of 10,950,000 gold marks was in the first place allocated in respect of the British Army, representing a special allowance of 2 gold marks per man per day, to cover its higher cost. The remainder, or 209,050,000 gold marks, was divided in proportion to the number of effectives in question. The conversion of the sums in gold marks so arrived at into national currencies was made at the mean rate of exchange for December, 1921.

The distribution of liquid assets received between Nov. 11, 1918 and April 30, 1922, as carried on the pre-May 1, 1921, account and shown in the accompanying table "Statement of Germany's Deliveries and Payments" was as follows:

*A. CASH AND SECURITIES.*

| | Gold Marks. |
|---|---|
| *Payment by French Government for:* | |
| Germany's proportion of the State Bank of Morocco | 643,000 |
| Telephone account prior to Aug., 1914 | 10,000 |
| *Payment by Denmark for:* | |
| Property acquired in Schleswig | 63,000,000 |
| Proportion of German Imperial and State debts assumed | 2,000,000 |
| *Money retrieved from ships sunk at Scapa Flow* | 4,000 |
| *Receipts from remitted sales of converted war material* | 43,140,000 |
| *Receipts on account of deliveries in kind* | |
| From Luxemburg for coal | 17,520,000 |
| From misc. sales of dyestuffs | 5,525,000 |
| *Realized proceeds of collections in Rhine customs zone* | 3,324,000 |
| *Interest Earned on Investments* | 3,102,000 |
| *Loss in Exchange* | 345,000 |
| Sums advanced from schedule of payments account (financial agreement of March 11, 1922) | 640,000,000 |
| Total receipts in cash | 778,268,000 |

NOTE.—Of this amount 637,599,000 gold marks went to Great Britain (including 500,000,000 g. m. of the "sums advanced"), and 140,307,000 g. m. went to France (including 140,000,000 g. m. of the "sums advanced"); the 345,000 g. m. loss on exchange and 17,000 g. m. of miscellaneous sales of dyes remain undistributed.

*B. DELIVERIES IN KIND.*

| | | |
|---|---|---|
| *Ships:* | | |
| Allotted to Powers | | 659,867,000 |
| To Great Britain | 204,334,000 | |
| To France | 51,153,000 | |
| To Italy | 2,036,000 | |
| To Japan | 6,200,000 | |
| To Greece | 5,318,000 | |
| To Roumania | 128,000 | |
| Difference between Germany's credit and Powers' debits | 390,701,000 | |
| *Rotterdam Docks* (to France) | | 325,000 |
| *Livestock (a)* | | 7,535,000 |
| To France | 4,568,000 | |
| To Italy | 772,000 | |
| To Belgium | 2,195,000 | |
| *Livestock (b)* | | 83,364,000 |
| To France | 53,045,000 | |
| To Belgium | 30,319,000 | |
| *Miscellaneous (a)* | | 8,430,000 |
| To France | 3,097,000 | |
| To Italy | 8,000 | |
| To Belgium | 5,325,000 | |
| *Reconstruction Material* | | 1,068,000 |
| To France | 641,000 | |
| To Italy | 18,000 | |
| To Belgium | 409,000 | |
| *Coal, Coke and Lignite* | | 423,365,000 |
| To France | 324,979,000 | |
| To Italy | 54,589,000 | |
| To Belgium | 43,792,000 | |
| Luxemburg (to pay) | 5,000 | |
| *By-Products of Coal* | | 8,014,000 |
| To France | 8,014,000 | |
| *Dyestuffs* | | 32,476,000 |
| To Great Britain | 8,499,000 | |
| To France | 9,251,000 | |
| To Italy | 2,124,000 | |
| To Japan | 2,630,000 | |
| To Belgium | 2,949,000 | |
| To Jugo-Slavia | 23,000 | |
| *Pharmaceutical Products* | | 3,053,000 |
| To France | 193,000 | |
| To Italy | 2,125,000 | |
| To Japan | 135,000 | |
| To Belgium | 541,000 | |
| To Jugo-Slavia | 59,000 | |
| *Louvain Library* | | 522,000 |
| To Belgium | 522,000 | |
| *Total Deliveries in Kind* | | *1,228,019,000* |
| To Great Britain | *212,833,000* | |
| To France | *455,263,000* | |
| To Italy | *68,672,000* | |
| To Japan | *8,965,000* | |
| To Belgium | *86,052,000* | |
| To Greece | *5,318,000* | |
| To Roumania | *12,000* | |
| To Jugo-Slavia | *32,000* | |
| Undistributed | *390,706,000* | |

*C. ARMISTICE DELIVERIES.*

| | |
|---|---|
| *Total Armistice Deliveries* | 1,183,226,000 |
| To Great Britain | 84,413,000 |
| To France | 527,433,000 |
| To Italy | 15,306,000 |
| To Belgium | 470,622,000 |
| To Poland | 14,705,000 |
| To Roumania | 1,408,000 |
| To Czechoslovakia | 6,848,000 |
| Undistributed | 59,491,000 |

*D. OTHER LIQUID ASSETS.*

| | |
|---|---|
| *Submarine Cables* | 49,000,000 |
| Undistributed | 49,000,000 |

*GRAND TOTAL OF LIQUID ASSETS.*

| | |
|---|---|
| *Grand Total, Liquid Assets Received* | *3,238,513,000* |
| *Distributed—* | |
| To Great Britain | *934,845,000* |
| To France | *1,123,003,000* |
| To Italy | *83,978,000* |
| To Japan | *8,965,000* |
| To Belgium | *556,674,000* |
| To Greece | *5,318,000* |
| To Poland | *14,705,000* |
| To Roumania | *4,536,000* |
| To Jugo-Slavia | *82,000* |
| To Czechoslovakia | *6,848,000* |
| Undistributed | *499,559,000* |

The distribution on capital account of cessions, being state property in ceded territories and other capital items (E.), was as follows:

| | Gold Marks. | Gold Marks. |
|---|---|---|
| *Coal mines in Saar Basin* | | 400,000,000 |
| Debited to France in 1922 | 300,000,000 | |
| Undistributed | 100,000,000 | |
| *German school in French concession, Shanghai* | | 2,042,000 |
| To France | 2,042,000 | |
| *Property in British concession Shameen* | | 538,000 |
| To Great Britain | 538,000 | |
| *Property in Kiaochow* | | 59,000,000 |
| To Japan | 59,000,000 | |
| *Property acquired by concessionary states* | | 2,017,665,000 |
| To Czechoslovakia | 5,540,000 | |
| Dantzig (undistributed) | 300,000,000 | |
| To Poland | 1,712,025,000 | |
| *Portion of German Imperial State loans assumed by concessionary states* | | 25,097,000 |
| By Belgium (Moresnet, Eupen and Malmedy) | 635,000 | |
| By Czechoslovakia | 391,000 | |
| Dantzig (undistributed) | 5,514,000 | |
| By Poland (Posen, etc., ceded) | 18,557,000 | |
| Total state properties | | *2,504,342,000* |

No figures have been furnished covering property and Imperial State loans in Memel and in the territory now Poland's in the plebiscite area.

Supplemental to the table "Statement of Germany's deliveries and payments on Pre-1st May, 1921, account," printed herewith, is the following table of *"Summary of Credits to Germany for Cash Payments and Deliveries in Kind on Account of Schedules of Payments and Army Costs, May 1, 1921-April 30, 1922."*

| | Gold Marks. |
|---|---|
| *A. Cash and securities* | *1,313,660,496* |
| Art. 5 of Schedule of Payments | 1,000,000,000 |
| Variable annuity instalment of Nov. 15, 1921 | 13,014,991 |
| Cash payments, Jan.-Apr., 1922 | 300,645,505 |
| *B. Deliveries in kind* | *560,475,417* |
| Proceeds of Reparation Recovery Act | 72,263,442 |
| Miscellaneous deliveries | 44,193,285 |
| Ships (376,533 tons) | 43,889,767 |
| Inland water craft | 21,071,825 |
| Livestock | 51,592,016 |
| Reconstruction material and misc | 21,101,716 |
| Coal, coke, lignite (16,050,165 tons) | 275,398,643 |
| Coke by-products—benzol, etc. (67,282 tons) | 11,690,454 |
| Dyestuffs | 10,006,782 |
| Pharmaceutical products | 8,451,212 |
| Louvain library | 816,276 |
| *C. Armistice deliveries in kind* | *3,678,816* |
| GRAND TOTAL | *1,877,814,749* |

The distribution of these items among the powers shows some divergence in figures because some deliveries in kind are carried as cash payments, etc. Of the cash, 640,000,000 gold marks was transferred

to the account for army costs; and a credit of 868,000 gold marks appears in favor of Great Britain, and another of 2,147,000 in favor of France, representing gains in exchange. To Belgium went 669,647,000 gold marks; and 33,016,000 were undistributed. Of the ships, the distribution was: Great Britain, 42,542,000 g. m.; France, 768,000; Italy, 490,000; Japan, 9,000; Greece, 81,000. Of inland navigation boats, tugs, etc., the distribution was: France, 14,318,000 g. m.; Belgium, 345,000; and Czechoslovakia, 6,409,000. Of the livestock, the distribution was: France, 27,867,000 g. m.; Italy, 5,046,000; Belgium, 6,828,000; S. H. S. State, 11,851,000. Of the reconstruction material and agricultural machinery and seeds, the distribution was: France, 5,229,000 g. m.; Italy, 2,335,000; Belgium, 12,307,000. Of the coal, the distribution was: France, 156,676,000 g. m.; Italy, 56,128,000; Belgium, 39,416,000. All the by-products of coke went to France. Of the dyestuffs, the distribution was: Great Britain, 1,212,000 g. m.; France, 1,630,000; Italy, 2,752,000; Belgium, 2,608,000; Greece, 197,000; and "sold to the United States Textile Alliance (but not yet paid in cash)," 139,000.

## STATEMENT OF GERMANY'S DELIVERIES AND PAYMENTS UPON PRE-1ST MAY, 1921, ACCOUNT.

(Between 11th November, 1918 and 30th April, 1920.)

| No. | Articles or Treaty Annexes. | Nature of Deliveries or Payments. | Quantity. | Value in Gold Marks. |

| Total Deliveries in Kind to 30th April, 1922 | 61,968,339 | 135,002,258 | 196,970,597 |
| Grand total | | | 509,216,446 |
| Balance due in Kind | | | 1,253,029,402 |
| Balance due in Cash | | | 407,754,151 |
| Total obligation | | | 2,170,000,000 |

It was announced in Washington on Sept. 27, that Secretary Hughes had worked out a plan whereby the United States would receive its share of German dyes, to be credited on the American bill against Germany for the cost of its Army of Occupation. The Reparation Commission approved this plan. Annual deliveries will probably not exceed $3,000,000.

## INTERNATIONAL BANKERS ON GERMAN LOAN.

The International Committee of Bankers which was invited by the Reparation Commission to Paris following the Genoa Conference to consider the conditions under which an external loan could be raised by Germany deliberated the matter from May 24 to June 10, 1922, found the flotation of such loan not feasible at that time, but stated emphatically that, given favorable conditions, substantial loans could be successfully floated in all the main markets of the world.

Germany and Belgium came to an agreement on Sept. 19, whereby the latter received German treasury bonds indorsed by the Reichsbank for reparation payments to Belgium, to the amount of 270,000,000 gold marks, due Feb. 15, and June 15, 1923.

An attempt at a practical solution of the Franco-German reparation problem was made early in September by the Marquis de Lubersac and Hugo Stinnes for furnishing millions of francs in building material. This, however, was cancelled about Oct. 20, because of the collapse of the German mark.

The Reparation Commission visited Germany in November, but no concrete results were accomplished. A further conference at Brussels was under discussion, but not settled by the first of December.

Germany on Nov. 14, delivered a note to the Reparation Commission, outlining her plan for a loan of 1,000,000,000 gold marks, half to be supplied by the Reichsbank, the rest from outside, for the rehabilitation of the mark, with a request for a three or four year moratorium. Germany would undertake, a Berlin despatch said, to increase production by prolonging working hours and to effect savings in administration by reducing the number of officials.

The meeting of the four Premiers of the Allied powers in London, December 9-11, failed to reach an agreement on a ground for the conference planned to be held on reparations in Brussels before the next German payment is due, which is January 15. They unanimously found unsatisfactory the plan submitted by the German Chancellor which asked for a two-year moratorium. Premier Poincare insisted that France wanted a "protective guarantee" that Germany will meet her obligations, which was interpreted as a definite instance that France would occupy the Ruhr.

## AMERICAN-GERMAN CLAIMS COMMISSION.

The personnel of the American-German Claims Commission appointed by the two Governments under the agreement signed in Berlin, Aug. 10, 1922, is as follows:

William R. Day, former Justice of the United States Supreme Court, umpire of the commission.

Edwin B. Parker of Texas, American member.

Robert C. Morris of New York, agent of the Government of the United States.

Marshall Morgan, assistant to the American agent.

Dr. Wilhelm Kiesselbach, German member.

Karl von Lewinski, agent of the Government of Germany.

Henry B. Morrow and O. O. Klep, joint secretaries of the commission.

The first work of the commission will be the settlement of claims of the American Government and nationals against Germany for war losses. German claims involving property seized here by the Alien Property Custodian will be held in abeyance. It is estimated the Commissioners will have the disposal of claims for about $800,000,000 or $900,000,000.

## THE GERMAN MARK COLLAPSE.

The United States Department of Commerce, in its Commerce Reports for Nov. 20, 1922, set forth the grave situation in industry, commerce and finance in Germany emphasized in the October (1922) mark collapse which has revived and intensified the effects of previous violent declines. Its article is based on cable reports from the United States Commercial Attache, Charles E. Herring, in Berlin and in part follows:

The new mark collapse from 1,815 to the dollar on October 1 to 8,392 on November 7, together with the expectation of a further decline, has resulted in Germany in renewed popular apprehension, greater uncertainty in all business, increased price confusion, panic buying of goods, and all other incidents of previous drops in the mark. The beginning of the decline of October 12 is generally attributed to the Cabinet crisis in England; since then basic factors which make even a further mark collapse inevitable have been in operation.

These basic factors bringing about currency depreciation may be listed as follows: The continuing adverse balance of payments, as aggravated by reparation payments; the complete loss of confidence abroad in any mark recovery, with the resulting refusal to purchase and the unloading of previous holdings; the invoicing of 60 per cent. or more of German exports in high-exchange currency

thus greatly diminishing the legitimate commercial demand for mark exchange; anticipatory purchase of foreign exchange by German industry and, of less importance, speculation by individuals; and lastly, although this is an effect rather than a cause, continued inflation.

The theory that internal speculation in foreign values is largely responsible for the recent collapse of the mark seems somewhat invalidated by the violent depreciation since the passage of the law providing for the control of foreign-exchange transactions. This measure was in fact not so much a practical expedient as a gesture to quiet public apprehension over the new mark depreciation; it was aimed chiefly at the prevention of smaller private speculation and has no effect on legitimate purchase of foreign exchange by industry which must obviously cover raw-material purchases when contracts are made. This law, which went into effect about the middle of October, is largely inoperative at present but has caused much protest from trade and industry.

## NOTE CIRCULATION AND FLOATING DEBT.

The German note circulation at the end of October amounted to 469,000,000,000 Reichsbank notes and 14,000,000,000 Government Loan Office notes. The Reichsbank circulation advanced during the month from 316,000,000,000, but the amount of the loan office notes was practically unchanged. The rate of inflation increases month by month, the additional circulation having been in round numbers 12,000,000,000 in March, 17,000,000,000 in June, 20,000,000,000 in July, 48,000,000,000 in August, 78,000,000,000 in September, and 153,000,000,000 in October.

The floating debt of the German Government was given as 721,000,000,000 marks on Oct. 31, 1922, of which 604,000,000,000 consisted of discounted treasury bills. Of these discounted bills the money market had absorbed only 127,000,000,000, leaving an excessive amount in the Reichsbank.

Private discounts at the Reichsbank amounted to 101,000,000,000 marks on October 31, of which 25,000,000,000 had been added during the last week in the month. On September 30 the private discount figure was 50,000,000,000 marks; on August 31, 21,000,000,000; on July 31, 8,000,000,000.

The Finance Ministry reports the revenue of the German Government from April to September first six months of fiscal year) as 343,000,000,000 marks, 218,000,000,000 of this being derived from the floating debt and 123,000,000,000 marks from taxation, but the forced loan receipts came to only 2,450,000,000 marks.

## GOLD VALUATION OF GERMAN INDUSTRY.

The stock market has experienced a strong bull movement. The extent of turnover and the work involved have made necessary the closing of the exchange for two days a week. Nevertheless, the market level has not reacted in proportion to the fall of the currency.

The Frankfurter Zeitung stock index on November 3 stood at 318,145, compared with 98,880 on October 6. Domestic loans went from 1,345 to 2,133 during the period, and foreign loans from 46,115 to 77,660. The remarkable appreciation of securities is to be attributed in part to the discouraging effect of the recent anti-speculation measures on small investors who formerly speculated in foreign currencies.

The gold value of the share capitalization of German industry, estimated last July by the Berliner Tageblatt at 6,800,000,000 marks (against 31,000,000,000 at the end of 1913), is considered to be undoubtedly less now than in July.

## CAPITAL SHORTAGE.

The various difficulties due to the shortage of capital are becoming more pronounced. Conditions tend to bring about the elimination of smaller concerns which are unable to obtain adequate bank credit to meet the new price levels or to proportionately increase their capitalization. This elimination takes the form of absorption by large corporations rather than of bankruptcies. The larger concerns are forced to draw upon their foreign high-exchange reserves. Actual currency is also still scarce; municipal and other corporations are issuing emergency currency.

The Frankfurter Zeitung gives October capital increases as 3,798,900,000 marks, largely in the metals and machinery industries, mines and smelters, public utilities, and banks. New incorporations amounted to 1,078,600,000 marks, chiefly in metals, machinery, foodstuffs, and banks. The capital increases in September were 3,748,400,000 marks, and the new incorporations came to 905,700,000; capital absorption apparently is lagging far behind currency depreciation and price levels. During October, six corporations issued 2,309,500,000 marks in fixed interest securities, as against 3,283,200,000 marks by twenty-one corporations in September.

## WHOLESALE PRICE INCREASES IMPORTANT.

Coal prices were increased on November 1 by approximately 60 per cent., and textile raw materials are advancing so rapidly as to affect both the cotton and woolen textile industries severely. Inland potash prices effective November 3 showed an advance over those of October 1 of about 250 per cent., while pig-iron prices jumped four times during the month.

The Frankfurter Zeitung wholesale price index for 98 commodities showed an increase from 43,223 at the end of September to 94,492 at the end of October, a much closer response to currency depreciation than is noted in retail indexes.

All domestic trade is now on a shifting price basis. Although internal payments in foreign currencies are prohibited except in special cases, yet the practice of calculating on a dollar basis is increasing. In export trade probably 60 per cent. of the transactions are in high-exchange currencies.

The labor market was probably less favorable during October than it had been in September (although official unemployment figures do not reflect this), but the slump in production predicted some time ago has not yet set in. Part-time employment is on the increase, but the eventual industrial crisis is apparently not yet imminent; all proposals to introduce part-time work must be approved by a Government commission, which refuses such applications in a large number of cases.

The weekly changes in the prices of iron and steel and certain other standard goods and the very frequent wage changes (often weekly) are resulting in many negotiations and much paper work and, of course, bring about great economic waste. Likewise the Government control of foreign trade and other activities, together with the shifting basis of all economic life, results in enormous unproductive employment among the "white collar" class; production costs are increased, and the effect of the lower gold value of wages is partially nullified.

Labor unions report that 52,349 of their membership were unemployed on October 1; this is 0.8 per cent., against an unemployment of 0.7 per cent. in September.

## WAGES AND LABOR TROUBLES.

Strikes and other labor troubles were less noticeable in October than in the preceding month; wage demands were being settled by arbitration or agreement. Apparently employers are making an effort to readjust wage distributions among skilled and unskilled workers.

The response of retail prices to the new currency depreciation is fortunately greatly retarded, and the danger of food riots is thus minimized. Dr. Kuczynski's minimum living-expense index for Berlin showed a 98 per cent. increase for the second half of October. Dr. Kuczynski estimated the minimum weekly living cost for a family of four in Berlin to be 6,136 marks during the first half of October and 8,871 during the second half. Effective on November 13 the price of rationed bread was set at 112 marks for a 1,000-gram loaf.

The average weekly wage paid in Berlin during the second half of October, 5,200 to 6,000 marks, indicates that wages are not keeping pace with the greatly advancing living costs. This condition is reported difficult for Germany as a whole.

The internal purchasing power of the mark, an average gold value for October, was estimated by Kuczynski at $0.001, while the foreign exchange value (based on an average mark-to-dollar rate of 3,308) was given as $0.0003. During the second half of the month the averages above were $0.0008 and $0.00028, respectively.

## TRANSPORTATION AND COMMUNICATIONS.

On November 15 an increase of 100 per cent. in postal rates went into effect; the Ministry of Posts reports that since the last increase there has been a considerable diminution in the use of the mails. On November 1 an increase of 50 per cent. in railway freight rates and 100 per cent. in passenger fares went into effect and further advances are announced for December 1.

During the month of October, nine ships, aggregating 46,400 tons were launched. Fourteen ships aggregating 86,800 tons were completed and one ship of 8,300 tons was bought. Imports for September were 4,830,000 metric tons and exports were 1,590,000 metric tons.

## THE GENOA CONFERENCE OF THE POWERS.

The Genoa Conference assembled on April 10, 1922, at the Royal Palace of St. George at Genoa, with delegates from thirty-four states, convened to find a remedy for the economical ills of Europe. Lloyd George, Prime Minister of Great Britain, had proposed this meeting to M. Briand, Premier of France, and later at Boulogne, on February 25, had renewed the proposal to M. Poincare. To him he had given the assurance that if Germany and Russia were invited the questions of reparations and the terms of the Versailles Treaty should not be made subject to revision and the Russian pre-war debt should not be brought into question.

The official list of nations represented was as follows:

Albania, Australia (Sir Joseph Cook, head of delegation), Austria, Belgium (Premier Theunis, head), Bulgaria, Canada (Sir Charles Gordon, head), Czechoslovakia (Premier Edouard Benes, head), Denmark, Esthonia, Finland, France (Louis Barthou, head), Germany (Chancellor Wirth, head, and Dr. Rathenau), Great Britain (Premier Lloyd George, head), Greece (Premier Gounaris, head), Holland, Hungary, Ireland, Italy (Premier Facta, head), Jugo-Slavia, Latvia, Lithuania, Luxemburg, New Zealand, Norway, Poland, Roumania (Premier Bratanio, head), Russia (Foreign Minister George Chicherin, head), San Marino, Union of South Africa, Spain, Sweden, Switzerland, Japan (Viscount Ishii, President of the Council of the League of Nations, head).

Richard Washburn Child, the American Ambassador to Rome, was present as an unofficial observer, the Washington Government having declined to participate. Great Britain brought a delegation of 128 members, France, 80, Germany, 80; in all the official attendance amounted to 1,500, and 400 newspaper correspondents crowded the gallery.

Lloyd George in his opening address said: "The world is one economic unit. For that reason I regret that the great American Republic is not represented here. However, much that has happened and is happening in Europe makes Americans cautious in interfering in our affairs. But if we can set these things right at this conference, I feel sure America will not merely come in, but come in gladly."

He made a plea for real peace, a careful study of currency and the question of exchanges, and the investigation of transport and credit. He emphasized four essential conditions to intercourse between nations; that contracts should not be repudiated; that no country can wage war on the institutions of another; that one nation shall not engage in aggressive operations against the territory of another; and that the nationals of one country shall be entitled to impartial justice from the courts of another.

As the spokesmen of the several delegations responded Viscount Ishii explained that Japan wished to co-operate because that country was suffering from the loss of European markets and the instability of exchange. The Russian Foreign Minister, George Chicherin, after saying "Russia has not come here to do propaganda, but to co-operate in the economic reconstruction of the world," introduced the question of disarmament. Russia, he said, was willing to reduce her army provided that other nations reduce theirs, and promise to let Russia alone. France, through M. Barthou, protested saying it had been agreed there should be no discussion of disarmament at Genoa.

The practical work of the conference was given over to three commissions—Finance, Commercial, and Transportation. A sub-committee of the first, composed of the leaders of the great powers, including Germany and Russia and four representatives from the remaining states, those selected being: Switzerland, Sweden, Poland and Roumania, had the bulk of the work to do.

An attempt was made by Italy to raise the question of the inter-allied debts, but it was ruled out by the Chairman on the ground that no decision could be reached without the participation and consent of the United States.

### TERMS FOR RUSSIA.

The Allied experts brought forward specific proposals relating to Russia, which stated bluntly that if Russia expects to resume her relations with the outside world that Cheka, or kindred bodies, sitting in secret and meting out arbitrary punishment to further the Soviets political needs, must be abolished and Russia must set up a public judicial authority with professional judges independent of the Soviet. All law to be applied must be published, must be equal for all persons and non-retroactive. Foreigners must be protected against arbitrary arrests and invasion of their homes. There must be right of appeal. The execution of judgments must be guaranteed, especially commercial contracts and arbitration awards, even when made in foreign countries, must be enforced. The Soviet Government must accept responsibility for the debts of the Imperial Russian Government and the provisional Government and accept a considerable number of other financial liabilities.

The Soviet delegates were amazed and said the demands respecting the rights of personal property and protection for foreigners contemplated changes in the Soviet Government which would virtually wipe out Communism and impair Soviet sovereignty at home.

Lloyd George, after waiting several days, invited the leaders of France, Belgium and Italy and the two leaders of the Soviet delegation for a preliminary conference at his villa at Quarto. There the Russians, as against a claim of all other countries, totalling 65,000,000,000 gold francs, opposed a Russian claim totalling 300,000,000,000 gold francs (subsequently scaled down to $125,000,000,000) to cover all Russia's counter-claims for her costs in waging war on the allied side before the revolution and for the subsequent damage done by the anti-Soviet Generals Kolchak, Denikin and Wrangel, who had received moral and material support from the Allies. Finally, the Russian leaders offered to settle on a basis of 200,000,000,000 gold francs, provided they were given a considerable loan for economic reconstruction. At the close of two days of discussion the British Premier told M. Chicherin that the Russians must abandon their fantastic indemnity claims and must comply with the following conditions:

Recognize the pre-war debt of Russia; recognize the responsibility of the Russian Government for the sums borrowed by Russia from the Allies during the war; and recognize the liability of the Soviet Government for property owned by foreigners, which the Soviet had nationalized. After they had accepted his conditions Lloyd George said the Allies would entertain the question of damage done by the anti-Soviet Generals.

Russia was notified by Sir Robert Horne that the Allied experts had estimated the Soviet debt for foreign-owned property destroyed or seized at 6,000,000,000 gold francs and asked if they were ready to recognize this obligation. Rakovsky, the Ukrainian Premier, one of the delegation, replied that they were, but only on condition that the Allies recognize the Russian counter-claims, totalling 30,000,000,000 gold francs and demanded that the Allies make Russia a preliminary payment of 2,000,000,000 gold francs on account. Discussion ended.

### THE RUSSO-GERMAN TREATY.

Lloyd George and his associates were staggered when the Germans announced on April 17, that on the previous day, Easter Sunday, Dr. Walter Rathenau, the German Foreign Minister, had concluded a treaty with M. Chicherin at Rapallo. The salient features of this treaty were:

Mutual renunciation of war expenses, war damages and civil damages; legal questions arising from the war, including disposition of merchant ships to be settled on a basis of reciprocity; expenses for war prisoners mutually annulled; Germany renounces all claims of her nationals, resulting from application of Soviet laws on condition that "the Soviet Government shall not satisfy similar claims made by any third state;" consular and diplomatic relations to be immediately resumed; the rights of nationals and the regulation of commercial relations to be mutually based on the "most favored nation" principle; and mutual economic assistance.

The Allied delegates were absolutely surprised and amazed, and the French especially furious, and reproached Germany bitterly in formal notes signed by ten nations, holding that such an agreement secretly concluded while the conference was in session was a violation of the conditions to which Germany pledged itself on entering the conference, and that the act destroyed the spirit of mutual confidence. The German envoys denied that secrecy had been intentional and the Russians said it was but the final result of earlier negotiations.

Two alternatives were presented to Germany: that she either denounce the treaty, or withdraw from further discussions on Russia. The delegates

chose the latter course, and asserted that they desired to co-operate fully with the work of the conference. The French went further and called on the Germans to state categorically that the treaty contained no secret clauses, for rumor was persistent that the compact embodied a secret military alliance. (Official denial of such a compact was later made by Russia.) They also held that Germany was alienating just claims to assets that would be applicable to reparation payments under the Versailles Treaty.

In continuing their relations with the Russian delegation the Allied powers put forth three demands: First, a refusal to admit any liability regarding the claims advanced by the Soviet Government; second, willingness was expressed, in view of the serious economic condition of Russia to write down the war debts owing by Russia by a percentage to be determined later; and the countries would be prepared to consider postponement of payments of interest and also some remission of interest; third, it must be definitely agreed that there can be no allowance made to the Soviet Government against (a) either debts and financial obligations due to foreign nationals, or (b) the right of such nationals regarding the return of their property and compensation for damage or loss.

### THE RUSSIAN REPLY.

The Russian delegation formally expressed a willingness to accept the first and second conditions and the first half of the third. For the rest they said the Russian Government would be ready "to restore to their former owners the use of property, nationalized or reserved, under the reservation, that in the event of that being impossible satisfaction shall be given to the legitimate claims of the former owners either by mutual agreement or by arrangements to be worked out at the conference." The delegation insisted on the necessity for a loan and the equal necessity for the recognition of the Soviet Government as a fundamental condition.

On this basis discussions went on until the Russians insisted that the cash loan and credit must pass through their hands. They were told that it would not be possible to give them a large cash loan, as the European nations had little cash available and because they did not admit the wisdom of turning cash over to the Soviet to use for reconstruction according to its own discretion. The British experts outlined a plan for a credit system by which supplies and machinery would be placed in Russia for specific purposes. The Russians protested, declaring that Moscow should have full discretion without Allied supervision or control, and declared that the British scheme would threaten the Communistic basis of their Government.

Russia then brought forward a set of completely new demands, insisting on a considerable cash loan, the cancellation of interest arrears on the pre-war debts and a moratorium of thirty years on those debts. They also declared that restitution of foreign-owned property was contrary to their policy of nationalization, yet they contended that Russia had the right to possess property in foreign countries because these countries were under a bourgeois regime. These new demands made the previous reply valueless. The commission decided further discussion was impossible, and referred the new situation to the heads of the Allied delegation.

A week's exchange of views resulted in agreement on three main issues: recognition by the Soviet of Russia's pre-war debts; restitution of private-owned foreign property and the acceptance of an international consortium to establish credit and develop enterprise in Russia. In connection with this, thirteen countries announced that they were ready to subscribe £20,000,000 capital to the consortium for the renewal of business in Europe, and especially in Russia. Great Britain, France, Italy and Germany were each to subscribe £4,000,000.

The final version of this note to be sent to Russia was drafted on May 1. On the morning of that day M. Jaspar blocked the decision by declaring that Belgians owned property in Russia worth nearly a billion dollars and that Belgium wanted this property restored outright. France backed up Belgium's claims and the note was finally transmitted to the Russian delegation, bearing the approval of all the powers except Belgium and France.

Lloyd George's project for a ten-year agreement "of non-aggression," after much discussion, proved abortive.

The Russian delegation sought definite instructions from Moscow and the Soviet Government refused its assent to the return of foreign property outright and emphasized its insistence on a foreign loan.

The Genoa Conference adjourned practically without results on May 19 after extending an invitation to the United States to join the Allied powers and Russia in a further conference on Russian affairs at The Hague on June 15.

Secretary Hughes, on May 15, sent a reply to the invitation saying that the United States Government could not join in the conference.

M. Chicherin and M. Rakovsky remained at Genoa and completed negotiations for a commercial treaty with Italy, which was signed on May 24.

### THE HAGUE CONFERENCE ON RUSSIAN AFFAIRS.

An attempt to reach a preliminary understanding was made by the British and French Governments. In considering the view put forward at Genoa by the Belgians, and accepted by the French, that the Russian Government had no right at all to nationalize foreign property, and was bound in all cases to restore it intact to its original owner, the British Government sent a note to the French Government saying: "Every state has a right compulsorily to acquire private property, whatsoever its nature, on payment of just compensation. . . . Whether the Russian Government makes restitution of private property alienated from its owners or pays compensation for it is a matter solely for the Russian Government. His Majesty's Government . . . entirely agree, however, that compensation shall be real, not shadowy."

The French Cabinet thereupon decided on June 13 to send a delegation, or "mission of inquiry," to The Hague, taking the position that the discussions should be removed from politics and be of a purely technical character. Charles Benoist was made head of the delegation. The English delegation was headed by Edward Hilton Young, Financial Secretary to the Treasury, and Sir Philip Lloyd-Graeme, Director of Overseas Trade; Baron Romano Avezzeno headed the Italian and M. Cartier the Belgian. The other nations represented were: Austria, Bulgaria, Denmark, Spain, Esthonia, Finland, Greece, Hungary, Japan, Latvia, Lithuania, Luxemburg, Norway, Holland, Poland, Portugal, Roumania, Serbia, Sweden, Switzerland and Czechoslovakia. The Russian delegation was composed of Maxim Litvinov, Leonid Krassin, M. Krestinsky and M. Sokolnikov. The United States was represented by Louis Sussdorf as an observer.

The conference met on June 15 at the Peace Palace and formed three sub-committees: Private property, Debts, and Credits. The Russians arrived on June 25, insistent that the question of credits must first be settled and then, and then only, would the Russians be ready to take up the other issues. The non-Russian powers were insistent on considering first the restoration of property. They declared that confidence was necessary, that credits must largely proceed from the financial and industrial interests which had been doing business with Russia before the revolution, and that these interests could not and would not move unless and until Russia had at least recognized its past obligations in relation to confiscated property and state debts.

M. Litvinov made it clear at the outset that the Russian Government would accept no absolute and general liability to restore particular undertakings to their original owners and that it could admit no vested rights. The Russians handed in a long list of properties which Soviet Russia was prepared to lease, giving priority to previous owners. This list showed that less than 25 per cent. of the foreign enterprises in Russia were included and that the Government apparently proposed to retain whole industries, notably the textile industry.

M. Krassin added that restitution by itself meant nothing, for the factory owner would be powerless to work his property unless he was able to make terms with the Soviet Government or its local organizations with regard to labor, food, fuel, supplies of raw material, transport, taxation, etc.

M. Litvinov explained that the Soviet Government, while unable to give freehold property rights, would grant leases of factories, mines, etc., on concession terms for as long even as ninety years, and that the property and personnel employed by the concessionaire would be absolutely immune from arbitrary confiscation, and that he would be free to buy and sell as he pleased, would be granted all possible facilities for supplies and be secured from crippling increases of taxation by an agreement in advance for a period of years, the Soviet Government preferring an arrangement for an agreed share in the output or profits. The question of compensation where the property was not restored was raised, but the inability of the Russians to satisfy either the French or the British conception of what was reasonable with regard to restitution made a deadlock inevitable.

To a request of the non-Russian representatives, M. Sokolnikov presented figures concerning the Soviet budget, size and basis of currency circulation,

etc., which will be found printed in this Almanac on pages 636-42 in the article on Russia.

To the sub-commission on credits the Russians presented an elaborate program asking for credits extending over a period of three years to a total of 3,224,000,000 gold rubles—a total of $1,612,000,000—made up of the following items: For transport, 1,050,000,000 gold rubles; Agriculture, 924,000,000; Industries, 750,000,000; Miscellaneous Commercial Credits, 300,000,000; Bank Credits, 200,000,000. These Litvinov said represented Russia's minimum necessities and should be granted as a direct credit to the Moscow Government and had nothing to do with the other credits in question, which were to facilitate private trade with Russia under Government guarantee. In other words, the Russian delegates asked that this money should be furnished or guaranteed by foreign Governments to the Soviet Government, who would have the spending of it and the responsibility of repaying it. To the non-Russian delegates business on these terms was impossible even if the amount had been available. The discussion came to an abrupt end.

At the plenary session, held later, Litvinov abandoned his demand for credits and proposed that if the several delegations would put a similar proposition to their respective Governments, the Russian delegation would at once refer to its Government the question whether it was prepared, on the assumption that no credits could be given:

1. To acknowledge the debts due by the Russian Government or its predecessors to foreign nationals, and

2. To agree to give effective compensation to foreigners for property previously owned by them which has been nationalized by the Russian Government, provided the terms of payment of the debts and terms of compensation, whether in the form of concessions or otherwise, were left to be agreed between the Russian Government and the persons concerned in the course of two years.

The non-Russian Commission stated its opinion that though the basis of an agreement could not be found within the terms of this declaration, its acceptance and its loyal execution by the Russian Government would contribute to the re-establishment of the confidence which was necessary for the reconstruction of Russia and under which further negotiations could be carried on. The conference passed another resolution by which the Governments undertook not to support their nationals in negotiating for property which had originally belonged to other foreigners but had not been restored, and then the conference ended.

## THE LEAGUE OF NATIONS IN 1922.

The Third Assembly of the League of Nations met in Geneva September 4 and adjourned on September 30 to meet again on Sept. 3, 1923. Its most notable work was the plan for the rehabilitation of Austria. This problem the Allied powers had turned over to the League when the situation seemed to be almost beyond remedy. The plan was worked out in three weeks by the powers concerned, sitting about a common council table, the leading statesmen being the Earl of Balfour, of Great Britain; Dr. Eduard Benes of Czechoslovakia and Mgr. Ignatz Seipel, the Austrian Chancellor. They were assisted by the Economic and Financial Committee of the League and concluded a five-power treaty, guaranteeing the independence and political integrity of Austria; the internal difficulties were met by a program of economy and reform to be executed under a League of Nations High Commissioner. (The details of this work will be found in the following article on the reconstruction of Austria.)

The assembly adopted unanimously the principle of a reduction of armaments, based upon a treaty of mutual guaranty against attack to be worked out in detail durng the coming year.

Reparations and inter-Allied debts were discussed, the European neutral nations pointing out that they are as vitally concerned in the prompt and sane solution of these questions as the directly interested powers. It was felt that it was possible that if an agreement is not soon reached the Allied powers may turn the whole question over to the League of Nations and make a fresh start on new lines.

Arthur Sweetser of New York, who is a member of the secretariat, points out: "Beyond question nearly all the leaders of world thought and action came to Geneva for the four weeks and left a distinct impression that the League had grown from an organization interested in many of the smaller, but perhaps subordinate, problems of international life into an organization capable of handling far greater problems than had yet come before it. . . . It shows that the League, having tested and proved its ability, was now moving out onto a broader platform."

Discussion of the situation in the Near East was in progress when the Allied negotiators in Paris came to an agreement and the Assembly stood aside.

Hungary, the third of the ex-enemy powers, was admitted to membership September 18, leaving outside only Germany and Turkey, the latter already promised the support of the Allied powers for membership. The roster now included fifty-two nations. Next year Turkey will probably be in, if the present international problems are solved; Germany will enter as soon as her problems permit and it is expected that Ireland will join now that the Free State has been set up.

An important change was made in the membership of the council. In Paris it was planned that the great powers should dominate that body with five members and that all the other powers should be entitled to only four. The United States did not take the place reserved for it, so the proportion became four and four. The great powers themselves provided for the entrance into the council of two small powers, so that the proportion to-day stands four great powers and six lesser powers. These six non-permanent members now are: Brazil, Spain, Uruguay, Belgium, Sweden and China, in order of the number of votes.

The fifty-two members of the League of Nations and amount assessed on each for the expenses of the League are as follows:

| *States.* | Units | Gold Francs. | United States Dollars. |
|---|---|---|---|
| Albania | 1 | 27,196 | 5,247 |
| Argentine Republic | | | |
| Australia | 26 | 707,109 | 136,439 |
| Austria | 1 | 27,196 | 5,247 |
| Belgium | 15 | 407,947 | 78,714 |
| Bolivia | 5 | 135,982 | 26,238 |
| Brazil | 35 | 951,877 | 183,668 |
| British Empire | 95 | 2,583,668 | 498,527 |
| Bulgaria | 7 | 190,375 | 36,733 |
| Canada | 35 | 951,877 | 183,668 |
| Chile | 15 | 407,947 | 78,714 |
| China | 65 | 1,767,773 | 341,097 |
| Colombia | 7 | 190,375 | 36,733 |
| Costa Rica | 1 | 27,196 | 5,247 |
| Cuba | 9 | 244,768 | 47,228 |
| Czechoslovakia | 35 | 951,877 | 183,668 |
| Denmark | 12 | 326,358 | 62,971 |
| Esthonia | 3 | 81,589 | 15,742 |
| Finland | 10 | 271,965 | 52,476 |
| France | 78 | 2,121,329 | 409,317 |
| Greece | 10 | 271,965 | 52,476 |
| Guatemala | 1 | 27,196 | 5,247 |
| Haiti | 2 | 54,393 | 10,495 |
| Honduras | 1 | 27,196 | 5,247 |
| Hungary | 4 | 108,786 | 20,990 |
| India | 65 | 1,767,773 | 341,097 |
| Italy | 61 | 1,658,987 | 320,107 |
| Japan | 73 | 1,985,345 | 383,079 |
| Latvia | 3 | 81,589 | 15,742 |
| Liberia | 1 | 27,196 | 5,247 |
| Lithuania | 4 | 108,786 | 20,990 |
| Luxemburg | 1 | 27,196 | 5,247 |
| Netherlands | 20 | 543,930 | 104,953 |
| New Zealand | 10 | 271,965 | 52,476 |
| Nicaragua | 1 | 27,196 | 5,247 |
| Norway | 11 | 299,161 | 57,724 |
| Panama | 1 | 27,196 | 5,247 |
| Paraguay | 1 | 27,196 | 5,247 |
| Persia | 6 | 163,179 | 31,485 |
| Peru | 10 | 271,965 | 52,476 |
| Poland | 25 | 679,912 | 131,191 |
| Portugal | 10 | 271,965 | 52,476 |
| Roumania | 31 | 843,091 | 162,677 |
| Salvador | 1 | 27,196 | 5,247 |
| Serb-Croat-Slovene State | 26 | 707,109 | 136,439 |
| Siam | 10 | 271,965 | 52,476 |
| South Africa | 15 | 407,947 | 78,714 |
| Spain | 40 | 1,087,860 | 209,906 |
| Sweden | 18 | 489,537 | 94,457 |
| Switzerland | 15 | 407,947 | 78,714 |
| Uruguay | 7 | 190,375 | 36,733 |
| Venezuela | 5 | 135,982 | 26,238 |
| Total | 944 | 25,673,507 | 4,953,789 |

The budget of the League of Nations for 1923 shows these expenditures, balancing an income derived from a pro rata assessment on the member nations:

The South American states played a large part in the Assembly; a Chilian, M. Agustin, serving as President, and Brazil and Uruguay received places on the council, and on the last day they agreed at an informal meeting to do what they could at the forthcoming pan-American conference at Santiago on March 20, 1923, to effect a liaison between that organization and the League.

The officers of the assembly were: President, M. Agustin Edwards of Chile; Vice Presidents, Lord Balfour, Great Britain; M. Hanotaux, France; M. Teixeira Gomes, Portugal; M. Branting, Sweden; Count de Gimeno, Spain; M. de Nintitch, Serb-Croat-Slovene state.

The assembly committees and chairmen were as follows:

Legal and constitutional questions, M. Scialoja (Italy).

Technical organizations (economy and finance, health, and communications and transit), M. Chadzko (Poland).

Reduction of armaments, M. Torriente y Peraza (Cuba).

Budget and finance, M. Herluf Zahle (Denmark).

Social and general questions (opium, refugees, traffic in women and girls, etc.), Mr. William F. Fielding (Canada).

Political (admission of Hungary), the Jonkheer J. Loudon (Netherlands).

**Expenditures.**

| | Gold Francs. |
|---|---|
| *Secretariat and spectal organizations*: | |
| Sessions of the assembly and council | 700,000 |
| General services of the Secretariat | 6,784,945 |
| Special organizations of the League | 5,722,825 |
| Refund of expenses (Vilna plebiscite) | 422,260 |
| Profit and loss on exchange | 200,000 |
| Buildings, permanent equipment | 1,263,016 |
| Working capital | 500,000 |
| *Other organizations*: | |
| Permanent Court of International Justice | 1,880,000 |
| International labor organization | 8,200,426 |
| Total | 25,673,508 |

The work of the assembly done under its own initiative had to do with the development of solutions for the opium traffic, white slavery and the protection of minorities in which international complications arise. The administrative part of this work is in the hands of the International Health Organization of the League of Nations. This committee is composed of these experts from thirteen countries and three international societies:

Prof. Medsen, State Serum Institute, Denmark; Sir George Buchanan, Senior Medical Officer, Ministry of Health, England; Dr. S. Josephine Baker, Child Hygiene, United States; Dr. Leon Bernard, Professor of Hygiene, University of Paris, France; Dr. A. Calmette, Pasteur Institute, Algeria; Dr. F. Carozzi, Industrial Hygiene Section, International Labor Office; Dr. H. Carriere, Director of Federal Health Department, Switzerland; Dr. Carlos Chagas, Director of Federal Health Department, Brazil; Sir Havelock Charles, President of the Medical Board for India; Dr. W. Chodzko, Director of Federal Health Department, Poland; Dr. A. Lutratio, Director of Federal Health Department, Italy; Dr. M. Miyajima, Kitasato Institute, Tokio, Japan; Dr. A. Pilido, President Royal Council, Public Health of Spain; Dr. O. Velghe, Director General, Health Department, Belgium; Dr. Santoliquido, representing the League of Red Cross Societies; and Dr. L. Eajchmann, Director Health Section, League of Nations, Geneva.

Ten Government laboratories or institutes are co-operating with the organization in the study of disease and epidemics and industrial hygiene. The State Institute of Denmark is the central laboratory and in co-operation are Austria, Belgium, France, Great Britain, Italy, Japan, Poland, Russia and the United States. The gift of the Rockefeller Foundation, available since October, 1922, will result in a very great acceleration of the work.

Mr. Sweetser also notes: "The curious spectacle presented itself at this third assembly of more American visitors, more American journalists and more general American interest than was the case with any other nationality, yet the United States played no part."

The American Government, however, made its first official appearance in a League of Nations on December 8, when Dr. M. Dorset of the International Labor Bureau spoke on the question of anthrax and wool. The official said he was officially representing the United States as observer.

Americans in the Secretariat of the League of Nations are: librarian, Florence Wilson; establishment officer, Howard R. Huston; associate director of information, Arthur Sweetser; assistant in administrative commissions section, Huntington Gilchrist; director research division, international labor organization, Dr. Royal Meeker; Judge, Permanent Court of International Justice, John Bassett Moore.

Americans on the committees are: Health, Dr. S. Josephine Baker, Dr. G. W. McCoy and Edgar Sydenstricker; Social Questions, Miss Grace Abbott; Opium, Mrs. Hamilton Wright; Intellectual Co-operation, Prof. R. E. Millekan and Prof. Alice Hamilton of Harvard University; Investigation of Anthrax, Dr. G. Dorset of the United States Bureau of Animal Industry.

## RECONSTRUCTION OF AUSTRIA.

The plan for the reconstruction of Austria as worked out during the summer and early fall of 1922 by Chancellor Mgr. Ignatz Seipel of Austria and the Committee of the League of Nations was put before Parliament for action early in November. Commerce Reports, published by the United States Department of Commerce, in its issue of Nov. 20, 1922, presents this summary based on cable reports of November 9 from Trade Commissioner Upson and Consul Foster of Vienna:

The plan provides for economies which will reduce administration expenses to one-third through the discontinuance of unessential functions. War plants and possibly the mines are to be disposed of, administrative procedure is to be simplified, and the Government personnel reduced. The financial operations of the new plan are to be centralized in the bank of issue. Federal departments are to be reduced to eight; the number of courts will be less and the legal procedure greatly simplified. Federal advances to provinces and municipalities are to be reduced and within three years discontinued.

By adjustment of important duties customs receipts will be doubled, probably yielding $16,000,000; they will then be gradually increased to yield $20,000,000 within two years. The most important foodstuffs and raw materials will remain for the present on the free list. Export duties are to be imposed on many articles. Tobacco and salt prices are to be increased, and taxes are to be levied on the consumption of electricity and gas. There will be a new turnover tax for personal services, with the exception of personal services rendered in connection with foreign trade. A yearly capital levy will also be made on natural persons, and fees charged for transportation will likewise be taxed. The railways, post, telegraph, telephone, and other Government enterprises are to be made independent, and the organizations are to be conducted along business principles so far as consistent with the public interest.

### BANK OF ISSUE AND NEW LOAN.

The recommendations of the League do not make the bank of emission the keystone of Austria's rehabilitation but give it rather a minor place in the general scheme of reconstruction. The capital is to be 30,000,000 gold crowns instead of 100,000,000 Swiss francs, as formerly announced. (The value of the gold crown is $.2026.) The Government's subscription to the capital stock is to be set aside in favor of purely private subscriptions, so that in fact the bank will be a private enterprise which will act as the fiscal agent of the Austrian Government. It will differ from other European Government banks in this, that it will have complete autonomy, being entirely free from control or interference from the Austrian Government.

The prospects for the passage of the above laws are favorable. In the mean time a law has been passed authorizing a loan for 130,000,000 gold crowns, of which the Austrian banks will subscribe 30,000,000 crowns underwrite 20,000,000 crowns, and with the help of the League of Nations expect to place the remainder abroad. The security for this loan comprises the proceeds from the customs and the tobacco monopoly, the proceeds from the French loan amounting to 47,000,000 francs and the Italian loan of 68,000,000 lire, and the amount of 15,000,000 gold crowns obtained from the liquidation of the Austro-Hungarian Bank. The loan is intended to cover the deficit for the remainder of 1922 and note printing.

### THREE TRILLION CROWNS IN NOTES.

The total circulation of notes in Austria, including demand certificates, at the end of October amounted to 2,973,000,000,000 crowns, as compared with 2,021,000,000,000 crowns at the end of September. Treasury certificates held by the bank amounted to 1,384,000,000,000 crowns, as compared

with 1,000,000,000,000 crowns for the previous month, while commercial discounts advanced to 876,000,000,000 from 735,000,000,000 crowns in September.

During October the highest rate of exchange for the dollar on New York was 74,300 crowns, and the lowest 73,725 crowns; the closing quotation for the month was 73,900. The New York cable rate for 1 crown on September 30 was $0.000014 and remained the same on October 30; on November 9 it was $0.000013.

Austrian factories are working on old orders; everywhere they are cutting down on operation and some expect to close entirely.

UNEMPLOYMENT INCREASES.

Unemployment has greatly increased, and at the end of October 59,000 were reported unemployed in the Vienna district, including 14,000 metal workers; other districts also reported increases. Unemployment in Vienna at the end of September amounted to 45,000.

The cost of living indicated by the Government index figure of 10,332 on October 14 (based on 1 for July, 1914) shows a decrease from 11,306 on September 14. This September figure was made up from the following detail figures on a similar basis: Food, 13,531; clothing, 19,159; rent, 33; and heat and light, 12,658.

The Volkswirt cost of living index at the end of October was 21,352 (based on 100, January, 1921) as compared with 20,552 on October 1, thus showing a slight increase (about 4 per cent.) in the cost of living in Austria during the month. A loaf of bread at the end of October cost 6,660 crowns, as compared with 6,330 crowns for September. Industrial bread supplements were discontinued on October 15.

The total imports of Austria for the first six months of 1922 amounted to 3,630,000 metric tons, as compared with 3,730,000 metric tons during the first half of 1921, according to Consul Foster, at Vienna. Exports for the first six months of 1922 amounted to 930,000 metric tons, as compared with 700,000 metric tons during the first half of 1921. Total imports for the first six months of this year are valued at 792,000,000 gold crowns, and total exports at 489,000,000 gold crowns.

Postal rates were doubled on November 1.

The reconstruction programme became operative on Nov. 15.

## JAPANESE DENIED NATURALIZATION.

Japanese are not eligible for naturalization in the United States is the substance of a decision handed down by the United States Supreme Court in Washington on Nov. 13, 1922, the opinion being delivered by Mr. Justice Sutherland.

In its finding the court disposed of two cases, one brought from Hawaii by Tako Ozawa against the United States, and the other brought by Takuji Yamashita and Charles Hio Koko against the Secretary of State of Washington.

In the latter case both Japanese had been naturalized by a court of the State of Washington, but were refused incorporation as a real estate firm on the ground that their naturalization had been illegal.

The lower Federal Courts denied naturalization in both cases, but the Ninth Circuit Court of Appeals in considering the Ozawa case suspended its decision and asked the Supreme Court for instructions as to whether Japanese are eligible for citizenship under the naturalization laws.

The question largely turned upon whether Section 2169 of the revised statutes restricting naturalization to "free white persons" and those of African descent was still in force.

The court stated that the questions before it were:

"(1) Is the nauralization act of June 29, 1906, limited by the provisions of section 2169 of the Revised Statutes of the United States?

"(2) If so limited, is the appellant eligible for naturalization under that section?"

The court answered the first of these questions in the affirmative, and then in discussing the phrase "free white persons," as it appears in the statute said:

"Undoubtedly the word 'free' was originally used in recognition of the fact that slavery then existed and that some white persons occupied that status. The word, however, has long since ceased to have any practical significance and may now be disregarded.

"Manifestly, the test afforded by the mere color of the skin of each individual is impracticable as that differs greatly among persons of the same race, even among Anglo-Saxons, ranging by imperceptible gradations from the fair blond to the swarthy brunette, the latter being darker than many of the lighter hued persons of the brown or yellow races. Hence, to adopt the color test alone would result in a confused overlapping of races and a gradual merging of one into the other, without any practical line of separation.

"The Federal and State courts, in an almost unbroken line, have held that the words 'white person' were meant to indicate only a person of what is popularly known as the Caucasian race. With the conclusion reached in these several decisions we see no reason to differ.

"Moreover, that conclusion has become so well established by judicial and executive concurrence and legislative acquiescence that we should not at this late day feel at liberty to disturb it, in the absence of reasons far more cogent than any that have been suggested.

"The effect of the conclusion that the words 'white person' means a Caucasian is not to establish a sharp line of demarcation between those who are entitled and those who are not entitled to naturalization, but rather a zone of more or less debatable ground outside of which, upon the one hand, are those clearly eligible, and outside of which, upon the other hand, are those clearly ineligible for citizenship. Individual cases falling within this zone must be determined as they arise from time to time by what this court has called, in another connection, 'the gradual process of judicial inclusion and exclusion.'

"The appellant in the case now under consideration, however, is clearly of a race which is not Caucasian, and therefore belongs entirely outside the zone on the negative side. A large number of the Federal and State courts have so decided and we find no reported case definitely to the contrary. These decisions are sustained by numerous scientific authorities, which we do not deem it necessary to review. We think these decisions are right and so hold."

The legal attack of Tako Ozawa, Japanese salesman for a large wholesale firm in Honolulu, to gain American citizenship was launched in the Hawaiian courts in 1914, and was brought to the Supreme Court in 1917.

Among other contentions Ozawa advanced the claim that he is "white," and in an effort to prove his point he traced the history of the Japanese nation for several thousand years, back to the Ainu tribe. He included in his argument the assertion that Solicitor James M. Beck had expressed the belief that this particular portion of the Japanese race has the distinct mark of the Caucasian.

Ozawa is well educated and speaks excellent English. He came to Hawaii while a young man. One of his points was that he had taken special care to educate his children in the American public schools of the Territory and to familiarize them with American customs and ideals in order that they might become loyal American citizens. He asserted that his children had not been taught the Japanese language and that nothing that pertained to Japan had been permitted to enter their education or religion.

In arguing both cases George W. Wickersham, acting for the Japanese, pointed out that the important issue to be settled was whether the section of the old laws limiting naturalization to "free white persons" and persons of African descent was abrogated by the immigration and naturalization law of 1906, which contained no such limitations.

Counsel for the Government in the Ozawa case and for the State of Washington in the other case argued that the limiting section was still in force and that, therefore, Japanese were not eligible for naturalization.

## M. CLEMENCEAU'S VISIT AND SPEECHES.

Georges Clemenceau, Premier of France during the latter years of the war and the making of peace (Nov. 14, 1917 to Jan. 18, 1920), arrived in New York on the French liner Paris on Nov. 18, 1922. He was met at Quarantine by a committee from the Council of Foreign Relations, Ambassador Jusserand, Robert Woods Bliss of the State Department, representing President Harding personally, Frank L. Polk, George W. Wickersham, Otto H. Kahn, Bernard M. Baruch, and Col. E. M. House. Landed by the city steamer Macon at the Battery, his drive up Broadway was an ovation. At the City Hall he was formally welcomed by Acting Mayor Murray Hulbert. In course of his response M. Clemenceau said:

"One morning I was in my private house bordering on the sea when I received bad news from America. I heard bad names. We were called imperialists and militarists. I think that is horrid and I thought I had better go and tell them how things happened to pass and to show them that their judgment was not sane and not right.

"One day a British newspaper arrived. It contained criticism from a man of very high standing, calling America bad names. Before I thought I had better go and scold America. At that moment I decided I had better go to America and defend her. That is the reason why I am here.

"Nobody can ascribe any personal aim to my act in visiting this country. My life is over. But it does seem to me that I can do you some service in letting you know how we Europeans judge the American people. It is necessary because in the world at this time there is a crisis which hasn't existed before. How it will end nobody knows. . . . I will ask for great freedom of thought and great freedom of speech. I must be allowed to speak as a freeman to freemen who are not afraid of anything."

On Sunday M. Clemenceau laid a wreath on the grave of Theodore Roosevelt at Oyster Bay. On Monday, the 20th, he was the guest at a luncheon at the Ritz-Carlton Hotel given by Ralph Pulitzer, head of The New York World, and made a speech to the attending editors and newspaper men. He spoke with frankness because he was speaking to his "brothers in journalism," as he phrased it.

He imposed the seal of confidence upon the speech, but this he later lifted. In part he said:

"When you find an old people like the French who have suffered for the work of liberation of Europe, and when you come to think that in this last war out of 8,000,000 mobilized we lost 5,500,000 mutilated, killed and wounded, think of the large amount of goodness, courage, power of hope, righteousness and human strength in all its best. Children returning to their own villages finding nothing. Not alone their houses but the City Halls and churches just a stick with the name of the village that was. Well, if they make some mistakes in the work of reparation, tell them that they are mistaken but don't give them the feeling that after being in the war we will let them lay.

### CAN'T BE BOTH NOBLE AND MEAN.

"There is one thing that you do not know; that is, when word came that "America is coming" they did not know what America was. If I could take you to my country now you could see for yourself the peasant. When you ask him what America is you will see that he cries at mention of America.

"If you do a noble thing one day you cannot do a mean thing the next.

"If you knew your power to-day as you seemed to have known at that time—the great crisis the end of which no one can foresee! It is very easy to see that we are in a crisis, and if you do not choose carefully the means, and if you do not unite your parties—well, the time has come, I thought, when American people ought to think about their responsibility.

"Well, the time has come for you to make up your mind. I am not going to tell you what to do, how to do it, when to do it, but I am going to tell you that the black clouds are on the horizon far away, for all the civilized world.

"I do not come for pity nor for protection of my health. I bring health with me. I feel, having lived in the situation which is coming soon, sooner than you think, and I come to wake you up. Not to do any worrying or on account of any economic question. I do not come for money. My principle is every honest debt must be honestly paid.

"My friends, think of it, you left us in a lurch, and in a lurch we are. I come to warn you because I know what you mean at the bottom of your hearts. I do not want to ask a decision. I want you to decide as you think best for America, because I know what is best for America is best for Europe and the world. Do not forget the responsibility which you have toward the civilized world. We have our share of it.

"I come to awaken certain feelings in your hearts, and if that is done I am willing to leave the rest to your conscience. I am sure in the end it will be right.

"You have the minds, you have the wills which make the greatest men. You have done too much to do too little, and I want us to live together to the end."

### FRANCE'S SUFFERING.

On Tuesday night M. Clemenceau addressed an audience that filled every seat of the Metropolitan Opera House and paid a notable tribute to Ignace Paderewski, former Premier of Poland, who was in a box. In that speech after saying "we are not people who deny our debts," he went on: "Now, let us see—90 per cent. of the laymen, 90 per cent. of cotton, 90 per cent. of steel, and so on, all our products—and out of 8,500,000 soldiers mobilized, we lost 5,500,000. Don't you think that is a figure —5,500,000 killed and wounded and 500,000 coming back from German prisons dying with hunger and consumption. We are the ones that have suffered most, cruelly suffered. . . . The Germans have devastated our lands, nevertheless, what has happened? In three years there has been taken from Germany 50 per cent. of their debts toward us under the pressure of England."

Later on he said, "Do you know that they are manufacturing cannon by the hundreds? . . . I tell you plainly, as I told Lloyd George before the war, they are preparing war again. Don't you see what is going on? Don't you read the papers? Why, haven't you heard of the treaty between the Turks, the Germans and the Russians? Now, I say that Gens. Ludendorff and Hindenburg are preparing war, civil war, to crush the German democracy if they can.

"Now, have you made up your minds? No sacrifice is demanded or exacted from you except to assert that you want to keep among the people of this world the great place you have twice taken. If you take it, then you will see a great emotion among the people, liberty—liberation. If you don't, the prospect is dark and dreary."

M. Clemenceau addressed the members of the Chamber of Commerce at a luncheon Wednesday, then stressing the necessity of reparations, saying, "The Germans have made so much havoc that they cannot pay the bill," and emphasizing France's need for guarantees for her security; for he, now beginning his eighty-second year, has seen two German invasions of France.

The United States Senate had several debates over M. Clemenceau's speeches which were received with great interest throughout Europe also. The British Government, notwithstanding his generous praise of the British soldier, etc., protested formally against his phrase, "England got a guarantee by letting the German fleet sink in Scapa Flow."

### GERMAN DENIALS.

Chancellor William Cuno of the German Republic, when interrogated in Berlin by a New York Herald correspondent, declined to make any comment upon or to permit his Cabinet associates to discuss M. Clemenceau's New York speech, on the ground that its full text had not yet been received there, and that, moreover, it voiced merely the views of a private French citizen. The Foreign Office, however, authorized the Herald to say that the German Government stamps his allegations about secret and illegal manufacture of war material as absolute invention, and that it feels that the existence of the Turko-Russo-German treaty to which he referred has been denied so often that further denial is unnecessary.

In the absence from Berlin of Gen. Nollett, chief of the Interallied Control Commission, one of the Allied Generals attached to the commission gave the Herald correspondent this statement:

"Unless every officer, without exception, in the French, Belgian, and British groups is deceived it is absolutely untrue that there is a single instance of war material being made in Germany. That is not only unlikely but ridiculous. We have men in every establishment in the country where arms—either cannon or military rifles—could be made; even supervision of the conversion of old arms plants to peace uses. It is true a limited number of sporting arms are made. Nobody can draw a line between sporting and military arms so far as being dangerous is concerned, but it is well known that the sporting rifles produced are not fit and not numerous enough for war. Moreover, there is not a pound of powder being made in Germany, except

for mine blasting, which again is obviously useless in war."

### HOW HIS TRIP WAS PLANNED.

John W. Davis, former Ambassador to Great Britain and President of the Council on Foreign Relations, on November 23 made clear certain facts concerning M. Clemenceau's visit to America in these words:

"Ever since the Peace Conference M. Clemenceau has frequently expressed a hope to visit the United States. Last summer he sent word to his friend, Col. E. M. House, that he would like to come this fall and make half a dozen speeches. Col. House thereupon suggested to the Council on Foreign Relations, an organization which includes men of all political parties, formed to foster discussion of America's foreign relations, but engaged in promoting no propaganda as to the form those relations should take, that it would be highly appropriate for M. Clemenceau to speak in New York under the auspices of the council. The council was very glad to embrace the suggestion and cabled an invitation to M. Clemenceau, which was accepted. It was also very glad to engage an auditorium in which M. Clemenceau could speak, and to invite its members and friends to give a courteous hearing to his message.

"During the remainder of M. Clemenceau's tour he is in charge in Boston of a citizens' committee, of which F. L. Higginson, Jr., is Chairman; at Chicago, Brig.-Gen. Dawes has charge of his arrangements, and he will speak there under the auspices of the Council on Foreign Relations of that city. He goes to St. Louis at the invitation of the city, extended by its Mayor. At Washington he will be the guest of Henry White and will speak before the International Chautauqua Association, of which President Harding is the Honorary President. At Philadelphia arrangements are being made by Edward Bok, and he will speak at the Academy of Music Forum.

"In advance of his coming M. Clemenceau stipulated that he should pay all his own expenses. Being a man of modest income, he is said to be earning these expenses through writing newspaper articles. He also stipulated that the proceeds from any of his meetings at which there should be a charge for admission should be distributed to some Franco-American charitable enterprise to be named by him."

### ANSWERED FROM AMERICAN HEARTS.

M. Clemenceau added to that program an address to American army officers at the War College in Washington and went from Philadelphia to Chicago where on Monday, December 11, he spoke to the American Farm Bureau Federation. In Washington he was entertained at lunch by President Harding, and called on former President Wilson. In St. Louis he was the guest of Joseph Pulitzer Jr., and in Chicago of Mrs. Potter Palmer. Everywhere he was tireless in visiting the shrines of American history and points of interest that had an especial appeal to him. He found time to write six articles for The World in addition.

The proceeds of his "lectures," as he called them, and they were all to crowded houses, he gave to the American Field Service Fund for Fellowships in French and American Universities, organized and directed by Congressman A. Piatt Andrew of Massachusetts; "in memory of my student days in America," he said.

Returning to New York on December 12 he was the guest of the American Committee for Devastated France at their banquet at Hotel Pennsylvania and made his last speech, saying: "I came to appeal to the American mind and the answer came from American hearts."

He sailed for France on the French liner Paris on December 13.

## PRESIDENT HARDING ON FOREIGN RELATIONS.

President Harding spoke on the foreign relations of the United States. This is his annual message to Congress on Dec. 8:

"I bring you no apprehension of war. The world is abhorrent of it, and our own relations are not only free from every threatening cloud but we have contributed our large influence toward making armed conflict less likely.

"Those who assume that we played our part in the World War and later took ourselves aloof and apart unmindful of world obligations give scant credit to the helpful part we assumed in international relationship.

"Whether all nations signatory ratify all the treaties growing out of the Washington Conference on Limitation of Armament or some withhold approval, the underlying policy of limiting naval armament has the sanction of the larger naval powers, and naval competition is suspended. Of course, unanimous ratification is much to be desired.

"The four-power pact which abolishes every probability of war on the Pacific has brought new confidence in a maintained peace, and I can well believe it might be made a model for like assurances wherever in the world any common interests are concerned.

"We have had expressed the hostility of the American people to a super-government or to any commitment where either a council or an assembly of leagued powers may chart our course. Treaties of armed alliance can have no likelihood of American sanction, but we believe in respecting the rights of nations, in the value of conference and consultation, in the effectiveness of leaders of nations looking each other in the face before resorting to the arbitrament of arms.

"It has been our fortune both to preach and promote international understanding. The influence of the United States in bringing near the settlement of an ancient dispute between South American nations is added proof of the glow of peace in ample understanding.

"In Washington to-day are met the delegates of the Central American nations, gathered at the table of international understanding, to stabilize their republics and remove every vestige of disagreement. They are met here by our invitation not in our aloofness, and they accept our hospitality because they have faith in our unselfishness and believe in our helpfulness.

"I would like the Congress and the people of the Nation to believe that in a firm and considerate way we are insistent on American rights wherever they may be questioned and deny no rights of others in the assertion of our own. Moreover, we are cognizant of the world's struggles for full readjustment and rehabilitation, and we have shirked no duty which comes of sympathy, or fraternity, or highest fellowship among nations."

## PERMANENT COURT OF INTERNATIONAL JUSTICE.

The project drafted by the Advisory Committee of Jurists at The Hague, in the summer of 1920 for a Permanent Court of International Justice was adopted by the Assembly of the League of Nations, modified in some important parts, notably in the matter of obligatory jurisdiction, on Dec. 13, 1920. The eleven regular or titular judges, as they are called, and the four deputy judges were elected on Sept. 14 and 15, 1921. The election was made by the independent, separate and concurrent votes of the Council of the League, in which body the great powers form a majority, and the Assembly of the League in which the small powers have an overwhelming preponderance. At the suggestion of Elihu Root, of the Advisory Committee, upon failure of the Council and Assembly to agree, a committee of three was appointed from each body which produced an agreement. The judges elected by this method are as follows:

**Rafael Altamira y Crevea** (b. 1866) of Spain, Senator, Professor of the Faculty of Law of the University of Madrid.

**Dionisio Anzilotti** (b. 1869) of Italy, Under Secretary General of the League of Nations, Professor of International Law at the University of Rome, Co-Editor of the Revista di Diritto Internazionale, Member of the Permanent Court of Arbitration at The Hague, Member of the Institute of International Law.

**Ruy Barbosa** (b. 1849) of Brazil, Senator, Former Minister of Finance and Vice President, Founder Member of the American Institute of International Law.

**Antonio Sanchez de Bustamante y Sirven** (b. 1865) of Cuba, Senator, Professor of International Law and Dean of the Faculty of Law at the University of Havana, Member of the Institute of International Law, Founder Member of the American Institute of International Law, Member of the Permanent Court of Arbitration at The Hague.

**Robert Bannatyne, Viscount Finlay** (b. 1842) of Great Britain, Former Attorney General, Former Lord Chancellor, Member of Parliament, Member of the Permanent Court of Arbitration at The Hague.

**Bernard, C. J. Loder** (b. 1849) of the Netherlands, Member of the Court of Cassation, Associate of the Institute of International Law.

**Yorozu Oda** (b. 1868) of Japan, Professor of International Law and Rector of the University of Kioto.

**Charles Andre Weiss** (b. 1858) of France, Professor of International Law at the University of Paris, Legal Adviser to the Ministry for Foreign Affairs, Member of the Institute of International

Law, Member of the Permanent Court of Arbitration at The Hague.

**John Bassett Moore (b. 1860) of the United States,** Former Counselor of the Department of State, Professor of International Law at Columbia University, Member of the Institute of International Law, Member of the Permanent Court of Arbitration at The Hague.

**Didrik Galtrup Gjedde Nyholm** (b. 1858) of Denmark, Honorary Counselor of State, Vice President of the Internationxl Mixed Tribunal at Cairo, Member of the Permanent Court of Arbitration at The Hague.

**Max Huber** (b. 1874) of Switzerland, Professor of International Law at the University of Zurich, Associate of the Institute of International Law.

The Deputy Judges are:

**Dumitriu Negulescu** (b. 1876) of Roumania, Professor at the University of Bucharest.

**Wang Chung Hui** (b. 1882) of China, Former Minister for Foreign Affairs and Minister of Justice.

**Mikhailo Jovanovitch** of the Serb-Croat-Slovene State, Former Minister of Justice, President of the Supreme Court at Belgrade.

**Frederick Valdemar Nikolai Beichmann** (b. 1859) of Norway, President of the Court of Appeals at Drontheim, Member of the Institute of International Law, Member of the Permanent Court of Arbitration at The Hague.

Each Judge is to serve nine years and may be re-elected. The ordinary Judge receives a salary varying from $6,030 to $14,070, in accordancc with the length of the session.

The members of the court, upon the invitation of the Secretary General of the League of Nations, met at The Hague Feb. 15, 1922, and elected as President Mr. Bernard C. J. Loder; as Vice President, Mr. Andre Weiss, and appointed Mr. Ake Hammarskjold as Registrar.

The court met for its first annual session on June 15, 1922. Three cases calling for interpretations of the Treaty of Versailles, all having to do with labor problems, were heard, and three advisory opinions handed down.

Secretary Hughes, in a speech in Boston October 30, declared that the Washington Government would give its formal support to the International Court, as soon as suitable arrangements could be made for American participation in the election of Judges.

According to the League Covenant, all disputes between members of the League must be submitted either to arbitration or to inquiry of the League Council. According to the statute of the court (Art. 36) the jurisdiction of the court "comprises all cases which the parties refer to it." The following cases are recognized as being generally suited for arbitration: (1) The interpretation of a treaty; (2) any question of international law; (3) the existence of any fact which, if established would constitute a breach of any international obligation; (4) the extent and nature of the reparation to be made for any such breach. There is no provision in the covenant that compels members of the League to submit disputes of the above nature to arbitration.

Motorcycles in use (1921), 207,930; motor buses, 10,000.

Motor vehicle license revenues in the U. S. (1921), $122,478,654. Foregoing is total of State licenses; to which are to be added $117,322,000 in Federal excise taxes, $90,000,000 in State taxes, and $11,000,000 in municipal license fees—total, $340,800,654.

## VETO OF THE SOLDIERS' BONUS BILL.

The Soldiers' Bonus Bill (or "adjusted compensation" bill) was passed by the House on March 23, 1922, by a vote of 333 to 70; and by the Senate on Aug. 31 by a vote of 47 to 22. It was sent to conference the following day. The House agreed to the conference report without a record vote; the Senate agreed by a vote of 36 to 17.

The bill was vetoed by the President on Sept. 19. The House on Sept. 20 passed the bill over the President's veto by a vote of 258 (Reps. 188, Dems. 69, Soc. 1) to 54 (Reps. 35, Dems. 19), absent and not paired, 43. The Senate on Sept. 20 failed to pass the bill over the President's veto—a two-thirds vote being necessary—by a vote of 44 (Reps. 27, Dems. 17) to 28 (Reps. 21, Dems. 7), absent and not paired, 3. The bill therefore failed to become a law.

President Harding's veto message in part follows:

"With the avowed purpose of the bill to give expression of a nation's defense in the world war, I am in accord, but to its provisions I do not subscribe. The United States never will cease to be grateful; it cannot and never will cease giving expression to that gratitude.

"In legislating for what is called adjusted compensation, Congress fails, first of all, to provide the revenue from which the bestowal is to be paid. Moreover, it establishes the very dangerous precedent of creating a Treasury covenant to pay which puts a burden, variously estimated between four and five billions, upon the American people, not to discharge an obligation, which the Government always must pay, but to bestow a bonus which the soldiers themselves, while serving in the World War, did not expect.

"It is not to be denied that the nation has certain very binding obligations to those of its defenders who made real sacrifices in the World War and who left the armies injured, disabled or diseased, so that they could not resume their places in the normal activities of life. These obligations are being gladly and generously met.

### $25,000,000,000 TOTAL FOR DISABLED.

"In the current fiscal year we are expending $510,000,000 on hospitalization and care of sick and wounded, on compensations and vocational training for the disabled and for insurance. The figures do not include the more than $35,000,000 in process of expenditure on hospital construction. The estimates for the year to follow are approximately $470,000,000, and the figures may need to be made larger. Though the peak in hospitalization may have passed, there is a growth in domicilization and the discharge in full of our obligations to the deceased, disabled or dependent, who have a right to the Government's aid with insurance—liability added—which will probably reach a total sum in excess of $25,000,000,000.

"More than 99,000 veterans are now enrolled in some of the 445 different courses in vocational training. Fifty-four thousand of them are in schools or colleges, more than 38,000 are in industrial establishments and a few more than 6,000 are being trained in schools operated by the veterans' bureau.

"Approximately 19,000 have completed their courses and have employment in all cases where they desire it, and 53,000 have deferred for the present time their acceptance of training. The number eligible under the law may reach close to 400,000, and facilities will continue to be afforded, unmindful of the necessary cost, until every obligation is fulfilled.

"Two hundred and seventy-six thousand patients have been hospitalized, more than a quarter of a million discharged and 25,678 patients are in our hospitals to-day.

"Four hundred and sixteen thousand awards of compensation have been made on account of death or disability and $480,000,000 has been paid to disabled men or their dependent relatives. One hundred and seventy-five thousand disabled ex-service men are now receiving compensation, along with medical or hospital care where needed, and a quarter of a million checks go out monthly in distributing the $8,000,000 payment of indisputable obligations.

"When the bill was under consideration in the House I expressed the conviction that any grant of bonus ought to provide the means of paying it, and I was unable to suggest any plan other than that of a general sales tax. Such a plan was unacceptable to the Congress, and the bill has been enacted without even a suggested means of meeting the cost. Indeed, the cost is not definitely known, either for the immediate future or in the ultimate settlement.

"The Treasury estimates, based on what seems the most likely exercise of the options, figure the direct cost at approximately $145,000,000 for 1923, $225,000,000 for 1924, $114,000,000 for 1925, $312,000,000 for 1926, make a total of $796,000,000 for the first four years of its operation, and a total cost in excess of $4,000,000,000.

"No estimate of the large indirect cost ever had been made. The certificate plan sets up no reserve against the ultimate liability. The plan avoids any considerable direct outlay by the Government during the earlier years of the bill's proposed operations, but the loans on the certificates would be floated on the credit of the Nation.

### DANGEROUS ABUSE OF PUBLIC CREDIT.

"This is borrowing on the Nation's credit just as truly as though the loans were made by direct Government borrowing, and involves a dangerous abuse of public credit. Moreover, the certificate plan of payment is little less than certified inability of the Government to pay, and invites a practice on sacrificial barter which I cannot sanction.

"The financial problems of the Government are too little heeded until we are face to face with a great emergency. The diminishing income of the Government, due to the receding tides of business and attending incomes, has been overlooked momentarily, but cannot be long ignored. The latest budget figures for the current fiscal year show an estimated deficit of more than $650,000,000 and a further deficit for the year succeeding, even after counting upon all interest collections on foreign indebtedness which the Government is likely to receive.

"To add to our pledges to pay, except as necessity compels, must seem no less than governmental folly. Inevitably it means increased taxation, which Congress was unwilling to levy for the purposes of this bill, and will turn us from the course toward economy so essential to promote the activities which contribute to common welfare."

## WAR BONUSES AND BOUNTIES IN THE UNITED STATES.

*War of the Revolution.*

By resolution of Congress Sept. 16, 1776, it was provided that grants of land should be given to men and officers serving during the war as follows, in acres:

Colonels, 500; lieutenant colonels, 450; majors, 400; captains, 300; lieutenants, 200; ensigns, 150; noncommissioned officers and privates, 100.

By resolution of Congress June 22, 1779: It was provided that a gratuity be paid to those who enlisted prior to Jan. 23, 1779, of $100.

By resolution of Aug. 24, 1780, it was provided that seven years' half pay should be given to officers continuing in service to the end of the war.

*War of 1812.*

Act of Congress, 1812: Noncommissioned officers and men upon discharge to be given a bounty and 160 acres of land. By act of Dec. 10, 1814: Men thereafter enlisted to receive 320 acres of land.

*Mexican War.*

Men serving through Mexican War entitled to warrants for 160 acres of land with option of bonus of $100.

*Civil War.*

Men entitled to receive patents for 160 acres of land. Various bounties paid for enlistment and service during war by Federal Government ranging from $150 to $400. Amount paid in bounties by Federal Government, $405,021,000.

In addition, the various States paid bounties as follows:

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Me. | $7,837,643.97 | N. J. | $23,868,966.62 | Ky. | $692,577.00 | Iowa | $1,615,171.20 |
| N. H. | 9,636,313.00 | Pa. | 43,154,986.92 | Ohio | 23,557,373.00 | Minn. | 2,000,464.00 |
| Vt. | 4,528,774.88 | Del. | 1,136,599.06 | Ind. | 9,664,855.00 | Mo. | 1,282,148.55 |
| Mass. | 22,965,550.36 | Md. | 6,271,992.00 | Ill. | 17,296,205.00 | Kan. | 57,407.00 |
| R. I. | 820,768.60 | D. of C. | 134,010.00 | Mich. | 9,664,855.00 | | |
| Conn. | 6,887,554.27 | W. Va. | 864,737.00 | Wis. | 5,885,356.19 | Total | $286,731,256.09 |
| N. Y. | 86,629,228.15 | | | | | | |

## PRESIDENT HARDING'S SHIP SUBSIDY MESSAGE.

President Harding, on Nov. 21, 1922, appeared before Congress at the opening of its fourth session and addressed them regarding pending ship subsidy liquidation in part as follows:

Members of the Congress: Late last February I reported to you relative to the American merchant marine and recommended legislation which the executive branch of the Government deemed essential to promote our merchant marine and with it our national welfare. Other problems were pressing and other questions pending, and for one reason or another, which need not be recited, the suggested legislation has not progressed beyond a favorable recommendation by the House committee. The committee has given the question a full and painstaking inquiry and study, and I hope that its favorable report speedily will be given the force of law.

We are not now dealing with a policy founded on theory; we have a problem which is one of grim actuality. We are facing insistent conditions, out of which will come either additional and staggering Government losses and national impotence on the seas, or else the unfurling of the flag on a great American merchant marine commensurate with our commercial importance, to serve as carrier of our cargoes in peace and meet the necessities of our defense in war.

There is no thought here and now to magnify the relation of a merchant marine to our national defense. It is enough to recall that we entered the World War almost wholly dependent on our allies for transportation by sea. We expended approximately three billions feverishly, extravagantly, wastefully, and impractically. Out of our eagerness to make up for the omissions of peace and to meet the war emergency we builded and otherwise acquired the vast merchant fleet which the Government owns to-day.

### TO RELIEVE TREASURY OF DRAIN.

In the simplest way I can say it, our immediate problem is not to build and support a merchant shipping, which I hold to be one of the highest and most worthy aspirations of any great people; our problem is to deal with what we now possess. Our problem is to relieve the public Treasury of the drain it is already meeting. Let us omit particulars about the frenzied wartime building. Possibly we did fully as well as could have been done in the anxious circumstances. Let us pass for the moment the vital relationship between a merchant marine and a commercially aspiring nation.

Aye, let us suppose for a moment the absurdity that with one $3,000,000,000 experience and with the incalculable costs in lives and treasure which may be chargeable to our inability promptly to apply our potency—which God forefend happening again!—let us momentarily ignore all of these and turn to note the mere business problem, the practical question of dollars and cents with which we are confronted.

### TONNAGE LEFT AFTER WAR.

The war construction and the later completion of war contracts, where completion was believed to be the greater economy to the public Treasury, left us approximately 13,200,000 gross tonnage in ships. The figures are nearer 12,500,000 tons now, owing to the scrapping of the wooden fleet. More than half of this tonnage is Government owned, and approximately 2,250,000 tons are under Government operation in one form or another.

The net loss to the United States Treasury—sums actually taken therefrom in this Government operation—averaged approximately $16,000,000 per month during the year prior to the assumption of responsibility by the present Administration. A constant warfare on this loss of public funds and the draft to service of capable business management and experienced operating directors have resulted in applied efficiency and enforced economies. It is very gratifying to report the diminution of the losses to $4,000,000 per month, or a total of $50,000,000 a year; but it is intolerable that the Government should continue a policy from which so enormous a Treasury loss is the inevitable outcome. This loss, moreover, attends operation of less than a third of the Government-owned fleet.

It is not, therefore, a question of adding new Treasury burdens to maintain our shipping; we are paying these burdens now. It is not a question of contracting an outlay to support our merchant shipping, because we are paying already. I am not asking your authorization of a new and added draft on the public Treasury; I am appealing for a program to diminish the burden we are already bearing.

But I have not properly portrayed all the current losses to the public Treasury. We are wearing out our ships without any provision for replacement. We are having these losses through deterioration now and are charging nothing against our capital account. But the losses are there, and regrettably larger under Government operation than under private control. Only a few years of continued losses on capital account will make these losses through depreciation alone to exceed the fifty millions a year now drawn to cover losses in operation.

### FLEET WORTH ONLY FRACTION OF COST.

The gloomy picture of losses does not end even there. Notwithstanding the known war cost of three billions of dollars for the present tonnage, I will not venture to appraise its cash value to-day. It may as well be confessed now as at some later time that in the mad rush to build, in establishing shipyards wherever men would organize to expend Government money, when we made shipbuilders overnight quite without regard to previous occupations or pursuits, we builded poorly, often very poorly.

Moreover, we constructed without any formulated program for a merchant marine. The war emergency impelled, and the cry was for ships, any kind of ships. The error is recalled in regret rather than criticism. The point is that our fleet, costing approximately $3,000,000,000, is worth only a fraction of that cost to-day. Whatever that fraction may be, the truth remains that we have no market in which to sell the ships under our present policy, and a program of surrender and sacrifice and the liquidation which is inevitable unless the pending legislation is sanctioned, will cost scores of millions more.

This problem cannot longer be ignored, its attempted solution cannot longer be postponed. The failure of Congress to act decisively will be no less disastrous than adverse action. Three courses of action are possible, and the choice among them is no longer to be avoided.

The first is constructive—enact the pending bill, under which I firmly believe an American merchant marine, privately owned and privately operated, but serving all the people and always available to the Government in any emergency, may be established and maintained.

The second is obstructive—continue Government operations and attending Government losses, and discourage private enterprise by Government competition under which losses are met by the public Treasury, and witness the continued loss and deterioration until the colossal failure ends in sheer exhaustion.

The third is destructive—involving the sacrifice of our ships abroad or the scrapping of them at home, the surrender of our aspirations, and the confession of our impotence to the world in general, and our humiliation before the competing world in particular.

I know full well the hostility in the popular mind to the word "subsidy." It is stressed by the opposition and associated with "special privilege" by those who are unfailing advocates of Government aid. "Aid" would be a fairer term than "subsidy," in defining what we are seeking to do for our merchant marine, and the interests are those of all the people, even though the aid goes to the few who serve.

### ANALYSIS OF THE BILL.

I challenge every insinuation of favored interests and the enrichment of the special few at the expense of the public Treasury. I am, first of all, appealing to save the Treasury. Perhaps the unlimited bestowal of Government aid might justify the apprehension of special favoring, but the pending bill, the first ever proposed which carries such a provision, automatically guards against enrichment or perpetuated bestowal.

**It provides that shipping lines receiving Government aid must have their actual investment and their operating expenses audited by the Government, that Government aid will only be paid until the shipping enterprise earns 10 per cent. on actual capital employed, and immediately that when more than 10 per cent. earning is reached half of the excess earnings must be applied to the repayment of the Government aid which has been previously advanced.**

Thus the possible earnings are limited to a very reasonable amount if capital is to be risked and

management is to be attracted. If success attends, as we hope it will, the Government outlay is returned, the inspiration of opportunity to earn remains, and American transportation by sea is established.

It should be kept in mind that the approximate sum of $5,000,000 annually paid for the transport of ocean mails is no new expenditure. It should be kept in mind that the loan fund to encourage building is not new; it is the law already, enacted by the essentially unanimous vote of Congress. It is only included in the pending bill in order to amend so as to assure the exaction of a minimum interest rate by the Government, whereas the existing law leaves the grant of building loans subject to any whim of favoritism.

DIRECT AID.

It should be kept in mind, also, that there are assured limitations of the Government aid proposed. The direct aid, with ocean carrying maintained at our present participation, will not reach $20,000,000 a year, and the maximum direct aid, if our shipping is so promoted that we carry one-half our deep-seas commerce, will not exceed $30,000,000 annually. At the very maximum of outlay we should be saving $20,000,000 of our present annual operating loss.

If the maximum is ever reached, the establishment of our merchant marine will have been definitely recorded and the Government-owned fleet fortunately liquidated.

PROVISIONS OF THE SHIP SUBSIDY BILL.

"A bill to amend and supplement the Merchant Marine Act, 1920, and for other purposes," commonly referred to as the Ship Subsidy Bill, was introduced in the House of Representatives Nov. 20, 1922, by Mr. Greene of Massachusetts, upon President Harding's call for an extra session to consider it. It may be summarized prior to any amendment as follows:

Authorizes the United States Shipping Board to sell to citizens Government owned ships at public or private sale (if by the latter, only on approval of five of the seven members of the board, with inclusion of reasons in board minutes), terms and conditions to be prescribed by the board, and payment to be completed in 15 years, payments annually to cover depreciation, and interest on unpaid balance to be not less than 4 per cent. Insurance to be carried by purchaser payable to board.

Provides for creation of the "United States Shipping Board Construction Loan Fund" of $125,000,000, out of which the board may loan funds for as long as 15 years at 2 per cent. interest "to its persons, citizens of the United States: (1) In the construction by them in private shipyards of the United States of vessels of the best and most efficient type. . . .; (2) in the equipping . . . of vessels already built with . . . machinery and commercial appliances," the loans to be limited in amount to two-thirds the construction or equipment cost.

Repeals laws of 1891 providing for mail carrying and authorizes the Postmaster General "to contract for the carrying of the mails over such lines at such price as may be agreed upon by the board and the Postmaster General," contracts to be made wherever practicable with American lines.

Allows American vessel owners certain extra exemptions from income tax laws, the deduction allowable to be determined on a ratio of ship operation. Permits an owner to deduct profits of the sale of a ship to another citizen provided that the proceeds are reinvested in shipping. Also allows deduction for depreciation.

Doubles tonnage duties and taxes except for sailing vessels of less than 1,000 gross tons and other vessels of less than 1,500 gross tons.

Prescribes that "as nearly as practicable one-half of the total number of immigrants admitted to the United States in any fiscal year" shall be transported in American ships, under regulation, to be promulgated by the Commissioner General of Immigration and approved by the Secretary of State.

Establishes the "Merchant Marine Fund," into which are to be paid all tonnage duties and taxes, 10 per cent. of the amount of all customs duties and "all excess earnings paid by the owner of any vessel." Out of this fund the board is authorized to pay subsidies (on ten-year contracts) based on gross tonnage of vessels, nautical miles sailed and speed, ranging in effect from one-half of one per cent. per gross ton per 100 nautical miles to 2 1-10th cents (this being for vessels doing 23 knots or over). Vessels of less than 5,000 but more than 1,500 gross tons to be rated as of 5,000 gross tons. Vessels to be eligible must be over 1,500 gross tons and must carry crews at least two-thirds citizens. The board may double the subsidy if it deems necessary.

Provides for discontinuance of army and navy transport service and diversion of this privilege to private lines under ten-year contracts negotiated by the Secretaries of the Army and Navy. Also provides that all Government officials, legislative, judicial, diplomatic, etc., must travel by American lines if their passage is paid by the Government.

The bill after amendment passed the House on Nov. 29 by a vote of 208 (Reps. 204; Dems. 4) to 184 (Dems. 114; Reps. 69; Soc. 1).

## THE UNITED STATES SHIPPING BOARD.

*GENERAL ADMINISTRATION.*

(As of September 1, 1922.)

*Chairman*—A. D. Lasker; *Vice Chairman*—T. V. O'Connor; *Commissioners*—George E. Chamberlain, Frederick I. Thompson, E. C. Plummer, Rear Admiral William S. Benson, and Meyer Lissner.

*Assistant to the Chairman*—Ralph V. Sollitt; *Secretary*—Clifford W. Smith; *Assistant Secretary*—Carl P. Kremer; *Chief Clerk*—M. J. Pierce; *Disbursing Officer*—T. L. Clear; *General Counsel*—Sanford H. E. Freund and Chauncey G. Parker.

*CLAIMS COMMISSION.*

*Chairman*—Walter D. Meals; A. W. Teele, Captain R. M. Watt, F. W. Wood and Homer L. Ferguson; *Secretary*—O. P. M. Brown.

*EMERGENCY FLEET CORPORATION.*

*President*—J. B. Smull; *Vice President and General Manager*—W. J. Love; *Vice President*—J. E. Sheedy; *Secretary*—Clifford W. Smith; *Assistant Secretary*—Carl P. Kremer; *Director of Finance*—J. W. McIntosh; *Assistants*—Clarence F. Buck and P. Sinclair; *Treasurer*—T. L. Clear; *Director of Sales*—Sidney Henry; *General Counsel*—Sanford H. E. Freund and Chauncey G. Parker.

THE WORLD ALMANAC presents official figures and facts compiled by the United States Shipping Board giving, as completely as possible, a business sheet of the board, as of Sept. 1, 1922, together with this official statement of the board's policy:

"The general policy of all provisions of the Shipping Act, 1916, and of the Merchant Marine Act, 1920, contemplates sales of vessels to citizens, to the exclusion of foreigners, except when the board regards particular vessels proposed to be sold to foreigners of unimportance to the American Merchant Marine. This policy is expressly set forth in Secs. 5 and 7 of the Merchant Marine Act."

The Bureau of Research of the U. S. Shipping Board discloses that 52 per cent. of total cargo tonnage handled in United States ports in the fiscal year ending June 30, 1922, moved under the American flag, when 37,312 vessels in water-borne foreign commerce, aggregating 80,231,000 long tons, entered and cleared American ports, 49 per cent. of the vessels being of American registry. Relative efficiency was indicated by the American average of 2.62 deadweight tons per cargo ton carried, the foreign average being 2.74.

(The United States is now second among the merchant fleets of the world. United States Department of Commerce statistics gave this country, as of June 30, 1914, sea-going tonnage of 1,837,000, against Great Britain, 18,877,000; Germany, 5,098,000; France, 1,918,000; Japan, 1,642,000; total, the world, 42,514,000; and as of June 30, 1921, the United States, 12,314,000; Great Britain, 19,288,000; France, 3,045,000; Japan, 3,063,000; Germany, 654,000; total, the world, 54,158,000; and as of June 30, 1922, the United States, 12,506,000; Great Britain, 19,053,000; France, 3,303,000; Japan, 3,325,000; Germany, 1,783,000; total, the world, 56,802,000.

The Department of Commerce also gave figures showing that gross tons of shipping building on June 30, 1922, was, the United States, 150,623; Great Britain, 1,919,504; France, 243,290; Japan, 115,512; Germany, estimated, 500,000; total, the world, 3,325,430.—*Ed. Almanac.*)

VESSELS OWNED.

The approximate deadweight tonnage and number of vessels owned by the U. S. Shipping Board Emergency Fleet Corporation in November, 1918:

| CLASS. | No. | D. W. Tons. |
|---|---|---|
| Steel vessels | 424 | 2,434,982 |
| Wood vessels | 101 | 371,675 |
| Ex-German vessels | 78 | 523,097 |
| Total | 603 | 3,329,754 |

The total number of vessels owned as of June 30, 1921:

| Class. | No. | Approximate D. W. Tons. |
|---|---|---|
| Steel | 1,524 | 10,549,800 |
| Other than steel | 314 | 1,123,326 |
| Uncompleted wood hulls | 142 | 471,050 |
| Total vessels | 1,980 | 12,144,176 |

The ships were: Steel cargo, 1,225; passenger, or passenger and cargo, 42; transports, 5; refrigerators, 13; tankers, 81; tugs, 30; wood cargo, 237; concrete, 9; composite, 11; uncompleted wood tug hulls, 4; total, 1,657.

The total number owned as of Sept. 1, 1922, was:

| Class. | No. | Approximate D. W. Tons. |
|---|---|---|
| Steel | 1,396 | 10,651,766 |
| Other than steel | 257 | 922,650 |
| Uncompleted wood tug hulls | 4 | ..... |
| Total vessels | 1,657 | 11,574,416 |

## APPROPRIATIONS AND ALLOTMENTS.

Appropriations and allotments received from inception to June 30, 1921, were (cents omitted):

*United States Shipping Board.*

| | |
|---|---|
| Permanent fund (Act of Sept. 7, 1916) to purchase capital of Emergency Fleet Corporation | $50,000,000 |
| Salaries and expenses, 1917 (Act of Sept. 7, 1916) | 100,000 |
| Salaries and expenses, 1918 (Act of June 12, 1917) | 342,000 |
| Investigation of foreign discrimination against vessels and shippers of the United States (Act of June 12, 1917) | 175,000 |
| Increase of compensation (Act of June 12, 1917) | 4,634 |
| Salaries and expenses, 1919 (Act of July 1, 1918) | 842,500 |
| Salaries and expenses, 1920 (Act of July 19, 1919) | 772,986 |
| Salaries and expenses, 1921 (Act of June 5, 1920) | 442,500 |
| Salaries and expenses, 1921 (Act of June 16, 1921) | 3,633 |
| Total appropriated for U. S. Shipping Board | $52,683,753 |

*United States Shipping Board Emergency Fleet Corporation.*

| | | |
|---|---|---|
| Emergency Shipping Fund: Act of June 15, 1917 | $405,000,000 | |
| Ditto, Oct. 6, 1917 | 635,000,000 | |
| Ditto, July 1, 1918 | 1,806,701,000 | |
| Ditto, July 11, 1919 | 500,000 | |
| Ditto, July 19, 1919 | 356,000,000 | |
| Ditto, June 16, 1921 | 36,852,000 | |
| Total for Emergency Fleet Corporation | $3,240,053,000 | $3,240,053,000 |
| Total appropriated | | $3,292,735,753 |
| Money otherwise provided was: Allotments by the President of the United States to the U. S. Shipping Board—National Security and Defense Fund in 1918—(Act of April 17, 1917) | $27,011,683 | |
| Same fund in 1919 | 2,500,743 | |
| Total otherwise provided | $29,512,426 | 29,512,426 |
| Total appropriated and otherwise provided | | $3,322,249,179 |
| Returned to Treasury unexpended | $4,725,110 | |
| Transferred to War Department, under Executive order | 3,860,000 | 8,585,110 |
| Net amount received from appropriations and allotments | | $3,313,664,069 |

*Appropriation received from July 1, 1921, to Sept. 1, 1922:*

| | |
|---|---|
| U. S. Shipping Board, salaries and expenses, 1922 (Act of March 4, 1922) | $460,316 |
| Ditto, 1923 (Act of June 12, 1922) | 459,000 |
| Total for Shipping Board | $919,316 |
| *Appropriations:* | |
| Emergency Fleet Corporation, Emergency Shipping Fund, Deficiency Act, June 16, 1921 | $25,000,000 |
| Deficiency Act, Aug. 24, 1921 | 48,500,000 |
| Emergency Shipping Fund, Act of June 12, 1922 | 50,000,000 |
| Claims, Act of June 12, 1922 | 50,000,000 |
| | $173,500,000 |
| Total appropriation received from July 1, 1921, to Sept. 1, 1922, Shipping Board and Fleet Corporation | $174,419,316 |
| *Less:* Unwithdrawn balances of appropriations in U. S. Treasury | 85,498,351 |
| Net amount of appropriations used | $88,920,965 |

*Managers (and/or) operators of U. S. Shipping Board vessels as of Sept. 1, 1922:*

Fifty-four steamship companies, of which twenty-seven were in New York.

*Trade Route Services in which the U. S. Shipping Board vessels were operating as of Sept. 15, 1922:*

To the United Kingdom from North Atlantic, South Atlantic and Gulf U. S. ports.
To Bordeaux/Hamburg range from same.
To Scandinavia and the Baltic Sea ports from North Atlantic U. S. ports.
To Spanish Atlantic and Portuguese ports from South Atlantic and Gulf U. S. ports.
To Spanish Mediterranean ports from South Atlantic and Gulf U. S. ports.
To French Mediterranean, west coast of Italy and the Adriatic Sea ports from North and South Atlantic and Gulf U. S. ports.
To British India from North Atlantic U. S. ports.
To Australia and New Zealand from North Atlantic and Pacific U. S. ports.
To the Orient from North Atlantic, Gulf and Pacific U. S. ports.
To the Dutch East Indies and east and west coasts of Africa from North Atlantic U. S. ports.
To South American east coast from North Atlantic Gulf and Pacific U. S. ports.
To South American east coast from North Atlantic and Pacific U. S. ports.
To the West Indies and Caribbean Sea ports from North Atlantic and Gulf U. S. ports.

*Number, type, kind and tonnage of ships being operated which are controlled by the U. S. Shipping Board as of Aug. 31, 1922:*

*Steel Vessels—Temporarily Inactive:*

| | No | D. W. T. |

| Total, operating dept | 1,670 | 10,773,294 |

*Inactive Vessels, type and port of lay-up, as of Aug. 31, 1922:*

Total cargo ships inactive, 882, of 5,620,881 deadweight tonnage; 17 cargo and passenger, of 183,438 tonnage; 13 refrigerator ships, of 91,183 tons; 66 tankers, of 615,413 tons; 18 tugs.

The U. S. Shipping Board on Aug. 31, 1922, owned 236 wooden vessels, built as a part of the war programme. Of these, 226 were sold at auction on Sept. 12, 1922, for $750,000.

**The Foreign Commerce** of the U. S. Shipping Board for the fiscal year ending June 30, 1922, was:
Exports, 6,634,381 tons of cargo.
Imports, 4,313,913 tons of cargo.

## OTHER INTERESTS.

**Docks and Wharves.** The U. S. Shipping Board owns and operates the Hoboken Terminal, bought on Executive order by former President Wilson for $7,146,583 from the North German Lloyd Dock Co., 6 piers, and the Hamburg American Line Terminal and Navigation Co., 3 piers, to be held for the original owners.

**Drydocks.** The U. S. Shipping Board owns drydocks with tonnage capacity as follows: Perth Amboy, N. J., 10,000; Lord Drydock Corporation, New York Harbor, 10,000; two stored at Mill Basin, Brooklyn, 10,000 tons each; 1 stored at Tiverton, R. I., 10,000; 1 steel dock stored at Mill Basin, Brooklyn, 6,000; Bruce Drydock, Pensacola, Fla., 5,000.

**Bunker Stations.** The U. S. Shipping Board owns bunker stations at Honolulu, T. H., of 110,000 bbls. capacity; Manila, P. I., 165,000 bbls.; St. Thomas, Virgin Islands, 220,000 bbls.; Mobile, Ala., 110,000 bbls.; Norfolk, Va., 1,100,000 bbls.

**Vessels Sold.** The U. S. Shipping Board had sold up to June 30, 1922, 473 vessels, of a total deadweight tonnage of 2,126,379 for a total price of $268,881,711. The board said: "The amount these sales will yield cannot be computed at present (Sept. 15, 1922). Many of the purchasers failed to keep their contracts. Others have applications for readjustments. Most of the sales were at the very high prices prevailing in 1919 and 1920, ranging in many cases as high as $180 per deadweight ton, whereas the prevailing price for similar tonnage in 1922 has been less than one-third that rate. This depreciation accounts for many of the defaults by purchasers."

**Housing.** The U. S. Shipping Board has several war housing projects not yet disposed of, aggregating about 400 acres on which there are about 1,100 buildings, structures and land having cost about $12,000,000.

## LIFE INSURANCE IN FORCE IN THE UNITED STATES.

| 1917 | 11,581,701 | 21,965,594,232 | 37,468,776 | 5,151,096,538 | 49,050,477 | 27,116,690,770 |
| 1918 | 12,768,019 | 24,167,111,902 | 40,453,438 | 5,629,956,453 | 53,221,457 | 29,797,068,355 |
| 1919 | 14,460,828 | 29,274,557,871 | 43,861,894 | 6,239,996,056 | 53,322,722 | 35,514,553,927 |
| 1920 | 16,733,000 | 35,299,292,000 | 47,608,000 | 7,031,676,000 | 64,341,000 | 42,330,968,000 |
| 1921 | 17,663,000 | 36,378,538,000 | 54,097,000 | 8,006,120,000 | 71,760,000 | 44,384,658,000 |

Above table does not cover life policies in force in U. S. issued by foreign companies. The 1920 totals include group insurance contracts for $1,636,725,000.

## THE CONGRESSIONAL "FARM BLOCS."

(This article on the activities of so-called "Farm Blocs" was prepared for the WORLD ALMANAC by Gray Silver, Washington representative of the American Farm Bureau Federation.)

Members of the Senate Farm Bloc, when it was organized on May 9, 1921, in the Washington office of the American Farm Bureau Federation, were:

William S. Kenyon (Rep., Iowa), Chairman; John B. Kendrick (Dem., Wyo.); George W. Norris (Rep., Neb.); Frank M. Gooding (Rep., Idaho); Arthur Capper (Rep., Kan.); Ellison D. Smith (Dem., So. Car.); Duncan U. Fletcher (Dem., Fla.); Robert M. La Follette (Rep., Wis.); Morris Sheppard (Dem., Tex.); E. F. Ladd (Rep., No. Dak.); Joseph E. Ransdell (Dem., La.); J. Thomas Heflin, (Dem., Ala.). Senator Arthur Capper, Kansas, succeeded Senator Kenyon as Chairman when the latter resigned from the Senate to accept a Federal Judgeship in Iowa.

Members of the House Farm Bloc, when it was organized on May 16, 1921, in the Washington office of the American Farm Bureau Federation, were:

L. J. Dickinson (Rep., Ia.); Guy L. Shaw (Rep., Ill.); R. C. Patterson (Rep., Mo.); Robert E. Evans (Rep., Neb.); A. P. Nelson (Rep., Wis.); John C. Ketcham (Rep., Mich.); John D. Clarke (Rep., N. Y.); William Williamson (Rep., So. Dak.); Homer Hoch (Rep., Kan); Burton L. French (Rep., Idaho); Frank Clague (Rep., Minn.); James G. Strong (Rep., Kan.); Charles A. Christopherson (Rep., So. Dak.); C. B. Hudspeth (Dem., Tenn.); O. B. Burtness (Rep., No. Dak.); John H. Smithwick (Dem., Fla.); Edw. T. Taylor (Dem., Col.); John W. Summers (Rep., Wash.).

"There is no definite membership in the Farm Blocs, membership depending upon support or non-support of agricultural measures," says Gray Silver, Washington representative of the American Farm Bureau Federation. "The Farm Bloc in both Senate and House was organized, not for class legislation, but for sympathetic consideration of the economic problems facing agriculture. The Blocs wish to see agriculture take its place in a sound, aggressive, prosperous national programme, and to reap rewards on the basis of the vast investment of capital, labor and knowledge commensurate with the rewards of other national activities."

Actual legislation, which has been enacted at the request of the Senate Farm Bloc, is as follows:

H. R. 5676—An act for the regulation of grain trading.

H. R. 2373—An act to permit farmers to do co-operative marketing.

H. R. 6320—An act for the regulation of the packing industry by the Federal Government.

S. 1072—An act outlining Federal aid for road building and an appropriation for 1921-22.

S. 1811—An act authorizing the sale of Farm Loan bonds at 5½ per cent.

S. 1837—An act depositing an additional $25,000,000 to the credit of the Farm Loan fund, at an interest rate of 5½ per cent.

S. 1915—An act reviving the War Finance Board for one year, and appropriating $1,000,000,000 to be loaned to agriculture through this board.

S. 2263—An act providing for a farmer member of the Federal Reserve Board.

S 2775—An act (1922) extending the life of the War Finance Board for another year.

H. R. 9859—An act containing an appropriation for continuance of Federal aid for the road building programme for 1922-23.

H. R. 11,843—An act meeting the objection of the United States Supreme Court to the Future Trading Act of 1921 following the same lines on the regulation of grain trading except that it is based on the power of Congress to regulate inter state commerce.

In addition are a number of measures of local significance, such as the appropriation of $200,000 to repay the cotton States in their effort to eradicate the pink boll worm; $1,500,000 to drought sufferers in Montana and the Dakotas; extending reclamation laws to irrigation projects; extending the time for payment of construction charges on reclamation projects. Also the Farm Bloc in both Houses was behind the appropriation for the U. S. Department of Agriculture, and many special items received increased appropriation at the instance of the Bloc.

Actual legislation, which has been enacted at the request of the House Farm Bloc, is indicated by the foregoing, with these additional measures which, on Sept. 12, 1922, had not yet been acted on by the Senate:

H. R. 8066—A bill prohibiting the manufacture of filled milk.

H. R. 7102—A bill establishing standard containers for fruits, etc.

The farm bloc lost one Senator, Kellogg of Minnesota, in the election of November 7, but his successful opponent, Henrik Shipstead, is the only member of the Farmer-Labor Party to be elected to the Senate and is expected to act with the bloc in the 68th Congress. Four members of the farm bloc were re-elected: Ashurst of Arizona, Jones of New Mexico, La Follette of Wisconsin, and Swanson of Virginia. Six members of the farm bloc in the House were defeated: Gernerd of Pennsylvania, Evans of Nebraska, Brooks of Illinois, Rhodes of Missouri, Patterson of Missouri, and Shaw of Illinois. Twenty-two of their Representatives were re-elected. Grey Silver, after the election, telegraphed to J. R. Howard, President of the American Farm Bureau Federation: "We consider this (election) a full vindication of the American Farm Bureau Federation's legislative program as well as that of the bloc's and proof that the legislation is in line with public sentiment." He announced this program which the bloc will push for passage during the short session of Congress.

Farm credit legislation.

Legislation to raise the limit from $10,000 to $25,000 or remove the limit altogether on Federal Farm Land Bank co-operative loans.

The extension of the Farm Land Bank movement.

Legislation to provide a limit on the interest rate on loans to farmers.

Legislation to enable small banks to join the Federal Reserve System.

Support of the "truth in fabric" bills.

Standardization of fruit and vegetable containers.

The Anti-Filled Milk Bill.

A bill designed to prohibit the admission into the United States of certain adulterated grain and seeds unfit for seed purposes.

Much of this legislation is already before the various committees of the House and the Senate, and some of the bills already have passed in one House or the other.

### THE AMERICAN FARM BUREAU FEDERATION.

The American Farm Bureau Federation—a national organization—originated when, on March 11, 1911, a local bureau was organized in Broome County, New York, James Quinn, President.

The National Federation was organized in March, 1920, in Chicago, with these officers: James Riley Howard, President; S. L. Strivings, Vice-President; Gray Silver, Washington representative; J. W. Coverdale, Secretary; C. E. Gunnels, Secretary and Treasurer. Executive Committee—E. B. Cornwall, Vt.; E. F. Richardson, Mass.; H. E. Taylor, N. J.; Howard Leonard, Ill.; C. H. Gray, Mo.; O. E. Bradfute, O.; W. H. Walker, Cal.; W. G. Jamison, Col.; John T. Burton, Utah; Gray Silver, W. Va.; J. W. Morton, Ga.; and George Bishop, Okla.

The officiary as of Sept. 1, 1922, was: James Riley Howard, President; O. E. Bradfute, Vice-President; Gray Silver, Washington representative; J. W. Coverdale, Secretary; C. E. Gunnels, director of organization and treasurer; Executive Committee—H. C. McKenzie, N. Y.; E. F. Richardson, Mass.; H. E. Taylor, N. J.; Howard Leonard, Ill.; Ralph P. Snyder, Kan.; John G. Brown, Ind.; W. H. Walker, Cal.; C. S. Brown, Ariz.; John T. Burton, Utah; J. W. Morton, Ga.; one vacancy. Chicago headquarters office, Garland Building, 58 East Washington Street; Washington office, Munsey Building, 1329 E Street, northwest.

The American Farm Bureau Federation officially lists these as the co-operative organizations formed under the inspiration of the Federation:

**U. S. Grain Growers**, 58 East Washington St., Chicago; E. H. Cunningham, President; H. L. Keene, Vice-President; J. M. Mehle, Secretary; C. E. Gunnels, Treasurer.

**National Livestock Producers' Association**, 608 South Dearborn St., Chicago; John G. Brown, President; C. E. Collins, Vice-President; E. H. Cunningham, Secretary and Treasurer.

**Federated Fruit Growers**, 608 South Dearborn St., Chicago; James Nicol, President; J. S. Edwards, Vice-President; C. E. Durst, Secretary and Treasurer.

## THE MEAT PACKING INDUSTRY.

J. Ogden Armour, President of Armour & Co., placed before the Government on Nov 15, 1922, a proposal for the consolidation of Armour & Co. and Morris & Co., two of the "Big Five" Chicago meat packers. He also had a half-hour conference with President Harding.

Decision was reserved while careful study was made at the Department of Agriculture on the details of the plan and its probable effect on the industry and on the producing and consuming public.

Armour & Co. is now capitalized at $150,000,000, with assets in 1920 of $525,488,957, and has packing plants in South America and Australia as well as in the United States. Its sales exceeded a billion dollars in 1919, and were over $900,000,000 in 1920. Morris & Co. is capitalized at $40,000,000, with assets in 1920 of $116,843,021. The company has half a dozen packing plants in the United States and distributing stations here and in the more important cities of Europe and Cuba.

The immediate result of a merger, it is claimed, would be a general consolidation of the facilities of the two companies, particularly as to distributing agencies and rolling stock. Economies of operation are sought.

The following tables show the extent and growth of the meat packing industry in the United States. The data are official, and are taken from the Federal Census of Manufactures.

### SLAUGHTERING AND MEAT PACKING IN THE UNITED STATES.

The total number of animals slaughtered in wholesale slaughtering and meat packing establishments in 1919 was 73,256,127, and in 1914, 59,561,819, an increase of 13,694,308, or 23 per cent., in the five year period.

### MATERIALS—QUANTITY AND COST, 1919 AND 1914.

| | 1919. | 1914. | | 1919. | 1914. |
|---|---|---|---|---|---|
| Materials, total cost | $3,782,929,533 | $1,441,662,658 | Hogs—No. | 44,520,726 | 34,441,913 |
| | | | Cost | $1,757,279,014 | $597,097,518 |
| Animals slaught'd, cost | $3,056,387,778 | $1,199,642,235 | Goats, kids—No. | 23,915 | 8,117 |
| Beeves—No. | 10,818,511 | 7,149,042 | Cost | $144,068 | $29,345 |
| Cost | $1,055,739,469 | $490,108,203 | Poultry, cost | $1,787,936 | $2,178,144 |
| Calves—No. | 4,395,675 | 2,019,004 | Dressed meat purch'd, cost | $299,089,389 | $124,334,798 |
| Cost | $96,449,234 | $27,623,448 | All oth. materials, cost | $425,664,430 | $115,507,481 |
| Sheep, lambs—No. | 13,497,300 | 15,943,743 | | | |
| Cost | $146,775,993 | $84,783,721 | | | |

NOTE—In addition, 553,839 beeves, 387,692 calves, 269,128 sheep and lambs and goats and kids, and 2,290,539 hogs were slaughtered for others in 1919, and 377,937 beeves, 243,360 calves, 795,519 sheep and lambs and goats and kids, and 2,898,994 hogs in 1914.

The dressed meat purchased (for curing) was procured largely from slaughtering establishments, and is duplicated in the total value of products. This item includes meat purchased for curing and canning, animal fats for the manufacture of lard, lard compounds and substitutes, oleo oil and stearin.

The cost of "all other materials" includes containers, materials for the manufacture of containers, ice, materials for the manufacture of ice, curing materials, cottonseed oil, butter, whole milk, fuel, rent of power, mill supplies, and freight.

The table above and the note beneath do not include animals slaughtered on farms and ranges, which in 1919 totalled 1,904,581 cattle; 434,608 sheep and lambs, and goats and kids, and 16,800,230 hogs. The tables that follow relate, also, only to wholesale slaughtering and meat packing plants.

### PRINCIPAL STATES, RANKED BY VALUE OF PRODUCTS, 1919.

| STATE. | Wage Earners. | Value of Products. | STATE. | Wage Earners. | Value of Products. | STATE. | Wage Earners. | Value of Products. |
|---|---|---|---|---|---|---|---|---|

Where there are no figures in the 1914 column, the items were not reported separately by the census takers and are not available.

## THE CASE OF SENATOR NEWBERRY OF MICHICAN.

In the State primary election in Michigan, held Aug. 27, 1918, Truman H. Newberry was nominated by the Republican Party for the United States Senate, defeating Henry Ford by 4,335 votes in a total of 438,452. There had been several other candidates for the nomination. During the campaign protests were made against the excessive use of money in Newberry's interests. The Newberry committee admitted the expenditure of over $178,000. Newberry's own report, under oath, to the United States Senate was: "I have taken no part in it (the campaign) whatever, and no contributions or expenditures were made with my knowledge and consent." His brother, John T. Newberry, contributed $94,000, and near relatives over $70,000 additional.

Mr. Newberry, on Nov. 5, 1918, was elected to the United States Senate, defeating Henry Ford, the Democratic candidate by 12,433 votes. Ford filed a notice of contest in the Senate Jan. 6, 1919. Newberry was sworn in as Senator, giving the Republicans a majority of one in the organization of the Senate. At the first session of the Sixty-sixth Congress, on May 20, 1919, notice of contest and petition for investigation by Henry Ford was again filed with the Senate and referred to the Committee on Privileges and Elections. Nothing was done until the following December, when the Senate voted to make a full investigation and recount the ballots.

In the mean time Newberry was indicted by the United States Grand Jury of the Western District of Michigan under the Federal Corrupt Practices Act. Pending the trial under the Michigan indictment the Spencer sub-committee of the Senate Committee on Elections took no action. The trial at Grand Rapids was concluded in March, 1920, and Newberry was convicted and sentenced to serve two years in the penitentiary and pay a fine of $10,000. The case was taken on appeal to the United States Supreme Court, which by a five to four decision, May 2, 1921, held that Congress had no power to pass a law regulating Senatorial primary elections and therefore the Corrupt Practices Act was unconstitutional. Charles Evans Hughes was Newberry's leading counsel.

The Spencer sub-committee then resumed hearings. Newberry did not appear to testify. Nearly three years after Henry Ford's first notice of contest the committee decided in Newberry's favor, after dividing on strictly partisan lines.

After a sharp debate the Senate adopted, on Jan. 12, 1922, the following resolution:

"1. That the contest of Henry Ford against Truman H. Newberry be, and it is hereby dismissed.

"2. That Truman H. Newberry is hereby declared to be a duly elected Senator from the State of Michigan for the term of six years, commencing on the fourth day of March, 1919, and is entitled to hold his seat in the Senate of the United States.

"3. That whether the amount expended in this (Michigan) primary was $195,000, as was fully reported or openly acknowledged, or whether there was some few thousand dollars in excess, the amount expended was in either case too large, much larger than ought to have been expended. The expenditure of such excessive sums in behalf of a candidate, either with or without his knowledge and consent, being contrary to sound public policy, harmful to the honor and dignity of the Senate and dangerous to the perpetuity of a free government, such excessive expenditures are hereby severely condemned and disapproved."

The Senators voted on the resolution as follows:

**For Seating Newberry, 46.**—*All Republicans*, Ball, Brandegee, Bursum, Calder, Cameron, Colt, Cummins, Curtis, Dillingham, Edge, Elkins, Ernst, Fernald, France, Frelinghuysen, Gooding, Hale, Harreld, Kellogg, Keyes, Lenroot, Lodge, McCormick, McCumber, McKinley, McLean, McNary, Nelson, New, Nicholson, Odie, Page, Pepper, Phipps, Poindexter, Shortridge, Smoot, Spencer, Stanfield, Sterling, Townsend, Wadsworth, Warren, Watson (Ind.), Weller, Willis.

**Against Seating Newberry, 41.**—*Republicans, 9*, Borah, Capper, Jones, (Wash.), Kenyon, (La.), Ladd, La Follette, Norbeck, Norris, Sutherland.

**Democrats, 32**—Ashurst, Broussard, Caraway, Culberson, Dial, Fletcher, Glass, Harris, Harrison, Heflin, Gerry, Hitchcock, Jones (N. M.), King, McKellar, Myers, Overman, Pittman, Pomerene, Ransdell, Robinson, Owen Sheppard, Shields, Simmons, Smith, Swanson, Trammell, Walsh (Mass.), Walsh (Mont.), Williams, Underwood.

Paired—Crow, du Pont and Moses, Republicans, for Newberry; with Kendrick Stanley and Reed, Democrats, against.

Absent and not voting—Newberry and Johnson, Republicans, and Watson (Ga.) Democrat.

## ENFORCEMENT OF THE PROHIBITION LAW.

President Harding in his annual message to Congress on Dec. 8, 1922, called for rigorous and literal enforcement of the Prohibition laws in these words:

"Let men who are rending the moral fibre of the Republic through easy contempt for the Prohibition law, because they think it restricts their personal liberty, remember that they set the example and breed a contempt for law which will ultimately destroy the Republic.

"Constitutional Prohibition has been adopted by the Nation. It is the supreme law of the land. In plain speaking there are conditions relating to its enforcement which savor of Nation-wide scandal. It is the most demoralizing factor in our public life.

"Most of the people assume that the adoption of the Eighteenth Amendment meant the elimination of the question from our politics. On the contrary, it has been so intensified as an issue that many voters are disposed to make all political decisions with reference to this single question.

"The day is unlikely to come when the Eighteenth Amendment will be repealed. The fact may as well be recognized and our course adapted accordingly. If the statutory provisions for its enforcement are contrary to deliberate public opinion, which I do not believe, the rigorous and literal enforcement will concentrate public attention on any requisite modification. Such a course conforms with the law and saves the humiliation of the Government and the humiliation of our people before the world, and challenges the destructive forces engaged in widespread violation, official corruption, and individual demoralization.

"The Eighteenth Amendment involves the concurrent authority of State and Federal Governments for the enforcement of the policy it defines. A certain lack of definiteness, through division of responsibility, is thus introduced. In order to bring about a full understanding of duties and responsibilities as thus distributed, I purpose to invite the Governors of the States and Territories, at an early opportunity, to a conference with the Federal executive authority. Out of the full and free considerations which will thus be possible, it is confidently believed will emerge a more adequate comprehension of the whole problem and definite policies of national and State co-operation in administering the laws."

### ATTORNEY GENERAL'S OPINION.

Attorney General Daugherty rendered on Oct. 6, 1922, a sweeping opinion that the sale or transportation of intoxicating beverages on all American ships, public and private, was prohibited, and that any foreign vessel entering an American port with liquor on board as cargo, or in stores, or even in a sealed case, was to be regarded as violating the Prohibition Enforcement Law and to be dealt with accordingly. The new ruling applied to all American vessels, even on the high seas, and to all foreign vessels within the three-mile limit of national territorial jurisdiction. This decision was understood to mean that a foreign vessel carrying intoxicating liquors leaving a foreign port for another foreign port would be violating the Volstead act if it stops en route at an American port. The opinion was confirmed by President Harding.

Foreign shipowners were much concerned over the opinion and counsel for the Cunard and Anchor Line steamships sought an injunction before United States District Judge Learned Hand on October 11 to restrain the Federal Government from seizing liquors carried as sea stores for use of passengers and crew on their vessels. Other foreign steamship lines later joined them in the suit. Judge Hand issued a temporary injunction on October 12, enjoining the local prohibition and customs authorities from molesting liquor on board the American steamers Finland and St. Paul, then in the port of New York.

The French Line announced on October 12 in Paris a decision to fight the ruling in the Supreme Court and that in the event of an adverse decision it would move to obtain an appeal to the Permanent International Court of Justice at The Hague. The French Line is compelled by French law to serve a wine ration to its crew of sailors and stokers. The financial loss to the French Line would be hundreds of thousands of francs monthly. On one trip in August, with 1,011 passengers aboard, the steamship Paris sold 1,260 bottles of champagne, 242 bottles of fine Burgundy and Bordeaux wines and 87 bottles of liquor. Besides this there was the ordinary red and white wine which was allotted to each passenger with the noon and evening meals.

A hearing was held on October 17 in which the attorney for the Cunard and Anchor Lines argued that intoxicating liquor, lawfully acquired and kept sealed as sea stores, is legal within the territorial waters of the United States, and that an act of commerce should not apply to the internal affairs of a foreign vessel touching these ports.

Judge Learned Hand on October 24 upheld the ruling of Attorney General Daugherty and dismissed the applications of the ten foreign and two American steamship lines, which had combined forces, for injunctions. He decided, however, that foreign ships would be allowed to enter port with liquor for their crews, if the supply is sufficient only for rations as required by laws of certain foreign nations. Ship owners must give bonds of $25,000 each to insure compliance with this provision. The case will be taken to the United States Supreme Court.

### CARRYING OUT THE RULING.

The ruling of Attorney General Daugherty became effective on October 21 at midnight. However, temporary suspension of the ruling as it applies to vessels of foreign countries plying to and from American harbors, was ordered by Secretary of Treasury Mellon on October 25, after a conference, following a meeting of the Cabinet, with the Attorney General and chief counsel Britt, of the Prohibition unit, at which was discussed the international aspect of the tangle and the responsibility that devolved on the Treasury Department to work out with the State Department means of safeguarding the country against foreign embarrassment.

On the day previous, the United States steamer President Adams came into New York harbor carrying five gallons of brandy in violation of the Volstead act. The captain claimed that the British Board of Trade officers at Tilbury had refused to give him his clearance papers until he shipped brandy to meet the British law requiring ships to carry at least one gallon of brandy for each 100 British steerage passengers.

President R. H. M. Robinson of the United American Lines announced on November 9 that the transatlantic steamers Resolute and Reliance of that line would be transferred from American to Panaman registry to escape the effects of the Daugherty ruling. He said that both steamers had been chartered for winter cruises and that more than fifty passengers, following the publication of the Attorney General's opinion, had cancelled their reservations on the Resolute alone. He continued, "because of the keen competition of cruises arranged for foreign steamers we believe the cruise of the Resolute and Reliance cannot be carried out successfully unless the passengers can be offered the same service and privileges as are offered on foreign ships. Therefore, in view of the large sums involved, and in fairness to our stockholders, we have completed arrangements to transfer the ships to a foreign flag."

International complications ensued, and on September 26, after a two-hour discussion in the Cabinet, Secretary of the Treasury Mellon communicated to the Prohibition Enforcement Division instructions not to go ahead with any general program of search and seizure beyond the internationally recognized three-mile limit; however, where vessels lying further out communicated with the shore by their own boats, or through their own crews, they might be taken, such intercourse being regarded as a landing in violation of the customs regulations. The Prohibition Commissioner was told that proper discretion should be exercised at all times to avoid any action that would bring international complications.

### NEW JERSEY'S RATIFICATION.

The 46th State to ratify the Prohibition Amendment (18th) to the Constitution of the United States was New Jersey, which did so on March 10, 1922.

### RELIEF SOUGHT BY PHYSICIANS.

The complaint was filed on November 20 in the Federal District Court of Southern New York in the equity test suit brought by Dr. Samuel W. Lambert which challenges the constitutionality of the National Prohibition Act, and the act supplemental thereto, and asks that Edward C. Yellowley, acting Federal Prohibition Director; David H. Blair, Commissioner of Internal Revenue, and Col. William Hayward, United States Attorney,

be enjoined from interfering with him in prescribing liquor to his patients. The restraining order is asked upon the ground that the quantities needed for the use of any one person in any period of ten days exceed the limits fixed by the Prohibition acts.

## PROSECUTIONS IN FEDERAL COURTS.

In the annual report of the Attorney General, made public Dec. 7, 1922, Mrs. Mabel Walker Willebrandt, Assistant Attorney General in charge of the divisions having supervision of the prosecution of suits brought by the Government in the various Federal Courts under the National Prohibition Act, said that during the fiscal year ending June 30, 1922, there was "a steady increase in cases coming to the courts, due probably to the increased efficiency of the officers charged with the enforcement of this law.

"The question confronting this department in 1921 relative to the immense storage charges accumulated all over the country by reason of quantities of liquor and vehicles seized and disposed of under the National Prohibition Act has been largely solved by a vigorous campaign on the part of the United States attorneys to libel and otherwise promptly dispose of this contraband material.

"Prosecutions under the National Prohibition Act in the United States District Courts were as follows:

| Fiscal Year 1921-22. | Civil. | Criminal. |
|---|---|---|
| Prosecutions commenced | 2,157 | 34,984 |
| Convictions | .... | 22,749 |
| Acquittals | .... | 1,195 |
| Quashed | .... | 1,250 |
| Dismissed | .... | 3,549 |
| Terminated | 1,537 | .... |
| Pending | 2,694 | 10,472 |

"The aggregate amount in fines and penalties imposed was $4,041,456.03 in civil cases. The aggregate amount in judgments obtained by the United States was $120,255.29. There are 10,472 criminal and 2,694 civil prosecutions pending at the close of the fiscal year.

"The above figures cover only cases arising under the National Prohibition Act. In addition a great many cases have arisen under the internal revenue laws and the customs statutes involving similar violations.

"Since the Eighteenth Amendment of the Constitution and Title II. of the National Prohibition Act became effective Jan. 16, 1920, rum-running vessels of American and foreign registry, carrying liquor from foreign ports to our shores, have swarmed along our seaboards, smuggling liquors into the United States in violation of our laws.

"Eighteen vessels of foreign registry and two of American registry with their cargoes of liquors have been seized."

A decision was handed down by the United States Supreme Court on Jan. 30, 1922, to the effect that the Volstead act does not permit an owner of intoxicating liquors to transport them from a bonded warehouse to residence for beverage purposes. A further decision, handed down May 15, 1922, was to the effect that the constitution of the Volstead Act prohibits the transportation of intoxicating liquors from a foreign country through a port of the United States to another foreign port.

## ENFORCEMENT OF THE LAW.

The Prohibition unit under the direction of the Commissioner of Internal Revenue was reorganized during the fiscal year. The number of employees in Washington increased from 503 to 596, and in the field from 1,818 to 2,881. The total payroll of the unit on June 30, 1922, was $6,045,073, an increase of $2,015,943. During the year a Prohibition patrol service (the "dry navy") was organized, consisting of six boats of the submarine chaser type, assigned at Atlantic ports. Five motor patrol boats, capable of making 33 miles per hour, were placed on the Great Lakes, to check liquor smuggling from Canada.

The Commissioner of Internal Revenue reported for the fiscal year ending June 30, 1922, the following:

| | |
|---|---|
| Distilleries seized | 8,318 |
| Stills seized | 10,994 |
| Fermenters seized | 81,640 |
| Spirits seized and destroyed, gals. | 127,819 |
| Spirits seized and not destroyed, gals. | 254,571 |
| Malt liquor seized, gals. | 4,187,626 |
| Mash seized, gals. | 4,052,214 |
| Automobiles seized | 1,886 |
| Boats and launches seized | 74 |
| Persons arrested | 42,223 |
| Property seized and destroyed | $2,507,982 |
| Property seized and not destroyed | $3,364,110 |
| Agents killed on duty | 9 |
| Agents injured on duty | 28 |
| Total disbursements by Federal Prohibition directors, salaries, travelling expenses, purchase of evidence, etc. | $4,883,092 |
| Total disbursements for enforcement of Prohibition Act | $6,543,904 |

## DETAIL OF WORK IN 1921.

Federal Prohibition Commissioner R. A. Haynes has issued this official summary covering the work of his bureau for the calendar year 1921:

Approximate cost of operation: Rent, $126,847.05; telephone, $17,409.05; supplies and equipment, $37,253.45; evidence and miscellaneous, $163,467.50; seizure and sale, $51,463.90; salaries, $3,501,209.61; travel, $1,396,443.51; office expenses, $980,429.40; estimated total, $6,274,523.47.

Estimated amount of assessments, involving 40,000 cases; penalties under Section 35, $50,000,000; $1,000 special tax, Section 1,001, Revenue Act, 1918, $500,000; taxes on spirits, wines, etc., $7,000,000; estimated total, $57,500,000.

Approximate amount of collections, $3,000,000.

Estimated seizures: Gallons of distilled spirits and wine, 950,000; estimated value of property seized during the year, not including property levied for payment of taxes, nor distillery apparatus or other property destroyed, $12,907,693.40.

Miscellaneous property was seized as follows: Automobiles, 600; boats, 40; wagons and carriages, 26; horses and mules, 45; aeroplanes, 1; motorcycles, 5; cash, $7,500; tracts of land, 10; stocks of merchandise, 7.

Number of Federal indictments, estimated, 30,000; pleas of guilty, 17,000; number of convictions, 21,000; number of acquittals, 950.

Wholesale drug companies must now have as a minimum a $25,000 drug stock, must be bona fide dealers, and sales of liquors must not exceed 10 per cent. of the amount of their gross sales as a drug concern.

Last year's importation was one-half of 1 per cent. of the total consumption of liquor in America the year before Prohibition.

Arrests for drunkenness decreased 60 per cent.

Liquor withdrawals reduced 50 per cent.

Another result: Official chemists report only 2 per cent. of all liquor seized and examined to-day is fit to drink.

Upward of 300 brewers investigated and charged with violations.

Some public officials indicted and some have gone to jail. Others on the way.

In fifty-nine cities, with a population of 30,000 or over, and a combined population of 20,000,000 (including New York, Chicago, and Philadelphia), official and estimated figures show a decrease in arrests for drunkenness from 316,842 in 1917 to 109,768, notwithstanding bad booze, temporary individual hard drinking, and a zeal to "jug" all intoxicated people.

## PROHIBITION IN CANADA.

Many popular votes have been taken on the general subject of Prohibition in the Dominion of Canada. To-day, of the nine Provinces of Canada, seven are dry. These are Ontario, Manitoba, Saskatchewan, Alberta, New Brunswick, Nova Scotia, and Prince Edward Island; two, Quebec and British Columbia, sell alcoholic liquors under new conditions indicated by such terms as "Government control," and "Government dispensaries." The Dominion of Newfoundland is also dry.

The annual budget for the Province of Quebec announced by Provincial Treasurer Jacob Nicol on November 15, for the year ending June, 1923, shows that the revenue from fines, duties and permits for the sale of liquor was over $4,000,000. He said the liquor commission had brought order out of chaos. In counties where the law applied it had opened stores, given licenses where deemed necessary, and impressed the general public with its sincerity and ability to carry on and have the law respected. The total surplus of the province above expected revenue amounted to $5,033,419.

Attorney General A. M. Manson reported to the Legislature of British Columbia on November 1 that the cities of the Province will receive for the last fiscal year $1,300,000 as their share of the profit from the sale of liquor by the Province. The report showed that 6,568 prescriptions for liquor were issued in the year as compared with 131,057 the year before the moderation act went into effect, when the Province was dry. The Province will issue no more licenses to exporters of liquor.

New Zealand, after an exciting campaign with "Pussyfoot" Johnson and other imported speakers from the United States and Australia, on the licensing referendum gave a majority in December of 16,138 in favor of continuance of licensing. In 1919 the majority against prohibition was 3.332.

## BETTER ENFORCEMENT OF THE LAW.

The American Bar Association at its annual meeting in San Francisco heard, on Aug. 10, 1922, and adopted the report of a special committee charged with considering a better enforcement of the law. The committee was composed of William B. Swaney, Chairman; Marcus Kavanagh, Charles S. Whitman, Wade B. Ellis, and Charles W. Farnham. Their report, in part, follows:

"The first difficulty which confronted us was a discouraging dearth of official information upon the criminal situation in the United States. No other great civilized country is so far behind on this important matter.

"First of all we urge the establishment, under the control of the Department of Justice at Washington, of a Federal Bureau of Records and Statistics to which criminal authorities in the several States must regularly report; that such reports, statistics, records, photographs, fingerprints, etc., shall be immediately available to officers charged with enforcement of the criminal law throughout the country. Without knowledge of the real situation it will be impossible thoroughly to diagnose or properly deal with the problems of crime which confront us.

"The population of Canada is about 9,000,000, that of Cook County, Illinois, about 3,000,000, and that of Chicago, 2,700,000. Notwithstanding this, we find that there were in 1921:

"In Joliet pentitentiary, *one* of the Illinois State prisons, 1,930 prisoners.

"In *all* Canada's penitentiaries, 1,930.

"In Chicago 4,785 burglaries.

"In Canada 2,270 burglaries.

"In Chicago 2,594 robberies.

"In Canada, robberies, including larceny from the person, 605.

"In Cook County 212 murders.

"In Canada 57 murders.

"It will not do to say that the Canadians are naturally more law-abiding than we, for the United States census of 1910 shows that when persons born in Canada settle in the United States they are even a little less law-abiding than the native white citizens of this country.

"Out of a Canadian born population of 1,196,070 in this country in 1910, 7,956 were in our prisons, and out of the natives of 17 foreign countries living here, Canadians ranked sixth in lawlessness.

"The natives of certain European countries which have the best record for law observance, when settled here, become the most lawless of all.

"As was stated to your committee, crime flourishes because criminals escape punishment, and criminals escape punishment because there are so many avenues of escape open. The prevalence of the abnormal volume of crime in our larger cities is the result of years of mollycoddling and sympathy by misinformed and ill-advised meddlers.

"In Canada the penalties imposed for crime are far more severe than our own. In fact, the theory there seems to involve protection to the public, with only a secondary concern for the criminal.

"The criminal situation in the United States, so far as crimes of violence are concerned, is worse than that in any other civilized country. Here there is less respect for law. While your committee cannot obtain the exact figures from all available sources of information, we estimate that there were more than 9,500 unlawful homicides last year in this country; that in 1920 there occurred not less than 9,000 such homicides, and that in no year during the past ten years did the number fall below 8,500. In other words, during the past ten years, no less than 85,000 of our citizens have perished by poison, by the pistol or the knife, or by some other unlawful and deadly instrument.

"Burglaries have increased in this country during the past ten years 1,200 per cent.

"Crime and lawlessness in the United States have been steadily on the increase and out of proportion to our growth, and there has been a steady and growing disrespect for law. In our opinion this is not a result of the war. We do not find the proportional increase in crime from 1916 to 1922 greater than from 1910 to 1916, and we have not been able to discover that crimes of violence have materially increased in France, England, or Canada during or since the war, although the effects of the war naturally must be more marked in those countries.

"It is our united opinion that the means provided in the United States for coping with crime and criminals are to-day neither adequate nor efficient, for example:

"First, we find that the parole and probation laws, as administered, very generally fail to accomplish the purposes for which the laws were designed and weaken the administration of criminal justice. We recommend that first offenders, and first offenders only, should be eligible for probation. We recommend that the indeterminate sentence laws should be modified so as to apply to first offenders only, and we believe, too, that neither probation nor parole should be permitted those convicted of homicide, burglary, rape or highway robbery.

"Second, we find that over 90 per cent. of the murders in this country are committed by the use of pistols. We find that the laws prohibiting the carrying of firearms or deadly weapons are ineffective—in fact, that they work to the benefit of the criminal rather than to the law-abiding citizen. The revolver serves no useful purpose in the community to-day. We recommend that the manufacture and sale of pistols, and of cartridges or ammunition designed to be used in them, shall be absolutely prohibited, save as such manufacture shall be necessary for governmental and official use under proper legal regulation and control.

"Third, we find the causes for delay in criminal cases so varied and the conditions so differing, that we hesitate to make specific recommendations. Certainly it is true that the criminals and not the public benefit by these delays. The Constitution provides: 'In all criminal prosecutions, the accused shall enjoy the right to a speedy trial.' As every one familiar with criminal prosecution knows, this is the kind of enjoyment that few charged with crime desire.

"Dilatory motions, such as motions to inspect the Grand Jury minutes, which the trial Judge may take under consideration almost indefinitely; motions for an order dismissing an indictment, from which, if granted, the prosecution in many of our States has no right to appeal; adjournments on account of other engagements of counsel, a privilege greatly abused in some jurisdictions, and many other causes for delay, all accrue to the benefit of the lawbreaker.

"We recommend that the State be given every right to appeal now enjoyed by a defendant—except from a verdict of not guilty, and we recommend that the prosecutor in a criminal trial shall have the right to call the attention of the jury to the fact that the defendant has failed to take the stand or has failed himself to contradict or deny the testimony offered by the prosecution.

"We recommend that the State be given the right to amend the indictment upon proper terms, in matters of form.

"We recommend that there should be but one appeal from a judgment of conviction in the trial court.

"We recommend that there be enacted legislation limiting the time during which Judges or courts may hold under advisement dilatory motions made in criminal trials; that at the expiration of such time, without action, such a motion shall be deemed to be denied.

"Fourth, we find that in some of the States the jury is the final judge both of the law and the facts. We believe that such a condition is absolutely subversive of a government of law and we recommend the repeal of such statutes.

"Fifth, we find in various jurisdictions glaring abuses in the matter of bail, both in the amount imposed and in the sufficiency of security offered.

"Sixth, we find that further legislation should be enacted by the Congress to punish and prevent lynching and mob violence.

"Seventh, we find that more stringent laws limiting and controlling immigration should be enacted and enforced.

"Eighth, we find that the bill now pending in the Congress, increasing the number of United States District Judges and conferring powers upon the Chief Justice and Senior Circuit Judges to have supervision over the work of the courts and see that the dockets are kept clear, should be enacted.

"Ninth, no meritorious case, whether civil or criminal, that is cognizable in the courts of the country, ought to be denied the services of an able, courageous and loyal advocate. And no man or woman, however humble, ought to be able to say in any American community that justice is too expensive for the poor. We therefore urge that in every community the members of this association volunteer to aid, without fee, the worthy poor who are being oppressed, defrauded or otherwise wronged, and who have not the means to employ counsel.

"Tenth, first offenders must be segregated from veteran criminals, for the jails throughout the land to-day are breeding-places for crime, and the young and thoughtless who may often be reclaimed, are taught by professional criminals to scorn the restraints of society; and in this connection we may well consider the extension of psychopathic laboratories established as adjuncts to the criminal courts."

## PRISONERS IN PENAL INSTITUTIONS, 1922 AND 1917.

The United States Department of Commerce announces that, according to returns received by the Bureau of the Census, the number of prisoners confined in Federal penitentiaries, State prisons, county jails, State and county chain or road gangs, city police stations, and other penal institutions on July 1, 1922, was 163,889, of which number 5,540 were reported for 3 Federal penitentiaries, 78,673 for 104 State prisons, 44,283 for 2,451 county penal institutions (principally jails), 12,717 for 296 chain or road gangs in certain Southern States, and 21,635 for 1,319 city institutions, while the remaining 1,041 were women committed by the courts to the care of other institutions (24 in number), mainly under the control of religious or charitable organizations.

Similar data were collected for July 1, 1917, but the total for that date does not include all prisoners in chain or road gangs, nor women committed by the courts to the care of institutions under the control of religious or charitable organizations. Excluding these from the figures for 1922, the comparable totals for the two years are: 1922, 151,172; 1917, 140,186.

These figures include prisoners awaiting trial and a few persons held as witnesses, as well as prisoners serving sentence. The returns were obtained in response to a circular of inquiry which the Bureau of the Census mailed to the various institutions, as a preliminary to the complete decennial census of prisoners which will be taken in 1923.

The number of prisoners in Federal penitentiaries increased from 3,018 on July 1, 1917, to 5,540 on July 1, 1922. During the same period the number of inmates of State prisons increased from 71,442 to 78,673, and of county jails, from 41,871 to 44,283, while persons confined in city penal institutions (including police stations) decreased in number from 23,855 to 21,635.

The data as to prisoners in Federal and State penal institutions are presumably complete and accurate for both 1922 and 1917. The combined total of persons in such institutions increased from 74,460 in 1917 to 84,213 in 1922, the rate of increase being 13.1 per cent.

The rate of increase in Federal prisoners was 83.6 per cent.; in State prisoners, 10.1 per cent. The ratio of Federal prisoners per 100,000 population increased from 3 in 1917 to 5.1 in 1922, and the corresponding ratio for State prisoners increased during the same period from 72.4 to 74.5.

No State prison is maintained in Delaware, and for Georgia the State figures, which include prisoners in chain or road gangs, are not comparable with those for other States. Of the remaining 46 States, 23 show increases in the ratio of State prisoners per 100,000 population, and 23 show decreases.

Of the 23 States in which the ratio increased, 19 show relatively low ratios for 1917, the average for the entire group of 23 States being 58.6 per 100,000; while of the 23 States in which the ratio decreased, 18 show relatively high ratios for 1917, the average for the entire group being 92.4 per 100,000. In other words, the ratio decreased in most of the States in which it was relatively high in 1917 and increased in most of the States in which it was relatively low in that year.

For example: Pennsylvania's low ratio of 41.6 in 1917 increased to 56.2 in 1922, while Indiana's high ratio of 118 in 1917 declined to 101.1 in 1922. The increases somewhat more than counterbalanced the decreases, however, and thereby raised the ratio for the United States from 72.4 in 1917 to 74.5 in 1922.

The tendency toward uniformity is further brought out by comparing the highest and lowest State ratios for each of the two years covered by the inquiry. In 1917 the highest three ratios were Nevada, 239.3; Florida, 177.6; Wyoming, 153.4. For 1922, however, the highest three ratios were perceptibly lower, namely: Nevada, 200.2; Wyoming, 165.3; Florida, 139.3. For 1917 the lowest three ratios were South Carolina, 19.2; Maine, 29.4; Nebraska, 29.9.

The lowest three ratios for 1922 are noticeably higher, namely: South Carolina, 29.5; New Hampshire, 32.9; North Dakota, 34.7.

The returns for counties and cities are not strictly comparable for the two years, for the reason that in each case a larger number of institutions is covered for 1922 than for 1917. The county returns covered 3,021 institutions (principally jails) for 1922, as against only 2,578 for 1917; while the city returns relate to 2,709 institutions (principally police stations) for 1922, as against only 2,351 for 1917.

Only a part of the prisoners in county and city institutions are actually serving sentence, the remainder being held in confinement awaiting trial, or, in a few cases, held as witnesses.

The only fair comparison between the county and city figures for the two years is that made with averages based on the total number of institutions for which reports were received (including those reporting no prisoners). For county institutions the average number of prisoners decreased from 16.2 in 1917 to 14.7 in 1922, and for city institutions it fell from 10.1 in the earlier year to 8 in the later.

The number of empty county jails and other county institutions decreased from 623, or 24.2 per cent. of the total for which reports were received in 1917, to 570, or 18.9 per cent. of the total, in 1922. On the other hand, the number of city institutions reporting no prisoners increased from 1,169, or 49.7 per cent. of the total in 1917, to 1,390, or 51.3 per cent. of the total in 1922.

The following tables show the distribution of prisoners by class of institutions and by States for 1922 and 1917:

INMATES OF PENAL INSTITUTIONS, BY CLASS OF INSTITUTION, FOR THE UNITED STATES, 1922 AND 1917.

## STATE LAWS RELATIVE TO FOREIGN CORPORATIONS.

THE WORLD ALMANAC presents a compilation of the laws of the States and Territories of the United States relating to the entrance into one of such jurisdictions of a corporation formed under the laws of another State, Territory or foreign country, with conditions precedent to transaction of business, liabilities for violation of requirements, and rate of license and privilege taxes imposed, with fees for the filing of the necessary papers and documents.

The utter dissimilarity of these State and Territory enactments rendered it impossible to present the matter in tabular form; and, in lieu thereof, each one is given in a separate paragraph.

ALABAMA—File with Secretary of State at Montgomery certified copy of articles of incorporation; fee, $10; penalty for failure, $1,000. Penalty $500 for doing business in State before designating places of business in State, and names and addresses of authorized agents, and paying charter fee 25 per cent. of actual capital employed in State up to $100; if not more than $1,000 so employed, 25 per cent. on $100, plus 5 per cent. on balance; if more than $1,000, 25 per cent. on $100, plus 5 per cent. on balance up to $1,000, plus one-tenth of 1 per cent. on excess over $1,000. When this charter fee is paid, file with State Auditor sworn statement setting forth legal name, State where incorporated, authorized capital stock, amount paid in, principal place of business, actual capital employed in State. Non-compliance denies access to courts, estops business, nullifies contracts. Procure from Secretary of State annual permit to do business, State Auditor to counter-sign; fee, $10. President or executive head and secretary of corporation files with a County Judge of Probate in the State statement of corporation's name, where organized, principal place of business in State, capital stock, capital actually employed in State. Judge may summon, and enforce payment of franchise tax as he finds, tax to be paid only in one county, on capital actually employed in State, less total loans in State secured by mortgage, 60 cents on each $1,000 actually so employed, payable to State Tax Commission, Montgomery, accompanied with sworn statement between Nov. 1 and Dec. 15, on blanks supplied by Commission, which may enforce payment of more than offered, if evidence justify. Appeals allowed to Circuit Court.

ALASKA—File with Secretary of Alaska at Juneau copy of articles of incorporation; fee, $25; if articles later be amended or supplemented, file statement thereof; fee, $10; file certificate of appointment of resident agent in Alaska, or revocation thereof; fee, $5; pay to Secretary of Alaska annual license, $15; penalty for failure, $2.50. Non-payment annual corporation tax for one year is prima facie evidence of insolvency; two years non-payment causes name of corporation to be stricken from Territory records. If re-instatement applied for, all taxes and penalties must be paid, plus $20. Corporation may withdraw from Alaska by paying all sums due; fee for withdrawal certificate, $5. Fee for certificate of dissolution of corporation, $5. Annual report to be filed with Secretary of Alaska; fee, $2.50. Copy articles of incorporation also to be filed in each district in which business is intended, giving total capital stock, amount paid in in money, amount paid in otherwise and in what; assets, character and cash value must be stated; liabilities, how secured and on what property. Agents must file written consent of responsibility with Secretary of Alaska. Death or removal of agent requires filing substitute designation within 60 days. Penalty for non-filing certificates mentioned is $25 for each day of neglect, voiding all contracts if other party so elects.

ARIZONA—File articles of incorporation with Corporation Commission at Phoenix; publish them six times in some newspaper in each county in which business is to be done, after which file affidavit of such publication with Commission; license fee to Commission, $15; obtain from Commission license permit; then in writing over sworn statement of President or other chief officer, attested by Secretary or by resolution of Board of Directors of corporation, appoint resident agent in each county in which business is to be done, agents to be actual, bona-fide residents of their counties for at least three years. Failure denies right to do business; every act by corporation to be void. Change of venue from State to Federal Court of suit instituted by corporation against a citizen of the State compels Corporation Commission to annul corporation's license. Three months' absence of agent from county appointed for, together with failure to appoint substitutes within four months, forfeits corporation's rights by such agent and voids contracts and all acts. Compliance with provisions gives all real and personal property rights enjoyed by citizens under Arizona laws.

ARKANSAS—Statement to be filed before June 1 showing name of corporation, under what laws organized, location of principal office, names and addresses of President, Secretary, Treasurer, members of Board of Directors, date of annual election of officers, amount of authorized capital stock, par value per share, capital stock subscribed, amount issued, amount paid up, market value of shares, nature of business, places of business in State, value of property owned and used in State; where situate; name and location of officers or agents in the State; value and where situate property owned and used outside of State; changes if any in any of these respects since former report. Report to be to State Tax Commission at Little Rock, which determines what proportion of corporation's capital stock is represented in State. Commission to certify to State Auditor, who in turn to State Treasurer, who collects franchise tax one-tenth of 1 per cent. annually on proportion of capital stock represented by property owned and used in State. Corporations with no capital stock or less than $10,000 employed in State pay annually $10. Tax Commission notifies by mail by July 1 amount of tax due. On payment of fees for filing statement first referred to, State Auditor gives certificate of compliance. Taxes due by Aug. 10. Tax-delinquent corporations to pay 25 per cent. additional as penalty. Taxes are first lien on corporation's property. Charter to be revoked if taxes not paid. Questions as to status of corporation arising, Tax Commission has full powers to enforce production of papers and witnesses. Recalcitrant witnesses fined $1,000 or six months imprisonment. Franchise tax being paid, Tax Commission issues 5-year permit subject to annual tax payments. Fees—Filing copy of articles of incorporation, $25 up to $10,000 authorized capital stock; for filing increase of capital stock, ditto; amounts of stock in either case being in excess of $10,000, fee is one-tenth of 1 per cent. on excess.

CALIFORNIA—File with Secretary of State at Sacramento copy articles of incorporation, copies of certificates of changes in capital stock or other amendments; affidavit by President or Secretary that no changes are contemplated prior to date business in State is to begin, affidavit to be filed not more than 15 days before; designate some person on whom legal processes may be served. Fees—For filing copy of articles, $75; license tax, $10 on authorized capital stock up to $10,000, increasing as capitalization increases, to a maximum of $1,000 tax if capital more than $10,000,000. Corporations for profit but with no capital stock pay annually $10. License tax is lien on property from Jan. 1. On Saturday preceding first Monday of March, non-payment of tax forfeits right to do business, attempt to continue causing fine not less than $250, or not less than 50 days imprisonment, contracts being void if made after that date. Reinstatement allowed on payment of tax for years suspended. Corporation may surrender rights in State by filing request therefor with Corporation Tax Exemption Board, Sacramento. False statements in these connections constitute perjury.

COLORADO—File with Secretary of State at Denver certified copy of articles of incorporation and all amendments thereto; fee, $30 for first $50,000, and 30 cents for each additional $1,000; file certified copy of corporation laws of State under which corporation was formed; filing fee, $5. Certificate of business purpose and of agent; fee, $5; affidavit by President and Secretary of capital stock, property and assets employed in Colorado, blank forms prescribed by State, whereupon certificate of authority issues; fee, $5. Total filing fee for corporation of $50,000 or less capital stock, $46. For increases of capital, fee is 30 cents per $1,000 of increase. File certified copies of amendments to articles of incorporation; filing fee, $5 for each amendment, excepting when name is changed, when fee is $25. Annual license tax due by May 1 in advance, $10 on capital employed in Colorado up to $100,000, and 10 cents for each additional $1,000. Penalty is 10 per cent. added for each six months of delinquency. File annual report by Jan. 1 with Secretary of State.

CONNECTICUT—File with Secretary of State at Hartford certified copy of charter or articles of incorporation, with statement, sworn by President, Treasurer and majority of Board of Directors, showing amount of authorized capital stock, amount paid in, and what amount, if any, paid in other than cash and in what. Also in sworn writing appoint Secretary of State attorney upon whom legal processes may be served. In case suit be instituted vs. the corporation, it pays 75 cents for each page of process filed, recoverable if corporation wins suit. Certificate of increase or reduction of capital stock to be filed within 30 days after such action. Annual report to be made by Feb. 15 or, Aug 15 giving name of corporation, post office address of each officer and director, amount of capital stock subscribed not paid for in full, amount due thereon, location of principal office in Connecticut. Each failure to comply involves forfeit of $25. Failure to file annual report for two successive years and pay forfeits therefor is prima facie evidence of loss of corporate rights in State, when corporate existence in State may be terminated by Secretary of State sending registered letter to corporation. Such termination not to affect action in courts necessary to close affairs or preserve rights of those who have dealt with corporation. Fraudulent statements and returns punishable by fine of $1,000. Fees—Filing annual reports, 75 cents each page; minimum, $2; certified copy charter, ditto; filing acceptance of Secretary of State as attorney, $50.

DELAWARE—File certified copy of articles of incorporation with Secretary of State at Dover, with names of agents in the State, and sworn statement of assets and liabilities; fee, $10; certificate of filing and copies thereof to be supplied by Secretary of State and agents, such certificates being prima facie evidence of corporation's right to do business in State, corporation to designate which agent may receive service in legal actions, agent to be resident of State. Death or removal of agent demands designation of substitute within 10 days. Violation of foregoing requirements punishable by fine imposed on corporation not less than $200 nor more than $500 for each offense, and on agents not less than $100 or more than $500. Annual reports to be filed by first Tuesday in January showing all facts as to location of agents, capital stock, names and addresses of officers and directors, and date of annual election of officers. Franchise tax is from $10 to $50 up to capital stock of $1,000,000, plus $25 on each additional $1,000,000.

DISTRICT OF COLUMBIA—No statutory provision regarding foreign corporations as distinct from domestic. They are not required to obtain special license or certificate of authority, "other than the license required of individuals and domestic corporations in certain classes of business." A foreign corporation cannot hold realty in the District, except as an incident of its regular business. Foreign corporation cannot maintain a suit in the District after its charter has been annulled by Governor of State where incorporated. No franchise license tax or fee. No annual reports required.

FLORIDA—File with Secretary of State at Tallahassee sworn copy of articles of incorporation; violation of this requirement punishable, but not affecting title to property held in State by the corporation. Secretary of State issues permit after filing of articles of incorporation, receiving therefor fee of $5. Fee for filing amendment of articles, $2. Court action prior to compliance therewith denied. No permit issued to corporation bearing name so nearly similar to that of one already existing under laws of Florida as to cause confusion.

GEORGIA—File with Comptroller-General annual report, register each agent on forms stipulated by Georgia law, file copy, sworn, of articles of incorporation, certified copy of resolution of Directors authorizing applying for admission. State official may judge as to whether character of business proposed is against interests of Georgia. Annual report to be filed by Nov. 1, showing name, when and where incorporated and by what authority, amount of capital stock, business of corporation, location of principal office; fee $1 first year, 50 cents annually thereafter. Certificate of authority of Secretary of State is valid for 20 years, subject to meeting annual requirements.

HAWAII—File with Treasurer of Territory at Honolulu certified copy charter or articles of incorporation, names of officers, certified copy of by-laws of corporation, name and business address of some person in Territory on whom legal process may be served; and bond with one or more sureties, approved by Hawaiian Treasurer, not less than $1,000 nor more than 10 per cent. of capital stock, if stock exceed $10,000; in no case bond to exceed $50,000, bond sureties to be answerable for judgments vs. corporation for payment of money; provided, Hawaiian Treasurer may excuse from giving bond if corporation's property in Hawaii seem sufficient to indemnify against all judgments. Breach of proviso entitles Hawaiian Treasurer to protect citizens injured thereby by court action in his own name vs. corporation. Before corporation open offices or do business in Hawaii it must obtain from Treasurer annual license; annual cost, $100. Penalty for failure to comply, 50 per cent. additional. Attempting to do business before compliance with foregoing is misdemeanor, agent being punishable by fine not less than $100 nor more than $500, or by imprisonment not more than six months, or by both fine and imprisonment. Corporation failing to comply is guilty of misdemeanor punishable by fine not less than $100 nor more than $500; is denied benefit of Territory laws, especially of statute of limitations in civil and criminal actions. Corporation operating for profit makes annual statement by July 1 "in such form as Treasurer, approved by Governor, may require," report not to be available for inspection by other than officers of Territory. Refusal to make report enforceable by courts on application by Treasurer of Territory; access to courts being denied so long as default continue. Fees—For filing certificate and bond, 20 cents for each $1,000 of capital stock; $35 minimum; certificate of increase or decrease of stock, ditto, minimum, $25. Annual license tax, $100.

IDAHO—File with County Recorder of county in which principal place of business is to be copy of articles of incorporation certified by Secretary of State of State in which the corporation was organized; copy of articles which have been filed with the County Recorder then to be filed with Idaho Secretary of State at Boise, certified by the Recorder. Fees—recording articles, 20 cents per folio of 100 words each; issuing certificate of incorporation, $3; filing with Secretary of State, from $10 to $100 up to $1,000,000 capital stock, $150 if more than $1,000,000; filing designation of agent, $2. Annual license tax, $25 to $325 up to $2,000,000 capital stock; $375 if more than $2,000,000. Statutory agent must be designated on whom legal processes may be served, agent to be substituted within 60 days if former agent die or be removed. Non-compliance denies access to courts, or holding real estate. Officers or agents attempting to make contracts while the corporation is in default in designating substitutes for deceased or removed agent are held jointly liable as principal contractors, and statute of limitations shall run in favor of the corporation only while the person upon whom service may be made is within the State. Compliance with requirements gives foreign corporation same rights, including that of eminent domain, as are enjoyed by domestic corporations.

ILLINOIS—Certificate of authority to be procured from Secretary of State before transacting business in State by filing with Secretary of State at Springfield sworn copy of articles of incorporation verified by proper officer in State or county in which organized; and statement by corporation's President and Secretary or other officer setting forth corporation's name, location of principal place of business, and of proposed principal place of business in Illinois, names of States in which it has been authorized to do business, character of business, itemized estimate of amount of tangible property to be employed in Illinois in first year after date on which Illinois license is issued, an estimate of amount of capital to be employed in Illinois and that to be employed elsewhere during such year, value of patent rights, licenses, franchises, trade-marks, secret processes, copyrights and good will, contracts, book accounts and notes, machinery and realty, stock in other corporations and securities, furniture and fixtures cash in bank, kinds and amount of other personalty; estimate of annual business to be transacted in Illinois; name and address of some person in Illinois as resident agent on whom legal processes may be served; names and addresses of officers and directors; and such other information touching property and business of corporation as Secretary of State may require. Such statement filed, Secretary of State issues certificate showing name of corporation and State where incorporated, business to be authorized in Illinois, amount of authorized capital stock, amount authorized to be used in business in Illinois, amount of fee paid,

address of corporation in Illinois and of agent for service of legal process, and duration for which license is issued. Amendments to articles of incorporation must be filed with Illinois Secretary of State. Foreign corporation cannot encumber property to injury of any citizen of Illinois who is a creditor. Failure to appoint legal service agent gives creditor right to file service on Illinois Secretary of State. Neglect of compliance with foregoing requirements denies access to courts. Fees and franchise taxes—Secretary of State collects initial fee of one-twentieth of 1 per cent. on amount of authorized capital stock, minimum being $20, and like sum for subsequent increase. Annual franchise tax 5 cents on each $100 of proportion of capital stock authorized by Illinois Secretary of State to be used in Illinois.

INDIANA—Apply to Secretary of State in statement, sworn by President and Secretary, of purpose in Indiana, proportion of business (based on business of previous year) to be done in Indiana; amount paid in on capital stock, what property and assets and value thereof to be used in Indiana, if any of capital stock has not been paid in, what disposition is to be made thereof; names of President, Secretary and Directors and their residences, address of principal offices in Indiana, and name and address of some agent or attorney in fact on whom legal service may be had; and file a copy of articles of incorporation. Secretary of State may demand additional information. Application must contain agreement not to procure change of venue, except by regular appeal, to any other court of any case begun by or against the corporation in Indiana, and not to begin suit in any United States Court against any citizen or resident of Indiana. Secretary of State issues certificate, prior to which no business may be done. Pay to Secretary of State (on proportion of capital stock used in Indiana) license tax of $25 on the first $10,000, and 1 per cent. additional on all in excess thereof; $1 for filing annual report. Failure to comply with foregoing causes fine of $1,000 to $10,000. No corporation will be admitted with name similar to that of one already admitted. Agents of corporation procure from corporation and file "with Circuit Court of county where they propose doing business," duly sworn copy of resolution of Board of Directors authorizing corporation to be sued as hereinbefore. Annual report by Jan. 31, sworn, giving name, capital stock, proportion of capital stock used in Indiana, value of property and assets issued in Indiana, character of business done, location of principal office, name of agent or attorney in fact, and names of President, Secretary and Directors and residences.

IOWA—File with Secretary of State at Des Moines certified copy of articles of incorporation attested by Secretary of State in which corporation was organized, accompanied by resolution of Board of Directors authorizing filing thereof, and designating some agent or officer in the State on whom service in legal processes may be made. With such attested copy must go application for permit to do business in Iowa, with pledge to obey provisions of Iowa's "Foreign Corporation" laws, and setting forth total authorized capital, total paid-up capital, total value of all assets, total value of money and other property corporation has in use in Iowa, total value of money and other property corporation purposes to use in Iowa during ensuing year, with certified copy of resolution by Board of Directors giving name and address of authorized agent. Secretary of State may investigate and fix fee to be paid. Permit finally issued costs corporation 10 cents per 100 words for filing aforementioned, plus $25 if capital stock be not more than $10,000, plus $1 additional for each $1,000 if in excess of $10,000. Whenever capital or property used in Iowa be increased, corporation must file with Secretary of State statement thereof, or may do so when making annual report to Iowa Secretary of State in July, fee for filing being $1 for each $1,000 of increase, with recording fee of 10 cents per 100 words. Violation of these requirements involves fine against corporation of $100, and $100 fine or 30 days imprisonment for officers or agents of corporation.

KANSAS—File application with State Charter Board at Topeka on blanks supplied by board, setting forth certified copy of articles of incorporation, principal place of business, principal place of business in Kansas, nature of business to be done, name and address of each officer, trustee and director, detailed statement of assets and liabilities sworn to by President and Secretary of corporation, and written consent of corporation "irrevocable" that actions vs. it in any County in Kansas may be initiated by service on Kansas Secretary of State and remain binding. Charter Board may investigate as to solvency, under "duces tecum" summoning powers, and judge as to certainty that business proposed in Kansas is agreeable with Kansas laws. Application when granted by board to be filed with Secretary of State, fee to be $25. Annual report to be filed with Secretary of State by March 31 showing as of Dec. 31 preceding "in such form as Secretary of State may prescribe," name and laws under which organized, location principal office, names and addresses of President, Secretary, Treasurer, and members of Board of Directors, date of annual electon of officers, amount of authorized capital stock with par value, amount of stock issued, amount of paid-up stock issued, nature of business in which corporation engages within and without Kansas, name and address of officers in Kansas and of agents, value of property owned and used in Kansas, where situate, and value and location of property owned and used outside of State, assets and liabilities, changes if any, since last annual report. On filing of such sworn report, Secretary of State determines what proportion of capital stock is represented by business of corporation in Kansas and collects as franchise tax annually minimum of $10 up to $10,000 capital stock, graduated up to $2,500 for more than $5,000,000 capital stock. Payment entitles to certificate of compliance. Penalty for failure to file report, $100, plus $5 a day so long as default continues. Charter to do business in Kansas may be forfeited for such failure. Court actions instituted by summons directed vs. Secretary of State acting as competent to accept service for the corporation. Secretary of State has power to investigate and determine alleged under-statement by corporation of its proportion of capital to be employed in Kansas or any other fact essential. Usual liability for false sworn statements, written or verbal, as perjurious.

KENTUCKY—File with Secretary of State at Frankfort statement on blanks supplied by that official showing principal place of business in State, agent thereat on whom service may be had; fee for filing, $1. This entitles to certificate of authority to enter State. Attempt to transact business prior to issuance of such certificate is misdemeanor, corporation "and any agent or employe of such corporation" shall be severally guilty of misdemeanor and fined not less than $100 nor more than $1,000 for each offense. Annual license tax, 50 cents on each $1,000 of property and business transacted in State, proportioned to whole capital stock, payable to State Tax Commission. Annual report to be made to commission by Feb. 1, showing name, State or Government under which organized, names and addresses of officers, and of agent or attorney in State on whom legal service may be had, amount of authorized capital stock, value and location of property owned and used in State, value and location of property owned and used outside of State, proportion of business transacted in and outside of State. Penalty for false statement as for perjury. Corporation wilfully violating or neglecting provisions hereinbefore mentioned fined $50 to $1,000, suspended from right to do business.

LOUISIANA—File with Secretary of State at Baton Rouge names and addresses of agents on whom legal processes may be served, and with Clerk of District Court in each parish in which corporation has established place of business, agent to be bona fide resident of parish to which he is designated. Also file with Secretary of State certified copy of articles of incorporation. Foregoing done, certificate is given by Secretary of State to do business. Failure involves misdemeanor, punishable by fine not less than $25 nor more than $500. Agent failing to pay fine is imprisoned not less than three days nor more than four months. Service in legal actions may be had on corporation's designated legal service agents "wherever found;" if agent be not found, then on any regularly employed person or agent in Florida. Change of venue in State courts at instance of corporation entities opposite party thereto, if plaintiff, to have cause tried in parish of corporation agent's residence or in parish in which cause arose. Annual report to be filed with Secretary of State between Jan. 1 and April 1 of receipts and disbursements of preceding year, salaries and wages paid, interest on bonds and other debts, dividends on stock, taxes of all kinds, materials and supplies used during preceding year, other expenses and number of officers and employes all kinds. Recording fees—negligible.

MAINE—File with Secretary of State at Augusta certified appointment of agent on whom legal service may be made, giving him power of attorney to act for corporation, his authority to continue so long as liability remains outstanding vs. corporation in the State, or until revoked in similar writing designating some other to act in same capacity. Also file with Secretary of State copy of articles of incorporation, certified under seal of State or county where incorporated, with copy of by-laws and name of corporation, location of principal place of business, names and addresses of officers and directors, date of annual meeting for election of officers, amount of capital stock authorized and issued, number and par value of shares, amount paid thereon to its treasurer. False statements subject to same laws re perjury as obtain in Maine. Secretary of State is judge as to admissibility of corporation to do business in Maine as to whether permitted by "laws of this State." Increases of capital stock must be certified to Secretary of State within 30 days thereafter. Annual license fee payable by March 1 to State Treasurer, $10. Changes made at annual meeting of corporation to be certified within three months thereof to Secretary of State. If no changes, fact must be certified to. Penalty for omission of foregoing is forfeit to State of not less than $5 nor more than $10 per day for 15 days after expiration of time for certifying, and not less than $10 nor more than $200 for each day thereafter during which omission continues.

MARYLAND—File with State Tax Commission at Baltimore certified copy of articles of incorporation, and certificate annually before March 1 giving names and addresses of officers and directors, principal places of business in Maryland and in State in which it was incorporated, amount of capital stock authorized and issued, number and par value of shares and amount paid thereon, names and addresses of shareholders and shares held by each, amount of capital employed in Maryland, name and address of resident agent for legal service, authority of agent to continue so long as liability remain outstanding or until substitute be named. Original papers to be accompanied by fee of $25 to State Tax Commission which issues certificate of permission. Failure to comply involves misdemeanor and fine of $200, non-access to courts, although not affecting contracts made with non-complying corporation. Annual franchise tax due before April 1, $25 for every $50,000 capital employed in Maryland, up to $500,000; one-fortieth of 1 per cent. in addition up to $5,000,000; $30 on each $1,000,000 above $5,000,000. Corporation's property is subject to taxation as other property under State laws. If business be abandoned in Maryland by corporation, suits may be filed against agent last designated for legal service.

MASSACHUSETTS—File power of attorney with Department of Corporations and Taxation at Boston appointing Commissioner of Corporations and Taxation attorney for service of legal processes, certificate of its charter, certified copy of its by-laws, blanks to be supplied by Commissioner; fee $50. Annual tax is 2½ per cent. of that portion earned in State, and $5 per $1,000 on value of that portion of capital stock employed in State. Annual report to be by April 10 to set forth all facts necessary to determination of foregoing with whatever Federal tax returns have been made. Penalty for failure to report is doubling of amounts due, plus $5 for each day of default. False returns involve penalty of not less than $500 nor more than $5,000. Examination of books and records by State officers to ascertain facts renders corporation liable to forfeit a sum "not greater than 2 per cent. upon par value of its capital stock as court may deem just."

MICHIGAN—File with the Secretary of State at Lansing certified copy of articles of incorporation and evidence that agent has been appointed to accept legal service, obtaining certificate of authority to do business; file also statement showing location of principal officers and place of business, location and principal place of business in Michigan and name and address of agent named, total value of property owned and used in corporation's business, stating separately tangible property, cash, credits, franchises, patents, trade-marks formulas and good will; also value and location of property owned and used in Michigan, and total business if any transacted in preceding year in Michigan, and other facts as Secretary of State may require. Secretary of State then determines amount of franchise fee to be paid, on basis of 35 mills on each dollar of paid-up capital and surplus, not however, to exceed $10,000, minimum being $50. Annual report to be made to Secretary of State in duplicate in July or August as of June 30 of state of business, showing amount of capital stock authorized, and that subscribed in cash and in property, value of property owned, names and addresses of officers and directors, credits owing to corporation; penalty for non-report, $100 plus $5 a day during default.

MINNESOTA—File with Secretary of State sworn copy of articles of incorporation, name of principal or agent in Minnesota, a statement, sworn, of proportion of capital stock represented by property in Minnesota; and pay $50 on first $50,000 plus $5 for each additional $10,000, on proportion of capital stock used in Minnesota. Secretary of State then issues certificate of authority, stating in certificate amount of capital stock and proportion used in Minnesota, certificate being valid for 30 years, subject to annual requirements being met. Failure to comply causes fine of $1,000. Authority of agent in Minnesota may be revoked by simple sworn writing, but revocation affects no action already pending.

MISSISSIPPI—File with Secretary of State copy of article of incorporation, certified by President and Secretary, pay tax and procure certificate of authority. There is no annual franchise or license tax, and no report is required. Fee for filing articles, $20 for $5,000 capital stock, up to $500 as stock increases. Fine of $100 for violating requirements.

MISSOURI—File with the Secretary of State at Jefferson City sworn copy of articles of incorporation under corporate seal, with statement showing nature of business proposed to be done in Missouri, location of principal office in Missouri, name and address of agent on whom legal service may be had, with affidavit of amount of capital stock represented by property located in Missouri; fee for permit to do business, $10. Permit may be for 50 years. If name of corporation be similar to one incorporated under Missouri laws, Secretary of State may refuse to issue permit. Penalty for violation, fine corporation $1,000 or more. Penalty for false affidavit punishable as felony by imprisonment not more than five years in penitentiary or in county jail not more than one year. Corporation must pay employees semi-monthly; discharged employes not paid wages under Missouri law remain on pay-roll until paid. Annual report required by July 1 showing Secretary of State amount of capital stock authorized, paid up, par value, actual value per share, cash value of all property in Missouri, indebtedness secured and unsecured on June 1 next preceding, surplus and undivided profits, and "clear market value of capital stock and surplus, including all property and assets." Secretary of State may call for special reports at any time as to financial status, refusal to comply being misdemeanor. Fee for registering with Secretary of State, $5 if registration is before July 1. Delay causes increase gradually to $35 if so late as December. Registration and compliance with all provisions entitles to certificate from Secretary of State. Rights are forfeited by cancellation by Secretary of State when provisions are not complied with. Refusal to submit records on demand involves usual punishment for recalcitrancy. Franchise tax due annually, one-twentieth of 1 per cent. of par value of proportion of stock and surplus employed in Missouri, interpreted under statute as proportion that all outstanding capital stock and surplus bears to all property and assets located within Missouri. State Tax Commission determines proportion to be taxed, but appeal is allowed to courts.

MONTANA—File with Secretary of State at Helena certified copy of articles of incorporation, attested by majority of Board of Directors, verified by President and Secretary of corporation under oath, showing name, location of principal office within and without State, names and residences of officers, trustees and directors, amount of capital stock, amount of capital invested in State, and consent to be sued in State courts, designating some person on whom service may be had. If articles be amended, file within 30 days after such action attested copy of amendments; ditto if capital stock be increased. Agent for legal service must file written sworn consent. Contracts are void prior to compliance with foregoing. By June 1 file annual report showing gross amount of business in Montana in preceding year, amount of money expended in Montana, net profits on Montana business. Every agent of corporation is guilty of misdemeanor if corporation has not complied with foregoing. Annual license fee, ½ per cent. on net income derived in preceding year from business in Montana, including interest on bonds, notes and other interest-bearing obligations, dividends on capital stock, and net earnings.

NEBRASKA—File with the Secretary of State at Lincoln and with Register of Deeds in County of principal place of business in Nebraska certified statement signed by officers of corporation showing principal place of business in State, name and address of agent on whom legal service may be had; appoint such agent; penalty for failure, $1,000 fine against corporation, and $1,000 fine or imprisonment in county jail not more than three months, or both, against every person representing corporation as responsible agent. Fee for filing such appointment of agent, $50. Annual sworn report by July 1 to be filed with Secretary of State, showing name, location of principal place of business, names and addresses of officers and directors, date of annual election of officers, amount of authorized capital stock, par value per share, amount subscribed, issued and paid up, nature of business, changes, if any, since last annual report. Franchise tax, $5 on $1,000 paid-up capital stock, graduated upwards to $2,000 for $25,000,000 capital stock; $2,500 if above that amount of stock. Penalty for violation, additional 15 per cent. of amount due. Default in provisions hereinbefore set forth annuls corporate rights in State. Withdrawal from State permissible by paying all due to State and filing notice with Secretary of State.

NEVADA—Within 30 days after election of officers or change of location of principal place of business in Nevada or change of agent in State file information thereof with Secretary of State at Carson City under corporate seal, giving names and addresses of officers and directors, date of annual election, character of business, location of principal office in Nevada, and name and address of agent on whom legal process may be served, such information aforesaid to be filed when original copy of articles of incorporation is filed. Penalty for failure, $100, and non-access to courts. Corporate rights in Nevada may be surrendered by payment of all due, and filing with Secretary of State statement thereof, and is allowed after withdrawal to permit fulfilment of all litigation which may have been begun against corporation. Foreign corporations doing mining business in Nevada may consolidate under rather liberal provisions. But failure to provide protection to creditors against removal of agent from jurisdiction involves penalty of $50 a day during default of compliance.

NEW HAMPSHIRE—Precedent to beginning business in the State, the corporation must appoint in sworn writing the Secretary of State at Concord its lawful attorney to accept legal service, said authority to continue so long as any liability remain against corporation in State. Penalty for non-compliance, $500 fine, validity of no contract with such corporation to be affected. Statement of articles of incorporation, amount of capital stock, nominal value, etc., to be filed with Secretary of State. False statements punishable by fine of $5,000, or imprisonment five years, or both. False maker of statement liable personally to any stockholder or person damaged by false statement. Annual sworn report by March 1 to Secretary of State on blanks supplied by him, fee $5, showing amount of authorized capital stock, par value of that issued, indebtedness to and from corporation, value of all property and assets as on preceding Jan. 1. False statement in connection therewith involves penalties as hereinbefore stated. Fee for recording, $10 up to $10,000 capital stock, graduated upwards to $250 for $1,000,000, plus $10 for each added $1,000 above $1,000,000. Franchise tax annually not less than $5 nor more than $100. Failure to pay for two years causes forfeiture of corporate rights in State. Reinstatement by payment of money due to State, with 10 per cent. interest.

NEW JERSEY—File with Commonwealth Department of State at Trenton certified copy of articles of incorporation, statement of authorized capital stock, amount issued, character of business, designate agent on whom legal process may be served, agent to be actual resident of State, (certain legal situations making it competent for service to be on Secretary of State at Trenton as attorney for corporation), compliance with foregoing entitling to certificate of authority to do business in New Jersey. File also list of officers and directors annually. Fees—For filing copy of articles, $10; officers, $1. Penalty for transacting business before certificate is issued by Secretary of State, $200 fine for each offense. Annual report to be filed with Secretary of State within 30 days after annual election of officers and directors, giving name, location of registered place of business in New Jersey, character of business, amount of authorized capital stock, and issued and outstanding, names and addresses of officers and directors, when term of each expires, and date of next annual election. Death or removal of authorized agent in State to be followed by substitute appointment, pending which legal service may be on Secretary of State as attorney for corporation. Failure to make annual report involves $200 forfeit to State. No franchise tax required.

NEW MEXICO—File with the State Corporation Commission at Santa Fe annual report by Sept. 1 sworn by proper accounting officer giving name, location of principal office and of principal office in New Mexico, with name of agent on whom process may be served, names and addresses of officers and directors, date of annual election, amounts of authorized, subscribed and issued capital stock and that paid up, nature of business both within and without State, value of property owned and used within and without State, total gross receipts derived from its property within and without State during last preceding fiscal year, changes if any since last annual report. Therefrom commission determines proportion of capital stock used in State, on which annual franchise tax is collected at rate of $10 for each $100,000 or fraction. Penalty for failure to pay is 5 per cent. added to amount due. Failure to report as required involves penalty of $1,000 fine. Franchise tax due by Nov. 30. Notice to appointed agent that money is due State is sufficient to bind corporation. Legal process against corporation is competent by leaving copy thereof at designated place of business of corporation or of agent thereof, or served in person on any officer or agent. Application for permission is to Secretary of State, with copy of articles of incorporation. Fee—$25, $5 for filing and $4.50 for certifying thereto.

NEW YORK—Procure from Secretary of State at Albany certificate of compliance with requirements, filing with that official sworn corporate statement under corporate seal showing nature of business, place in State where principal business is to be, designating some person on whom legal service may be had, his consent in sworn writing also to be filed. Proof to be submitted that statement filed is under authority of corporation, together with copy of articles of incorporation sworn to by an official, attested by a clerk of a court of record in State wherein corporation was formed. Fee for filing, $52. Papers then go to State Tax Commission. License tax is one-eighth of 1 per cent. on capital stock employed in New York, minimum being $10, payable to State Tax Commission at Albany, which has power to demand books and records. Corporation cannot maintain court action after 13 months from beginning business in New York, if license tax shall not have been paid.

NORTH CAROLINA—File with Secretary of State at Raleigh attested copy of articles of incorporation under corporate seal, and statement of amount of capital stock authorized and issued, location of principal place of business in State, the name of agent in charge, character of business and names and post office addresses of officers and directors; and pay annually to Secretary of State 20 cents for each $1,000 of authorized capital stock, minimum payment being $25, maximum, $250. Filing fee, $5. Corporation may withdraw from State by filing with Secretary of State attested statement thereof and paying fee of $5. Failure to comply with foregoing provisions forfeits to State $500 recoverable by Attorney General of State.

NORTH DAKOTA—File with Secretary of State at Bismarck attested appointment by corporation of that State officer and his successors as attorney on whom legal service may be had, to remain irrevocable so long as any liability stand against corporation in State. Failure to comply renders each officer, agent and stockholder personally liable for all obligations against and contracts with corporation. Fee for filing foregoing, $25. An annual report must be filed with Secretary of State by Aug. 1, showing location of principal place of business in State, names and addresses of officers, when terms of service expire, kind of business transacted, failure to file such report being prima facie evidence in State that corporation has gone out of business. Secretary of State notifies corporation of default, and unless within 90 days report be filed, corporation's rights in State are cancelled. Blanks therefor to be procured from Secretary of State. Corporation having complied with all provisions, for fee of $5, certificate of authority is issued, and annual franchise tax imposed, 50 cents for each $1,000 of capital actually invested in transaction of business in State, exemption of $10,000 capital being allowed.

OHIO—File with Secretary of State on blanks prescribed by him, statement by an officer, or managing agent in Ohio, showing number and par value of capital shares, name and location of corporation's offices in Ohio, value of property owned and used in Ohio, proportion of capital stock represented by property owned and used in Ohio, from which Secretary of State determines what proportion shall be taxed in Ohio, franchise tax being one-tenth of 1 per cent. upon such proportion; upon payment of which Secretary of State issues certificate of authority to do business. Increases of capital stock to be reported to same official within 30 days, tax being one-tenth of 1 per cent. on proportional share of increase. Certificate of authority then issues. Failure to comply denies access to courts and involves liability of especial attachment under Ohio laws as foreign corporation, forfeit of $1,000 per month during furtner default, and cancellation of business rights. Fee for issuing certificate of authority by Secretary of State is $15 for capital stock up to $100,000, gradually increasing to $50 for $1,000,000 or more. Transaction of business before complying with requirements involves fine of $10 to $500 or imprisonment 10 days to six months, or both.

OKLAHOMA—Within 60 days after applying for admission to do business in Oklahoma, file with Secretary of State at Oklahoma City written sworn declaration designating place in State where legal processes may be served on designated agents; copies of corporation charter and by-laws with amendments from time to time within 60 days after such changes; annual report by Jan. 31, sworn, showing residence and address of some officer or agent within State, amount of capital stock actually paid, names of President and Secretary and members of Board of Directors with respective places of residence and addresses. Fee for filing first statement required, minimum $15; if capital stock $100,000, $50; increasing up to $300 if stock be $1,000,000, plus $10 for each additional $1,000,000. For filing annual report, minimum fee, $10 up to $5,000 capital stock, increasing up to $150 if stock exceed $2,000,000. Penalty for failure, added $10 per day for 60 days after which transaction of business prohibited.

OREGON—File with Corporation Commissioner at Salem sworn written declaration of purposes in engaging in business, name of State or county in which incorporated, amount of capital stock, nature of business in which corporation's charter authorizes it to engage, location in Oregon of principal office, name of its attorney in fact on whom legal processes may be served, names and addresses of principal officers, directors and trustees, name and address of principal agent in Oregon, certified copy of charter or articles of incorporation, with certified statement "by Secretary of State, of State or Territory, or of United States Ambassador or Consul" if corporation be of a foreign country, that articles of incorporation are valid, pay to Commissioner $50 for filing and recording, with annual license fee of $20 due by Aug. 15. Compliance entitles to certificate of authority from Commissioner of Corporations.

PENNSYLVANIA—File with Secretary of Commonwealth at Harrisburg sworn appointment of that official and his successors as attorney on whom legal processes may be served, and statement showing title and purpose of corporation, principal place of business in State, post office address to which Commonwealth Secretary may forward by mail legal processes which may be desired to be served against corporation, and, if principal place of business be changed, notice to be given to Secretary of Commonwealth. Fee for filing power of attorney for legal processes, $10. Penalty for failure, fine of $1,000, imprisonment 30 days, or both. Annual license tax, $250. Admission to do business in State requires also filing with Secretary of Commonwealth statement sworn showing in amplitude character of capital stock authorized, *re* all classes of stock, actual value in cash of entire property, assets and good will without deduction of encumbrances, actual cash value with deductions, character and location anywhere of tangible property of all kinds, amount invested in Pennsylvania with detailed description of each item for past five years, with dividends and net income for same period. Capital stock annual report requires statement of aforesaid details in full such as would be made to corporation's Board of Directors. Access to courts denied by failure to comply.

PHILIPPINE ISLANDS—Obtain from Bureau of Commerce and Industry at Manila license; preliminary requirements: File statement showing name, purpose of corporation, location of principal office, capital stock, amount actually subscribed and paid in, net assets over debts, liabilities, obligations and claims outstanding, name of resident agent to accept service, application for permission to enter Islands, signed by managing agent and acknowledged, resolution of Board of Directors authorizing agent to apply, resolution of Directors authorizing President or Vice President to execute power of attorney in favor of agent, copy of articles of incorporation duly certified. License fee, $25 to $300 for capital stock from $50,000 to more than $2,000,000. If corporation be unable at first to file all papers required, Bureau of Commerce and Industry may issue provisional license until papers are available; provisional license revocable at any time for cause.

PORTO RICO—File with Secretary of the Island at San Juan certified copy of charter or articles of incorporation, and statement verified under oath by majority of Board of Directors showing name, principal office in Porto Rico and elsewhere, objects of business, amount of authorized capital stock, amount of capital stock actually paid in in money, amount paid in otherwise and in what, amount of assets and what, with cash value, itemized statement of liabilities, indebtedness, how secured and on what, names and addresses of all officers and directors and when term of each expires. At same time file with same Island official, under seal of corporation and over signatures of corporation's President, Vice President, or other acting head, and of Secretary, certifying that said corporation consents to be sued in Island courts and that processes may be served upon some designated person, resident of Island, such agent to reside at principal place of business on Island. These requirements are conditions precedent to beginning business there. Notices must be given in same form as aforesaid of changes of agent by death or removal. Agent must file sworn written consent to such legal responsibility. Penalty for failure to comply, fine not less than $25 for each day of default, personal representatives to be guilty of misdemeanor. Annual sworn report to be filed by March 15 with Secretary of Island showing legal name, principal place of business in Porto Rico, object of corporation, amount of receipts in items, expenditures, liabilities by items, names of directors or trustees and officers, their addresses, dates of election and date of expiration of terms of service, amount of authorized capital stock, amount paid in in money, amount paid in otherwise and in what, amount of assets, character, with cash value, amount of liabilities and if secured how and on what property, "true and exact balance sheet showing financial condition at end of fiscal year," with income. Failure to file or to make report satisfactory to Treasurer of Porto Rico involves fine of $50, contempt of court and revocation of license to do business, Secretary of Island having authority to extend 60 days time for making annual report. Copy of articles of incorporation attested also to be filed. Fees for filing, 15 cents for each $1,000 of authorized capital stock, fee to be not less than $25 nor more than $500; for recording articles of incorporation, 20 cents for each 100 words; for issuing certificate of registration, $3; for filing certificate of increase or decrease of capital stock, $5; annual license fee, $25, due by July 1.

RHODE ISLAND—Pay $25 fee, plus negligible fees not more than $5 each for papers filed, to Secretary of State at Providence; file sworn copy in English language of articles of incorporation and all amendments thereto, name, principal place of business in State, character of business, amount of authorized, issued and outstanding capital stock as to each class of stock, names and addresses of directors and officers, with dates when terms of service expire, date for next annual meeting of stockholders, written power appointing competent person upon whom legal processes may be served, changes therein to be notified. Annual report by Feb. 28, certified by some officer under corporate seal, giving name, location of principal place of business in State, character of business, amount of authorized, issued and outstanding capital stock as to each class of stock, names and addresses of each officer and director, name and residence of resident attorney, date for next annual stockholders' meeting. Penalty for non-reporting, $200. If corporation cease to do business in State, it may revoke power of attorney, revocation not to affect liability existing against corpo-

ration. Penalty for non-filing of copy of articles of incorporation, fine of not more than $2,000 against every officer or agent who transacts business in State, no contract with corporation to be affected by non-filing.

SOUTH CAROLINA—Report to State Tax Commission at Columbia during February name of corporation, location of principal place of business, names and addresses of officers and directors, date of annual meeting, amount of authorized capital stock and par value of shares, amount of capital stock subscribed, issued, outstanding and paid up, nature of business, changes if any since last report, and other facts as required by Tax Commission. Annual license fee, one mill on each dollar "paid to the capital stock of said corporation," minimum fee to be $5, due within 30 days of notice from State Treasurer. Corporation may not retire from business in South Carolina without filing notice thereof with Secretary of State; fee, $5 for filing.

SOUTH DAKOTA—Annual fee $2 for filing report, and tax of $1 on each $1,000 of capital employed in State in excess of $25,000. File with Secretary of State at Pierre sworn copy of articles of incorporation, names, location of principal places of business within and without State, names and addresses of officers, and of agent or manager in State, amount of capital stock paid in in money, property or services, nature of business transacted, proportion of capital stock represented by property in State and by business transacted therein, and statement that corporation appoints Secretary of State its agent on whom legal processes may be served irrevocable so long as liability stand against corporation within State, statement of where corporation was authorized to do business in State where incorporated and whether still so authorized. Fee for filing articles, $25 and $1 for each $1,000 employed within State. File annual report by March 1 as of preceding Dec. 31, showing name, location principal place of business within and without State, names and addresses of officers and agent in State, nature of business transacted during preceding year, amount of capital stock paid in in money, services of property, amount of all business transacted in preceding year, with true value of all property held; amount of business transacted in State and proportion of capital stock employed in State. Failure to comply involves $500 forfeit and revocation of permission to do business.

TENNESSEE—File with Secretary of State at Nashville certified copy of articles of incorporation; fee, $20. Annual tax on foreign corporation, $50 up to $50,000 capital stock, rising to $1,000 if less than $5,000,000, and $1,500 if more than $5,000,000, with privilege tax of one-tenth of 1 per cent. on authorized capital stock. Fee for filing annual report, $5 up to $25,000 capital stock, rising to $150 if capital stock $1,000,000 or more. Reports due by July 1 to be on blanks supplied by Secretary of State.

TEXAS—File with Secretary of State at Austin copy of articles of incorporation certified, and all amendments thereto, showing under which State laws incorporated, amount of capital stock authorized, subscribed, and paid in, home office of said corporation, nature of business desired to transact, principal place of business in Texas, name of manager or agent in charge, number, names and addresses of present Board of Directors, accompanied by anti-trust affidavit executed by proper officers of corporation. Secretary of State has power to require to limit extent and character of business permitted to be done within State agreeable with his interpretation of Texas statutory requirements. Franchise tax, due by March 15, based on annual report as of preceding Dec. 31, $1 for each $1,000 up to $100,000 of capital stock, plus 50 cents for each $1,000 excess capital stock up to $1,000,000, plus 25 cents for each $1,000 in excess of $1,000,000, tax to be on proportion of such capital stock employed in Texas, total gross volume of business done in Texas to be determined by Secretary of State.

UTAH—File with clerk of county in which principal place of business in Utah is to be sworn copy of articles of incorporation, by-laws, appointment of resident agent on whom legal process may be served, acceptance of Constitution of Utah; amendments to articles likewise to be filed. Statement to show resolution by Board of Directors, attested, authorizing to enter State to do business. Annual license tax, precedent to issuance of certificate of authority by Secretary of State, at Salt Lake City, $5 for up to $10,000 authorized capital stock, increasing to $250 if more than $4,000,000 authorized. County clerk's fees, $5 plus 30 cents per page; Secretary of State, 25 cents per $1,000 of authorized capital stock, with $3 for filing by-laws.

VERMONT—Register with Commissioner of Foreign Corporations at Montpelier, obtain from him certificate of authority to do business in State; fee, $10; annual fee for renewal, $5. Annual license tax, $10 for $50,000 or less capital stock, increased $5 for each additional $50,000 or fraction thereof, until $100 maximum tax is reached.

VIRGINIA—File with Secretary of Commonwealth at Richmond written power of attorney appointing him and successors attorney to accept service against corporation in legal processes; file certified copy of such power of attorney with same State official; maintain an office in State from which all claims against corporation will be paid; also appoint an agent competent to accept legal service; file with same State official two attested copies of articles of incorporation; file with Auditor of Public Accounts statement showing that fees have been paid; obtain from Auditor certificate of authority to transact business, Auditor to judge as to corporation's compliance with Virginia laws involved. If articles of incorporation be amended, two attested copies of amendment to be filed with State Corporation Commission. Fee for registration not more than $25, failure to pay which and to make annual report forfeits right to do business. Transacting business in State before complying with preliminary requirements involves fine against corporation from $10 to $1,000, each transaction being separate offense, agents of corporation being personally liable for fines imposed on corporation. Fee for entrance into State $30 if capital stock be $50,000, gradually increasing to $5,000 if capital stock be over $90,000,000.

WASHINGTON—File with Secretary of State at Olympia certified copy of original articles of incorporation under seal of Secretary of State or other authorized official; fee for filing, $25; certified copy of each amendment; filing fee, $10; power of attorney to show appointment of resident agent; fee, $5; annual license fee due by July 1, $15. For failure to pay license fee, name of corporation is stricken from State records, thereafter any other corporation to have right to use name of delinquent corporation in State of Washington, additional penalty imposed of $20 for each year name shall have been stricken from records. Rights may be restored on payment of all due to State, plus $100 penalty.

WEST VIRGINIA—File with Secretary of State at Charleston certified copy of articles of incorporation, attested by Secretary of State of State in which incorporated or by President of corporation; file similar copy with clerk of one of the counties in which corporation conducts business in West Virginia; file with Secretary of State acceptance of responsibility if admitted to State, appoint State Auditor attorney of record, whereupon Secretary of State will issue certificate of authority which corporation must file with County Clerk in county wherein certified copy of articles was filed. Minimum costs of these filings, $166. Annual report to be made to Secretary of State as to capitalization, property owned and used in State.

WISCONSIN—File with Secretary of State at Madison copy of articles of incorporation and amendments thereto certified by Secretary of State of State where incorporated; sworn statement showing name, location of principal place of business within and without the State, amount of capital stock paid in in money, property or services, with authorized capital stock, nature of business to be done, proportion of capital stock represented in State, appoint Secretary of State attorney on whom legal service may be had, statement of when corporation was authorized to do business in State where incorporated and whether now so authorized, that corporation will comply with laws of State; pay to Secretary of State fee of $25 and $1 for each $1,000 of capital stock exceeding $25,000 employed in State. Amendments to articles to be filed with Secretary of State within 30 days after filing in State wherein incorporated. Failure to comply with provisions forfeits license to do business. Annual report to be filed with Secretary of State by April 1 showing name, location of principal place of business, names and addresses of officers and of agent in State, nature of business transacted, amount of capital stock paid in, authorized and outstanding,

WYOMING—File with Secretary of State at Cheyenne certified copy of articles of incorporation, certified copy of corporation law under which corporation was organized, acceptance of Constitution of Wyoming, certificate of designation of principal office and agent in Wyoming, blank forms to be supplied by Secretary of State. Certified copy of articles and corporation law under which organized to be filed with County Clerk of county in which principal office is to be. Fees—$10 if capital stock be $10,000 or less, gradually increasing to $25 for $100,000 and 20 cents for each additional $1,000; other filing fees total about $15. File with Secretary of State sworn statement of actual value of net assets, authorized capital stock. No franchise tax imposed.

## LAW OF CONTRACTS.

(General Provisions of the Statutes.)

**A Contract is an agreement of two or more parties** by which reciprocal rights and obligations are created. One party acquires a right, enforceable at law, to some act or forbearance from the other, who is under a corresponding obligation to thus act or forbear.

Generally speaking, all contracts which are made between two competent parties, for a proper consideration, without fraud and for a lawful purpose, are enforceable at law.

**To the creation of a valid contract** there must be:

1. Precise agreement. The offer of one party must be met by an acceptance by the other, according to the terms offered.

2. There must be a consideration. Something of value must either be received by one party or given up by the other.

3. The parties must have capacity to contract. The contracts of insane persons are not binding upon them. Married women are now generally permitted to contract as though single, and bind their separate property. The contracts of an infant are generally not binding upon him unless ratified after attaining his majority. The contracts of an infant for "necessaries" may be enforced against him to the extent of the reasonable value of the goods furnished. It is incumbent upon one seeking to hold an infant to show that the goods furnished were in fact necessary.

4. The party's consent must not be the result of fraud or imposition, or it may be avoided by the party imposed upon.

5. The purpose of the parties must be lawful. Agreements to defraud others, to violate statutes, or whose aim is against public policy, such as to create monopolies or for the corrupt procurement of legislative or official action, are void, and cannot be enforced by any party thereto.

**Contracts in general are equally valid whether made orally or in writing,** with the exception of certain classes of contracts, which in most of the States are required to be attested by a note or memorandum in writing, signed by the party or his agent sought to be held liable. Some of the provisions which are adopted from the old **English Statute of Frauds** vary in some States, but the following contracts very generally are required to be attested by some writing:

Contracts by their terms not to be performed within a year from the making thereof.

A promise to answer for the debt, default, or miscarriage of another person.

Contracts made in consideration of marriage, except mutual promises to marry.

Promise of an executor or administrator to pay debts of deceased out of his own property.

Contracts for the creation of any interest or estate in land, with the exception of leases for a short term, generally one year.

Contracts for the sale of goods above a certain value, unless a portion of the price is paid or part of the goods delivered. The required value of the goods sold varies in different States from $30 to $200. In a number of the States no such provision exists.

In many of the States, declarations or conveyances of trust estates.

In many States, representations as to the character, credit, or responsibility of another person.

**Actual performance of the contract** is generally held to dispense with the necessity for a writing.

**If the damages liable to result from the breaking of a contract are uncertain** the parties may agree upon a sum to which either may be entitled as compensation for a breach, which will be upheld by the courts, but if the sum so fixed is not designed as a fair compensation to the party injured, but as a penalty to be inflicted, it will be disregarded.

**A party is generally excused for the failure to perform** what he has agreed only by the act of God or the public enemy, except in cases involving a personal element in the work to be performed, such as the rendition of services, when the death or sickness of the party contracting to perform them is a valid excuse.

## PROMISSORY NOTES AND CHECKS.

(A Brief Summary of Laws Relating Thereto.)

**Negotiable instruments,** the common forms of which are promissory notes, checks, or other bills of exchange, while having the same general requisites as other contracts, have certain distinct features. The purpose of the law is to facilitate as much as possible their free passing from hand to hand like currency. The assignment of an ordinary contract leaves the assignee in no different position for enforcing his rights than that of his assignor, but one who takes a negotiable instrument from a prior holder, without knowledge of any defences to it, before its maturity, and gives value for it, holds it free of any defences which might have been set up against his predecessors, except those defects that were inherent in the instrument itself.

**To be negotiable** an instrument must be in writing and signed by the maker (of a note) or drawer (of a bill or check).

**It must contain** an unconditional promise or order to pay a sum certain in money.

Must be payable on demand, or at a fixed future time.

Must be payable to order or to bearer.

In a bill of exchange (check) the party directed to pay must be reasonably certain.

Every negotiable instrument is presumed to have been issued for a valuable consideration, and want of consideration in the creation of the instrument is not a defence against a bona fide holder.

**An instrument is negotiated,** that is completely transferred, so as to vest title in the purchaser, if payable to bearer, or indorsed simply with the name of the last holder, by mere delivery, if payable to order by the indorsement of the party to whom it is payable and delivery.

One who transfers an instrument by indorsement warrants to every subsequent holder that the instrument is genuine, that he has title to it, and that if not paid by the party primarily liable at maturity, he will pay it upon receiving due notice of non-payment.

**To hold an indorser liable** the holder upon its non-payment at maturity must give prompt notice of such non-payment to the indorser and that the holder looks to the indorser for payment. Such notice should be sent within twenty-four hours.

**When an indorser is thus compelled to pay** he may hold prior parties through whom he received the instrument liable to him by sending them prompt notice of non-payment upon receiving such notice from the holder.

One who transfers a negotiable instrument by delivery, without indorsing it, simply warrants that the instrument is genuine, that he has title to it, and knows of no defence to it, but does not agree to pay it if unpaid at maturity.

**The maker of a note is liable** to pay it if unpaid at maturity without any notice from the holder or indorser.

Notice to one of several partners is sufficient notice to all.

**When a check is certified** by a bank the bank becomes primarily liable to pay it without notice of its non-payment, and when the holder of a check thus obtains its certification by the bank, the drawer of the check and previous indorsers are released from liability, and the holder looks to the bank for payment.

**A bona fide holder** of a negotiable instrument, that is, a party who takes an instrument regular on its face, before its maturity, pays value for it and has no knowledge of any defences to it, is entitled to hold the party primarily liable responsible for its payment, despite any defences he may have against the party to whom he gave it, except such as rendered the instrument void in its conception. Thus, if the maker of a note received no value for it or was induced to issue it through fraud or imposition, they do not defeat the right of a bona fide holder to compel its payment from him.

**The following States have enacted a** similar Negotiable Instrument Law: Alabama, Arizona, Colorado, Connecticut, Dist. of Columbia, Florida, Idaho, Iowa, Kansas, Kentucky, Louisiana, Maryland, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Oregon, Pennsylvania, Rhode Island, Tennessee, Utah, Virginia, Washington, and Wisconsin—and the same general rules apply in all the States.

## ARREST IN CIVIL ACTION.

WHILE imprisonment for debt as it formerly existed in English and American law, by which a debtor might be arrested and imprisoned for mere inability to pay his creditor, no longer exists in the United States, the statutes of the majority of the States provide for the arrest of a defendant in a civil action under varying conditions. A large number of States determine the right of arrest by the character of the claim on which suit is brought, allowing in it actions for fraud or the injuries known in the law as "torts," such as an injury to the person or property, conversion or embezzlement, libel, slander, or the like.

In the following States no civil arrest is allowed: Arizona, District of Columbia, Florida, Maryland, Minnesota, Mississippi, Missouri, Nebraska, New Mexico, Tennessee, and Texas.

In the following States the right to arrest depends upon the nature of claim in suit: In actions for fraud or torts, Connecticut; for fraud, libel, slander, or violent injury to person or property, Delaware; for fraud only, Iowa and Kansas; only after verdict of jury, finding malice, fraud, or wilful deceit, Colorado; for torts, breach of promise to marry, misconduct or embezzlement in office or professional capacity, Michigan, Pennsylvania, and New York (also for fine or penalty or to recover property concealed from Sheriff).

In the following States arrest is only allowed against a defendant about to remove from State or about to conceal, transfer, or remove his property to avoid plaintiff's claim or defraud creditors, irrespective of the nature of the claim: Indiana, Kentucky, Louisiana, New Hampshire, Utah, Virginia; In New Hampshire tax collector may also arrest person for non-payment of poll tax if not sufficient property upon which to make distress.

In the following States arrest is allowed in contract actions where the defendant is about to depart from the State or conceal or remove his property, and also in actions for fraud or torts of various kinds, though the provisions are not identical: Arkansas (fraud only), California, Idaho, Illinois, Maine, Massachusetts, Montana, Nevada, New Jersey, North Carolina, North Dakota, Oregon, South Carolina, South Dakota, Vermont, Washington, West Virginia (fraud only), Wisconsin.

In Georgia arrest only allowed against attorneys, Sheriffs or other officers of the court for failure to pay over money collected, and in certain circumstances against defendant who conceals property from Sheriff. The drawer of a check on which, on presentation to the bank, payment is refused is guilty of a misdemeanor.

In Wyoming (only after judgment) in actions for fraud, or money lost at gambling, or where defendant has removed or concealed property to avoid judgment.

In Rhode Island, allowed in all actions except to recover debt or taxes.

In Ohio, when an affidavit is filed showing: About to remove property to defraud creditors, convert property into money for same purpose, conceal property or rights in action fraudulently, assigned or disposed of property with intent to defraud creditors. Fraudulently contracted the debt, or incurred the obligation. Money or property sought to be recovered was in gambling on a bet or wager.

* Under seal, 10 years. † Unless a different rate is expressly stipulated. ‡ Under seal, 20 years. †† New York has legalized any rate of interest on call loans of $5,000 or upward on collateral security. § Six years from last item on either side. (*a*) Judgments, 6 per cent. (*b*) Justice Court judgments, 6 years. (*c*) Witnessed, 20 years. (*d*) Thirty-five years in Courts of Record, eighteen years in inferior courts. (*e*) Pawnbrokers, 4 per cent. per month. (*f*) Ceases to be a lien after the period unless revived. (*h*) Subject to renewal. (*j*) Not of record, 6 years. (*k*) No limit. (*m*) No statute. (*n*) Except witnessed promissory note, 14 years.

In New York a judgment ceases after 10 years to be a lien on real estate.

### PENALTIES FOR USURY.

Penalties for usury differ in various States. California, first offense fine of $25 to $300, or prison, not over 6 months or both; subsequent offenses fine $100 to $500, or prison 6 months to year. Colorado, fine not over $300, and prison not over 6 months. Maine, Massachusetts (except on loans of less than $1,000), have no provisions on the subject. Loss of *principal and interest* is the penalty in Arkansas and New York. Loss of principal in Delaware and in Oregon entire debt.

Loss of interest in Alabama, Arizona, District of Columbia, Florida, Idaho, Illinois, Iowa, Louisiana, Michigan, Mississippi, Nebraska, New Jersey, North Carolina (double amount if paid), North Dakota (double amount if paid), Porto Rico, South Carolina, Virginia, Washington (double amount if paid), Wisconsin, and Wyoming. In Alaska, Montana, Oklahoma, Texas, Vermont, double the amount of interest collected. In Minnesota usurious contract is void. Borrower may lose both principal and interest. In South Dakota taking over 10% on real estate loan punishable by fine of not over $500.

Loss of excess of interest in Connecticut, Georgia, Indiana, Kansas, Kentucky, Maryland, Missouri, Nevada, Ohio, Pennsylvania, Tennessee, Vermont and West Virginia. Loss of principal and interest in Rhode Island, not over 30% of amount exceeding $50 or more than 5% per month for first six months of amount less than $50. In New Mexico, fine and forfeiture of double amount collected.

By the Federal act No. 103, the period of military service is to be excluded from the computation of time limited for the bringing of an action by or against persons in the service.

## ACKNOWLEDGMENT OF DEEDS.

AN ACKNOWLEDGMENT is the act of declaring the execution of an instrument before an officer authorized to certify to such declaration. The officer certifies to the fact of such declaration, and to his knowledge of the person so declaring. Conveyances or deeds of land to be entitled to be recorded must first be acknowledged before a proper officer. Most of the States have forms of acknowledgments, which should be followed.

Acknowledgments may be taken in general by Notaries Public, Justices of the Peace, Judges or Clerks of Courts of the higher grades, Registers, Masters in Chancery, Court Commissioners, Town Clerks, Mayors and Clerks of incorporated cities, within their respective jurisdictions.

The requisities to a valid deed are the same in general as other contracts, but the appointment of an attorney to execute a deed for another person must in general be executed with the same formalities requisite to the deed itself.

SEALS or their equivalent (or whatever is intended as such) are necessary in Alaska, Connecticut, Delaware, District of Columbia, Florida, Idaho, Illinois, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, North Carolina, Oregon, Pennsylvania, South Carolina, Vermont, Virginia, West Virginia, Wisconsin, Wyoming. In almost all the States deeds by corporations must be under seal. FORMS are prescribed or indicated by the statutes of most of the States except Connecticut, Florida, Louisiana. SEPARATE ACKNOWLEDGMENT by wife is required in Alaska, Arkansas, Delaware, District of Columbia, Florida, Georgia, Idaho, Kentucky, Louisiana, Montana, Nevada, New Jersey, North Carolina, Oregon, Pennsylvania, South Carolina, Tennessee, Texas. ONE WITNESS to the execution of deeds is required in District of Columbia, Maine (customary), Maryland, Nebraska, New Jersey (usual), Oklahoma, Utah, Wyoming. TWO WITNESSES to the execution of deeds are required in Arkansas, Connecticut, Florida, Georgia, Louisiana, Michigan, Minnesota, New Hampshire, Ohio, Oregon, South Carolina, Texas, Vermont, Wisconsin.

## THE BANKRUPTCY LAW.

(Extracts from the United States Bankruptcy Act of July 1, 1898, as amended by subsequent acts.)

SEC. 4. WHO MAY BECOME BANKRUPTS.—(*a*) Any person, except a municipal, railroad, insurance or banking corporation, shall be entitled to the benefits of this act as a voluntary bankrupt.

(*b*) Any natural person, except a wage-earner or a person engaged chiefly in farming or the tillage of the soil, any unincorporated company, and any moneyed, business, or commercial corporation, except a municipal, railroad, insurance, or banking corporation, owing debts to the amount of one thousand dollars or over, may be adjudged an involuntary bankrupt upon default or an impartial trial, and shall be subject to the provisions and entitled to the benefits of this act.

### OFFICERS AND STOCKHOLDERS OF CORPORATIONS ARE LIABLE.

The bankruptcy of a corporation shall not release its officers, directors, or stockholders, as such, from any liability under the laws of a State or Territory or of the United States. (30 Stat. 547. 32 Stat. 797. 36 Stat. 839.

SEC. 7. DUTIES OF BANKRUPTS.—(*a*) The bankrupt shall (1) attend the first meeting of his creditors, if directed by the court or a Judge thereof to do so, and the hearing upon his application for a discharge, if filed; (2) comply with all lawful orders of the court; (3) examine the correctness of all proofs of claims filed against his estate; (4) execute and deliver such papers as shall be ordered by the court; (5) execute to his trustee transfers of all his property in foreign countries; (6) immediately inform his trustee of any attempt, by his creditors or other persons, to evade the provisions of this act, coming to his knowledge; (7) in case of any person having to his knowledge proved a false claim against his estate, disclose that fact immediately to his trustee; (8) prepare, make oath to, and file in court within ten days, unless further time is granted, after the adjudication if an involuntary bankrupt, and with the petition if a voluntary bankrupt, a schedule of his property, showing the amount and kind of property, the location thereof, its money value, in detail, and a list of his creditors, showing their residences, if known (if unknown that fact to be stated), the amount due each of them, the consideration thereof, the security held by them, if any, and a claim for such exemptions as he may be entitled to, all in triplicate, one copy of each for the clerk, one for the referee, and one for the trustee; and (9) when present at the first meeting of his creditors, and at such other times as the court shall order, submit to an examination concerning the conducting of his business, the cause of his bankruptcy, his dealings with his creditors and other persons, the amount, kind, and whereabouts of his property, and, in addition, all matters which may affect the administration and settlement of his estate; but no testimony given by him shall be offered in evidence against him in any criminal proceedings.

### WHEN BANKRUPT MAY COLLECT ACTUAL TRAVELLING EXPENSES.

Provided, however, that he shall not be required to attend a meeting of his creditors, or at or for an examination at a place more than one hundred and fifty miles distant from his home or principal place of business, or to examine claims except when presented to him, unless ordered by the court, or a Judge thereof, for cause shown, and the bankrupt shall be paid his actual expenses from the estate when examined or required to attend at any place other than the city, town, or village of his residence.

### ALLOWABLE DEBTS.

SEC. 63. DEBTS WHICH MAY BE PROVED.—(*a*) Debts of the bankrupt may be proved and allowed against his estate which are (1) a fixed liability as evidenced by a judgment or an instrument in writing, absolutely owing at the time of the filing of the petition against him, whether then payable or not, with any interest thereon which would have been recoverable at that date, or with a rebate of interest upon such as were not then payable and did not bear interest; (2) due as costs taxable against an involuntary bankrupt who was at the time of the filing of the petition against him plaintiff in a cause of action which would pass to the trustee and which the trustee declines to prosecute after notice; (3) founded upon a claim for taxable costs incurred in good faith by a creditor before the filing of the petition in an action to recover a provable debt; (4) founded upon an open account, or upon a contract express or implied; and (5) founded upon provable debts reduced to judgments after the filing of the petition and before the consideration of the bankrupt's application for a discharge, less costs incurred and interest accrued after the filing of the petition and up to the time of the entry of such judgments.

(*b*) Unliquidated claims against the bankrupt may, pursuant to applications to the court, be liquidated in such manner as it shall direct, and may thereafter be proved and allowed against his estate.

### DEBTS NOT AFFECTED BY A DISCHARGE IN BANKRUPTCY.

(Amendment approved by the President and in effect January 7, 1922.)

A discharge in bankruptcy shall release a bankrupt from all of his provable debts, except such as (first) are due as a tax levied by the United States, the State, county, district, or municipality in which he resides; (second) are liabilities for obtaining property by false pretenses or false representation, or for wilful and malicious injuries to the person or property of another, or for alimony due or to become due, or for maintenance or support of wife or child, or for seduction of an unmarried female, or for breach of promise of marriage accompanied by seduction, or for criminal conversation; (third) have not been duly scheduled in time for proof and allowance, with the name of the creditor, if known to the bankrupt, unless such creditor had notice or actual knowledge of the proceedings in bankruptcy, or (fourth) were created by his fraud, embezzlement, misappropriation, or defalcation while acting as an officer or in any fiduciary capacity; or (fifth) are for wages due to workmen, clerks, travelling or city salesmen, or servants, which have been earned within three months before the date of commencement of the proceedings in bankruptcy; or (sixth) are due for moneys of an employee received or retained by his employer to secure the faithful performance by such employee of the terms of a contract of employment.

## WILLS.

A WILL OR TESTAMENT is a final disposition of a person's property, to take effect after his death. A codicil is an addition or alteration in such disposition. All persons are competent to make a will except idiots, persons of unsound mind, and infants. In many States a will of an unmarried woman is deemed revoked by her subsequent marriage. A nuncupative or unwritten will is one made *orally* by a soldier in active service, or by a mariner while at sea.

In most of the States a will must be in writing, signed by the testator, or by some person in his presence, and by his direction, and attested by witnesses, who must subscribe their names thereto in the *presence* of the testator. The form of wording a will is immaterial as long as its intent is clear.

Age at which persons may make wills is in most of the States 21 years. Males and females are competent to make wills at 18 years in the following States: California, Connecticut, Idaho, Montana, Nevada, North Dakota, Oklahoma, South Dakota, Utah and the Hawaiian islands; and in the following States only females at 18 years: Colorado, District of Columbia, Illinois, Maryland, Missouri, Washington, Wisconsin.

In the following States persons of 18 years may dispose of personal property only: Alabama, Arkansas, Missouri, Oregon, Rhode Island, Virginia, West Virginia; in Georgia and Ohio over 14 years and in Louisiana any one over 16 years, is competent to make a will. In Colorado, persons of 17 years, and in New York males of 18 and females of 16 years may dispose of personalty. Witnesses—Most of the States require two witnesses, except in Connecticut (3), Maine (3), Massachusetts (3), New Hampshire (3), South Carolina (3), Vermont (3).

## ADMINISTRATION OF DECEASED PERSONS ESTATES.

THE following is a synopsis of the laws of the various States affecting the administration of the estate of a deceased person:

1. Who to Administer.—(a) If the deceased leaves a will, the duty of administration falls upon the executor. If no executor is named, or in the event of the death or refusal of the executor to act, the Court will grant administration under the will to some suitable person, generally selected from those most largely interested under the provisions of the will, such as the residuary legatees, if any. (b) If the deceased died intestate, letters of administration are granted to the following persons in practically all the States:

First—To the surviving husband or widow.

Second—To one or more of the next of kin entitled to share in the estate.

Third—If none of the above consent to act, to one of the creditors of the estate, except in localities where there is provided by law a Public Administrator, who is preferred to creditors.

In practically all the States an administrator is required to give bond for the faithful performance of his duties in double the value of the estate to be administered.

In most of the States, if so provided by the will, no bond is required of an executor, except that in some States an executor is required to give a bond to cover the probable amount of the debts of the estate, and in practically all the States, in the discretion of the Court, for cause shown, an executor may be required to give a bond.

2. Claims of Creditors.—The procedure in the several States in presenting creditors' claims against the estate varies very considerably. In the majority of the States the executor or administrator is required promptly to give public notice to creditors to present their claims to him, and the creditors are required so to present their claims supported by an affidavit that the same are justly due and owing from the estate, above any offsets or counter claims, within a period limited generally to six months or a year. The law of each State should be consulted for more specific details. Most of the States direct a final closing of the estate by the executor or administrator within a year or eighteen months after his appointment, though the time limit may be extended by the Probate Court if conditions require it.

3. The following table contains an analysis of the laws of the several States, covering:

(1) The inheritance or succession tax upon property received either by intestate laws, last will, or by gift or transfer, designed to take effect at death, excepting legacies for religious, charitable or educational purposes, which are tax exempt in most of the States. In the great majority of the States no distinction as to tax is made between real estate and personal property.

(2) The various classes of estate obligations given priority over other claims in case of the insolvency of the estate.

NOTE—*Tax* when used below means Inheritance Tax, and *Obligations* means Preferred Obligations.

ALABAMA—*Tax*—None. *Obligations*—1, Funeral expenses; 2, administration expenses; 3, expenses of last sickness; 4, taxes; 5, wages of servants or employes.

ALASKA—*Tax*—Primary rates: On amounts up to $15,000; to wife or lineal issue, 1%; to husband or lineal ancestor, 1½%; to brother or sister or descendant of such, wife or widow of son, or husband of daughter, 3%; brother or sister of father or mother, or descendant of such, 4%; other collaterals, or strangers, or body politic or corporate, 5%. On amounts $15,000 to $30,000, double primary rates; $30,000 to $50,000, 2½ times; $50,000 to $100,000, 3 times; over $100,000, 3½ times primary rates. Exemptions, to widow, husband, lineal issue (including adopted children), $10,000; to lineal ancestors, $3,000; to collaterals, $1,000; charitable transfers to hospitals, schools, etc., $2,500. *Obligations*—1, Funeral expenses; 2, administration expenses; 3, expenses of last sickness; 4, taxes; 5, wages of servants or employees.

ARIZONA—*Tax*—To grandfather, grandmother, parents, husband, wife, child, brother, sister, son-in-law, or daughter-in-law, lineal descendant, or adopted child, 1%; $5,000 exempt to each beneficiary above named. Estates less than $10,000 exempt. To uncle, aunt, nephew, niece or descendant thereof, 2%; $2,000 exempt to each beneficiary named. Estate less than $5,000 exempt. To others, 3% up to $10,000; 4% from $10,000 to $20,000; 5% from $20,000 to $50,000; 6% above $50,000. $500 exempt. *Obligations*—No statutory provision.

ARKANSAS—*Tax*—On amounts not exceeding $5,000 the rate is 1% to parents, husband or wife, child or adopted child, lineal descendant, brother, sister, son-in-law or daughter-in-law. To all others the rate on the same amount is 4%. $3,000 passing to widow or minor child and $1,000 passing to the other immediate relatives mentioned is exempt. The exemption to others more remote is $500. On amounts in excess of $5,000 the primary rates (1% and 4% respectively) are increased as follows: From $5,000 to $10,000, twice the primary rates; from $10,000 to $30,000, 3 times the primary rates; from $30,000 to $50,000, 4 times; $50,000 to $100,000, 5 times; $100,000 to $500,000, 6 times; $500,000 to $1,000,000, 7 times; above $1,000,000, 8 times. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, wages of servants; 4, judgments which are liens on land of deceased; 5, all debts due by estate, including taxes, cost of administration, etc.; 6, Federal Estate tax.

CALIFORNIA—*Tax*—To husband, wife, descendants, ancestors, adopted children or issue thereof, 1% up to $25,000; 2% from $25,000 to $50,000; 4% from $50,000 to $100,000; 7% $100,000 to $200,000; 10% $200,000 to $500,000; 12% above $500,000. $24,000 is exempt to widow or minor child; to others in this paragraph $10,000 is exempt. Property received by any one belonging in this classification from a member of this class who died within five years and having paid a tax thereon is exempt. To brothers, sisters, or their descendants, or to a son-in-law or daughter-in-law, 3% up to $25,000; upon the increasing amounts in the preceding paragraph the rates are 6%, 9%, 12%, 15% and 18%. $2,000 exempt from tax. To uncles, aunts, or their descendants, 4% up to $25,000; the rates increase, as above, up to $200,000 as follows: 8%, 10% and 15%; above $200,000, the rate is 20%. $1,000 exemption. To others more remote in blood, 5% up to $25,000; the rates increase as above up to $100,000 as follows: 10% and 15%; above $100,000 the rate is 20%. $500 exemption. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, wages due within 60 days; 4, debts preferred by U. S. laws; 5, judgments, mortgages and other liens.

COLORADO—*Tax*—Direct heirs—Father, mother, husband, wife, child, adopted child or descendants, in excess of exemption ($20,000 for widow, others $10,000) up to $50,000, 2%; to $100,000, 3%; to $150,000, 4%; to $250,000, 5%; to $500,000, 6%; over $500,000, 7%. Wife or widow of son, husband or widower of daughter, grandfather or grandmother, brother, sister, in excess of exemption ($2,000) up to $10,000, 3%; to $25,000, 4%; to $50,000, 5%; to $100,000, 6%; to $250,000, 7%; to $500,000, 8%; over $500,000, 10%. Uncle, aunt, nephew or niece or descendant, in excess of $500, up to $5,000, 4%; to $10,000, 5%; to $25,000, 6%; to $100,000, 8%; to $250,000, 10%; to $500,000, 12%; over $500,000, 14%. Strangers, all others, in excess of $500, up to $5,000, 7%; to $10,000, 8%; to $25,000, 9%; to $100,000, 10%; to $250,000, 12%; to $500,000, 14%; over $500,000, 16%. *Obligations*—1, Moneys held in a fiduciary capacity; 2, reasonable administration expenses; 3, expenses for funeral and last sickness; 4, allowances to widow and orphans.

CONNECTICUT—*Tax*—To husband, wife, parent, grandparents, descendants, adopted parent, adopted child or its descendants, $10,000 to $25,000, 1%; $25,000 to $100,000, 2%; $100,000 to $200,000, 3%; in excess of $200,000, 4%. To brothers, sisters or their descendants, step-child, son-in-law or daughter-in-law, $3,000 to $25,000, 2%; $25,000 to $100,000, 3%; $100,000 to $200,000, 4%; in excess of $200,000, 5%. To any person, corporation or association not included in above, $500 to $25,000, 5%; $25,000 to $100,000, 6%; $100,000 to $200,000, 7%; in excess of $200,000, 8%. *Obligations*—1, Funeral and administration expenses; 2, expenses of last sickness; 3, taxes; 4, wages within three months; 5, other preferred claims by State laws.

To wife or widow of son, husband of daughter, lineal descendant of adopted child, brother or sister, on amount over exemption, 5%, and an additional 3% on grantee or donee in conveyance taking effect upon death. To other collateral kindred, strangers to the blood, corporations, voluntary associations or societies, in amount over exemption, 5%, and an additional tax on grantee or donee in conveyance taking effect upon death, 3%. Exemptions are on entire estate, $10,000, as to first two classes as above; $500, as to collaterals, strangers, etc. All gifts of paintings, books, etc., for free exhibitions within State, are entirely exempt. *Obligations*—1, Inheritance tax; 2, judgments; 3, funeral expenses; 4, medical expenses of last sickness.

NEW YORK—*Tax*—To parents, husband or wife, child, adopted child ($5,000 exempt), and to descendants ($500 exempt), 1% up to $25,000; 2% on the next $75,000; 3% on the next $100,000; 4% upon all additional sums. To brother, sister, son-in-law, or daughter-in-law, 2% up to $25,000; 3% on the next $75,000; 4% on the next $100,000; 5% thereafter; unless estate amounts to at least $500, there is no tax. To others more remote, 5% up to $25,000; 6% on the next $75,000; 7% on the next $100,000; 8% thereafter; unless estate amounts to at least $500, there is no tax. *Obligations*—1, Funeral and administration expenses; 2, debts preferred under U. S. laws; 3, taxes; 4, judgments and decrees.

NORTH CAROLINA—*Tax*—To husband or wife, heirs at law, son or daughter-at-law, stepchild, adopted child. Exempt, $10,000 to widow, $5,000 to minor child, $2,000 to others of this class. Rates on excess, 1% up to $25,000; 2%, $25,000 to $100,000; 3%, $100,000 to $250,000; 4%, $250,000 to $500,000; 5%, above $500,000. To brother, sister, or their descendants, no exemption. Rates on the amounts given above are: 3%, 4%, 5%, 6% and 7%. To others more remote, the rates on the same amounts are: 5%, 6%, 7%, 8% and 9%. *Obligations*—1, Debts secured by liens on property of deceased; 2, funeral expenses; 3, taxes; 4, debts due U. S. or State; 5, judgments; 6, wages within one year, medical attendance within one year.

NORTH DAKOTA—*Tax*—To husband, wife, lineal issue, lineal ancestor of decedent, adopted child, on not to exceed $15,000, over amount of exemption, 1%. To brother or sister, descendants of same, wife or widow of son, or husband of daughter, on $15,000, 1½%. To brother or sister of father or mother, or descendant of same, on $15,000, 3%. To brother or sister of grandfather or grandmother, or descendant, on $15,000, 4%. To any other collateral degree, or stranger, or body politic or corporate, on $15,000, 5%. Above are termed primary rates. In excess of $15,000, up to $30,000, 1½ times primary rates. On $30,000 to $50,000, 2 times; $50,000 to $100,000, 2½ times; $100,000 to $300,000, 3 times; $300,000 to $500,000, 3½ times; in excess of $500,000, 4 times primary rate. Exemptions, to husband or wife, $10,000; to each minor child, $5,000; brother or sister, $2,000; descendants of brother or sister, $500; wife or widow of son, or husband of daughter, $250; devises or bequests to municipal corporations for county, town or municipal purposes, or to corporations of this State, organized for religious, charitable or educational purposes, entirely exempt. *Obligations*—1, Administration expenses; 2, funeral and last sickness expenses; 3, allowance to family; 4, debts preferred by U. S. laws; 5, debts secured by liens on property of deceased.

OHIO—*Tax*—To wife or minor child, father, mother, husband, adult child, or adopted child, or lineal descendants thereof, on $25,000 or part thereof, over exemptions, 1%; on next $75,000, 2%; on next $100,000, 3%; on balance, 4%. To brother, sister, niece, nephew, wife or widow of a son, husband of a daughter, or child treated as son or daughter for ten years though not formally adopted, on $25,000 or part thereof, over exemptions, 5%; on next $75,000, 6%; on next $100,000, 7%; on balance, 8%. To other persons, institutions or corporations, on $25,000 or part thereof, 7%; on next $75,000, 8%; on next $100,000, 9%; on balance, 10%. Exemptions, to wife or child, $5,000; to father, mother, husband, adult child, or adopted child, or lineal descendants, $3,500; to brother, sister, nephew, niece, wife or widow of son, husband of daughter, $500. *Preferred obligations*—1, Administration, funeral and last sickness expenses; 2, allowance to widow and children for twelve months; 3, debts; 4, taxes.

OKLAHOMA—*Tax*—To parents, husband or wife, child, brother, sister, son-in-law, daughter-in-law, adopted child, or lineal descendant, 1% up to $25,000; 2%, $25,000 to $50,000; except to brother, sister, wife or widow of son, or husband of daughter, 3%; 3%, $50,000 to $100,000, except brother, sister, wife or widow of son or husband of daughter, 4%; 4% in excess of $100,000, except to brother, sister, wife or widow of son, or husband of daughter, 5%. To other persons and corporations, on from $500 to $25,000, 6%; $25,000 to $50,000, 7%; $50,000 to $100,000, 8%; over $100,000, 10%. Exemptions, to wife, $15,000; to each child, $10,000; to other relatives as above, $5,000, except brother, sister, wife or widow of son, or husband of daughter, $1,000. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, support of family for ninety days; 4, taxes to U. S. or State; 5, debts preferred by U. S. or State laws; 6, judgments or mortgages; 7, other claims presented within six months.

OREGON—*Tax*—To grandfather, grandmother, father, mother, husband, wife, child or any lineal descendant (exemption $10,000), $10,000 to $25,000, 1%; $25,000 to $50,000, 1½%; $50,000 to $100,000, 2%; $100,000 to $300,000, 3%; $300,000 to $500,000, 5%; $500,000 to $1,000,000, 7%; over $1,000,000, 10%. To brother, sister, uncle, aunt, niece, nephew, or lineal descendant (exemption $1,000), additional tax, $1,000 to $3,000, 1%; $3,000 to $5,000, 2%; $5,000 to $10,000, 4%; $10,000 to $30,000, 7%; $30,000 to $50,000, 10%; over $50,000, 15%. Additional tax in all other cases (no exemption) up to $500, 2%; $500 to $1,000, 4%; $1,000 to $2,000, 6%; $2,000 to $4,000, 8%; $4,000 to $10,000, 10%; $10,000 to $25,000, 15%; $25,000 to $50,000, 20%; over $50,000, 25%. Effective on and after May 29, 1919. *Obligations*—1, Funeral expenses; 2, taxes due U. S.; 3, expenses of last sickness; 4, public rates and taxes; 5, debts preferred by U. S. laws; 6, debts secured by liens on property of deceased; 7, wages within ninety days.

PENNSYLVANIA—*Tax*—Collateral Inheritance tax, estates less than $250 exempt. To parents, husband or wife, children or lineal descendants, stepchildren, adopted children, wife or widow of son, 2%. To all others, 5%. Direct Inheritance tax, 2%. No exemptions. *Obligations*—1, Funeral and last sickness expenses, wages due household servants within one year; 2, rent, within one year.

RHODE ISLAND—*Tax*—Estates under $5,000 tax exempt (above said sum a general tax of ½% is imposed in addition to the rates specified below). To grandparents, parents, husband or wife, child, or descendant, adopted child, brother, sister, nephew, niece, son-in-law, or daughter-in-law, $25,000 is exempt. Rates on excess are: ½% below $50,000; 1%, $50,000 to $250,000; 1½%, $250,000 to $500,000; 2%, $500,000 to $750,000; 2½%, $750,000 to $1,000,000; 3% above $1,000,000. To others more remote, $1,000 is exempt, and rates on excess are: 5% up to

$50,000; 6%, $50,000 to $250,000; 7%, $250,000 to $1,000,000; 8% above $1,000,000. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, debts due U. S.; 4, State and town taxes; 5, wages up to $100; 6, other claims presented within six months; 7, all other debts. If property insufficient to pay all debts of any class, creditors of that class shall be paid ratably, and no payment shall be made to creditors of any class until all of preceding class or classes have been paid in full.

SOUTH CAROLINA—*Tax*—To husband, wife, minor child, adult child, father or mother, on amount in excess of exemption: up to $20,000, 1%; $20,000 to $40,000, 2%; $40,000 to $80,000, 3%; $80,000 to $150,000, 4%; $150,000 to $300,000, 5%; in excess of $300,000, 6%. To lineal ancestor, lineal descendant (other than above), brother, sister, uncle, aunt, niece, nephew, wife or widow of son, or husband of daughter, on amount in excess of exemption, up to $20,000, 2%; to $40,000, 3%; to $80,000, 4%; to $150,000, 5%; to $300,000, 6%; over $300,000, 7%. To any other beneficiary, double above rates, viz., 4%, 6%, 8%, 10%, 12% and 14%. Exemptions, husband or wife, $10,000; minor child, $7,500; adult child, father or mother, $5,000; lineal ancestor or descendant, brother, sister, uncle, aunt, etc., $500; any other beneficiary, $200. Devises or bequests for educational, religious, or public charities in this State, or for city or town for public purposes, entirely exempt. Act of Feb. 23, 1922. *Obligations*—1, Funeral, last sickness, probate and administration expenses; 2, debts due to public; 3, judgments, mortgages and executions; 4, rent; 5, bonds, contract debts.

SOUTH DAKOTA—*Tax*—Primary rates: To wife or lineal issue, up to $15,000 in excess of exemptions, 1%; to husband, lineal ancestor of decedent or any child legally adopted, or mutually acknowledged for not less than ten years or lineal issue of such, 2%; to brother or sister, or descendant o brother or sister of decedent, a wife or widow of a son or husband of a daughter, 3%. To brother or sister of father or mother, or a descendant of a brother or sis'er of the father or mother of decedent, 4%; to any person or persons in any other degree than as above, or strangers, or a body politic or corporate, 5%. Over $15,000 and up to $50,000, two times the primary rate; $50,000 to $100,000, 3 times; in excess of $100,000, 4 times the primary rate. Exemptions, all property transferred to public corporations within the State for strictly county, township or municipal purposes, property of clear value of $10,000 transferred to widow or husband of decedent, each of lineal issue, or adopted or mutually acknowledged children and issue of such, lineal ancestors of decedent, exemption, $3,000; $500 exemption to brother or sister of decedent, or descendants of such, wife or widow of son or husband of daughter, $200 exemption to brother or sister of father or mother or descendants of such; $100 exemption to others. Exemption of $2,500 to hospitals, colleges, etc., and charitable institutions, deductions to be made of amounts received from outside the State. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, administration expenses; 4, wages for 60 days; 5, debts preferred by U. S. laws; 6, debts secured by liens on property of deceased.

TENNESSEE—*Tax*—To husband, wife or direct descendants, child adopted in conformity with laws of State, or ascendants of person making transfer, from $10,000 to $25,000, 1%; on next $25,000, or any part thereof, 1½%; on next $50,000, 2%; on next $500,000, 3%; on $500,000 and all over that sum, 5%. To all others, from $1,000 to $50,000, 5%; on next $50,000, 6%; on next $50,000, 7%; on next $50,000, 8%; on next $50,000, 9%; 10% on $250,000 and all over that sum. Exemptions, property of intestate, testator or grantor when clear market value is less than $1,000. Property of clear market value of less than $10,000, transferred to wife, direct descendants and ascendants, or either of them, of person from whom transfer is made, the estate to be treated as a whole. All property transferred to municipal corporations for strictly municipal purposes. Property devised or transferred to any church for purely religious purposes, to any school or college for purely educational purposes, to any hospital or bona fide charitable institution. *Obligations*—1, Transfer and inheritance taxes are included as debts in settlement of estate.

TEXAS—*Tax*—Exempt to parents, husband or wife or descendants. The rate of taxation on other legacies varies (above such sum as is exempt) with the amount of the legacy. Six divisions as to amount are recognized: (1) up to $10,000; (2) $10,000 to $25,000; (3) $25,000 to $50,000; (4) $50,000 to $100,000; (5) $100,000 to $500,000; (6) above $500,000. To ancestors, brothers, sisters or their descendants, the rates on the above amounts are 2%, 2½%, 3%, 3½%, 4% and 5%, $2,000 being exempt. To uncles, aunts or their descendants the rates are 3%, 4%, 5%, 6%, 7% and 8%, $1,000 being exempt. To others more remote the rates are 4%, 5½%, 7%, 8½%, 10% and 12%, $500 being exempt. *Obligations*—1, Funeral and last sickness expenses; 2, administration expenses; 3, debts secured by mortgage or other lien; 4, other debts presented within twelve months.

UTAH—*Tax*—$10,000 of each estate exempt; tax 3%, $10,000 to $25,000; 5% above $25,000. *Obligations*—1, Funeral expenses the only preferred obligations. The term "debts" shall include local or State taxes due at time of death, court costs, statutory fees of executors, administrators or trustees.

VERMONT—*Tax*—To husband, wife, child, father, mother or grandchild, wife or widow of a son or husband of a daughter, child adopted during minority, stepchild or other lineal descendant, no tax unless legacy or share exceeds $10,000; between $10,000 and $25,000, 1%; between $25,000 and $50,000, 2%; between $50,000 and $250,000, 4%; over $250,000, 5%. To all others, 5%. Exemptions, devises or bequests for charitable, religious or educational societies or institutions, cemetery purposes created or existing under laws of this State, to a Bishop in his ecclesiastical capacity for religious uses in this State. *Obligations*—1, Funeral expenses; 2, headstone not over $25; 3, expenses of last sickness; 4, taxes; 5, debts due to State; 6, debts due to U. S.; 7, wages within 3 months, not over $50 per creditor.

VIRGINIA—*Tax*—To husband, wife, lineal ancestor, lineal descendant, in excess of exemption and up to $50,000, 1%; in excess of $50,000 and up to $100,000, 2%; in excess of $100,000 and up to $500,000, 3%; in excess of $500,000 and up to $1,000,000, 4%; in excess of $1,000,000, 5%. To brother, sister, nephew or niece, in excess of exemption, amounts as above, 2%, 4%, 6%, 8% and 10%. All others, in excess of exemption, etc., 5%, 7%, 9%, 12% and 15%. Exemptions, husband, wife, ancestor, descendant, $10,000; brother, sister, nephew, niece, $4,000; others, $1,000. *Obligations*—1, Funeral and administration expenses; 2, expenses of last sickness, not exceeding $50, doctor or druggist; 3, taxes; 4, money owing as trustee or in fiduciary capacity.

WASHINGTON—*Tax*—To parents, husband or wife, lineal descendant, adopted child or its descendants, $10,000 exempt. Rates on excess are: 1% up to $50,000; 2%, $50,000 to $100,000; 3%, $100,000 to $250,000; 5% above $250,000. To brother, sister, uncle, aunt, nephew or niece, no exemption, the rates on the amounts stated are: 3%, 5%, 7% and 9%. To others more remote, the rates on the same amounts are: 6%, 9%, 12% and 15%. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, debts preferred by U. S. laws; 4, wages, within ninety days; 5, taxes; 6, judgments and mortgages which are liens on land.

WEST VIRGINIA—*Tax*—To wife, husband, child or children of deceased child, or father or mother of decedent, not exceeding $50,000, 2%. To brother or sister of decedent (not including those of half blood), 4%. To those further removed in relationship from decedent than brother or sister, 6%. To those of no blood relationship, strangers, institutions corporate or otherwise, except eleemosynary institutions hereinafter exempt, 10% of market value of such interest in such property. The foregoing are termed primary rates. In excess of $50,000 up to and not over $100,000, two times primary rate; over $100,000 up to $150,000, 2¼ times; over $150,000 up to $200,000, 2½ times; over $200,000 up to $300,000, 2¾ times; over $300,000 up to $400,000, 3 times; over $400,000 up to $500,000, 3¼ times. Upon all in excess of $500,000, 3½ times primary rates. Exemptions, property transferred to person or corporation for educational, literary, scientific, religious or charitable purposes, or to State, county or municipal corporation for public purposes, used exclusively in this State. To widow, $15,000; to wife, husband, child, children

of deceased child, father or mother of decedent $10,000, except that exemption to children of child shall be per stirpes not per capita. *Obligations*—1, Funeral and administration expenses; 2, debts owing to U. S.; 3, taxes; 4, fiduciary obligations.

WISCONSIN—*Tax*—Tax of 2% to husband, wife, lineal descendants, lineal ancestors, adopted child, and lineal issue thereof. To brothers, sisters and their descendants, wife or widow of son, or husband of daughter, 4%. To uncles, aunts or their descendants, 6%. To all others, 8%. When the estate is above $25,000 the above rates are multiplied as follows: $25,000 to $50,000, 2 times on excess; $50,000 to $100,000, 3 times on excess; $100,000 to $500,000, 4 times on excess; above $500,000, 5 times on excess. Exempt, $25,000 to widow and lesser amounts to other relatives, down to $100 exemptions to strangers in blood. *Obligations*—1, Last sickness and funeral expenses; 2, debts.

WYOMING—*Tax*—Tax of 2% on amount above $10 000 to parents, husband or wife, child, brother, sister, lineal descendants, wife or widow of son, husband of daughter, adopted child or mutually acknowledged child. To others than above, tax of 5%, if estate less than $500, no tax. *Obligations*—1, Funeral and administration expenses; 2, expenses of last sickness and sixty days' wages, including medical attendance and medicines; 3, judgments and mortgages; 4, all claims presented within six months; 5, all claims presented within one year.

UNITED STATES—*Tax*—The Federal Tax is imposed on the estate as a whole, not on the shares of the several legatees, irrespective of the relationship of the beneficiaries to the decedent. $50,000 of each estate is exempt from tax. The rates on the excess are as follows: Not exceeding $50,000, 1%; $50,000 to $150,000, 2%; $150,000 to $250,000, 3%; $250,000 to $450,000, 4%; $450,000 to $750,000, 6%; $750,000 to $1,000,000, 8%; $1,000,000 to $1,500,000, 10%; $1,500,000 to $2,000,000, 12%; $2,000,000 to $3,000,000, 14%; $3,000,000 to $4,000,000, 16%; $4,000,000 to $5,000,000, 18%; $5,000,000 to $8,000,000, 20%; $8,000,000 to $10,000,000, 22%; exceeding $10,000,000, 25%.

## DISTRIBUTION OF INTESTATE'S PERSONAL ESTATE.

THE following is a synopsis of the laws of the various States providing for the distribution of the personal estate of a deceased after the payment of funeral expenses and other debts where there is no will:

In many of the States the widow and children are entitled to receive a small portion of the estate, generally varying from $100 to $500, before the claims of creditors are paid. Aside from such exempt portion of the estate, the property to be distributed to widow or relatives is that remaining after all creditors' claims have been satisfied.

The following is the plan of distribution of a male's property. The same rules apply to a female's estate, except in some States, where the rights of a husband in the estate of his deceased wife differ.

I. In all States where the deceased leaves a child or children, or descendants of any deceased child, and no widow, the children or descendants take the entire estate, to the exclusion of all other relatives. The children take equal shares, and in most States the descendants of a deceased child together take the share of their parent, except where the descendants are all in equal degree to the deceased (all grandchildren, no children surviving), when they share equally and do not take their proportionate share of their parent's interest.

No statement is given in this synopsis of the law of Louisiana, which, being founded on the provisions of the French code and Roman law instead of the English common law, which is the underlying principle in the other States, differs in many respects from the principles followed in the other States, especially on the question of the rights of a husband and wife in each other's property and in the property acquired by the husband and wife during their married life. The provisions of the law of Indiana are also not included, for the reason that for an accurate statement of its provisions a reading of the entire statute is necessary, together with the decisions of the Indiana courts construing its provisions, which would occupy too much space for a statement here.

II. (a) If deceased leaves a widow, and no children or descendants, the widow takes all. This is the rule in Alabama, Arizona, Colorado, Florida, Georgia, Illinois, Kansas, Minnesota, Mississippi, New Jersey, New Mexico, Ohio, Oregon, Tennessee, Texas, Washington, West Virginia and Wisconsin.

(b) In the following States the widow takes one-half, the residue being taken by the other relatives in the manner and proportion in which they take the entire estate when the deceased leaves neither widow nor descendants (given below); Arkansas, California, Delaware, District of Columbia, Idaho, Iowa, Kentucky, Maine, Maryland, Missouri, Montana, Nebraska, Nevada, North Carolina, Oklahoma, Rhode Island, Texas, Washington, West Virginia and Wisconsin. In Delaware the widow takes all up to $3,000 and one-half after that. If no kin, widow takes all.

(c) In Massachusetts, North Dakota, Pennsylvania and Utah the widow takes the entire estate up to $5,000 and one-half of the residue.

(d) In Connecticut the widow takes the entire estate up to $2,000 and one-half of the residue.

(e) In New York, if there be a father or mother of deceased surviving, the widow takes one-half; if there be no father or mother, but a brother or sister, nephew or niece surviving, the widow takes $2,000 and one-half residue; if there be no parent, brother, sister, nephew or niece, the widow takes all. The residue after the widow's share passes in each case in accordance with the provisions applying where no widow or issue survive.

(f) In New Hampshire the widow takes $1,500, and, if the estate exceeds $3,000, one-half of the residue.

(g) In Wyoming the widow takes the entire estate up to $20,000 and three-fourths of the residue (if brother, sister or parent survive, otherwise all to widow).

(i) In Michigan the widow takes the entire estate up to $3,000 and one-half of the residue (if brother, sister or parent survive, otherwise all to widow).

(j) In Vermont the widow takes entire estate if not exceeding $2,500; if more than $2,500, widow takes that sum and one-half of residue.

III. (a) When the deceased leaves a widow and children, or descendants, the widow takes one-third and the children share equally in the residue in the following States: Arizona, Arkansas, Connecticut, Delaware, District of Columbia, Illinois, Iowa, Maine, Maryland, Massachusetts, Minnesota, New Hampshire, New Jersey, New York, Ohio (one-half if less than $400), Pennsylvania, Rhode Island, South Carolina, Texas, Vermont, Virginia and West Virginia.

(b) In the following States, if there be but one child, the widow takes one-half and the child one-half; if two or more children or their descendants, the widow takes one-third, as above, and the children or their descendants the residue: California, Florida, Idaho, Michigan, Montana, Nevada, North Dakota, Oklahoma, South Dakota and Utah.

(c) In the following States the widow takes one-half and the children, or descendants, the residue: Colorado, Kansas, Kentucky, Oregon, Washington and Wyoming.

(d) In the following States the widow takes the same share as each of the children: Mississippi, Missouri, Tennessee and Wisconsin.

(e) In North Carolina, if there are less than three children, the widow takes one-third and the children the residue; if there are three or more children, the widow takes the same share as each of the children.

(f) In Alabama, if there is but one child, the widow takes one-half and the child one-half; if there are more than one child and less than five children, the widow takes the same share as each of the children; if there are five or more children, the widow takes one-fifth and the children or their descendants share equally in the residue.

(g) In Georgia, if there are less than five children, the widow takes the same share as each of the children; if there are five or more children, the widow takes one-fifth and the children or their descendants share equally in the residue.

(h) In Nebraska if widow is not the parent of all the children of the deceased and there be more than one child, widow takes one-fourth and children the residue. If widow is parent of all children of the deceased, she takes one-half if there be but one child and the child the residue; if there be more than one child the widow takes one-third and the children the residue.

(l) In New Mexico, the widow takes one-half of the estate acquired during marriage, otherwise than by gift (by purchase, for example) and the children or their descendants share equally in the residue; the widow also takes one-fourth of the estate acquired before marriage, or by gift or legacy during marriage, the children or their descendants taking the residue.

IV. (a) When the deceased leaves no widow,

children or descendants, the parents take the entire estate in equal shares in the following States: Alabama, Arizona, California, Colorado, Connecticut, Idaho, Iowa, Kansas, Kentucky, Maine, Massachusetts, Michigan, Minnesota, Montana, Nebraska, Nevada, New Hampshire, North Carolina, Oklahoma, Pennsylvania, Texas, Utah, Vermont, Washington, Wisconsin and Wyoming.

In all of the States just mentioned, except Alabama, Arizona, Maine, and Texas, if one parent is dead, the surviving parent takes the entire estate to the exclusion of brothers and sisters. In Alabama, Arizona, Maine, and Texas the surviving parent takes one-half and the brothers and sisters, or their descendants, take the residue.

In all of them, if both parents are dead, the brothers and sisters and their descendants take the entire estate.

(b) In the following States the father, if living, takes the entire estate; if the father is dead, then to the mother and brothers and sisters, or their descendants equally; and if both parents are dead, then to the brothers and sisters, or their descendants: Florida, New York, Oregon, Rhode Island, South Dakota, Tennessee, Virginia, and West Virginia.

(c) In the following States the father, if living, takes the entire estate; if the father is dead, then to the mother, and if both parents are dead, then to the brothers and sisters of their descendants: Arkansas, District of Columbia and North Dakota.

(d) In the following States the parents, if living, and the brothers and sisters, or their descendants, take the entire estate, sharing equally: Georgia, Illinois, Mississippi, Missouri, New Jersey and South Carolina.

(e) In Delaware, Ohio and Maryland (where the property did not descend to intestate from either parent), the brothers and sisters, or their descendants, take the entire estate in preference to the parents, who only inherit if there are no brothers or sisters or lawful issue of any deceased brothers or sisters.

DISTRIBUTION OF FEMALE'S ESTATE.

In the following States, if the deceased was a married woman, the rights of her surviving husband in her personal estate differ from the rights of a widow in the estate of her deceased husband as shown in the above synopsis.

(a) In Delaware, District of Columbia, North Carolina, Rhode Island, and Virginia the husband takes the entire personal estate, whether there is any issue of the marriage or not.

(b) In New York, the husband takes the same distributing share as a widow would take.

(c) In Florida, Georgia, and Pennsylvania, if there are no children or descendants, the husband takes the entire estate; if there are children, the husband takes the same share as each child.

(d) In Ohio the husband takes the entire estate if there are no children or descendants; if there are children or descendants, they take the entire estate.

(e) In Alabama the husband takes one-half of the estate, the children, or descendants, taking the residue.

(f) In North Carolina, where surviving husband is not also the father of all the children of decedent, if there be one child the husband takes one-half and the child one-half; if there be more than one child, husband takes child's share.

## MARRIAGES AND DIVORCES IN UNITED STATES.

| Calendar Year. | Marriages. | | Divorces. | | | | | |

## MARRIAGE AND DIVORCE LAWS.

(Figures in parentheses after each State show number of years residence required before divorce action can be begun.)

**Marriage Licenses**—Required in all the States and Territories. California and New Mexico require both parties to appear and be examined under oath, or submit affidavit.

**Marriage, Prohibition of**—Marriages between whites and persons of Negro descent are prohibited and punishable in Ala., Ariz., Ark., Cal., Col., Del., Fla., Ga., Idaho, Ind., Ky., La., Md., Miss., Mo., Mont., Neb., Nev., N. C., N. Dak., Okla., Ore., S. C., S. Dak., Tenn., Tex., Utah, Va., and W. Va. The causes for absolute divorce given in the table are in addition to adultery, which is a primary cause in every State except South Carolina. Marriages between whites and Indians are void in Ariz., N. C., Ore., and S. C.; and between whites and Chinese in Ariz., Cal., Idaho, Miss., Ore., and Utah. Both parties must submit in Oregon to physical examination on applying for license. N. J. and N. H. bar communicable diseases in either party.

Note—Marriage between first cousins is forbidden in all of the States except Ala., Cal., Col., Conn., Del., Dist. of Col., Ga., Hawaii, Ky., Me., Mass., N. Mex., N. Y., N. C., R. I., S. C., Tex., Va., and Wash.; between step-relatives except in Alaska, Ariz., Ark., Del., Hawaii, Ill., Ind., Iowa, La., Md., Minn., Neb., Nev., N. Mex., N. Y., Ohio, Ore., Tenn., Utah, Wis. and Panama.

### SUMMARY OF DIVORCE LAWS OF THE STATES.

(*Causes* means causes for absolute divorce.)

**Alabama**—(1-3). *Causes:* Abandonment 2 years, crime against nature, habitual drunkenness, violence, pregnancy of wife by other than husband at marriage, physical incapacity, imprisonment for 2 years for felony, confinement in insane asylum for 20 years, provided insanity is incurable, if husband becomes addicted to cocaine, morphine or similar drugs. New ground for divorce: To the wife, when the wife without support from the husband for 2 years preceding the filing of the bill has lived separate and apart from the bed and board of the husband for 5 years next preceding the filing of the bill and she has actually resided in this State during all of said period.

**Alaska**—(2). *Causes:* Felony, physical incapacity, desertion 2 years, cruelty, habitual drunkenness.

**Arizona**–(1). *Causes:* Felony, physical incapacity, desertion 1 year, excesses, cruelty, neglect to provide 1 year, pregnancy of wife by other than husband at marriage, conviction of felony prior to marriage unknown to other party, habitual drunkenness.

**Arkansas**–(1). *Causes:* Desertion 1 year, felony, habitual drunkenness 1 year, cruelty, former marriage existing, physical incapacity.

**California**—(1). *Causes:* Cruelty, desertion 1 year, neglect 1 year, habitual drunkenness 1 year, felony.

**Colorado**—(1). *Causes:* Desertion 1 year, physical incapacity, cruelty, failure to provide 1 year, habitual drunkenness or drug fiend 1 year, felony, former marriage existing.

**Connecticut**—(3). *Causes:* Fraudulent contract, wilful desertion 3 years, with total neglect of duty, habitual drunkenness, cruelty, imprisonment for life, infamous crime involving violation of conjugal duty and punishable by imprisonment in State prison, 7 years' absence without being heard from.

**Delaware**—(1). *Causes:* Desertion 2 years, habitual drunkenness for 2 years, cruelty, bigamy, felony followed by a continuous imprisonment for at least 2 years—and at the discretion of the Court, fraud, want of age, neglect to provide 3 years. "When at the time the cause of action arose, either party was a bona fide resident of the State, and has continued so to be down to the time of the commencement of the action; except that no action for absolute divorce shall be commenced for any cause other than adultery, or bigamy, unless one of the parties has been for the 2 years next preceding the commencement of the action, a bona fide resident of this State."

**District of Columbia**—(3). *Causes:* Marriages may be annulled for former existing marriage, lunacy, fraud, coercion, physical incapacity and want of age at time of marriage.

**Florida**—(2). *Causes:* Cruelty, violent temper, habitual drunkenness, physical incapacity, desertion 1 year, former marriage existing, relationship within prohibited degrees.

**Georgia**—(1). *Causes:* Mental and physical incapacity, desertion 3 years, felony, cruelty, force, duress, or fraud in obtaining marriage, pregnancy of wife by other than husband at marriage, relationship witnin prohibited degrees.

**Hawaii**—(2). *Causes:* Desertion 1 year, felony, leper, cruelty, habitual drunkenness.

**Idaho**—(6 months). *Causes:* Cruelty, desertion 1 year, neglect 1 year, habitual drunkenness 1 year, felony, insanity.

**Illinois**—(1). *Causes:* Desertion 2 years, habitual drunkenness 2 years, former existing marriage, cruelty, felony, physical incapacity, attempt on life of other party; divorced party cannot marry for 1 year.

**Indiana**—(2). *Causes:* Abandonment 2 years, cruelty, habitual drunkenness, failure to provide 2 years, felony, physical incapacity.

**Iowa**—(1). *Causes:* Desertion 2 years, felony, habitual drunkenness, cruelty, pregnancy of wife by other than husband at marriage, unless husband has illegitimate child or children living of which wife did not know at time of marriage. The marriage may be annulled for the following causes existing at the time of the marriage: Insanity, physical incapacity, former existing marriage.

**Kansas**—(1). *Causes:* Abandonment 1 year, cruelty, fraud, habitual drunkenness, gross neglect of duty, felony, physical incapacity, pregnancy of wife by other than husband at marriage, former existing marriage.

**Kentucky**—(1). *Causes:* Separation 5 years, desertion 1 year, felony, physical incapacity, loathsome disease, habitual drunkenness 1 year, cruelty, force, fraud or duress in obtaining marriage, joining religious sect believing marriage unlawful, pregnancy of wife by other than husband at marriage or subsequent unchaste behavior, ungovernable temper.

**Louisiana**—(1). *Causes:* Felony, habitual drunkenness, excesses, cruelty, public defamation of other party, abandonment, attempt on life of other party, fugitive from justice.

**Maine**—(1). *Causes:* Cruelty, desertion 3 years, physical incapacity, habits of intoxication by liquors, opium, or other drugs, neglect to provide, insanity under certain limitations.

**Maryland**–(2). *Causes:* Abandonment 3 years, unchastity of wife before marriage, physical incapacity, any cause which renders the marriage null and void *ab initio*. Exceedingly vicious conduct.

**Massachusetts**—(3-5). *Causes:* Cruelty, desertion 3 years, habits of intoxication by liquors, opium or other drugs, neglect to provide, physical incapacity, imprisonment for felony, uniting for 3 years with religious sect believing marriage unlawful.

**Michigan**–(1). *Causes:* Felony, desertion 2 years, habitual drunkenness, physical incapacity, and in the discretion of the Court for cruelty or neglect to provide.

**Minnesota**–(1). *Causes:* Desertion 1 year, habitual drunkenness 1 year, cruelty, physical incapacity, imprisonment for felony.

**Mississippi**—(1). *Causes:* Felony, desertion 2 years, consanguinity, physical incapacity, habitual drunkenness by liquor, opium or other drugs, cruelty, insanity at time of marriage, former existing marriage, pregnancy of wife by other than husband at marriage.

**Missouri**—(1). *Causes:* Felony, absence 1 year, habitual drunkenness 1 year, cruelty, indignities, vagrancy, former existing marriage, physical incapacity, conviction of felony prior to marriage unknown to other party, wife pregnant by other than husband at marriage.

**Montana**—(1). *Causes:* Cruelty, desertion, neglect 1 year, habitual drunkenness 1 year, felony. Innocent party may not remarry within 2 years and guilty party within 3 years of the divorce.

**Nebraska**—(1†) *Causes:* Abandonment 2 years, habitual drunkenness, physical incapacity, felony, failure to support 2 years, cruelty, imprisonment for more than 3 years.

**Nevada**—(6 months). *Causes:* Desertion 1 year, felony, habitual drunkenness, physical incapacity, cruelty, neglect to provide 1 year.

**New Hampshire**—(1; 3 in case of desertion). *Causes:* Cruelty, felony, physical incapacity, absence 3 years habitual drunkenness 3 years, failure to provide 3 years, treatment endangering health or reason, union with sect regarding marriage unlawful, wife separate without the State 10 years, not claiming marital rights, husband, absent from United States 3 years intending to

become citizen of another country without making any provision for wife's support.

**New Jersey**—(2). *Causes:* Desertion 2 years, cruelty. No divorce may be obtained on grounds arising in another State unless they constituted ground for divorce in the State where they arose. The marriage may be annulled for the following causes existing at the time of the marriage: Want of legal age, former existing marriage, consanguinity, physical incapacity, idiocy. In other cases, an action may be begun if the overt act was committed here.

**New Mexico**—(1). *Causes:* Abandonment, cruelty, neglect to provide, habitual drunkenness, felony, physical incapacity, pregnancy of wife by other than husband at marriage.

**New York**—(‡). *Causes:* Adultery; abandonment or absence for 5 successive years. The marriage may be annulled for such causes as rendered the relationship void at its inception.

**North Carolina**—(2). *Causes:* Pregnancy of wife by other than husband at marriage, physical incapacity, husband and wife living apart for ten years and having no issue.

**North Dakota**—(1). *Causes:* Cruelty, desertion 1 year, neglect 1 year, habitual drunkenness 1 year, felony. The marriage may be annulled for the following causes existing at the time of the marriage: Former existing marriage, insanity, physical incapacity, force or fraud inducing the marriage, or want of age.

**Ohio**—(1). *Causes:* That either party had a husband or wife living at the time of the marriage from which the divorce is sought, wilful absence of either party from the other for 3 years, adultery, impotency, extreme cruelty, fraudulent contract, any gross neglect of duty, habitual drunkenness for 3 years, the imprisonment of either party in a penitentiary under sentence thereto. The petition for divorce under this clause must be filed during the imprisonment of the adverse party. The procurement of a divorce without this State, by a husband or wife, by virtue of which the party who procured it is released from the obligations of the marriage, while they remain binding upon the other party.

**Oklahoma**—(1). *Causes:* Abandonment 1 year, cruelty, fraud, habitual drunkenness, felony, gross neglect of duty, physical incapacity, former existing marriage, pregnancy of wife by other than husband at marriage.

**Oregon**—(1). *Causes:* Felony, habitual drunkenness 1 year, physical incapacity, desertion 1 year, cruelty or personal indignities rendering life burdensome.

**Pennsylvania**—(1). *Causes:* Former existing marriage, desertion 2 years, personal abuse or conduct rendering life burdensome, felony, fraud, relationship within prohibited degrees, physical incapacity.

**Porto Rico**—(1). *Causes:* Felony, habitual drunkenness, abandonment 1 year.

**Rhode Island**—(2). *Causes:* Cruelty, desertion 5 years, habitual drunkenness, excessive use of morphine, opium or chloral, neglect to provide 1 year, gross misbehavior, living separate 10 years, physical incapacity, cruel treatment of husband by wife, making it unsafe for him to live with her. Either party civilly dead for crime or prolonged absence. The marriage may be annulled for causes rendering the relationship originally void or voidable.

**South Carolina**—No divorces granted.

**South Dakota**—(1). *Causes:* Cruelty, desertion 1 year, neglect 1 year, habitual drunkenness 1 year, felony. The marriage may be annulled for the following causes existing at the time of the marriage: Want of age, former existing marriage, insanity, physical incapacity, force or fraud inducing marriage.

**Tennessee**—(2). *Causes:* Former existing marriage, desertion 2 years, felony, physical incapacity, attempt on life of other party, refusal of wife to live with husband in the State and absenting herself 2 years, pregnancy of wife by other than husband at marriage; at the discretion of the Court for cruelty, indignities, abandonment or neglect to provide, habitual drunkenness.

**Texas**—(1). *Causes:* Abandonment 3 years, physical incapacity, cruelty, excess or outrages rendering life together insupportable, felony.

**Utah**—(1). *Causes:* Desertion 1 year, physical incapacity, habitual drunkenness, felony, cruelty, permanent insanity.

**Vermont**—(2). *Causes:* Imprisonment 3 years, intolerable severity, desertion 3 years, neglect to provide, absence 7 years without being heard from.

**Virginia**—(1†). *Causes:* Insanity at marriage, felony, desertion 3 years, fugitive from justice 2 years, pregnancy of wife by other than husband at marriage, wife a prostitute, or either party convicted of felony before marriage unknown to other, physical incapacity.

**Washington**—(1). *Causes:* Abandonment 1 year, fraud, habitual drunkenness, refusal to provide, felony, physical incapacity, incurable insanity, cruelty or indignities rendering life burdensome, or 5 years' separation.

**West Virginia**—(1). *Causes:* Desertion 3 years, felony, physical incapacity, pregnancy of wife by other than husband at marriage, husband a licentious character or wife a prostitute unknown to other party, either party convicted of felony before marriage unknown to other. The marriage may be annulled for the following causes existing at the time of the marriage: Former existing marriage, consanguinity, insanity, physical incapacity, miscegenation, want of age.

**Wisconsin**—(2). *Causes:* Felony (imprisonment 3 years), desertion 1 year, cruelty, physical incapacity, habitual drunkenness 1 year, separation 5 years. In the discretion of the Court for cruelty or neglect to provide. The marriage may be annulled for the following causes existing at the time of the marriage: Want of age or understanding, consanguinity, force or fraud inducing marriage.

**Wyoming**—(1). *Causes:* Felony, desertion 1 year, habitual drunkenness, cruelty, neglect to provide 1 year, husband a vagrant, physical incapacity, indignities rendering condition intolerable, pregnancy of wife by other than husband at marriage, either party convicted of felony before marriage unknown to other. The marriage may be annulled for the following causes existing at the time of the marriage: Want of age, force or fraud.

† Two years for causes arising out of State. ‡ Actual residence.

## AGES AT WHICH MARRIAGE IS VALID.

Males (age without parents' consent), 21 years in every State except Idaho, Ill., Mich., Minn., Nev., N. H., N. C., S. C., Tenn., and W. Va., where it is 18 years.

Males (age with parents' consent), 14 years in Ky., La., N. H., and Va.; 16 years in Iowa, Tex., and Utah; 17 years in Ala., Ark., Ga., and Kan.; 18 years in Ariz., Cal., Hawaii, Idaho, Ill., Ind., Mich., Minn., Mont., Neb., Nev., N. Mex., N. C., N. Dak., Ohio, Okla., Ore., Porto Rico, S. C., S. Dak., Tenn., Wis., Wyo. There is no definite age provision in Conn., Del., District of Columbia, Fla., Me., Mass., N. Y., R. I., S. C., Tex., and Vt.; 21 years elsewhere.

Females (age with parents' consent), 16 years in Md., N. H.; 21 years in Fla., Ky., La., Pa., Porto Rico, R. I., Va., W. Va., and Wyo.; 18 years in the other States.

Females (age with parents' consent), 12 years in Ky., La., Md., Miss., Va.; 13 years in N. H.; 14 years in Ala., Ariz., Ark., Ga., Iowa, N. C., R. I., S. C., Tex., Utah; 15 years in Cal., Hawaii, Kan., Minn., Mo., N. Mex., N. C., N. Dak., Okla., S. Dak., and Wis.; 16 years in Ill., Ind., Mich., Mo., Mont., Neb., Nev., Ohio, Ore., Porto Rico, W. Va., and Wis.; 18 years in Alaska, Col., Idaho, N. J., N. Y., Tenn., and Vt.

The lowest age at which a single female can make a valid contract, except marriage, is 18 years in Ark., Cal., Col., Hawaii, Idaho, Ill., Iowa, Kan., Minn., Mont., Neb., Ohio, Okla., Ore., S. Dak., Vt., and Wash.; 21 years in the other States.

Most of the States require consent of parents to marriages of males under 21 or of females under 18; exceptions are for males under 18 in Idaho, Ill., Minn., Nev., N. H., S. C.; under 20 in Hawaii; under 16 in Conn. and Tenn.; for women under 21 in Fla., Ky., La., Pa., Va., W. Va., and Wyo.; under 16 in Conn., Ill., Md., Nev., N. H., R. I., Tenn., and W. Va.; under 15 in Minn.

The lowest age at which a married female can make a valid contract, except marriage, is 14 years in Ariz., Iowa, Tex.; 16 years in Neb., Ore., Porto Rico; 18 years in Ala., Alaska, Ark., Cal., Hawaii, Idaho, Ill., Ind., Kan., Minn., Mont., Ohio, Okla., S. Dak., Utah, Vt., Wash.; 21 years in the other States.

## CRIMES AND PENALTIES.

WHILE the penalties for homicide are not precisely uniform throughout the various States of the Union, except for the continuance or the abolishment of capital punishment, they are similar. With regard to other serious crimes, likewise, differences are more seeming than real. Felonies, such as manslaughter, arson, burglary, robbery and larceny, are in some States subdivided into degrees, first, second, third and even fourth; while in others there is a single general classification. Where there is no subdivision into degrees, however, the modifying of penalties by reason of attending circumstances results in the same effect as though there were degrees.

### CRIMES AGAINST THE UNITED STATES.

**Treason**—Whoever, owing allegiance to the United States, levies war against them, or adheres to their enemies, giving them aid and comfort, is guilty of treason. The penalty upon conviction is imprisonment for not less than 5 years, fine of not less than $10,000, or death. Misprision of treason consists in general of having knowledge of, concealing and not disclosing the treason of others. The penalty is imprisonment for not more than 7 years, and fine of not more than $1,000; or both fine and imprisonment. Rebellion or insurrection is the inciting, setting on foot, assisting or engaging in armed resistance to the execution of the laws by two or more. The penalty on conviction is imprisonment for not more than 10 years, fine of not more than $10,000, or both. Offenses against the mails fall into two general classes; one, the misuse of the mails for immoral or fraudulent purposes; the other, robbing the mails; penalties vary with the nature of the particular offense.

### CRIMES AGAINST THE STATES, PROVIDED FOR IN THE VARIOUS STATE PENAL CODES

**Bank Hold-Up**—Kan., 10 to 50 yrs.; No. Dak., 30 yrs. or less.

**Murder in the First Degree** may be generally defined to be the unlawful, intentional and premeditated killing of a human being, or such a killing resulting from the commission or attempt to commit one of the graver crimes, such as arson, burglary, rape or robbery.

**Murder in the Second Degree** is such a killing without premeditation, or resulting from the attempt to commit some lesser crime.

The penalty for murder in the first degree by the Federal Statutes is death by hanging. Hanging is also the penalty in Arizona, Connecticut, Delaware, Florida, Georgia, Missouri, New Mexico, Hawaii and the District of Columbia. Death by hanging or life imprisonment in Alabama, California, Colorado, Idaho, Iowa, Louisiana, Maryland, Mississippi, Montana, New Hampshire, Oregon, West Virginia and Wyoming, Alaska and Porto Rico. In Illinois, hanging or imprisonment not less than 14 years to life. In Texas, hanging, or any term of imprisonment not less than 5 years. Death by electricity in Arkansas, Massachusetts, Nebraska, New Jersey, New York, North Carolina, Pennsylvania and Vermont. Death by electricity or life imprisonment in Indiana, Kentucky, Ohio, Oklahoma and South Carolina. Life imprisonment in Kansas, Maine, Michigan, Minnesota, South Dakota and Wisconsin. In the State of Utah, the penalty may be death or life imprisonment; if death, the convicted person may choose between hanging or shooting. In Tennessee, the jury may fix the term of imprisonment. In the State of Washington, the jury may, by special verdict, find for the death penalty. In New Jersey and Oregon penalty is death, unless jury recommends life imprisonment; in Nevada, lethal gas.

Murder in the second degree is punished in the Federal Constitution by imprisonment for not less than 10 years to life. The same penalty, not less than 10 years up to life is imposed in the States of Arizona, Idaho, Iowa, Nebraska, Nevada, Rhode Island, Utah. Not less than 10 (the statutes not mentioning life imprisonment) is the penalty in Alabama, California, Kansas, Missouri, Montana, Washington and Porto Rico. Life imprisonment is the penalty in Connecticut, Delaware, Florida, Georgia, Indiana, Michigan, Minnesota, Ohio, Oregon, Vermont. The statutes of Illinois, Kentucky, Louisiana, Mississippi, Oklahoma, South Carolina and Texas have no second degree murder classification. In Arkansas the penalty is from 5 to 21 years; Maryland, 5 to 18; Michigan and New Hampshire, any term of years to life; no minimum term mentioned. New Jersey, not over 30; New Mexico, 3 or more; New York, not less than 20 up to life; North Carolina, 2 to 30; North Dakota, 10 to 30; Pennsylvania, not over 20; Tennessee, 10 to 20; Virginia and West Virginia, 5 to 18; Wisconsin, 14 to 25; Wyoming, not less than 20 up to life; Alaska, not less than 15; Hawaii, 20 up to life; District of Columbia, not less than 20 up to life.

In Colorado the death sentence is not imposed where the conviction is had on circumstantial evidence, nor on one under 18 years of age. In Delaware the jury may recommend commutation of the death sentence to imprisonment for life. In Delaware killing by husband of man found in adultery with wife is a misdemeanor, not a felony.

**Manslaughter** may be defined as a killing either unintentionally resulting from the careless or unlawful doing of some otherwise lawful act or from the commission of some unlawful act of comparatively trivial character or intentionally in the heat of passion and without premeditation.

Penalties for manslaughter vary, scarcely any two States fixing precisely the same. Many of the States do not subdivide into first and second. Where there is but the single heading the penalties are as follows: California (not over 10), Connecticut (not over 10 years and fine of $1,000), Delaware (1-10 and $500 to $5,000), Florida (not over 20 or $5,000), Idaho (not over 10), Illinois (any term up to life fixed by the Division of Pardons and Paroles), Indiana (2-21), Iowa (not over 8 and $1,000), Louisiana (not over 20 and $2,000), Maine (not over 20 and $1,000, or both), Maryland (not over 10 or $500), Massachusetts (not over 20), Michigan (15 or not over $1,000), Mississippi (not over 20 and $500), Montana (not over 10), Nebraska (1-10), Nevada (not over 10), New Jersey (not over 10), New Mexico (1-10), North Carolina (4 months to 20 years), Ohio (1-20), Oregon (1-15 and $5,000), Rhode Island (not over 20), South Carolina (2-30), Texas (2-5) Vermont (not less than 1 up to life or $1,000), Virginia (1-15), Washington (not over 20 and fine), Wyoming (1-20), Alaska (1-15), District of Columbia (not over 15, or $1,000, or both). Where two degrees are specified the penalty for manslaughter in the first is: Alabama (1-10), Arizona (not over 10), Arkansas (2-7), Colorado (1-8), Georgia (1-20), Kansas (5-21), Kentucky (2-21), Minnesota (5-20), Missouri (not less than 5), New Hampshire (not over 30), New York (not over 20), North Dakota (5-15), Oklahoma (not less than 4), Pennsylvania (not over 12 and $1,000), South Dakota (not less than 4), Tennessee (2-10), Utah (1-10), West Virginia (1-5), Wisconsin (5-10), Hawaii (10-20), Porto Rico (not over 10). And for second degree: In Alabama (not over 1 and $500), Georgia (1-3), Kansas (3-5), Kentucky (1-6), Minnesota (1-15), Missouri (3-5), New Hampshire (not over 10 or $1,000, or both), New York (not over 15 or $1,000, or both), North Dakota (1-15), Oklahoma (2-4), Pennsylvania (not over 2 and $1,000), South Dakota (2-4), Tennessee (1-15), Utah (not over 1), West Virginia (court fixes penalty), Wisconsin (4-7), Hawaii (5-10), Porto Rico (not over 10).

**Assault with Intent to Kill**—Under Federal Statutes, assault with intent to kill or to commit a rape is punishable by imprisonment for not more than 20 years, while assault with intent to commit a felony other than murder or rape is punishable by not more than 5 years' imprisonment and a fine of not over $3,000. In Iowa, assault with intent to kill is punishable by 10 years' imprisonment; not over 10 in Kansas, Massachusetts, Missouri, New York and Oklahoma; from 1 to 10 North Dakota, Oregon, Virginia; not less than 10 in Porto Rico; 1 to 14, California, Colorado, Idaho, Illinois, Nevada, Wyoming; 1-20, Maine, Rhode Island and Utah; Alabama (2-20), Arizona (5 up to life), Arkansas (1-21), Connecticut (10-30), Delaware (not over 3), Florida (not over 20), Georgia and Maryland (2-10), Indiana (2-14 and $2,000), Kentucky (1-5), Louisiana (not over 2 and $1,000), Michigan (any term to life or $8,000), Minnesota (5-10 and not over $100), Mississippi (not over 5 or $1,000), Montana (5-10), Nebraska and Texas (2-15), New Hampshire (not over 20), New Jersey (not over 7 or $200, or both), New Mexico (1 to 25 years or $1,000), North Carolina (fine or imprisonment, or both), Ohio and Alaska (1-15), Pennsylvania (not over 7 and $1,000), South Dakota (not over 5), Tennessee (3-21), Vermont (not over 10 and $1,000), Washington (not less than 5), West Virginia (2-10), Wisconsin (1-5 or $1,000), Hawaii (not over 5 and a fine), District of Columbia (not over 15). In Texas, an assault with a dagger incurs a double penalty. In Iowa, assault with intent to commit a rape (not more than 20).

**Rape**—In Federal Courts, rape is punishable with death by hanging. While many States have death as the extreme penalty, in few is it the same one. Arkansas and North Carolina (death by electricity), Alabama, Delaware, Kentucky, and Louisiana (hanging), Florida and Mississippi (hanging or life imprisonment), Georgia (hanging or 1-20), Missouri (hanging or not less than 5), Oklahoma electrical execution or not less than 15), South Carolina (elec-

trical execution or 5-40), Tennessee (electrical execution or not less than 10 to life), Texas (hanging or not less than 5 to life), Virginia (electrical execution or 5-20), West Virginia (hanging or 7-20), District of Columbia (hanging or 5-30). Many of the States do not inflict the death penalty. Arizona (5 to life), California (not over 50), Colorado (3 to life), Connecticut (not over 20), Idaho (not less than 5 to life), Illinois (1-life), Indiana (2-21), Iowa (any term to life), Kansas (5-21), Maine (any term of years), Maryland (hanging or 18 months-21 years), Massachusetts and Michigan (any term to life), Minnesota (7-30), Montana (not less than 5), Nebraska (3-20), Nevada (not less than 20 up to life), New Hampshire (not over 30), New Jersey (not over 15, or $5,000, or both), New Mexico (5-20), New York (10-20), North Dakota (not less than 1), Ohio and Oregon (3-20) Pennsylvania (not over 15 and $1,000), Rhode Island (not less than 10 up to life), South Dakota (not less than 10), Utah and Washington and Porto Rico (not less than 5), Vermont (not over 20 or $2,000, or both), Wisconsin (1-30), Wyoming (not less than 1 up to life), Alaska (3-20), Hawaii (up to life and $1,000). The rape of a daughter, sister or female under 12 is punishable in Alaska by life imprisonment. In Indiana rape of female under 12 life imprisonment. In Nevada rape accompanied with extreme violence may be punished by death or imprisonment not less than 20 years in jury's discretion.

**Arson**—where classified in degrees—though the number and exact definitions of degrees vary greatly—is in general classified with reference to two conditions, first, the character of the building burned, whether a dwelling house or structure likely to contain a human being; and, second, whether the crime is committed by day or night. Thus the most serious offense is the burning of an inhabited dwelling by night, and the least serious, the burning of an uninhabited structure by day. Often intermediate degrees are recognized, such as burning a dwelling by day or an uninhabited building by night. The Federal Statutes for arson in the first degree impose a penalty of not more than 20 years, and for the second degree, not more than 20 years and a fine of not more than $5,000. Some States punish arson in the first degree with death. These are: Alabama (hanging or not less than 10), Delaware (hanging), Louisiana (hanging or 1 to 10), Maryland (hanging or not over 20), Mississippi (hanging or life imprisonment), North Carolina, South Carolina and Virginia (death by electricity), Vermont (any term to 30 years or death by electricity), Hawaii (hanging or life imprisonment). The imprisonment which may be imposed for arson in the first degree takes a wide range—New York (not over 40), Iowa (30), New Hampshire (not over 30), Oklahoma (10-30), Florida and Michigan (any term up to life), Georgia (1 to life), Idaho (2 to life), Illinois (1-20), Indiana (2-21), Kansas (10-21), Kentucky (5-12), Maine (1-20), Minnesota and North Dakota (not less than 10), Nebraska (1-20), New Jersey (not over 15 or $2,000, or both), New Mexico (2-20), Ohio (not over 20), Oregon, West Virginia and Alaska (10-20), Texas (5-20), Utah (2-15), Wisconsin (3-14), Wyoming (1-21), South Dakota and Porto Rico (not less than 10), Arizona and California (not less than 2), Arkansas (2-10), Colorado and District of Columbia (1-10), Connecticut (not over 10), Missouri, Montana and Washington (not less than 5). The penalties for arson in the second degree are as varied as those for the first. In the Federal Courts, not more than 20 and $5,000. California (1-25), Colorado (not over 2 and $1,000), Delaware (1-10 and $500 to $5,000), Iowa (10-20), Kansas (7-10), Louisiana (1-20), Maine (any term of years), Maryland (2-20), Minnesota (7-15), New Hampshire (not over 20), New Mexico (1-15), New York (not over 25), North Dakota (7-10) Oregon (5-15), Pennsylvania (not over 10 and $2,000), South Dakota (7-10), Tennessee (2-21), Vermont (not over 10 or $1,000) Virginia (5-18), Washington (not over 10 or $5,000), Alaska (5-15), Hawaii (life or any number of years), Alabama and Oklahoma (2-10), Arizona, Idaho, Montana, Utah and Porto Rico (1-10), Arkansas (6 months and fine), Massachusetts and Mississippi (not over 10), Missouri (not less than 5), Nevada (1-3 and fine), South Carolina (in discretion of the court) Wisconsin (3-10).

**Burglary**—The classification of burglary or housebreaking depends on substantially the same elements as those of arson; namely, the building entered, whether a dwelling or other building, and whether the offense was committed by day or night. Burglary in the first degree is punished in North Carolina by death by electricity; Virginia (electricity or 5-18), Delaware (hanging or not over 14), Florida and Iowa (any term up to life), Maine (any term of years), Massachusetts (life imprisonment or not less than 10), Ohio (life or 5-30), Rhode Island and South Carolina (not less than 5 up to life), Alabama, Georgia and Illinois (1-20), Arkansas, California, Idaho, Montana, Alaska and Porto Rico (1-15), Connecticut, Michigan and Hawaii (not over 20), Indiana (10-20), Kansas (10-20), Mississippi (7-15), Nevada and Wyoming (1-14), New Hampshire (not over 30), New Mexico (3-12), Oklahoma (7-20), Oregon, Tennessee and Wisconsin (5-15), Pennsylvania (not over 10 and $10,000), Texas (2-12), Utah (25-40), Vermont (not over 15 or $1,000), District of Columbia (not over 15), West Virginia (2-15), Minnesota, New York, North Dakota, South Dakota (not less than 10), Missouri and Washington (not less than 5), Arkansas (3-7), Colorado and Nebraska (1-10), Kentucky (2-10), Maryland (3-10). Burglary by means of dynamite or other explosives is punished in Colorado by imprisonment from 25 to 40 years; in Wisconsin (15-40), and in Wyoming (not over 20). Quite a number of States have no heading of second degree burglary. These are Alabama, Arkansas, Colorado, Kentucky, Louisiana, Maryland, Michigan, Nebraska, New Jersey, Rhode Island, South Carolina, West Virginia, and Wyoming, also the District of Columbia. The penalties where it is specified do not show as much variance as in the first degree. Connecticut, Florida, Iowa, Massachusetts (not over 20), Delaware, Georgia and Utah (1-20), Minnesota, Mississippi, New York, North Carolina and Hawaii (not over 10), Maine (1-10), Arizona, California, Idaho, Montana, Nevada and New Hampshire (not over 5), Texas (not less than 5), North Dakota and New Mexico (1-5), Oregon, South Dakota, Tennessee and Virginia (3-10), Indiana (2-14), Kansas (5-10), Missouri (not less than 2), Ohio (1-15), Oklahoma (2-7), Pennsylvania (not over 10 and $500), Vermont (not over 10 or $1,000), Washington (not over 15), Wisconsin (3-8), Alaska (2-5), Porto Rico (not over 2).

**Robbery** may be generally defined as the theft of property from the person or immediate presence of the victim, accomplished by force or fear. Where degrees of robbery are recognized, the distinction is generally determined by whether the thief be armed or unarmed, though some States also distinguish the second from the first degree, where the theft is accomplished by means of threats of future rather than immediate injury. In the following synopsis, degrees are not considered. Federal Statutes fix the penalty for robbery at not more than 15 years. Alabama punishes robbery by death (hanging or not less than 10), Virginia (electrical execution or 5-18), Massachusetts, Michigan and Hawaii (any number of years to life), Maine (any term of years), Idaho, Rhode Island and Texas (5 to life), Oregon and Utah (3 to life), Illinois (1 to life), Oklahoma (not less than 10), New York and South Dakota (10-20), Kansas (10-21), Arizona, Nevada and Washington (not less than 5), North Carolina (5-60), Minnesota (5-20), Tennessee (5-15), Indiana (5-14 and $1,000), West Virginia (5-10), Arkansas (3-21), Nebraska, New Mexico and Wisconsin (3-15), Colorado (3-14), Maryland (3-10), Kentucky and South Carolina (2-10), Georgia and Iowa (2-20), Montana and Porto Rico (1-20), Ohio and Alaska (1-15), Wyoming (1-14), North Dakota (1-10), California (not less than 1), New Hampshire (not over 30), Vermont (not over 20 and $1,000), Florida (not over 20), New Jersey (not over 15 or $1,000, or both), Louisiana (not over 14), Delaware (not over 12), Connecticut (not over 7), Pennsylvania (not over 5 and $1,000), District of Columbia (6 months to 15 years). In Nevada train robbery and in Texas robbery by means of deadly weapons may be punished with death. Train robberies in Territories are punishable by imprisonment not more than 20 years and a fine of not more than $5,000.

**Grand Larceny** is simply theft of property above a fixed value, generally $25 to $50—more States also classify as grand larceny theft of property from the person of the victim, irrespective of value, though, of course, accomplished without the force or fear which constitutes the crime of robbery. In the Federal Courts, grand larceny is punishable by not more than 10 years' imprisonment and a fine of not more than $10,000. Wisconsin (1-25), Alabama and Georgia, (1-20), Maryland (1-15), Idaho, Indiana, Montana and Nevada (1-14), New Mexico, Oregon, Utah, Virginia, Alaska, Porto Rico and District of Columbia (1-10), Tennessee, Texas and West Virginia (2-10), Nebraska and Ohio (1-7), Arkansas, Kentucky, Maine and North Dakota (1-5), Hawaii (not over 20), Washington (not over 15), Louisiana, New York, North Carolina and Wyoming (not over 10), Kansas and Missouri (not over 7), New Jersey (not over 7 or $2,000, or both), Connecticut, Iowa, Massachusetts, Mississippi, New Hampshire, Oklahoma and South Dakota (not over 5), Florida and Rhode Island (not over 5 or $1,000), Michigan (not over 5 or $5,000), Pennsylvania (3 and $500), Delaware (not over 3), South Carolina (3 months to 10 years). Special penalties are imposed in certain States for horse and cattle stealing. In Calif., Mont.

and N. Mex., taking horses, cattle, etc., is grand larceny, irrespective of value; in Arkansas for stealing horse or mule (1-15); in Missouri and New Hampshire, larceny of horse or cattle (not over 7); in Texas horse theft (5-10); in Georgia there are various grades of larceny of horses, cattle, etc. In Connecticut the punishment for larceny of over $2,000 (not over 20). In North Carolina habitual offenders receive longer terms.

**Forgery** in general means the false making, imitating or counterfeiting or alteration of a genuine signature or written instrument. There are numerous Federal Statutes defining and imposing penalties for alteration of public records and documents. These do not come within the purview of this synopsis, being no one general classification. Counterfeiting is punished by imprisonment of not more than 15 years and a fine of not more than $5,000. There is some uniformity but not a great deal in the various State penalties for forgery. North Dakota (not less than 10), North Carolina (4 months to 10 years), Oklahoma (7-20), Kentucky (5-15), Tennessee (3-15), Arkansas (2-21), Oregon and Alaska (2-20), Mississippi and New Mexico (2-15), Indiana (2-14 or $1,000), Alabama, Georgia and West Virginia (2-10), Texas (2-7), Nebraska, Ohio and Utah (1-20), Montana (1-15), Nevada and Wyoming (1-14), Maryland, Virginia, Porto Rico and District of Columbia (1-10), Wisconsin (1-7), South Carolina (1-7), Kansas (not over 21), Minnesota, New York and Washington (not over 20), Michigan (not over 14), Florida, Iowa, Maine, Massachusetts, Missouri, South Dakota (not over 10), Pennsylvania and Vermont (not over $1,000), Rhode Island (not over 10, or $1,000, or both), Hawaii (not over 10 and $500), New Hampshire (not over 7), New Jersey (not over 7 or $2,000, or both), Connecticut (not over 5). In Iowa changing plate numbers on autos is classified as forgery.

**Bigamy**—A person who, having a husband or wife living, marries another, is guilty of bigamy. Under Federal Statutes, polygamy (or bigamy) in the Territories is punished by imprisonment for not more than 5 years and a fine of not more than $500. Five years' imprisonment is the most general maximum penalty in the States for bigamy and fines are quite commonly imposed. Some of the States, however, have a more severe extreme penalty and some a lesser maximum. Kentucky (3-9), Virginia (3-8), Tennessee (2-21), Arkansas (3-7), New Mexico and District of Columbia (2-7), Alabama and Texas (2-5), Indiana (2-5 or $1,000), Georgia (1-10), Nebraska, Ohio and Alaska (1-7), North Dakota, West Virginia and Wyoming (1-5), Illinois, Nevada and Rhode Island (1-5 and $1,000), Louisiana (1-5 and $500), Wisconsin (1-5 and fine), Oregon (1-4), Mississippi (not over 10), California (not over 10 and $5,000), Arizona (not over 10 and $2,000), New Jersey (not over 10 or $1,000, or both), Delaware (not over 6 and $2,000), Connecticut, Iowa, Kansas, Massachusetts, Missouri, New York, Oklahoma, South Dakota and Washington (not over 5), Idaho (not over 5 and $2,000), Minnesota and Vermont (not over 5 and $1,000), Florida, Maine, Michigan and Utah (not over 5 or $500), Porto Rico (not over 3 or $2,000), Montana (not over 3 and $1,000), New Hampshire (not over 3 and $500), Pennsylvania (not over 2 and $1,000), Hawaii (not over 2 or $500).

**Perjury** under the various State codes usually means false testimony on a material point given in an action or proceeding at law. The following are the penalties imposed in accordance with this usual definition. In the Federal Courts (not more than 5 and not more than $2,000), Iowa (10 up to life), Oklahoma (5-20), Georgia (4-10), Ohio and Oregon (3-10), Indiana (2-21 or $50 and $1,000), Minnesota, Texas and District of Columbia (2-10), Wisconsin (2-5), South Dakota (1-20), Arkansas and Tennessee (1-15), Arizona, California, Colorado, Idaho, Illinois, Montana, Nebraska, Nevada and Wyoming (1-14), North Dakota, Utah, Alaska and Porto Rico (1-10), New Mexico (1-7), Kentucky (1-5), West Virginia (1 year and $1,000), North Carolina (4 months to 10 years), Florida, New Hampshire, Massachusetts, Rhode Island and Hawaii (not over 20), Michigan and Washington (not over 15), Vermont (not over 15 and $1,000), Maine, Maryland, Mississippi and New York (not over 10), Delaware (not over 10 and $2,000), Kansas, Missouri and South Carolina (not over 7), New Jersey (not over 7 or $2,000, or both), Pennsylvania (not over 7 and $500), Connecticut and Louisiana (not over 5), Virginia (not over 1 and $1,000). In many of the States severer penalties than those given above are imposed, varying with the character of the action or the results of the false testimony. Thus in Colorado and Texas perjury which causes conviction in a capital case is punished by death. In capital cases, irrespective of results, the penalty is: In Alaska (2-20), Oregon (5-20), Kansas (not less than 7), Maine, Mississippi and Missouri (not less than 10), Massachusetts and Michigan (any term up to life), Wisconsin (3-15). In cases of felony not necessarily capital: Alabama (3-20), New York (not more than 20), North Dakota (not less than 10), Virginia (2-10), West Virginia (1-10).

Where crimes are divided into several degrees it is generally within the province of the jury, in convicting, to fix the degree of the crime, and in almost every case in which a crime is punishable by death or imprisonment it is the province of the jury to determine the punishment, except upon a plea of guilty, when the duty devolves upon the court.

NOTE—Figures in parentheses in the laws on crimes with their penalties are years. Money figures are maximum.

## LITIGATION OF CUSTOMS CLAIMS.

(By the Board of United States General Appraisers.)

A statutory judicial remedy is given by the Customs Practice Act of June 10, 1890, and supplements thereto, for the return of money illegally exacted by the administrative customs officials before a special statutory Court of Customs Claims called the Board of United States General Appraisers. If the valuation by the local appraiser of imported merchandise upon which an ad valorem duty is assessed is disputed by the importer he may appeal for a revaluation (or reappraisement as it is called) within ten days after the local appraiser has made the assessment. If the importer is dissatisfied with the classification by the Collector of Customs at the port of entry, he may file a protest in writing within thirty days with such Collector, who thereupon must forward the papers to the board, and the case is regularly docketed.

### NO LIMITATION ON AMOUNT.

There is no limitation upon the amount involved in such litigation. It covers and includes merchandise imported by Parcel Post and claims arising from the assessment and classification of baggage not exempt from duty. The trial of the case is usually had at the port of entry or some nearby place. Regular dockets for the trial of such cases are held at New York, Philadelphia, Boston, Baltimore, Chicago, Cincinnati, St. Louis, St. Paul, Seattle, Portland, San Francisco and Los Angeles. In addition special dockets are held in other customs districts at the convenience and on request of the importers' attorneys. There are no court costs and the procedure is simple and expeditious, yet includes all the safeguards and protections of an ordinary court trial. Numerous claims against the Government, arising from the administration of the customs laws are thus litigated and involve in the aggregate large sums of money. Reappraisement cases are heard by a single member of the board, with an appeal by either the Government or the importer from his judgment to a board of three. Classification cases, including contests over the legality of an appraisement, the legality of any administrative regulation promulgated by the Secretary of the Treasury, or the legality of other administrative action resulting in the levy of an excessive rate or amount of duty by the Collector of Customs are decided by the Classification Board.

### METHOD OF APPEAL.

An appeal lies from this board's judgment to the Court of Customs Appeals at Washington, from whence certiorari lies to the Supreme Court of the United States in treaty cases, constitutional cases and other cases which the Attorney General certifies as of sufficient importance.

## U. S. NATURALIZATION LAWS.

By an act of Congress approved Sept. 22, 1922, it is provided that after that date the citizenship status of a married woman shall no longer follow that of the husband, and that thereafter a married woman shall have the privilege of becoming naturalized on her own account.

The two principal classes of married women specifically referred to in the above legislation, with the means each class must take in order to acquire American citizenship, are described below:

1. *An alien woman marrying an American citizen after the passage of the above act, or any woman whose husband is naturalized after said act.*

She may become naturalized by filing the usual petition for naturalization and complying with all requirements of the naturalization laws, with the following exceptions:

(a) No declaration of intention required.

(b) Only one year's continuous residence in the United States, Hawaii, Alaska, or Porto Rico immediately preceding the filing of her petition required.

2. *A woman who before the passage of the above act was an American citizen and lost her United States citizenship by marriage to an alien.*

She may become naturalized by filing the usual petition for naturalization and complying with all requirements of the naturalization laws, with the following exceptions:

(a) No declaration of intention required.

(b) Only one year's continuous residence in the United States, Hawaii, Alaska, or Porto Rico immediately preceding the filing of her petition required.

(c) No certificate of arrival required if during the continuance of the marital status she shall have resided within the United States.

An alien woman married to an alien at the time of the passage of the above act, or who thereafter marries an alien may become naturalized by complying with all requirements of the naturalization laws, including declaration, five years' continuous United States residence, one year continuous State residence, certificate of arrival if her entry dates from June 29, 1906, etc.

The status of *single* alien women is not affected by this law, and women of this class may continue as in the past to file declarations and petitions for the purpose of becoming naturalized.

The act referred to further provides that no married woman whose husband is not eligible to citizenship shall be naturalized during the continuance of the marital status, and that she herself must be eligible to citizenship. Eligibility for citizenship is determined almost entirely by the question of whether the persons concerned are "white persons" or "persons of African nativity or African descent," as provided by the Revised Statutes, and whether the husband is disbarred from citizenship because of withdrawal of declaration of intention under the act of July 9, 1918, for the purpose of securing immunity from military service during the recent war.

The following courts alone have the power to naturalize aliens: United States District Courts in the States and Territories; also all courts of record in any State or Territory having a seal, a clerk, and jurisdiction in actions at law or equity, or law and equity, in which the amount in controversy is unlimited.

The power to naturalize is limited to persons residing within the geographical limits of the respective courts.

Any alien, white, or of African nativity or descent, is required, if he desires to become naturalized, to file a declaration of intention in the clerk's office of a court having jurisdiction, and such declaration may not be filed until the alien has reached the age of eighteen. This declaration must contain information as to the name, age, occupation, time and place of arrival in the United States, and must further show that it is the declarant's *bona fide* intention to become a citizen of the United States and to renounce forever all allegiance and fidelity to any foreign prince, potentate, state or sovereignty

Not less than two years after an alien has filed his declaration of intention, and after not less than five years' continuous residence in the United States, he may file a petition for citizenship in any one of the courts which has jurisdiction over the place in which he resides, provided he has lived at least one year continuously, immediately prior to the filing of such petition, in the State or Territory in which such place is located. This petition must be signed by the petitioner in his own handwriting and shall give his full name, place of residence, occupation, place of birth and the date thereof, the place from which he emigrated, and the date and place of his arrival in the United States. If such arrival occurred subsequent to the passage of the act of June 29, 1906, he must secure a certificate from the Department of Labor showing the fact of such arrival and the date and place thereof, for filing with the clerk of the court to be attached to his petition. If he is married he must state the name of his wife and, if possible, the country of her nativity and her place of residence at the time of the filing of his petition, and, if he has children, the name, date and place of birth and present place of residence of each living child. The petition must set forth that he is not a disbeliever in or opposed to organized government, or a member of or affiliated with any organization or body of persons teaching disbelief in or opposition to organized government; that he is not a polygamist or a believer in the practice of polygamy, and that he absolutely and forever renounces all allegiance and fidelity to any foreign country of which he may, at the time of filing such petition, be a citizen or subject. This petition must be verified at the time it is filed by the affidavit of two credible witnesses, who are citizens of the United States and who shall state that they have known the petitioner during his entire residence (not exceeding five years) in the State in which the petition is filed, which must be not less than one year, and that they have known him to be a resident of the United States continuously during the five years immediately preceding the filing of the petition; that during such time he acted as a man of good moral character, attached to the principles of the Constitution of the United States and well disposed to the good order and happiness of the same. If a portion of the five years has been passed by the petitioner in some other State than that in which he resides at the time of filing his petition the affidavit of the witnesses may verify so much of the petitioner's residence as has been passed in the State (not less than one year), and the portion of said five years' residence out of the State may be shown by depositions at the time of hearing on the petition.

No petition may be heard until the expiration of at least ninety days after it is filed nor within thirty days preceding a general election.

The act of May 9, 1918, in reference to naturalization of honorably discharged soldiers and sailors who served during the recent war, has been superseded by the act of July 19, 1919, as follows: "Any person of foreign birth, who served in the military or naval forces of the United States during the present war, after final examination and acceptance by the said military or naval authorities, and shall have been honorably discharged after such acceptanec and service, shall have the benefits of the seventh subdivision of Section 4, of the act of June 29, 1906, 34 Statutes at Large, Part 1, Page 596, as amended, and shall not be required to pay any fee therefor; and this provision shall continue for the period of one year after all of the American troops are returned to the United States."

Alien seamen who have sailed three years on United States merchant or fishing vessels are protected as American citizens after declaring intention of becoming such. (This means that aliens who have sailed three years or more on American vessels may claim protection as American citizens by simply asking for it and, at the same time, declaring their intention of becoming citizens.) Aliens honorably discharged on account of disability in performance of duty while in military or naval service during the war or at its termination, may be relieved of the necessity of proving continuous five years' residence. Citizens having lost citizenship by entering the service of the Allies may resume citizenship by taking the oath of allegiance.

### STATUS OF NATURALIZED AMERICANS ABROAD.

Section 2 of the Citizenship Act of March 2, 1907, contains the following provision: "When any naturalized citizen shall have resided for two years in the foreign state from which he came, or for five years in any other foreign state, it shall be presumed that he has ceased to be an American citizen, and the place of his general abode shall be deemed his place of residence during said years: provided, that such presumption may be overcome on the presentation of satisfactory evidence to a diplomatic or consular office of the United States, under such rules and regulations as the Department of State may prescribe: and provided also, that no American citizen shall be allowed to expatriate himself when this country is at war."

## UNITED STATES IMMIGRATION LAW OF FEB. 5, 1917.

The *tax* on immigrant aliens entering, including seamen, is $8. Children under sixteen years, when with a parent, are exempted, also aliens in transit to another country.

*Excluded Classes*—All idiots, imbeciles, feeble-minded persons, epileptics, insane persons; persons who have had one or more attacks of insanity at any time previously; persons of constitutional psychopathic inferiority; persons with chronic alcoholism; paupers; professional beggars; vagrants. persons afflicted with tuberculosis in any form or with a loathsome or dangerous contagious disease; persons not comprehended within any of the foregoing excluded classes who are found to be and are certified by the examining surgeon as being mentally or physically defective, such physical defect being of a nature which may affect the ability of such alien to earn a living; persons who have been convicted of or admit having committed a felony or other crime or misdemeanor involving moral turpitude; polygamists, or persons who practise polygamy or believe in or advocate the practise of polygamy;

Anarchists, or persons who believe in or advocate the overturow by force or violence of the Government of the United States or of all forms of law, or who disbelieve in or are opposed to organized government, or who advocate the assassination of public officials, or who advocate or teach the unlawful destruction of property; persons who are members of or affiliated with any organization entertaining and teaching disbelief in or opposition to organized government, or who advocate or teach the duty, necessity, or propriety of the unlawful assaulting or killing of any officer or officers, either of specific individuals or of officers generally, of the Government of the United States or of any other organized government because of his or their official character, or who advocate or teach the unlawful destruction of property; prostitutes, or persons coming into the United States for the purpose of prostitution or for any other immoral purpose; persons who directly or indirectly procure or attempt to procure or import prostitutes or persons for the purpose of prostitution or for any other immoral purpose; persons who are supported by or receive in whole or in part the proceeds of prostitution.

Persons, hereinafter called contract laborers, who have been induced, assisted, encouraged, or solicited to migrate to this country by offers or promises of employment, whether such offers or promises are true or false, or in consequence of agreements, oral, written, or printed, express or implied, to perform labor in this country of any kind, skilled or unskilled; persons who have come in consequence of advertisements for laborers printed, published, or distributed in a foreign country; persons likley to become a public charge, persons who have been deported under any of the provisions of this act, and who may again seek admission within one year from the date of such deportation, unless prior to their re-embarkation at a foreign port or their attempt to be admitted from foreign contiguous territory the Secretary of Labor shall have consented to their reapplying for admission;

Persons whose ticket or passage is paid for with the money of another, or who are assisted by others to come, unless it is affirmatively and satisfactorily shown that such persons do not belong to one of the foregoing excluded classes; persons whose ticket or passage is paid for by any corporation, association, society, municipality, or foreign Government, either directly or indirectly; stowaways, except that any such stowaway, if otherwise admissible, may be admitted in the discretion of the Secretary of Labor; all children under sixteen years of age unaccompanied by or not coming to one or both of their parents, except that any such children may, in the discretion of the Secretary of Labor, be admitted if in his opinion they are not likely to become a public charge and are otherwise eligible;

Unless otherwise provided for by existing treaties, persons who are natives of islands not possessed by the United States adjacent to the continent of Asia, situate south of the twentieth parallel latitude north, west of the one hundred and sixtieth meridian of longitude east from Greenwich, and north of the tenth parallel of latitude south, or who are natives of any country, province, or dependency situate on the continent of Asia west of the one hundred and tenth meridian of longitude east from Greenwich and east of the fiftieth meridian of longitude east from Greenwich and south of the fiftieth parallel of latitude north, except that portion of said territory situate between the fiftieth and the sixty-fourth meridians of longitude east from Greenwich and the twenty-fourth and thirty-eighth parallels of latitude north, and no alien now in any way excluded from or prevented from entering the United States shall be admitted to the United States.

*The provision next foregoing, however, shall not apply to persons of the following status or occupations:* Government officers, ministers or religious teachers, missionaries, lawyers, physicians, chemists civil engineers, teachers, students, authors, artists, merchants, and travellers for curiosity or pleasure, nor to their legal wives or their children under sixteen years of age who shall accompany them or who subsequently may apply for admission to the United States, but such persons or their legal wives or foreign-born children who fail to maintain in the United States a status or occupation placing them within the excepted classes shall be deemed to be in the United States contrary to law, and shall be subject to deportation as provided in section nineteen of this act.

All aliens over sixteen years of age, physically capable of reading, who cannot read the English language or some other language or dialect, including Hebrew or Yiddish: *Provided*, That any admissible alien, or any alien heretofore or hereafter legally admitted, or any citizen of the United States, may bring in or send for his father or grandfather over fifty-five years of age, his wife, his mother, his grandmother, or his unmarried or widowed daughter, if otherwise admissible, whether such relative can read or not; and such relative shall be permitted to enter.

*The following classes of persons shall be exempt from the operation of the illiteracy test, to wit:* All aliens who shall prove to the satisfaction of the proper immigration officer or to the Secretary of Labor that they are seeking admission to the United States to avoid religious persecution in the country of their last permanent residence, whether such persecution be evidenced by overt acts or by laws or governmental regulations that discriminate against the alien or the race to which he belongs because of his religious faith; all aliens who have been lawfully admitted to the United States and who have resided therein continuously for five years and who return to the United States within six months from the date of their departure therefrom; all aliens in transit through the United States; all aliens who have been lawfully admitted to the United States and who later shall go in transit from one part of the United States to another through foreign contiguous territory:

*Provided*, That nothing in this act shall exclude, if otherwise admissible, persons convicted or who admit the commission, or who teach or advocate the commission of an offense purely political:

*Provided further*, That the provisions of this act relating to the payments for tickets or passage by any corporation, association, society, municipality, or foreign Government shall not apply to the tickets or passage of aliens in immediate and continuous transit through the United States to foreign contiguous territory:

*Provided further*, That skilled labor, if otherwise admissible, may be imported if labor of like kind unemployed cannot be found in this country, and the question of the necessity of importing such skilled labor in any particular instance may be determined by the Secretary of Labor upon the application of any person interested, such application to be made before such importation, and such determination by the Secretary of Labor to be reached after a full hearing and an investigation into the facts of the case:

*Provided further*, That the provisions of this law applicable to contract labor shall not be held to exclude professional actors, artists, lecturers, singers, nurses, ministers of any religious denomination, professors for colleges or seminaries, persons belonging to any recognized learned profession, or persons employed as domestic servants:

*Provided further*, That whenever the President shall be satisfied that passports issued by any foreign Government to its citizens or subjects to go to any country other than the United States, or to any insular possession of the United States or to the Canal Zone, are being used for the purpose of enabling the holder to come to the continental territory of the United States to the detriment of labor conditions therein, the President shall refuse to permit such citizens or subjects of the country issuing such passports to enter the continental territory of the United States from such other country or from such insular possession or from the Canal Zone;

*Provided further*, That aliens returning after a temporary absence to an unrelinquished United States domicile of seven consecutive years may be

admitted in the discretion of the Secretary of Labor and under such conditions as he may prescribe:

*Provided further*, That nothing in the contract-labor or reading-test provisions of this act shall be construed to prevent, hinder, or restrict any alien exhibitor, or holder of concession or privilege for any fair or exposition authorized by act of Congress, from bringing into the United States, under contract, such otherwise admissible alien mechanics, artisans, agents, or other employees natives of his country as may be necessary for installing or conducting his exhibit or for preparing for installing or conducting any business authorized or permitted under any concession or privilege which may have been or may be granted by any such fair or exposition in connection therewith, under such rules and regulations as the Commissioner General of Immigration, with the approval of the Secretary of Labor, may prescribe both as to the admission and return of such persons:

*Provided further*, That the Commissioner General of Immigration with the approval of the Secretary of Labor shall issue rules and prescribe conditions, including exaction of such bonds as may be necessary to control and regulate the admission and return of otherwise inadmissible aliens applying for temporary admission:

*Provided further*, That nothing in this act shall be construed to apply to accredited officials of foreign Governments, nor to their suites, families, or guests.

## VIOLATIONS AND PENALTIES.

Violations of the immoral-women clause are punishable, on conviction, by imprisonment up to ten years and a fine up to $5,000. Violations of the contract-labor clause are punishable, on conviction, by $1,000 fine in each case and (or) imprisonment up to two years. Violations of the Anarchist clause carry prison up to five years and fine up to $5,000. Other violations carry various penalties. It is unlawful for any person or concern engaged in bringing immigrants to give fare rebates or to solicit immigration; penalty, $400 fine in each case. The penalty for smuggling immigrants is fine up to $2,000 and prison up to five years. Immigrant ships must bring written records of each alien, with name, description, destination, etc., signed by the ship's surgeon; penalty, $10 for each unrecorded alien.

Incoming aliens at all U. S. ports are examined by U. S. Public Health Service doctors, and each immigrant must be examined by at least two inspectors, under oath. False testimony by an immigrant or in his behalf is punishable as perjury. Impeding inspection is punishable by fine up to $2,000 and prison up to one year. An alien can appeal to a board of special inquiry, and then to the Secretary of Labor, whose word is final. Excluded aliens are returned at the ship's expense.

Aliens may be deported at any time within five years of their arrival if found guilty of crime or of having been of the excluded classes at arrival. An alien otherwise admittable may be let in by giving a cash bond that he or she will not become a public charge. The amount of cash is fixed in each case by the Secretary of Labor. It is unlawful for a ship to pay off or discharge an alien seaman in a U. S. port unless he lands merely to reship. An alien seaman unlawfully entered may be deported within three years of arrival, and this applies to any other person who got in unlawfully and who was not of the excluded classes.

Whenever an alien shall have been naturalized or shall have taken up his permanent residence in this country and thereafter shall send for his wife or minor children to join him, and said wife or any of said minor children shall be found to be affected with any contagious disorder, such wife or minor children shall be held under such regulations as the Secretary of Labor shall prescribe, until it shall be determined whether the disorder will be easily curable or whether they can be permitted to land without danger to other persons; and they shall not be either admitted or deported until such facts have been ascertained; and if it shall be determined that the disorder is easily curable and the husband or father or other responsible person is willing to bear the expense of the treatment, they may be accorded treatment in hospital until cured and then be admitted, or if it shall be determined that they can be permitted to land without danger to other persons, they may, if otherwise admissible, thereupon be admitted:

*Provided*, That if the person sending for wife or minor children is naturalized, a wife to whom married or a minor child born subsequent to such husband or father's naturalization shall be admitted without detention for treatment in hospital, and with respect to a wife to whom married or a minor child born prior to such husband or father's naturalization the provisions of this section shall be observed, even though such person is unable to pay the expense of treatment, in which case the expense shall be paid from the appropriation for the enforcement of this act.

## AMENDMENT EXCLUDING ALIENS.

An act of Congress, approved June 5, 1920, amends the amendment of Oct. 16, 1918, as to Anarchists so as to exclude from admission to the United States the following classes:

(*a*) Aliens who are Anarchists; (*b*) aliens who advise, advocate, or teach, or who are members of or affiliated with any organization, association, society, or group that advises, advocates, or teaches, opposition to all organized government; (*c*) aliens who believe in, advise, advocate, or teach, or who are members of or affiliated with any organization, association, society, or group, that believes in, advises, advocates, or teaches: (1) the overthrow by force or violence of the Government of the United States or of all forms of law, or (2) the duty, necessity or propriety of the unlawful assaulting or killing of any officer or officers (either of specific individuals or of officers generally) of the Government of the United States or of any other organized government because of his or their official character, or (3) the unlawful damage, injury or destruction of property, or (4) sabotage:

(*d*) Aliens who write, publish, or cause to be written or published, or who knowingly circulate, distribute, print, or display, or knowingly cause to be circulated, distributed, printed, published, or displayed, or who knowingly have in their possession for the purpose of circulation, distribution, publication, or display, any written or printed matter advising, advocating, or teaching opposition to all organized government, or advising, advocating or teaching: (1) the overthrow by force or violence of the Government of the United States or of all forms of law, or (2) the duty, necessity or propriety of the unlawful assaulting or killing of any officer or officers (either of specific individuals or of officers generally) of the Government of the United States or of any other organized government, or the unlawful damage, injury or destruction of property, or (4) sabotage:

(*e*) Aliens who are members of or affiliated with any organization, association, society, or group that writes, circulates, distributes, prints, publishes, or displays, or causes to be written, circulated, distributed, printed, published, or displayed, or that has in its possession for the purpose of circulation, distribution, publication, issue, or display, any written or printed matter of the character described in subdivision (*d*).

For the purpose of this section: (1) the giving, loaning, or promising of money or any thing of value to be used for the advising, advocacy, or teaching of any doctrine above enumerated shall constitute the advising, advocacy, or teaching of such doctrine; and (2) the giving, loaning, or promising of money or any thing of value to any organization, association, society, or group of the character above described shall constitute affiliation therewith; but nothing in this paragraph shall be taken as an exclusive definition of advising, advocacy, teaching, or affiliation.

Any alien who shall, after he has been excluded and deported or arrested and deported in pursuance of the provisions of this act, thereafter return to or enter the United States or attempt to return to or to enter the United States shall be deemed guilty of a felony, and upon conviction thereof shall be punished by imprisonment for not more than five years; and deported.

## ALIENS ADMITTED TO MARRY.

An act of Congress, approved June 5, 1920, amends the Immigration Act by adding that an alien who cannot read may, if otherwise admissible, be admitted if within five years hereafter a citizen of the United States who has served in the military or naval forces of the United States during the war with the Imperial German Government requests that such alien be admitted, and with the approval of the Secretary of Labor marries such alien at a United States immigration station. Approved June 5, 1920.

Under an act of Congress, approved May 1[illegible]

1920, the Secretary of Labor is given power to deport, after a hearing, aliens found guilty of violating any of the so-called war acts, including interned aliens.

Congress, by a joint resolution, approved Oct. 19, 1918, amended the Immigration Law so as to readmit any alien who enlisted or served here or abroad in the United States or other Allied forces if such alien applies for readmission within a year after the war's end, or returns to a United States port within two years after the war's end. In such cases the head tax is remitted, and the alien is let in.

### THE IMMIGRATION RESTRICTION LAW.

The Immigration Restriction Law of May 19, 1921, operative until June 30, 1924, defines "alien" as any person not native born or naturalized, exclusive of Indians not taxed, and citizens of the islands under U. S. jurisdiction. It limits the number of aliens admissible to three per cent. of the number of the particular nationality in each case resident in the U. S. as shown by the 1910 census. Exceptions are government employees, their families and servants, visitors for pleasure or business, others merely going through the country as a convenient route, one year residents of Canada, Newfoundland, Cuba, Mexico, or Central or South American countries, and children (under eighteen) of U. S. citizens. Not more than 20 per cent. of each nationality to be admitted in any one month. Preference to be given to relatives and fiancees of U. S. citizens, of applicants for citizenship, and of persons eligible to citizenship by service in U. S. military or naval forces between April 6, 1917 and Nov. 11, 1918, inclusive.

The penalty for bringing aliens in who are inadmissible under the Restriction Act is $200 for each alien.

## PASSPORT REGULATIONS.

1. AUTHORITY TO ISSUE—Section 4075 of the Revised Statutes of the United States, as amended by the act of Congress approved June 14, 1902, provides that "the Secretary of State may grant and issue passports, and cause passports to be granted, issued, and verified in foreign countries by such diplomatic or consular officers of the United States, and by such chief or other executive officer of the insular possessions of the United States, and under such rules as the President shall designate and prescribe for and on behalf of the United States."

2. TO WHOM PASSPORTS ARE ISSUED—Section 4076 of the Revised Statutes of the United States (U. S. Comp. Stat., 1901, 2765) provides that "no passport shall be granted or issued to or verified for any other persons than those owing allegiance, whether citizens or not, to the United States." Persons who have declared their intention to become citizens are not classed as citizens.

3. BY WHOM ISSUED AND REFUSAL TO ISSUE—No one but the Secretary of State may grant and issue passports in the United States (Rev. Stat., Secs. 4075, 4078) and he is empowered to refuse them in his discretion. Passports are not issued by American diplomatic and consular officers abroad, except in cases of emergency; and a citizen who is abroad and desires to procure a passport must apply therefor through the nearest diplomatic or consular officer to the Secretary of State. Applications for passports by persons in Hawaii, Porto Rico or the Philippines should be made to the chief executives of those islands. The evidence required of such applicants is similar to that required of applicants in the United States.

4. FEE—A fee of $10 is required to be collected for every citizen's passport issued. That amount in currency or postal money order should accompany each application made by a citizen or person owing allegiance or entitled to the protection of the United States. Orders should be made payable to the Disbursing Clerk of the Department of State. Drafts or checks will not be accepted. No fees charged to widow, child, parent, brother or sister of an American soldier, sailor or marine buried abroad, to visit country of burial.

5. APPLICATIONS: AFFIDAVIT OF APPLICANT—A person who is entitled to receive a passport, if within the United States, must submit a written application, in duplicate, in the form of an affidavit, to the Secretary of State. The application should be made by the person to whom the passport is to be issued and signed by him, as it is not proper for one person to apply for another. The affidavit must be made before a clerk of a Federal court or of a State court authorized by the act of Congress of June 29, 1906, to naturalize aliens, within the jurisdiction of which the applicant or his witness resides, and the seal of the court must be affixed; *but in any place where there is a Federal court the affidavit must be made before a clerk of such court*, unless there is in such place an agent of the Department of State, in which case the Secretary may, in his discretion, require the application to be made before such agent.

The applicant must state from what point he intends to leave the United States, the object of trip and evidence of same, and the date of his intended departure, and also, if by a port of the United States, by what ship he intends to sail.

A person applying for a passport or for a renewal of his passport or for an amendment thereto to include additional countries should state in a brief form the object or objects of his proposed trip abroad, but it is no longer necessary to submit with the application documentary evidence supporting the statements as to the objects of the visit.

If the applicant is proceeding abroad on his own behalf he should so indicate by the use of expressions similar to the following: Study, Health, Tourist, Recreation, Temporary Residence, Settling my own Estate, Care for my Property, Visit my Relatives.

If the applicant is proceeding abroad for other personal reasons or to represent some other person or organization, he should state definitely the object of the trip. The following expressions will serve as examples: Commercial Banking, Legal, (or other) business for (name of person or organization); Research, Literary, Construction, Relief (or other) work for (name of person or organization); Distribute funds (food, clothing, etc.) for (name of person or organization).

If there is more than one object of the trip each object should be clearly stated opposite the name of the country in which it is intended to accomplish the objects.

Passports will be issued to all parts of the world except countries where internal conditions or relations with the United States prevent.

(*c*) PHOTOGRAPHS—The application must be accompanied by duplicate photographs of the applicant, on thin paper, unmounted, and not larger in size than three by three inches. One must be attached to the back of application by the clerk of court or the department's agent before whom the application is made, with an impression of such officer's seal so placed as to cover part of the photograph but not the features, and the other sent loose, to be attached to the passport by the department. The loose photograph must be signed by the applicant across its face, so as not to obscure the features, and the signature thereon must correspond to the applicant's signature affixed to the application. *Photographs on cardboard or postcards will not be accepted.*

(*d*) WITNESS—The application must be supported by an affidavit of at least one credible witness, who has known the applicant at least two years, stating that the applicant is the person he represents himself to be and that the facts stated in the application are true to the best of the witness's knowledge and belief. This affidavit must be made before the clerk of court or the department's agent before whom the application is executed, and the witness must accompany the applicant when he makes his application. The witness must be an American citizen, established in a recognized profession or business and having his office or place of business within the jurisdiction of the court or the department's agent (e. g., a clergyman, lawyer, physician, banker, broker, real estate dealer, or merchant). The witness, in signing the application, should state the nature of his profession or business and his professional or business address. *No lawyer or other person will be accepted as witness to a passport application if he has received or expects to receive a fee for his services in connection therewith.* A passport issued by the Secretary of State on and after June 3, 1918, to which is attached the photograph and signature of the person to whom the passport was originally issued, will be accepted in lieu of an identifying witness.

6. NATIVE CITIZEN—An application containing the information indicated by rule 5 will be sufficient evidence in the case of a native citizen; except that a person born in the United States in a place where births are recorded will be required to submit a birth certificate with his application. If a birth certificate is not obtainable, the application must be supported by a baptismal certificate or an affidavit of the physician who attended the birth or affidavits of parents or other reputable persons having sufficient knowledge to be able to testify as to the place and date of the applicant's birth. Passports issued by the Department of State or its diplomatic or

consular representatives are intended for identification and protection in foreign countries and not to facilitate entry into the United States, immigration being under the supervision of the Department of Labor.

7. A PERSON BORN ABROAD WHOSE FATHER WAS A NATIVE CITIZEN OF THE UNITED STATES—In addition to the statements required by rule 5, his application must show that his father was born in the United States, resided therein, and was a citizen at the time of the applicant's birth. In such case evidence of the father's birth in this country, similar to that required in section 6, above, should be submitted.

8. NATURALIZED CITIZEN—In addition to the statements required by rule 5, a naturalized citizen must transmit his certificate of naturalization, or a duly certified copy of the court record thereof, with his application. It will be returned to him after inspection. He must state in his affidavit when he emigrated to this country, where he has lived since his arrival in the United States, when and before what court he was naturalized, and that he is the identical person described in the certificate of naturalization. The signature to the application should conform in orthography to the applicant's name as written in his certificate of naturalization, or an explanation of the difference should be submitted.

9 WOMAN'S APPLICATION—If she is unmarried in addition to the statements required by rule 5, she should state that she has never been married. If she is the wife of a native citizen of the United States, the fact should be made to appear in her application, which should be made according to the form prescribed for a native citizen, whether she was born in this country or abroad. If she is the wife of a naturalized citizen, in addition to the statements required by rule 5, she must transmit for inspection her husband's certificate of naturalization or a certified copy of the court record thereof, must state that she is the wife of the person described therein, and must set forth the facts of his birth, emigration, naturalization, and residence, as required in the rules governing the application of a naturalized citizen. She should sign her own Christian name with the family name of her husband. (Thus, Mary Doe; not Mrs. John Doe.) A married woman's citizenship follows that of her husband. It is essential, therefore, that a woman's marital relation be indicated in her application for a passport, and that in the case of a married woman her husband's citizenship be established.
